Heritage Signature® Auction #1261

U.S. Coin Auction

Featuring: Selections from The Liberty Collection, Part IV • The Terry Brand Estate, Part V
The G.M. Simon Collection • The Carnton Collection, Part II

November 2-4, 2017 | Dallas

Signature® Floor Sessions 1-4

(Floor, Telephone, HERITAGELive!®, Internet, Fax, and Mail)

Heritage Auctions, Dallas • 1st Floor Auction Room
3500 Maple Avenue • Dallas, TX 75219

Session 1

Thursday, November 2 • 1:00 PM CT • Lots 16001-16534

Session 2 - PREMIER SESSION

Thursday, November 2 • 6:00 PM CT • Lots 16601-17078

Session 3

Friday, November 3 • 1:00 PM CT • Lots 17079-17723

Session 4

Friday, November 3 • 6:00 PM CT • Lots 17724-18243

Signature® Internet Session 5

(HERITAGELive!®, Internet, Fax, & Mail only Session)

Session 5

Saturday, November 4 • 12:00 PM CT • Lots 19001-20914

LOT SETTLEMENT AND PICK-UP

Friday, November 3 • 10:00 AM – 1:00 PM CT

Extended Payment Terms available. Email: Credit@HA.com

Lots are sold at an approximate rate of 200 lots per hour, but it is not uncommon to sell 150 lots or 250 lots in any given hour.

Buyer's Premium Per Lot:

This auction is subject to a Buyer's Premium of 20% (minimum \$19).

TX Auctioneer Licenses: Paul Minshull 16591; Teia Baber 16624; Edward Beardsley 16632; Holly Culbreath 17513; Sarah Davies 17505; Samuel Foose 11727; Alissa Ford 17104; Kathleen Guzman 16142; Gregory Holman 17653; Jennifer Jayne Marsh 17105; Marina Medina 17512; Bob Merrill 13408; Brian Nalley 17134; Scott Peterson 13256; Michael Provenzale 17157; Michael Sadler 16129; Barry Sandoval 17649; Martin Scammel, Jr. 17659; Nathan Schar 17365; Kimberly Serrano 17657; Anthony Singleton 17507; Andrea Voss 16406; Phillip Wooten 17656.

This Auction is cataloged and presented by Heritage Auctioneers & Galleries, Inc., doing business as Heritage Auctions.

Dear Bidder,

The first week in November offers an unprecedented opportunity for bidders at Heritage's World Headquarters in Dallas. In addition to our customary Fall Dallas Signature Auction, we are pleased and privileged to offer selections from the incomparable Eric P. Newman Collection in exciting, back-to-back auction events.

The Eric P. Newman auction is scheduled for Wednesday, November 1 – currency selections in the morning and afternoon, and U.S. Coins in the evening. When the day is complete, Heritage will have offered our ninth presentation of selections from the comprehensive Eric P. Newman Collection. Many exceptional Colonial, early silver type, and Territorial gold issues highlight the day's coin lots. As always, all Eric P. Newman currency and coins are offered on behalf of The Eric P. Newman Numismatic Education Society. The lots are featured in three separate catalogs – two for currency, and one for U.S. coins.

Then, a full slate of Dallas Signature sessions follows on Thursday and Friday. Session 1 (Colonials through quarters) starts promptly at 1:00 p.m. Thursday, followed by a loaded Premier Session Thursday evening with 478 high-value lots that represent a cross section of federal coinage. On Friday afternoon, Session 3 features half dollars, dollars, and commemoratives, while the Friday evening Session 4 is devoted to gold and patterns.

We ask that you spend a moment now to read more about our Dallas Signature Auction Featured Collections:

THE LIBERTY COLLECTION, PART IV

This is a consignment of just three Colonial coins. Each is exceptional for its grade. The "star" of the consignment is an important Immune Columbia piece struck in silver with vertical edge reeding. Long absent from collectors' eyes, the coin was cataloged as part of the Loye Lauder Sale (William Doyle Galleries, 12/1983), although it was withdrawn from that auction and has remained absent from any auction appearance until now. It is a lovely near-Mint State example, a leading candidate for the finest-known among these famous Immune Columbia patterns, graded AU58 PCGS.

THE G.M. SIMON COLLECTION

Gary M. Simon is proof-positive of the persistent allure of numismatics, which can lay dormant throughout a number of years before returning with passion. Mr. Simon had an early interest in coins, starting at age 13 or so until other interests, education, and an ambitious career took precedence. Combining an MBA in Finance from Oklahoma State with positions at the USAF, Arthur Andersen Consulting, a stint as Controller at Schlumberger, and later as founder and CEO of a business software company for 25 years, Gary did not return to coins until his early 60's. Then, it was with new-found fervor, assembling an impressive collection from cents to dollars including several Choice Indian cents, Liberty and Buffalo nickels, Standing Liberty quarters, Walking Liberty halves, and select key-date Morgan dollars.

THE TERRY BRAND ESTATE, PART V

A dozen 1794 halves from the remarkable collection of Terry Brand include nine Premier Session examples in collector grades ranging from Good 4 to Fine 15. All are the Overton 101 or 101a varieties, except for an O-104 and three O-105 coins.

THE CARNTON COLLECTION, PART II

This previous consignor displays a keen sense of quality and eye appeal, first exemplified by a fine set of Mercury dimes in our 2012 Central States auction. He returns with an outstanding consignment of type coins in both circulation strike and proof formats. Three notable PCGS Registry Sets are included in the consignment: The #5 All-Time Shield Nickels Basic Set, Proof (1866-1883), the #5 All-Time Liberty Nickels Basic Set, Proof (1883-1912), and the #6 All-Time Liberty Nickels Basic Set, Circulation Strikes (1866-1883). In addition to the nickels, many excellent cents, two cent pieces, three cent nickels, and Barber dimes include both high-grade proofs and circulation strikes. A memorable number of coins (about three dozen) qualify for Premier Session, a testament to the overall quality of the collection.

We look forward to welcoming all of our friends, clients, and dealer associates to Dallas. This is our opportunity to meet and serve you, and we look forward to personally assisting you with lot viewing, buying, selling, consigning, or simply answering any questions you might have. As always, we accept bids through HA.com, e-mail, U.S. mail, and fax. Real-time options for remote bidding include telephone bidding and online bids with HERITAGE Live!®.

Good Luck with your bids!

Sincerely,

Greg Rohan
President

Todd Imhof
Executive Vice-President

MyRECOMMENDATIONS

Online Suggestion Tool

THE LAST PIECE OF THE PUZZLE? HERITAGE HAS IT.

Our new online tool, MyRecommendations looks at your collecting history and preferences, and notifies you when a potentially desired item becomes available—even items you have never bid on before.

MyRecommendations constantly combs Heritage's upcoming auctions and in-house inventory, and updates your personalized list as auctions open and close. It's a convenient new way to stay aware of the latest opportunities to expand and improve your collection.

Find that special piece with MyRecommendations visit Heritage's US Coin pages now at HA.com/Coin.

SESSION ONE

COLONIALS

1662 Oak Tree Twopence, VF35
Small 2, Noe-31, Salmon 1-A

16001 1662 Oak Tree Twopence, Small 2, VF35 PCGS. Noe-31, W-240, Salmon 1-A, High R.6. A horizontal die break runs across the top of the 2, and the second 6 in the date is weak but present. The Oak Tree twopence is the only such denomination in the Massachusetts silver coinage series and the only one with the 1662 date. Deep steel-gray tones cover moderately granular surfaces with visible central motifs. The outer legends are partly readable but slightly cut-off by an off-center strike. A very rare type. Listed on page 40 of the 2018 *Guide Book*. NGC ID# 2ARD, PCGS# 45355 Base PCGS# 17

16002 1662 Oak Tree Twopence, Large 2, Noe-32, W-240, Salmon 1-B — Environmental Damage — PCGS Genuine. VF Details. Struck from the early die state of the recut reverse die used for Noe-33 and 34. Often Noe-32 is misaligned on the obverse, yet this example is well-centered. A small area of corrosion at the central obverse and moderate overall granularity accounts for the assigned net grade, yet some pleasing iridescence remains on the medium-toned surfaces. Listed on page 40 of the 2018 *Guide Book*.

1662 Oak Tree Twopence, VF Details
Rare Noe-32 Variety

16003 1662 Oak Tree Twopence, Large 2 — Bent — NGC Details. VF. Noe-32, W-240, Salmon 1-B, R.6. Deep blue-gray patina appears on each side amid well-defined details. Several light bends in the planchet result in uneven wear, although the variety is readily attributable. The 2 in the date is mostly obscured. The strike is well-centered, showing complete border beads around each side. A collectible example of this rare Oak Tree twopence variety.

16004 1662 Oak Tree Sixpence, Noe-20, W-400, Salmon 2-B, R.6 — Damage — PCGS Genuine. Fine Detail. Numerous scrapes and cuts obscure much of the obverse detail, while the reverse is more clearly defined with tall numerals 652 in the well-centered date. Struck on an undulating planchet, this slate-gray example retains a generous measure of sharpness and glossiness despite the noted damage, most of it on the reverse. Listed on page 40 of the 2018 *Guide Book*.

1652 Pine Tree Sixpence, VF20
Noe-33, Pleasing Example

16005 1652 Pine Tree Sixpence, Pellets at Trunk, VF20 PCGS. Noe-33, W-670, Salmon 2-B, R.3. As usual for Noe 33, the obverse die is displaced to the northwest, crowding the legend partially off the flan between 10 and 1 o'clock. Similarly, the reverse lettering is slightly off the flan at the lower right because the planchet is a bit out-of-round. Deep grayish-blue patina covers the smooth surfaces and contrasts with the raised devices, which are silver-gray. Nicely defined for the grade, with only a slight wave in the planchet from the rocker press. Listed on page 41 of the 2018 *Guide Book*. NGC ID# BYVT, PCGS# 45367 Base PCGS# 22

1652 Pine Tree Sixpence, XF40
Noe-33, Salmon 2-B

16006 1652 Pine Tree Sixpence, Pellets at Trunk, XF40 PCGS. Crosby 1-A, Noe-33, Salmon 2-B, R.3. An interesting transitional piece for the die state specialist. The obverse is canted upward, which is a characteristic of the early state known as Noe 33 (Salmon 2-B). The reverse, however, shows an advanced die crack between 1 and 6 that is generally found with the later state Noe-33a (Salmon 2*-B), which is usually encountered with a realigned obverse. This is a well-struck and accurately graded piece with good coloration and little in the way of problems. Listed on page 41 of the 2018 *Guide Book*. NGC ID# BYVT, PCGS# 45367 Base PCGS# 22

1723/22 Hibernia Halfpenny, XF45
Spectacular Double Strike

16007 1723/22 Hibernia Halfpenny — Double Struck — XF45 NGC. Martin 4.60-Da.1. The second strike is about 50% off center on this spectacular double struck Hibernia halfpenny. The visual presentation is stunning. The pleasing chestnut and walnut-brown surfaces show only the slightest trivial marks. NGC ID# 2ATF, PCGS# 183

16008 1724 Hibernia Halfpenny MS62 Brown PCGS. M. 8.3-L.2, W-Unlisted, R.6. No stop after date, 11 harpstrings. Six sub-varieties of this type exist, of which the present is among the rarer. The current coin is sharply struck and satiny with hints of silvery luster atop the chestnut-brown patina. A lone spot in reverse field near the ER is a reliable pedigree marker. Listed on page 47 of the 2018 *Guide Book*. NGC ID# 2ATH, PCGS# 190

**1778-1779 Rhode Island Ship Token, Betts-563
Wreath Below, Struck in Copper, AU55**

16009 1778-1779 Rhode Island Ship Token, Wreath Below, Copper, AU55 PCGS. Betts-563, W-1740, R.4. The origin of the Rhode Island Ship token is thought to be either Dutch or English, and the ambiguity of its meaning has long eluded numismatists. Some argue it satirizes the American retreat on August 30, 1778, others argue it is a commentary on the British evacuating Rhode Island just one year later in October 1779, while others still claim both messages are accurate. The purpose of these medals as propaganda pieces, whether pro-British or pro-American, remains fertile ground for further research. This Choice AU Betts medal has deep glossy brown surfaces with a trace of wear over the highest points. Razor-sharp and free of distracting abrasions. Listed on page 52 of the 2018 *Guide Book*. NGC ID# 2AUM, PCGS# 576

16010 1787 Massachusetts Half Cent AU53 PCGS. Ryder 4-C, W-5940, R.2. A splendid example for the assigned grade, with smooth, minimally marked surfaces and just a bit of high point rub. Faint hints of mint-red remain beneath the pleasing medium bluish-brown patina. An ideal representative of the Ryder 4-C variety for the specialist and an equally excellent selection for Massachusetts half cent type. NGC ID# 2B22, PCGS# 296

**1787 Massachusetts Half Cent, MS65 Brown
Ryder 4-C, Glossy and Razor-Sharp**

16011 1787 Massachusetts Half Cent MS65 Brown NGC. Ryder 4-C, W-5940, R.2. The arrowhead touches the Indian's kilt, and 78 in the date are closely spaced. This glossy brown Massachusetts half cent features razor-sharp detail on the central motifs and legends. Each side is void of mentionable marks, and the eye appeal is undeniably impressive. Rarely seen finer. Listed on page 61 of the 2018 *Guide Book*. NGC ID# 2B22, PCGS# 296

16012 1788 Vermont Copper, Bust Right, Good 4 NGC. RR-26, Bressett 16-T, W-2190, High R.6. A rarely seen variety. This piece is well-circulated but exhibits remarkably appealing medium brown color and smooth, problem-free surfaces. The prominent die crack across the upper reverse is plain. Uneven wear weakens portions of the peripheries, although the central devices remain boldly outlined. NGC ID# 2B5D, PCGS# 563

**1788 Vermont Copper, VG10
Bust Right, RR-29**

16013 1788 Vermont Copper, Bust Right, RR-29, Bressett 22-U, W-2220, R.5, VG10 NGC. The stars are close to the portrait and a diagnostic die crack shows from the rim above the head to the rim at R in AUCTORI, identifying the RR-29 variety. The slightly glossy chocolate-brown surfaces of this VG10 specimen show light porosity in a few areas and the design is weak at the centers. The peripheral legends are bold, but the date is partly off the planchet. Listed on page 74 of the 2018 *Guide Book*. NGC ID# 2B5D, PCGS# 563

16014 1788 Vermont Copper, Bust Right — Environmental Damage — NGC Details. Fine. RR-28, Bressett 21-U, W-2215, R.6. Stars follow VERMON and precede AUCTORI. A diagnostic horizontal die break crosses the obverse from 8 to 4 o'clock. The central reverse is poorly defined due to die fatigue, although the legend and the date are readable. Deeply toned, granular surfaces exhibit a refreshing reddish hue on the reverse.

16015 1787 Fugio Cent, Club Rays, Rounded Ends, VF35 PCGS. N. 4-E, W-6685, R.3. The ray is close to the cinquefoil near 1 of the date, and O is above the second S in BUSINESS. The words WE ARE ONE are punched deeply into the die. This is a generally smooth, walnut-brown example with tan toning on the raised devices. Some small areas of patchy corrosion exists on both sides. An important representative of the Club Rays type, listed on page 90 of the 2018 *Guide Book*. NGC ID# AX5E, PCGS# 904

16016 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, XF45 NGC. N. 13-X, W-6855, R.2. A readily identifiable variety with a radial die crack on the reverse at 6 o'clock. The strike is even and bold, and high-point wear is light. This lightly circulated type coin displays original chocolate-brown surfaces and outstanding eye appeal for the grade. NGC ID# AX5E, PCGS# 883

**1787 Fugio Cent, MS63 Brown
Late Die State N. 11-X**

16017 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, N. 11-X, W-6790, R.4, MS63 Brown PCGS. A late die state with the obverse exhibiting heavy clash marks, and the usual reverse die crack from the border at 6 o'clock up through the rings. A pleasing medium-brown example, this Fugio cent exhibits faint bluish-olive toning on its smooth and attractive surfaces. NGC ID# AX5E, PCGS# 883

16018 1787 Fugio Cent, UNITED STATES, 4 Cinquefoils, XF45 PCGS. N. 8-B, W-6740, R.3. Evenly struck on a quality planchet from clashed dies. The left rim is clipped, as made. Light wear leaves strong detail on the devices, and the surfaces show original walnut-brown patina with lighter hues over the relief elements. Housed in a green label holder. NGC ID# 2B8F, PCGS# 889

16019 1787 Fugio Cent, UNITED STATES, 4 Cinquefoils, MS63 Brown PCGS. N. 8-B, W-6740, R.3. Glossy surfaces display burgundy-brown patina and a good strike. Clash marks are prominent on the reverse, and the obverse has some faint planchet irregularities from the rolling process not fully struck out of the planchet. The upper reverse rim is weakly defined. Housed in a green label holder. NGC ID# 2B8F, PCGS# 889

16020 1787 Fugio Cent, STATES UNITED, Eight-Pointed Stars, XF45 PCGS. N. 15-Y, W-6915, R.2. The eight-pointed star between STATES and UNITED is diagnostic. This Choice XF Fugio cent showcases deep olive-brown patina with accents of reddish-violet over lightly blended motifs. Nevertheless, every design feature remains strong. A wonderful type coin. NGC ID# 2B8K, PCGS# 898

1783 Chalmers Shilling, XF Sharpness Short Worm, W-1785

16021 1783 Chalmers Shilling, Short Worm — Plugged — PCGS Genuine. XF Details. Breen-1011, W-1785, High R.4. The silver coins privately issued by Annapolis, Maryland silversmith John Chalmers were produced in a building at the corner of Fleet and Cornhill streets. Apparently, the coins were well-received and circulated extensively. Many are found well-worn, but not this strongly detailed survivor. The design elements remain bold with slight high-point blending. Deep steel-gray patina blankets each side. The faint outline of a plug appears just right of the 3 in the date, but it is not overly offensive.

16022 1783 Chalmers Shilling, Long Worm VG10 PCGS. Breen-1012, W-1790, R.4. Unusually heavy wear affects the right side of both the obverse and reverse of this Long Worm shilling, an issue which is known for uneven planchet thicknesses and localized weakness. Pleasing silver-gray surfaces are sharply defined on the “thin” side of the coin. The surfaces show only a few light marks overall. Listed on page 53 of the 2018 *Guide Book*. Population: 4 in 10, 40 finer (9/17). NGC ID# 2AUT, PCGS# 595

(1785) Bar Copper, W-8520, VF Details Colonial Issue of Mysterious Origin

16023 (1785) Bar Copper, Breen-1145, W-8520 — Environmental Damage — PCGS Genuine. VF Details. A small tine off the upper-left edge of the 12th bar confirms the authenticity of this bar copper, a colonial issue of mysterious origin. Supposedly, the coins were struck by Thomas Wyon in Birmingham, England in 1785 and modeled after Revolutionary War buttons. Granular surfaces are somewhat corroded, but the remaining design details makes this a great candidate for a colonial type set. Listed on page 76 of the 2018 *Guide Book*.

PROOF COLONIAL

16024 1795 Talbot, Allum & Lee Cent, PR64 Brown PCGS. Fuld-1, W-8620, R.1. The Whitman *Colonial Encyclopedia* states “often prooflike (sometimes called Proof).” The surfaces of this coin, however, make a convincing case for this piece as a proof. The fields are deeply mirrored, and the reflectivity greatly enhances the iridescent lilac, brown, and red color seen over each side. The devices are fully struck. Listed on page 78 of the 2018 *Guide Book*. Ex: Los Angeles Signature (Heritage, 8/2009), lot 23. NGC ID# 2B65, PCGS# 90640

COLONIALS

16025 1794 Talbot, Allum & Lee/Stork Mule, LONDON Edge, MS64 Red and Brown PCGS. DH-52a. Designated here a 1793 Hampshire token by PCGS, which otherwise certifies these pieces as 1794 Talbot, Allum & Lee/Stork mules. The obverse is dated 1794, and the stork side is dated 1793. The piece displays an excellent strike and semiprooflike fields. Coppery-orange luster clings to the protected regions, while the interiors show olive, burgundy, and auburn toning. A pair of carbon spots at the stork's feet are the only distraction. PCGS# 580682 Base PCGS# 974

16026 1791 Washington Large Eagle Cent AU58 PCGS. Baker-15, W-10610, Musante GW-15, R.2. Copper, 30 mm, lettered edge. This well-struck piece shows some satiny luster in the protected portions of the fields with a blend of burgundy and chestnut-brown toning overall. No imperfections are observed. Listed on page 83 of the 2018 *Guide Book*. NGC ID# 2B6Z, PCGS# 702

16027 1791 Washington Large Eagle Cent AU58 PCGS. Baker-15, W-10610, Musante GW-15, R.2. The uniformed bust of Washington faces left, an obverse shared with the 1791 Liverpool halfpenny. This is a pleasing near-Mint example, richly toned in walnut-brown shades with glossy surfaces and deep-blue overtones. Smooth wear above the ear and at the eagle's head determines the assigned grade. Listed on page 83 of the 2018 *Guide Book*. Population: 25 in 58, 85 finer (9/17). NGC ID# 2B6Z, PCGS# 702

16028 Undated Washington Success Medal, Small Size, Plain Edge, MS62 PCGS. Baker-267A, DeWitt-GW-1792-4, W-10877, Musante GW-44, R.5. Brass, 20 mm, plain edge. A shimmering olive-brown example, undisturbed aside from an unobtrusive pincrash distant from the focal points at 5 o'clock. A retained lamination (as made) is noted beneath the second T in STATES. Unlike most pieces seen, the eye in the center on the reverse is sufficiently struck to recognize the motif. The Small Size Success Medal is scarcer than its Large Size counterpart. Listed on page 86 of the 2018 *Guide Book*.

Ex: Oak Collection of American Colonial Coinage (Heritage, 9/2005), lot 485; Long Beach Signature (Heritage, 5/2008), lot 2066; FUN Signature (Heritage, 1/2009), lot 132. NGC ID# 2VZ9, PCGS# 782

Undated Baker-267 Washington Success Medal Small Size, Reeded Edge, MS63

16029 Undated Washington Success Medal, Small Size, Reeded Edge, Baker-267, W-10875, Musante GW-44, MS63 NGC. This piece is tied for second finest certified reeded edge small size Washington Success medal, bested only by a single PCGS coin. Light golden-brown and dove-gray toning drapes the nicely struck surfaces. Thin marks on the reverse border near SUCCESS TO THE emerge beneath a loupe. Listed on page 86 of the 2018 *Guide Book*. Ex: Long Beach Signature (Heritage, 2/2010), lot 54. NGC ID# 2VZB, PCGS# 783

**Washington Funeral Urn Medal, Fine 12
White Metal, Baker-166C, Fuld 1-B, GW-70**

- 16030** (1800) Washington Funeral Urn, White Metal Fine 12 PCGS. Baker-166C, Fuld 1-B, Musante GW-70. This variety has the berry under the H in THE on the obverse. The George Washington Funeral Urn medals were produced by Jacob Perkins mere weeks after the former president's death. They were issued holed and worn around the necks of marchers in the funeral procession held on January 3, 1800 in Boston. This well-worn example struck in white metal retains largely readable legends and clear outlines with little interior detail. PCGS# 410788

HALF CENTS

**1793 Half Cent, Fine Details
C-4, B-4**

- 16031** 1793 C-4, B-4, Low R.3 — Environmental Damage — PCGS Genuine. Fine Details. Manley Die State 1.0, without the defect above the 7 and with clash marks between the hair and cap. This olive-brown first-year half cent retains visible legends and good portrait detail. The surfaces are corroded, and the planchet is cracked diagonally from about 6 o'clock to 9 o'clock on the obverse. Our EAC grade Good 5.
- 16032** 1794 Normal Head, C-3a, B-5b, R.5, VF25 PCGS. Manley Die State 2.0. Die cracks appear under the chin, and a die bulge occurs right of the 4. This rare Small Edge Letters half cent is chocolate-brown with moderate granularity in the fields. The devices maintain bold detail despite having spent a fair amount of time in circulation. A few thin scratches are noted on the obverse. Our EAC grade Fine 12. NGC ID# 2223, PCGS# 35030 Base PCGS# 35015
- 16033** 1794 Normal Head, Small Edge Letters, C-4a, B-6b, R.3 — Edge Damaged — PCGS Genuine. XF Details. The devices are bold, and the coloration is a pleasing chocolate-brown hue. Moderate granularity over each side is a familiar sight on early half cents. This piece also has a prominent reverse rim nick at 12 o'clock that denies a numeric grade from PCGS. Our EAC grade Fine 12.

- 16034** 1794 High Relief Head, C-9, B-9, R.2 — Environmental Damage — PCGS Genuine. XF Details. Manley Die State 3. The coin is well-detailed and shows little wear. The reverse is deep chocolate-brown in color with scattered pitting along the right-hand margin that denies a numeric grade; a small spot is also seen at the U in UNITED. The obverse is the same color and largely smooth. However, a peculiar area of granularity stretches along a sharp line from the tip of the cap to the rim above the TY in LIBERTY, and spills over the upper-left edge of the planchet. Possibly an odd planchet flaw, although we encourage bidders to examine the coin in person and make a determination as to what they believe caused this oddity. There is also an old mark on Liberty's temple. Our EAC grade Fine 15.

- 16035** 1804 Crosslet 4, No Stems, C-12, B-11, R.2, MS62 Brown PCGS. The glossy olive-brown surfaces of this attractive MS62 example show traces of original mint luster and only minor signs of contact, but some slight porosity is evident on the obverse. One tiny dark alloy spot is visible in the right obverse field, near the bust. The design elements are sharp and eye appeal is quite strong. Our EAC grade AU50. NGC ID# 222F, PCGS# 35173 Base PCGS# 1072

**1804 Half Cent, MS61 Brown
Plain 4, No Stems, C-13**

- 16036** 1804 Plain 4, No Stems, C-13, B-10, R.1, MS61 Brown NGC. Manley Die State 2.0, with most of the obverse dentilation lacking and with it present on the reverse only from about 2 to 9 o'clock. Uncirculated, with scattered marks commensurate with the grade assigned, but with dark intermittent toning, particularly on the obverse, possibly from storage in a high-carbon paper. Our EAC grade VF35. Census: 7 in 61 Brown, 25 finer (9/17). NGC ID# 222F, PCGS# 35176 Base PCGS# 1063
- 16037** 1804 Plain 4, No Stems, C-13, B-10, R.1, MS62 Brown PCGS. CAC. Manley Die State 2.0. Most obverse dentilation is gone, and faint clash marks are seen on that side. The availability of the C-13 variety and the popularity of the 1804 date make this a perfect half cent for type purposes. Light brown colors the obverse and upper right reverse, which is mainly steel-blue. Our EAC grade XF45. NGC ID# 222F, PCGS# 35176 Base PCGS# 1063
- 16038** 1853 C-1, B-1, R.1, MS66 Brown PCGS. The pleasing light brown surfaces of this impressive Premium Gem are impeccably preserved and retain much of their original mint luster, under the patina. The design elements are sharply detailed throughout. Our EAC grade MS60. NGC ID# 26YX, PCGS# 35327 Base PCGS# 1227
- 16039** 1854 C-1, B-1, R.1, MS65 Brown PCGS. CAC. Frosty chocolate-brown surfaces exhibit full cartwheel luster with traces of blue toning and splashes of original orange mint luster. Our EAC grade MS62. NGC ID# 26YY, PCGS# 35330 Base PCGS# 1230

16040 1857 C-1, B-1, R.2, MS65 Brown PCGS. CAC. Only 35,180 half cents were struck in 1857, the final year of the series. Much original red color appears within the star recesses, while the remaining surface area displays appealing reddish-brown patina. Well-struck with virtually indiscernible ticks and a single mark near star 2. Our EAC grade MS63. NGC ID# 26Z3, PCGS# 35339 Base PCGS# 1239

LARGE CENTS

1793 Wreath Cent, Fine Details S-9, B-12, Vine and Bars Edge

16041 1793 Wreath, Vine and Bars Edge, S-9, B-12, R.2 — Tooled — PCGS Genuine. Fine Details. This is a collectible variety of the single-year Wreath reverse, Vine and Bars edge type. Rich mahogany-brown surfaces display extensive roughness. Liberty's portrait and the date are clear. The reverse is better-defined with relatively strong wreath elements. The right obverse field appears to have been smoothed. Our EAC grade Good 5.

16042 1793 Wreath, Vine and Bars Edge, S-10, B-10, R.4 — Damage — NGC Details. Fine. This is a collectible example from the first year of official copper coinage production. Both sides show extensive damage in various forms, but the date, legends, portrait, and wreath all remain visible. A perfect example for budget-minded collectors. Our EAC grade AG3.

16043 1794 Head of 1794, S-28, B-10, R.2, VF20 PCGS. Breen Die State III. The chocolate and olive-brown surfaces of this VF20 specimen show some light porosity in selected areas and a tiny planchet void is evident in the field near Liberty's nose. Most lettering and the date remain legible, but ATEs are very weak. Our EAC grade VG10. NGC ID# 223P, PCGS# 35549 Base PCGS# 901374

16044 1794 Head of 1794, S-40, B-28, High R.5 — Corroded — ANACS. VF20 Details. The steel-brown surfaces of this popular issue show extensive porosity, making the die state difficult to determine. Two die chips in the left obverse field and the high ribbon bow on the reverse confirm the variety. The date and peripheral legends are weak, but the central devices are complete in outline. Our EAC grade Good 4. NGC ID# 223P, PCGS# 35585 Base PCGS# 901374

16045 1794 Head of 1794, S-59, B-57, R.3, VF25 PCGS. Wide LIBERTY and recutting on the left ribbon bow aid in attributing this variety, which Breen called High R.5. This moderately rough, reddish-brown cent has good portrait and wreath detail for a coin that saw considerable circulation. Dentils are clear everywhere except the upper obverse. Our EAC grade Fine 12. NGC ID# 223P, PCGS# 35639 Base PCGS# 901374

1796 Liberty Cap Cent, VF35 S-91, B-1

16046 1796 Liberty Cap, S-91, B-1, R.3, VF35 NGC. No other 1796 Liberty Cap cent shares a die with S-91. Breen wrote: "It logically belongs at either the end or the beginning of the 11 Liberty Caps, just before or just after the connected sequence of 10 die-linked varieties." Sheldon placed it at the end of the sequence, while Denis Loring places it at the beginning for "stylistic reasons." This well-centered and evenly struck example displays minimal roughness and uniform reddish-brown patina. A few small marks are noted on the portrait. Our EAC grade Fine 15. NGC ID# 223V, PCGS# 35780 Base PCGS# 1392

16047 1796 Reverse of 1795, NC-4, B-23, High R.5, VG8 ANACS. Die State indeterminate due to wear along the upper reverse rim. All legends are readable, although the fraction is faint. Boldly outlined central devices retain some details in Liberty's hair. The reddish-brown surfaces have generous field granularity but nothing uncommonly distracting. Most known examples of this variety are well-worn or exhibit environmental impairments. Our EAC grade Good 4. NGC ID# 223W, PCGS# 35840 Base PCGS# 1401

16048 1797 Reverse of 1797, No Stems, S-131, B-27, R.2, VG10 PCGS. A large die break occurs at 9:30 on the obverse. Dentilation is almost universally clear, save for a few points of softness. This well-circulated Sheldon-131 cent has deep brown surfaces with moderate roughness. Detail is predictably soft over the portrait and wreath leaves. Our EAC grade VG7. NGC ID# 2243, PCGS# 35981 Base PCGS# 1425

16049 1797 Reverse of 1797, Stems, S-134, B-4, R.4, VF25 PCGS. A noticeable die chip in the right obverse field provides immediate identification of the S-134 cent variety. This piece exhibits scattered handling marks on its subdued dark olive-brown surfaces. A small obverse rim nick is noted just past 9 o'clock, and splashes of maroon patina are evident on the reverse. Our EAC grade VG10. NGC ID# 2242, PCGS# 35933 Base PCGS# 1422

16050 1798 Second Hair Style, S-167, B-33, R.1 — Repaired — PCGS Genuine. AU Details. Breen Die State VI, terminal. Some planchet roughness in the margins and blurred dentils can be mostly attributed to die wear rather than strike or environmental impairment. This well-detailed coin nonetheless shows some faint tool marks on the obverse that prevent a numeric grade. The surfaces are uniformly burgundy-brown with olive accents. Our EAC grade VF20.

16051 1801 NC-1, B-3, R.6, Good 4 NGC. Ex: Mervis Collection. Breen Die State I, with heavy clash marks at the upper reverse. These clash marks and associated die failure, while not diagnostic, are a good indicator of this rare variety. This example has the sharpness of Good 6 with minor handling marks on each side. The obverse is light chocolate with lighter brown devices. The reverse is steel-brown with slight surface roughness. Our EAC grade Good 4. Ex: Shawn Yancey; Brian Vail; Greg Hannigan; The Adam Mervis Large Cent Collection (Heritage, 1/2014), lot 2740. PCGS# 36257 Base PCGS# 1458

**1801 Draped Bust Cent, VG Details
Very Rare NC-4, B-14 Variety**

16052 1801 NC-4, B-14, R.7 — Environmental Damage — NGC Details. VG. An impressive steel and olive-brown representative of this very rare Sheldon variety, with a surviving population of less than a dozen examples in all grades and conditions. The NC-4 combines the reverse of S-222 with an obverse die that was only used on this issue. The surfaces are moderately corroded, but the date and legends remain legible and the central devices are complete in outline. A slight rim bruise is visible near the E in UNITED. The NC-4 was first tentatively noticed in the Anderson Dupont Collection (Stack's, 2/1954), lot 344, but the variety was not officially confirmed until Walter Breen found another example nine years later. Our EAC grade Good 4.

16053 1802 S-227, B-5, R.2, XF40 NGC. CAC. Breen Die State II, exhibiting heavy obverse clash marks and a reverse die crack through OF AMERI at the tops of those letters. An attractive example with smooth surfaces showing tan, olive, and maroon surfaces with pale blue toning on the high points. Our EAC grade VF20. NGC ID# 224E, PCGS# 36296 Base PCGS# 1470

16054 1802 S-232, B-12, R.1, AU55 NGC. The T over Y in LIBERTY is diagnostic for the obverse that appears on S-232 and S-233. The former has the point of the highest leaf below the right side of the final S, while the latter has that leaf point below the left side of the final S. A late die state, with a rim break on the second T of STATES. This pleasing example has sepia and dark brown surfaces with scattered marks on each side. Our EAC grade VF30. NGC ID# 224E, PCGS# 36305 Base PCGS# 1470

**1802 Cent, AU58
S-232, B-12, Late Die State**

16055 1802 S-232, B-12, R.1, AU58 NGC. Breen Die State VI, with large rim breaks below 18 and above ATE. Clash marks appear on both sides. The obverse die features the T cut over an underlying Y, and the double leaf tips are partly right of the final S in STATES. This near-Mint chocolate and steel-brown cent is well-centered and crisply defined. Each side is smooth with minimal ticks. Our EAC grade XF40. NGC ID# 224E, PCGS# 36305 Base PCGS# 1470

16056 1804 S-266, B-1, R.2 — Environmental Damage — PCGS Genuine. VG Details. Breen Die State II. The strike is a trifle uneven, resulting in border weakness from wear along the right obverse and left reverse rims. All legends are plainly readable. The central devices are boldly outlined, although a numeric grade is denied due to mild surface granularity on each side. Our EAC grade Good 4.

16057 1805 S-267, B-1, R.1, XF45 PCGS. The minutely granular obverse exhibits olive-brown and steel toning, while the reverse has intermingled steel-brown and tan. A glass reveals microscopic hairlines on each side, with a few trivial surface marks. Our EAC grade VF25. NGC ID# 224K, PCGS# 36427 Base PCGS# 1510

16058 1810/09 S-281, B-1, R.1, VF25 PCGS. CAC. An evenly worn example with consistently deep chocolate-brown patina. This mid-level 1810/09 large cent displays problem-free surfaces, which is a scarce characteristic of any issue in the Classic Head type. The CAC green label confirms the quality. Our EAC grade Fine 12. NGC ID# 224T, PCGS# 36469 Base PCGS# 1552

16059 1810/09 S-281, B-1, R.1, XF40 NGC. Breen Die State II. A solid walnut-brown and steel example of the overdate, with the portrait and central reverse showing just moderate wear for the assigned grade. Several of the left-hand stars lack their centers, and the upper-left border is a bit weak. Overall, the centers are smoother than the outer elements, where uniform microporosity covers both sides. Our EAC grade Fine 15. NGC ID# 224T, PCGS# 36469 Base PCGS# 1552

16060 1810 S-285, B-2, R.2, VF35 NGC. Breen Die State II. The diagnostic die crack through the outer right-hand star points extends to 10 in the date. Generally smooth surfaces show some grade-consistent small marks and a few bits of patchy build-up on the reverse. Struck minutely off-center to the northwest on the obverse (northeast on the reverse), where the dentils merge to the edge. Deep chocolate-brown color retains glossy appeal and is a notch lighter on the reverse. Our EAC grade Fine 15. NGC ID# 224S, PCGS# 36484 Base PCGS# 1549

16061 1812 Small Date, S-290, B-2, R.1 — Improperly Cleaned — NGC Details. Unc. Pickup points for Sheldon-290 include a Block 8, no die lump under the E in ONE, and the leaf tip under the right edge of (STATE)S. No trace of friction is present over steel and brown surfaces, but the coloring suggests an old cleaning. Our EAC grade XF40. NGC ID# 224W, PCGS# 36499 Base PCGS# 1561

16062 1820 Large Date, N-13, R.1, MS65 Brown NGC. This plentiful variety is often found in Mint State, discovered in quantity as part of the Randall Hoard. Steel-blue accents complement glossy chocolate-brown surfaces that are devoid of major marks. The central motifs display pinpoint-sharp detail. Die cracks through the stars and recutting on the L and Y in LIBERTY confirm the attribution. Our EAC grade MS60. NGC ID# 2256, PCGS# 36673 Base PCGS# 1615

16063 1824/2 N-1, R.1, AU50 PCGS. The underdigit 2 is clear, and the leaf points to the right side of the C in AMERICA. This is a late die state with cracks through the reverse. Light golden-brown color mixes with accents of steel-blue over glossy surfaces. Minimally circulated with moderate high-point blending on the cheek and wreath. Sought-after *Guide Book* entry. Our EAC grade VF30. NGC ID# 225E, PCGS# 36778 Base PCGS# 1639

16064 1837 Head of 1838, N-11, R.1, MS66 Brown NGC. Stars 9-11 are recut, and a pair of lengthy die cracks subdivide the reverse into disparate segments, including a diagnostic break tangent to the A in STATES that does not terminate until crossing the wreath and first A in AMERICA to reach the opposite edge. Bold die clashing confirms a late state of the dies. Glossy reddish-brown color yields to blue overtones that congregate within the devices and creep into the smooth, virtually unmarked fields. Our EAC grade MS60. PCGS# 37138 Base PCGS# 1729

1846 Small Date Cent, MS65 Red and Brown
N-9, High-End for the Issue

16065 1846 N-9, R.2, Small Date MS65 Red and Brown PCGS. Die State b, showing only a weak fragment of the die line through ICA in AMERICA. All varieties included, the 1846 Small Date cent is rare in Gem Red and Brown condition, and no full Red pieces are reported at PCGS. This coin displays a bold, even strike with vibrant luster and mostly carbon-free surfaces. Rich steel-blue and sea-green overtones complement original copper-red luster. Two microscopic ticks on Liberty's jaw deny an even finer grade. Our EAC grade MS63. Population (all varieties included): 17 in 65 Red and Brown, 2 finer (9/17). PCGS# 403878 Base PCGS# 1866

1848 Cent, MS65 Red and Brown
N-35, Early Die State

16066 1848 N-35, R.2, MS65 Red and Brown PCGS. CAC. Die State a. The strike is weak on the stars, as usual for the early die state, but the central devices are well-rendered. This lustrous Gem displays well-balanced copper-red, orange-gold, and burgundy hues with occasional accents of steel-blue. There is no obvious carbon spotting. Our EAC grade MS63. Population (all varieties included): 26 in 65 Red and Brown, 6 finer; 4 in 65 Red, 0 finer. CAC: 19 in 65, 2 finer (9/17). PCGS# 406529 Base PCGS# 1884

1850 N-7 Cent, MS65 Red
Late Die State

16067 1850 N-7, R.2, MS65 Red PCGS. Die State b, as usual, with heavily flowlined fields. Weak star definition is normal for the variety, and blurry dentils are diagnostic of this die state. The coin displays frosty copper-red luster and well-defined central devices. No major carbon spots are seen. Housed in an old green label holder. Our EAC grade MS64. Population (all varieties included): 22 in 65 (1 in 65+) Red, 1 finer (9/17). PCGS# 405882 Base PCGS# 1891

1851 Large Cent, MS65 Red
N-10

16068 1851 MS65 Red PCGS. N-10, R.1. Ex: Sturgeon Collection. This is a lovely, lustrous Gem with plenty of rich orange-red luster on both sides. The strike is well above average for the type with sharp detail in the centers and emerging definition over many of the obverse star centrils. Some flyspecks are noted, particularly over the reverse, but none are sizeable or individually distracting. Our EAC grade MS64. Ex: *Long Beach Signature* (Heritage, 9/2002), lot 5180. NGC ID# 226H, PCGS# 1894

16069 1851/81 N-3, R.1, MS65 Brown PCGS. The underdigits are plain on this lovely Gem. Light brown surfaces show considerable red coloration within the recesses and occasional steel-blue accents in the fields. Razor-sharp and eminently appealing. Our EAC grade MS62. NGC ID# 226H, PCGS# 400138 Base PCGS# 1895

1852 Cent, N-22, MS65 Red
A High-Grade Type Coin

16070 1852 N-22, N-9, R.1, MS65 Red PCGS. Die State d, with obverse and reverse cracks and heavy metal flowlines. Both sides are well-preserved and lustrous with coppery-pink coloration. The obverse is carbon-free, while the reverse has a partial print along the lower margin. Housed in a green label holder. Our EAC grade MS63. Population (all varieties included): 21 in 65 (1 in 65+) Red, 3 finer (9/17). PCGS# 147286 Base PCGS# 1900

16071 1853 N-9, R.2, MS64 Red PCGS. Die State b. N-9 shows repunching on the 1 and 5 in the date, and in this later die state has field roughness on the reverse. No full Red examples are attributed as N-9 by PCGS, although this piece and likely some others exist but are not attributed on the holder. The coin is well-struck on the stars and wreath, showing frosty auburn-red luster. A few scattered specks are normal for the type. Our EAC grade MS63. NGC ID# 226K, PCGS# 1903

**1853 N-13 Cent, MS65 Red
The Later Die State**

16072 1853 N-13, R.1, MS65 Red PCGS. Die State b, as usual for Mint State examples of N-13. The 1 in the date is recut at its base. This Gem Red type coin displays original, frosty copper-orange luster with no major carbon spots. The usual weakness is seen on select stars and to a minor extent on the hair curls around Liberty's ear. No abrasions are observed. Our EAC grade MS64. Population (all varieties included): 71 in 65 (1 in 65+) Red, 18 finer (9/17). PCGS# 403930 Base PCGS# 1903

16073 1853 N-25, R.1, MS65 Red NGC. The base of the 1 in the date is recut, and a mint-made spike from the berry left of the C in CENT confirms the variety. A lustrous pumpkin-orange Gem with a nearly unabraded obverse and a crisp strike on the portrait. The stars have generally soft centrils, but the reverse legends and wreath are bold. A bit of olive-green color surrounds selected border areas and a bit of dark porosity over the T of STATES is all that limits the grade. Our EAC grade MS62. NGC ID# 226K, PCGS# 403925 Base PCGS# 1903

**1853 N-25 Cent, MS65 Red
Lustrous Orange-Gold Gem**

16074 1853 N-25, R.1, MS65 Red PCGS. Grellman Die State b. This lustrous orange-gold Gem has a bold strike at the centers and on the lower reverse and coronet. The stars, lower obverse, and upper reverse exhibit incompleteness. Only incidental contact is present, but we note a fingerprint fragment near star 8 and a small spot near the I in AMERICA. Our EAC grade MS64. NGC ID# 226K, PCGS# 403925 Base PCGS# 1903

**1854 Braided Hair Cent, MS65 Red
N-25, Housed in an Old 'Doily' Holder**

16075 1854 MS65 Red PCGS. N-25, R.3. Delicate mint-made clash marks near the chin and throat identify this Newcomb pairing. This orange-red Gem is well-struck on the central devices and on most stars, with occasional softness of definition seen on the rims and dentils. Virtually free from contact, the grade is only determined by a few small carbon flecks on each side. Housed in a rarely seen "doily" holder. Our EAC grade MS64. Ex: *Dallas Signature (Heritage, 12/2005)*, lot 75. NGC ID# 226L, PCGS# 1906

16076 1854 N-13, R.3, MS65 Red and Brown PCGS. CAC. Grellman Die State a that he describes as "Very Rare." This piece shows three short lines up from the dentils below the 54. The obverse retains about one-third of the original orange mint color with bluish-brown toning, and the reverse has about half of its mint orange remaining, also with bluish-brown toning. Neither the Holmes nor Naftzger offerings had an early die state piece. Our EAC grade MS63. PCGS# 406098 Base PCGS# 1905

FLYING EAGLE CENTS

16077 1857 MS64 PCGS. This satiny Choice Uncirculated Flying Eagle type coin displays warm tan-gold luster with overtones of rose and mint-green. No distracting abrasions are seen, although considerable strike weakness affects the right-hand relief elements of both sides. NGC ID# 226P, PCGS# 2016

16078 1857 MS64 PCGS. CAC. Medium-brown to chocolate on the obverse with an appreciably lighter reverse. Only the slightest high-point softness is noted on each side. A quality near-Gem example of this popular type issue. NGC ID# 226P, PCGS# 2016

16079 1858/7 Large Letters, Snow-1, FS-301, MS60. ANACS. The small die lump in the field above the date and the flag of the 7 next to the second 8 are visible but faint on this late die state coin. The eagle's wingtip is separated by die lapping as always. The coin is sharp and satiny with tan-gold mint luster. Light handling marks limit the grade. NGC ID# 2277, PCGS# 37383 Base PCGS# 2022

16080 1858 Large Letters MS64 PCGS. CAC. High Leaves, Closed E in ONE. The AM in AMERICA are joined at the bases, indicating the Large Letters variety. This CAC-approved near-Gem displays satiny bronze-gold luster with reddish and peach-orange hues throughout. The eagle's tailfeathers and the corresponding upper-right portion of the wreath exhibit the only mentionable strike weakness. NGC ID# 2277, PCGS# 2019

16081 1858 Small Letters MS64 PCGS. CAC. The AM in AMERICA are separated on this near-Gem Small Letters type coin. Die cracks near the date and the eagle's wing and tail feathers indicate a late die state, although both sides nonetheless displays sharp design definition. Satiny golden-orange luster is without heavy abrasions. NGC ID# 2279, PCGS# 2020

INDIAN CENTS

16082 1859 MS64 PCGS. CAC. Eagle Eye Photo Seal, card included. Wisps of peach, rose, and olive warm the tan-gold surfaces of this well-struck and eye-appealing near-Gem. No distracting abrasions are seen. An outstanding example of the one-year Laurel Wreath type. NGC ID# 227E, PCGS# 2052

16083 1861 MS65 PCGS. The well-detailed design elements of this attractive Gem show just a touch of the usual softness on some feather tips. The well-preserved surfaces radiate original mint luster on both sides. NGC ID# 227G, PCGS# 2061

16084 1864 L On Ribbon MS64 Red and Brown NGC. Design James B. Longacre's initial "L" was added late in 1864, creating a popular and scarce variety that proves challenging in high grades. Each side displays amber and pumpkin-gold hues. The ribbon diamonds are clear. Housed in a former generation holder. NGC ID# 227M, PCGS# 2080

1865 Fancy 5 Cent, MS65 Red
Striking Orange-Gold Color

16085 1865 Fancy 5 MS65 Red PCGS. The usual Fancy 5 variant, although this Gem Red example is conditionally scarce. Vibrant copper-orange and gold luster shows no major abrasions, illuminating sharp design elements. Eye appeal is excellent. Finer examples are rarely offered. Population: 46 in 65 (1 in 65+) Red, 14 finer (9/17). NGC ID# 227N, PCGS# 2084

1865 Indian Cent, MS65 Red
Fancy 5 Variant

16086 1865 Fancy 5 MS65 Red PCGS. The 1865 Indian cent with a Fancy 5 in the date is more available than its Plain 5 counterpart, but high-grade examples are still elusive. This attractive Gem exhibits sharply detailed design elements and well-preserved original red surfaces, with vibrant mint luster throughout. Overall eye appeal is terrific. NGC ID# 227N, PCGS# 2084

16087 1866 MS65 Red and Brown PCGS. CAC. Blushes of chestnut toning deepen otherwise vibrant copper-orange luster on this Gem 1866 cent. The strike is razor-sharp, and even under a loupe no distractions are observed. The CAC endorsement is well-earned. Finer Red and Brown coins are rarely offered. Population: 86 in 65 Red and Brown, 6 finer; 26 in 66 Red, 8 finer. CAC: 24 in 65, 4 finer (9/17). NGC ID# 227P, PCGS# 2086

16088 1867 MS64 Red PCGS. CAC. Vibrant copper-orange mint luster and a bold strike give this near-Gem 1867 cent much visual appeal. No major abrasions are seen. CAC-approved coins in this grade are rare. Population: 76 in 64 (2 in 64+) Red, 32 finer. CAC: 4 in 64, 5 finer (9/17). NGC ID# 227R, PCGS# 2090

16089 1867/67 Snow-1, FS-301, MS62 Brown PCGS. This popular 'Cherry-pickers' and Snow variety features bold recutting at the tops of the 67 in the date. The present example is sharp and satiny with only light handling marks to limit the grade. A blend of olive, umber, tan-gold, and peach hues produce the generally medium brown patina. NGC ID# 227R, PCGS# 37459 Base PCGS# 92088

16090 1869 MS64 Red and Brown PCGS. CAC. A blend of golden-orange and burgundy-brown toning on this near-Gem 1869 Indian cent offer attractive eye appeal, while the strike is sharp and abrasions are minimal. A few small flecks blend into the patina and are hardly noticed. NGC ID# 227T, PCGS# 2095

16091 1869 MS65 Red PCGS. Accents of cherry-red accent the blazing orange-gold surfaces of this Gem 1869 cent. A few scattered specks are hardly distracting, and the strike is sharp. The 1869 is rare this fine and extremely rare any finer. Population: 29 in 65 Red, 7 finer (9/17). NGC ID# 227T, PCGS# 2096

16092 1869/69 Snow-4, FS-303, MS64 Red and Brown PCGS. The 69 in the date are lightly recut at the top, although the recutting is easily picked up under a loupe. This near-Gem is sharply struck and satiny with a dusting of olive-brown toning over coppery-orange mint luster. No major abrasions are seen. NGC ID# 4L8B, PCGS# 148717 Base PCGS# 2095

16093 1871 MS64 Red and Brown PCGS. CAC. The CAC endorsement is a rare sight on high-grade Red and Brown 1871 Indian cents, but this luminous, well-struck example earns the label. Well-balanced burgundy-brown and copper-orange hues favor the Red side of the Red and Brown grade, along with a lack of major carbon spotting and heavy abrasions. Eye appeal is excellent. CAC: 24 in 64, 13 finer (9/17). NGC ID# 227V, PCGS# 2101

16094 1872 MS66 Brown NGC. Bold N. An exceptional 1872 representative, this Premium Gem displays medium brown, olive, and lilac surfaces, with minor areas of original red still sneaking through the outlines of the nicely impressed elements. Indian cents from this period are elusive in high grades. NGC ID# 227W, PCGS# 2103

16095 1872 MS64 Red and Brown PCGS. Bold N in ONE. A relatively low mintage of 4 million coins makes the 1872 a semikey date among Indian Head cents. Both sides are typically defined with woodgrain toning and blended copper-gold and amber-brown coloration. NGC ID# 227W, PCGS# 2104

16096 1872 MS64 Red and Brown PCGS. CAC. Wisps of mint-green and cherry-red accent the copper-orange surfaces of this near-Gem 1872 cent. The coin is very nearly full red, as the CAC endorsement indicates. No obvious carbon spots are noted, although localized areas of strike weakness are seen on the reverse wreath and shield. CAC: 30 in 64, 26 finer (9/17). NGC ID# 227W, PCGS# 2104

16097 1873 Open 3 MS65 Red and Brown PCGS. CAC. The more available of the two date variants for the year, more than 11.6 million pieces were struck of the Open 3. The outer margins and the fields surrounding the devices still retain significant amounts of original mint red, while the interiors have mellowed to a medium brown patina. Fully struck. NGC ID# 227Y, PCGS# 2107

1873 Indian Cent, XF40
Guide Book Doubled LIBERTY

- 16098 1873 Closed 3, Doubled LIBERTY, Snow-1, FS-101, XF40 PCGS.** Strong doubling is evident on LIBERTY and the profile, identifying one of the most popular varieties of the Indian cent series. Some kind of striking anomaly affects the first four feather tips in the headdress of this interesting XF specimen, and the central reverse is softly struck, but only light wear is evident and the pleasing brown surfaces are lightly abraded. NGC ID# 227X, PCGS# 37504 Base PCGS# 2115

1874 Cent, MS65 Red
Green Label Holder

- 16099 1874 MS65 Red PCGS.** Dynamic cartwheel luster sweeps this slightly dusky apricot-gold Gem. Virtually without abrasion, and the traces of carbon are mostly localized to the left obverse field. Only a small portion of Uncirculated 1874 cents retain their initial Mint color. Housed in a green label holder. Population: 37 in 65 (1 in 65+) Red, 11 finer (9/17). NGC ID# 227Z, PCGS# 2120

- 16100 1877 VF20 PCGS.** A nice circulated example of this key Indian cent issue with even wear, smooth surfaces, and attractive chocolate-brown color. The shallow lower point of the N in ONE confirms this as a circulation strike, rather than the proof variant which is occasionally seen in worn grades. NGC ID# 2284, PCGS# 2127

- 16101 1877 VF30 NGC.** Only 852,500 cents were struck for circulation in 1877. Each side of this moderately circulated key date representative exhibits chocolate-brown patina. The impression is somewhat soft at the upper obverse border and light friction occurs throughout, but the overall impression remains good. NGC ID# 2284, PCGS# 2127

- 16102 1877 — Cleaned — PCGS Genuine. AU Details.** The shallow N in ONE confirms the circulation strike origin of this AU-level 1877 Indian cent. The design elements are well-detailed, and both sides show a balance of copper-orange and auburn-brown hues. Some olive overtones appear on the high points of the devices. PCGS notes evidence of an old, light cleaning, although to the unaided eye there is no significant distraction.

- 16103 1878 MS66 Red and Brown PCGS.** The obverse features glossy violet and steel-blue centers that turn to glints of fire-orange at the borders. The reverse has more of a woodgrain appearance with considerable red remaining. A loupe is required to bring minuscule ticks into view. Among the finest examples in this color category (9/17). NGC ID# 2285, PCGS# 2131

- 16104 1878 MS65 Red PCGS.** A colorful Gem, bright copper-orange with a touch of jade at the obverse periphery and russet-violet accents elsewhere on the surfaces. The strike is relatively sharp, with clarity on all four diamonds. A few light flecks are noted over each side, but these do not significantly detract from the overall eye appeal. Housed in an old green-label holder. Population: 56 in 65 Red, 16 finer (9/17).

Ex: FUN Signature (Heritage, 1/2006), lot 790; FUN Signature (Heritage, 1/2007), lot 525; Long Beach Signature (Heritage, 9/2007), lot 193. NGC ID# 2285, PCGS# 2132

- 16105 1884 MS65 Red PCGS.** The slightly lower mintage of 23.2 million pieces in 1884 was most likely due to the difficulty the Mint had in procuring planchets. This is a bright yellowish-tinged mint red example that is sharply struck throughout. Exceptional surfaces. Population: 45 in 65 Red, 20 finer (9/17). NGC ID# 228B, PCGS# 2150

1886 Type One Cent, MS65 Red
Even, Cherry-Red Color

- 16106 1886 Type One MS65 Red PCGS.** Ex: Richard. Final year for this hub, the design was altered the next year so the lowest feather in the headdress points between the C and A of AMERICA rather than between the I and C as it does on this earlier type. The Type One coins are the more plentiful of the two types, but that is a relative statement as only 23 Gems have been certified by PCGS with five finer (9/17). The surfaces on this piece have an even cherry-red coloration and the strike details are sharply defined throughout. A lovely, high-grade example of this pivotal year in the Indian cent series.

Ex: FUN Signature (Heritage, 1/2004), lot 4312; FUN Signature (Heritage, 1/2015), lot 3211, where it brought \$2,500.40. NGC ID# 228D, PCGS# 2156

- 16107 1887 MS65 Red PCGS.** Blazing color emanates from both sides of this lustrous Gem. This example exhibits an attractive strike. A number of tiny carbon spots are visible on both sides and a strikethrough appears near 3 o'clock on the obverse. NGC ID# 228F, PCGS# 2159

1888/7 Indian Cent, VG10
Famous FS-301, Guide Book Variety

- 16108 1888/7 Snow-1, FS-301, VG10 PCGS.** Eagle Eye Photo Seal, card included. The remnants of an undertype 7 are visible below the final 8 in the date, and a small rim cud is evident at 9 o'clock on the obverse, identifying the FS-301 variety, "the number one cherrypick among Indian Head cents" according to the *Cherrypickers' Guide*. About 30 examples are known. This well-worn VG10 example displays lightly abraded olive-brown surfaces, with the date and legends legible, but LIBERTY largely effaced. NGC ID# 228G, PCGS# 37543 Base PCGS# 2169

16109 1888 MS65 Red PCGS. A frosty and lustrous copper-orange coin with small daubs of violet color on the highest points of the obverse portrait. This Gem Red 1888 Indian cent is conditionally scarce and attractive. A loupe reveals a touch of softness on the upper three headdress feathertips. Population: 36 in 65 Red, 16 finer (9/17). NGC ID# 228G, PCGS# 2168

16110 1889 MS65 Red PCGS. Snow-17, Repunched Date. Rick Snow lists numerous repunched date varieties for the 1889 Indian cent. Snow-17 shows repunching most plainly on the flag of the 1 and the top of the 9. This Gem Red example is well-struck and mostly unabraded, showing frosty copper-orange luster. Population: 52 in 65 (1 in 65+) Red, 12 finer (9/17). NGC ID# 2732, PCGS# 2174

16111 1891 MS65 Red PCGS. Frosty mint-fresh luster casts this Gem 1891 cent in vibrant copper-gold color without any distracting abrasions. A couple of specks are hidden within the headdress feathers. This piece is sharp and attractive. Finer coins are rare. Population: 76 in 65 (2 in 65+) Red, 19 finer (9/17). NGC ID# 228K, PCGS# 2180

16112 1895 MS66 Red PCGS. Effulgent luster sweeps across this amber-gold Gem cent, explaining the undeniable visual appeal seen throughout each side. Well-struck centers cede to minor softness around the borders. A tick on the cheek precludes an even higher grade. Population: 56 in 66 (6 in 66+) Red, 4 finer (9/17). NGC ID# 228P, PCGS# 2192

16113 1899 MS66+ Red PCGS. The 1899 was set aside in generous numbers, undoubtedly as people recognized this as the final year coins would be available with the 18__ date. This is a bright, uniformly red example that shows a few small planchet flakes out of the obverse. Sharply detailed throughout. NGC ID# 228U, PCGS# 2204

16114 1901 MS66 Red PCGS. An ideal 20th century type coin, significant for its date, grade, and eye appeal. The strike is sharp, and frosty copper-gold surfaces are devoid of bothersome abrasions and spotting. Higher-grade Red examples are extremely rare. Population: 88 in 66 (16 in 66+) Red, 6 finer (9/17). NGC ID# 228W, PCGS# 2210

16115 1903 MS66 Red PCGS. Hints of pale green accent the copper-orange surfaces of this Premium Gem type coin. The top three headdress feathers are slightly weak at the tips, but the satiny surfaces are luminous and devoid of distractions. Population: 82 in 66 (6 in 66+) Red, 10 finer (9/17). NGC ID# 228Y, PCGS# 2216

16116 1908 MS66 Red PCGS. This Premium Gem displays unabraded copper-red luster and frosty surfaces. The wreath bow is slightly soft, but the strike is otherwise well-rendered. The 1908 Indian cent is scarce in this grade and extremely rare any finer. Population: 92 in 66 (12 in 66+) Red, 2 finer (9/17). NGC ID# 2295, PCGS# 2231

16117 1908-S MS65 Red and Brown PCGS. This represents the first foray into minor coinage production for any of the United States branch mints. The surfaces of this Gem display shades of copper-orange and luminous mint frost. Each side is well-struck and expectedly clean. There are 17 finer submissions in the Red and Brown category at PCGS (9/17). NGC ID# 2296, PCGS# 2233

16118 1908-S MS65+ Red and Brown PCGS. Vibrant copper-orange color dominates each side, ceding to accents of attractive amber-brown. The motifs are well-struck, though the feathertips are slightly soft (as always), and minimal carbon is seen. The 1908-S is sought-after as the first cent from a branch mint. NGC ID# 2296, PCGS# 2233

16119 1908-S MS66 Red and Brown PCGS. The well-preserved, original red surfaces of this spectacular Premium Gem have mellowed to light brown in some areas, including a streaky pattern on the reverse. The design elements are sharply detailed, and satiny mint luster radiates from both sides. NGC ID# 2296, PCGS# 2233

16120 1908-S MS65 Red PCGS. A luminous, satiny Gem example of the first branch mint issue of this denomination. Rich orange-gold coloration adorns each side, and the strike is bold. We can not see any mentionable carbon specks. Finer Red coins are elusive and proportionately more expensive to acquire. NGC ID# 2296, PCGS# 2234

16121 1909-S MS65 Red and Brown PCGS. The rarer of the two mintmarked issues in the Indian cent series, the 1909-S is also a major key date. This frosty Gem displays nearly full copper-orange luster but with a few chestnut overtones that define the Brown aspect of the grade. The strike is a trifle soft on the headdress feathers as normal. NGC ID# 2298, PCGS# 2239

16122 1909-S MS64 Red PCGS. The 1909-S is famously one of the big keys to the Indian cent series, coming from a small mintage of 309,000 coins. This piece is frosty with copper-orange and reddish luster. The strike is above average, and no major abrasions are seen. A lone speck appears at the tip of the right wreath branch. NGC ID# 2298, PCGS# 2240

PROOF INDIAN CENTS

16123 1859 PR64 PCGS. This Choice proof displays full design sharpness and reflective fields. Modest contrast is seen on the tan-gold obverse, although the olive-tinted reverse shows less separation of field and device. A few specks and unimportant contact marks determine the grade. NGC ID# 2299, PCGS# 2247

16124 1873 Closed 3 PR65 Red PCGS. CAC. All 1,100 Close 3 proofs were struck from a single die pairing. This is a brightly mirrored example that shows much blended yellow and red coloration. Fully struck throughout. Population: 28 in 65 Red, 3 finer. CAC: 4 in 65, 0 finer (9/17). NGC ID# 229S, PCGS# 2308

1887 Cent, PR66 Red and Brown Attractive Color

16125 1887 PR66 Red and Brown PCGS. CAC. Radiant colors appear over each side, including rose-violet, copper-orange, blue, and green. The eye appeal and technical quality are exceptional. Rick Snow explains that this issue is elusive despite a relatively high mintage of 2,960 proofs. He adds, "The 1887 ... is very tough in full red." Indeed, the certified population bears that out. Population: 12 in 66 (1 in 66+) Red and Brown, 5 finer, including Red coins. CAC: 5 in 66, 1 finer (9/17). NGC ID# 22A9, PCGS# 2349

LINCOLN CENTS

16126 1909 VDB MS67 Red PCGS. CAC. A magnificent Superb Gem from the first year of the design, this coin offers sharply detailed design elements, with bold designer's initials, and impeccably preserved original red surfaces. Vibrant mint luster adds to the terrific eye appeal. NGC ID# 22AZ, PCGS# 2425

16127 1909-S VDB MS64 Brown PCGS. This "Brown" near-Gem actually shows intermingled and blended shades of copper-gold, lavender, and burgundy. A bold strike complements a lack of distracting abrasions and spots. Satiny surfaces are especially luminous when rotated beneath a light. NGC ID# BYKW, PCGS# 2426

16128 1909-S VDB MS65 Brown NGC. The 1909-S VDB is enormously popular, due to its low mintage, first year status and the story behind the removal of the VDB initials. It is, perhaps, the most well-known collector date coin in the 20th century. This specimen is worthy of any high-grade collection, being well struck, devoid of significant contact marks, and displaying a pretty coppery-gold color that is just beginning to tone to a light tan. The obverse is occupied by numerous toning freckles. NGC ID# BYKW, PCGS# 2426

16129 1909-S VDB MS64 Red and Brown PCGS. This well-struck, satiny near-Gem displays original golden mint luster with areas of autumn-brown and olive toning. No major abrasions are observed. The 1909-S VDB is the most sought-after Lincoln cent issue, as its mintage of 484,000 coins was the lowest in the series. This example is accompanied by an old ANACS grading certificate and photo, dated March 3, 1986, awarding this coin the conservative grade of MS63/63. NGC ID# 22B2, PCGS# 2427

16130 1909-S VDB MS64 Red and Brown PCGS. CAC. Victor David Brenner's initials appear along the lower reverse on this key Lincoln cent issue. The present Red and Brown coin is well-struck and satiny with chestnut and olive toning over orange-gold luster. Metal flowlines at the outer obverse periphery indicate a late die state. CAC-approved in a green label holder. NGC ID# 22B2, PCGS# 2427

16131 1909-S VDB MS64 Red and Brown PCGS. CAC. Soft olive, rose, and chestnut-gold hues intermingle throughout the glistening satin surfaces of this near-Gem. The strike is sharp, and there is a lack of distracting abrasions. The 1909-S VDB is heavily collected in the middle Red and Brown grades due to a combination of affordability and generally good eye appeal, as is this CAC-endorsed piece demonstrates. NGC ID# 22B2, PCGS# 2427

16132 1909-S VDB MS64 Red and Brown PCGS. CAC. This Red and Brown near-Gem leans heavily toward the Red side of the color spectrum, although tinges of olive on the reverse prevent such a designation. The coin is sharp, and the preservation is outstanding for a sub-Gem cent. CAC approval adds to the appeal. NGC ID# 22B2, PCGS# 2427

1909-S VDB Cent, MS65 Red and Brown Famous Key Issue

16133 1909-S VDB MS65 Red and Brown PCGS. CAC. When the first Lincoln cents were produced in San Francisco, in 1909, they showed the initials of designer Victor D. Brenner along the lower reverse border. This feature proved controversial, and the design was soon changed, with the initials VDB removed. This is a well-struck and nicely preserved Gem, with few surface flaws to distract the beholder.

Ex: FUN Signature (Heritage, 1/2008), lot 450. NGC ID# 22B2, PCGS# 2427

1909-S Lincoln Cent, MS66 Red An Issue Rarely Seen Finer

16134 1909-S MS66 Red PCGS. The 1909-S Lincoln cent is scarcer in high Red grades than its more coveted VDB counterpart. This Premium Gem displays a bold strike and luminous copper-orange mint luster. A couple of tiny specks on the obverse are not distracting. PCGS lists only nine numerically finer Red examples (9/17). NGC ID# 22B4, PCGS# 2434

16135 1909-S MS66 Red NGC. The passage of a century has scarcely muted the rose and orange color on this shining Premium Gem. The strike is impressive, particularly in how it reveals the early intricate textures in Lincoln's hair. Only a few tiny flecks are visible in out-of-the-way parts of the fields.

Ex: Houston Signature (Heritage, 12/2009), lot 108. NGC ID# 22B4, PCGS# 2434

16136 1909-S/S S Over Horizontal S, FS-1502, MS66 Red PCGS. CAC. The eye-catching luster of this Premium Gem Red example appears more yellow-gold than bronze. The coin is well-struck and pristine with a radiant cartwheel effect. The horizontal secondary mintmark is faintly visible along the right edge of the primary. NGC ID# 22B4, PCGS# 37645 Base PCGS# 92434

16137 1911-D MS66 Red PCGS. The Denver Mint's first foray into Lincoln cent production came in 1911, when the facility manufactured 12.6 million coins. This fire-orange Premium Gem exhibits satiny luster and strong detail on the portrait and reverse lettering. Minimal carbon is seen. Population: 64 in 66 (6 in 66+) Red, 1 finer (9/17). NGC ID# 22B8, PCGS# 2446

16138 1911-S MS65 Red PCGS. The well-preserved original red surfaces of this impressive Gem display vibrant mint luster on both sides, and the design elements are sharply detailed throughout. Overall eye appeal is terrific. NGC ID# 22B9, PCGS# 2449

1911-S Cent, MS65 Red Conditionally Rare Branch Issue

16139 1911-S MS65 Red PCGS Secure. CAC. The few microscopic carbon freckles on the reverse are forgiven as reminders of the original surface and color of this impressive 1911-S. Coppery peach-red patina radiates mint luster across finely textured, sharply struck surfaces. The 1911-S is a key date in all grades, and a classic series rarity in Gem or finer grades. Housed in a PCGS Secure holder, it displays CAC endorsement that is seldom awarded for the issue. Population: 68 in 65 (1 in 65+) Red, 17 finer. CAC: 5 in 65, 2 finer (9/17). NGC ID# 22B9, PCGS# 2449

1912-D Lincoln Cent, MS66 Red Sharply Detailed and Well-Preserved

16140 1912-D MS66 Red PCGS. This early series Lincoln cent displays razor-sharp definition on all design elements, and the lustrous original surfaces show mellow red patina without mentionable distractions. Overall eye appeal is outstanding. This coin should find a home in the finest collection or Registry Set. Population: 29 in 66 (3 in 66+) Red, 0 finer (9/17). NGC ID# 22BB, PCGS# 2455

16141 1914-D AU58 PCGS. CAC. The 1914-D is a low-mintage key in the Lincoln cent series. Just a trace of wear shows on the sharply detailed design elements of this impressive near-Mint example, and the glossy olive-brown surfaces are lightly abraded on both sides. NGC ID# 84BX, PCGS# 2471

**1914-S Cent, MS65 Red and Brown
Sharp Strike, Original Color**

16142 1914-S MS65 Red and Brown NGC. This important Gem cent displays significant Mint-red color throughout both sides, supplemented by cobalt-blue and umber overtones on the raised elements and across the open, nearly unmarked fields. The strike is pleasingly sharp throughout. Even today, the 1914-S remains one of the storied branch mint rarities in the Lincoln cent series — especially at the MS65 level. This original and attractive example is sure to elicit strong bids. Census: 25 in 65 Red and Brown, 3 finer (9/17). NGC ID# 22BJ, PCGS# 2475

16143 1915-S MS64 Red and Brown PCGS. CAC. The well-preserved original red surfaces of this impressive Choice specimen have mellowed to light brown in a few areas, but only minor signs of contact are evident and both sides radiate vibrant mint luster. The design elements are sharply detailed throughout. NGC ID# 22BM, PCGS# 2484

**1916-D Lincoln Cent, MS66 Red
Vibrant Luster, Sharp Strike**

16144 1916-D MS66 Red PCGS. The finely textured surfaces of this Premium Gem cent are sharply struck and vibrant on both sides. Satiny copper-red luster shines brightly over the crisp definition on Lincoln's portrait and throughout the fields and devices. A lens reveals a few microscopic carbon flecks (invisible to the unaided eye) but no significant spots or marks. The 1916 Denver issue is scarce this fine and virtually unavailable any finer. Population: 19 in 66 (4 in 66+) Red, 2 finer (9/17). NGC ID# 22BP, PCGS# 2491

16145 1917 Doubled Die Obverse, FS-101, XF45 PCGS. Die doubling on this rare and popular *Cherrypickers'* variety is best viewed at TRUST and at 9 in the date. Eagerly sought by collectors as the "king" of early Lincoln cent varieties, the 1917 doubled die is usually seen in lower grades and seldom in Choice XF or finer conditions. The present piece is problem-free with smooth brown surfaces and sharply defined motifs. A few light abrasions within Lincoln's beard are noted but they are of little concern. Population: 9 in 45, 34 finer (9/17). NGC ID# 22BS, PCGS# 37673 Base PCGS# 92495

16146 1922 No D, Strong Reverse, FS-401, XF40 PCGS. As usual, the reverse is much sharper than the obverse on this bonafide No D cent, struck from the requisite Die Pair 2 with no evidence of the D mintmark and fresh reverse die. This solid XF example shows only a few minor ticklike marks and attractive, glossy-brown surfaces across both sides. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

16147 1922 No D, Strong Reverse, FS-401, XF40 PCGS. Die Pair 2, with the reverse strongly impressed and the second 2 in the date bold. This pleasing XF No D coin is well-detailed and has original chestnut-brown patina with the expected light abrasions for the grade. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

16148 1923-S MS64 Red and Brown PCGS. CAC. Lustrous orange and rose surfaces are quite well detailed for this notoriously substandard issue, being mellowed primarily on the obverse in specks of steel-blue toning. NGC ID# 22CB, PCGS# 2547

16149 1927 MS67 Red PCGS. A magnificent Superb Gem, with impeccably preserved original red surfaces and blazing mint luster on both sides. The design elements are sharply detailed in most areas, with just a touch of the usual softness on Lincoln's beard. NGC ID# 22CM, PCGS# 2578

16150 1933 MS67 Red PCGS. CAC. The 1933 Lincoln cent is rarely encountered in this quality with an endorsement from CAC. Eye-catching mint luster washes over carefully preserved light coppery-gold surfaces. Marks only become apparent under magnification. Population: 66 in 67 (7 in 67+) Red, 0 finer. CAC: 12 in 67, 0 finer (9/17). NGC ID# 22D7, PCGS# 2629

16151 1933-D MS67 Red PCGS. This magnificent Registry coin is among the finest 1933-D Lincoln cents known, a satiny copper-red Superb Gem with sharp motifs and unblemished surfaces. Examples are rare in this condition. Population: 36 in 67 (1 in 67+) Red, 0 finer (9/17). NGC ID# 22D8, PCGS# 2632

16152 1936 Doubled Die Obverse, FS-102, MS65 Red PCGS. The date is clearly die doubled, as is the RTY in LIBERTY. The peach-red obverse center is encompassed by a broad sea-green border. The reverse displays similar but evenly distributed shades. Lustrous and well-struck with exemplary preservation. PCGS# 37753 Base PCGS# 2650

16153 1947 MS67 Red PCGS. Another example of the top-grade 1947-P cent issue, this piece in MS67 Red displays ample eye appeal over medium orange surfaces that show a few flecks visible only with a loupe. The strike is decent save for softness at LURI on the reverse, and a small prooflike area appears on the lower reverse where the prevailing frosty texture is absent. NGC ID# 22EN, PCGS# 2752

16154 1947 MS67 Red NGC. The pristine original surfaces of this spectacular Superb Gem display vibrant mint luster and attractive burnt-orange color. The devices are sharply detailed throughout. The 1947 Lincoln cent is conditionally rare this fine, and no numerically finer representatives are known. Census: 28 in 67 (1 in 67+) Red, 0 finer (9/17). NGC ID# 22EN, PCGS# 2752

16155 1955 Doubled Die Obverse, FS-101, AU58 NGC. Smooth, satiny surfaces exhibit blended chocolate-brown and olive toning over still-lustrous fields. Only the highest points of Lincoln's portrait show evidence of friction. No distracting abrasions are present. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

16156 1955 Doubled Die Obverse, FS-101, AU58 NGC. This deeply toned chestnut-brown example retains some luster in the protected portions of the fields, with little high-point wear on the Lincoln portrait. The surfaces are generally smooth and appealing. A highly coveted mint error, showing die doubling that is visible to the unaided eye. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

16157 1955 Doubled Die Obverse, FS-101, AU58 NGC. A few light contact marks on Lincoln's jacket accompany a trace of high-point friction, although the fields remain satiny and lustrous. Both sides have medium chestnut-brown patina and good eye appeal. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

**1955 Cent, MS62 Red and Brown
Doubled Die Obverse**

16158 1955 Doubled Die Obverse, FS-101, MS62 Red and Brown NGC. Delicate lavender and burgundy hues appear over copper-orange luster, producing the Red and Brown designation. The coin is well-struck and shows minimal abrasions. The 1955 double die variety is one of the most famous Lincoln cent issues. The present example is upper-end for the grade and highly attractive. NGC ID# 22FG, PCGS# 37911 Base PCGS# 2826

**1955 Cent, MS63 Red and Brown
Doubled Die Obverse, Pleasing Color**

16159 1955 Doubled Die Obverse, FS-101, MS63 Red and Brown PCGS. CAC. The Brown aspect of this coin's grade is made up of olive-green, lavender, rose, and burgundy hues blended over copper-orange luster. The strike is sharp, and the satiny surfaces show now distracting abrasions. This is the most famous die variety in the Lincoln cent series. The population is fairly high compared to other Lincoln cent varieties, although collector and investor demand easily absorbs the available supply. NGC ID# 22FG, PCGS# 37911 Base PCGS# 2826

**1970-S Cent, MS64 Red and Brown
Large Date, Doubled Die Obverse**

16160 1970-S Large Date, Doubled Die Obverse, FS-101, MS64 Red and Brown NGC. Bold die doubling is evident on the date, LIBERTY, and IN GOD WE TRUST. This variety is scarce, with NGC attributing only 31 examples in all grades, and PCGS just 21 (9/17). The present coin is nearly full Red, showing only a tinge of burgundy at the lower reverse that prevents the Red designation from NGC. A similar lavender area appears in the left obverse field below IN. This satiny coin is sharply struck and well-preserved. NGC ID# 22GN, PCGS# 37998 Base PCGS# 2938

16161 1992-D Close AM, FS-901, AU58 PCGS. The AM in AMERICA touch at the bases, identifying this scarce *Guide Book* and *Cherrypickers'* variety. This example has barely a trace of high-point friction on the Lincoln portrait, delivering the overall first impression of a full Red Mint State coin, at least to the unaided eye. Cartwheel luster illuminates golden-orange surfaces and sharp motifs. NGC ID# 22JJ, PCGS# 391427 Base PCGS# 83099

PROOF LINCOLN CENTS

16162 1909 PR65 Red and Brown PCGS. CAC. A rose blush on the obverse and considerable peripheral orange on the reverse account for the "Red" on this specimen, with blue overtones appearing elsewhere. From the last of three proof designs for the cent that year. NGC ID# 22KS, PCGS# 3304

16163 1911 PR66 Red and Brown PCGS. CAC. This Premium Gem Lincoln cent has the broad, razor-sharp rims and matte surfaces expected of a proof of this vintage. Occasional rose shadings accent deep coppery brown color. Each side is free of marks worth mentioning. One of 1,725 pieces struck. There is a single finer coin in this category at PCGS (9/17). NGC ID# 22KU, PCGS# 3310

16164 1913 PR66 Red PCGS. CAC. Razor-sharp definition is evident on all design elements of this impressive Premium Gem, and the original red surfaces are impeccably preserved, with vibrant mint luster and terrific eye appeal. NGC ID# 22KW, PCGS# 3317

16165 1914 PR65 Red and Brown PCGS. The well-preserved original red surfaces of this impressive Gem show some streaks of amber and steel-brown patina in selected areas, with sharply detailed design elements and vibrant mint luster. NGC ID# 22KX, PCGS# 3319

16166 1916 PR63 Red and Brown NGC. This Select proof is razor-sharp with impressively well-preserved matte surfaces for the grade. Each side displays uniform chestnut-gold coloration without distractions or discolorations. A collectible example of this scarce matte proof Lincoln. Census: 5 in 63 Red and Brown, 58 finer (9/17). NGC ID# 22KZ, PCGS# 3325

16167 1936 Type One—Satin Finish PR65 Red PCGS Secure. Two styles of proof Lincoln cents were coined in 1936, following a two decade intermission of proof coinage production since the last matte proofs were minted in 1916. The initial 1936 proofs had a satin finish such as the piece offered here, and those struck later in the year had a brilliant finish with deeply mirrored fields. Both styles are highly collectible, and elusive in higher grades. This pleasing Gem exhibits the expected bold strike, with brilliant orange mint color on the satin surfaces with a trivial splash of darker toning on the reverse. NGC ID# 22L2, PCGS# 3332

16168 1936 Type Two—Brilliant Finish PR66 Red and Brown PCGS. Violet and pine-green colors accent copper-orange surfaces on this Premium Gem Red and Brown brilliant proof. The strike is full, and neither side exhibits a distracting blemish. This is the sole finest Red and Brown proof at PCGS (9/17). NGC ID# 22L2, PCGS# 3334

16169 1936 Type Two — Brilliant Finish PR65 Red PCGS. This spectacular Gem exhibits deeply reflective fields and sharply detailed design elements throughout. The original red surfaces are well-preserved, with the more popular all-brilliant finish of the Type Two proofs. NGC ID# 22L3, PCGS# 3335

16170 1936 Type Two — Brilliant Finish PR65 Red PCGS. CAC. The Philadelphia Mint resumed proof coinage after a two-decade hiatus in 1936. This impressive Gem represents the Type Two issue struck later in the year, with an all-brilliant Finish. The original red surfaces are deeply reflective and well-preserved. NGC ID# 22L3, PCGS# 3335

**1936 Type Two Cent, PR66 Red
Brilliant Finish**

- 16171 1936 Type Two — Brilliant Finish PR66 Red PCGS.** The mirrorlike fields on each side of this first-year Lincoln cent proof distinguish the Brilliant finish from the Satin finish employed on proofs earlier in the year. This format is more collectible, and many collectors prefer the Brilliant aesthetic. Fire-orange surfaces are incredibly void of contact. Tiny carbon spots appear on each side but do not affect the appeal. Population: 58 in 66 (5 in 66+) Red, 7 finer, including Cameo (9/17). NGC ID# 22L3, PCGS# 3335

**1936 Lincoln Cent, PR64 Red Cameo
Brilliant Finish, Rare With Contrast**

- 16172 1936 Type Two — Brilliant Finish PR64 Red Cameo PCGS.** The Mint resumed proof set offerings in 1936 for the first time since 1916. The coins were first issued in Satin Finish (Type One) and, later, in Brilliant Finish (Type Two). The all-brilliant finish was attractive but, since the devices were not deliberately frosted, examples with Cameo contrast are unusual. This impressive Choice example displays unexpectedly frosted, sharply detailed design elements that contrast boldly with the reflective fields. The original red surfaces are lightly marked and eye appeal is outstanding. Population: 3 in 64 Red Cameo, 6 finer (9/17). NGC ID# BY3A, PCGS# 83335

- 16173 1954 PR67 Red Deep Cameo PCGS.** Dramatic field-device contrast characterizes each side of this Superb Gem Red proof 1954 cent. The brilliant copper-pink surfaces showcase liquidlike mirroring in the fields and thick, frosty luster on the relief elements. The preservation appears almost flawless. Rarely seen this fine. Population: 16 in 67 (1 in 67+) Red Deep Cameo, 6 finer (9/17). NGC ID# 22LE, PCGS# 93371

TWO CENT PIECES

- 16174 1864 Small Motto, FS-401, MS63 Brown PCGS. CAC.** From the first year of the denomination, this impressive Select specimen represents the elusive Small Motto variety. The design elements are sharply detailed and the olive-brown surfaces are lightly marked. NGC ID# 22N8, PCGS# 38232 Base PCGS# 3579

- 16175 1864 Large Motto MS66 Red PCGS.** The odd-denomination two cent series saw its highest mintage in 1864, the first year of issue. This is an attractive and still-Red Premium Gem representative of the most popular date for type collectors with only a few scattered flyspecks, including one at the D of GOD. Population: 67 in 66 (3 in 66+) Red, 2 finer (9/17).
Ex: FUN Signature (Heritage, 1/2015), lot 3411. NGC ID# 22N9, PCGS# 3578

PROOF TWO CENT PIECES

- 16176 1865 PR64 Red PCGS.** The two cent series was still in its nascent stages in 1865, when the Mint reportedly struck 500+ proofs. This near-Gem features a slight woodgrain pattern over flashy pumpkin and amber-gold surfaces. As expected, strike detail is fully defined. NGC ID# 274U, PCGS# 3629

**1870 Two Cent Piece, PR65 Red
Rarely Encountered Finer**

- 16177 1870 PR65 Red PCGS Secure. CAC.** Most Red proof 1870 two cent pieces are clustered in the PR64 and PR65 grades, with finer coins rare. This CAC-approved example is in a minority. The strike is full, and both sides display bright, glimmering gold surfaces with orange highlights. Modest cameo contrast is seen on the obverse. Population: 42 in 65 (2 in 65+) Red, 15 finer. CAC: 7 in 65, 6 finer (9/17). NGC ID# 274Z, PCGS# 3644

**1871 Two Cent Piece, PR65 Red
Boldly Struck with Original Surfaces**

- 16178 1871 PR65 Red PCGS.** A lustrous piece toned just enough to confirm its originality while maintaining its bright proof surfaces. Boldly struck, and a perfect example for a type set. Struck from a doubled obverse die, most obvious at TRUST, as are all 1871 proof two cent pieces. Population: 42 in 65 Red, 17 finer (9/17). NGC ID# 22NH, PCGS# 3647

**1872 Two Cent Piece, PR65 Red
Green Label Holder**

- 16179 1872 PR65 Red PCGS. CAC.** Due to the scarcity of the circulation strike of this year, the 1872 proof two cent piece is in demand among date collectors. This Red example is fully struck and reflective with unblemished surfaces. CAC-endorsed in a green label holder. Population: 38 in 65 (1 in 65+) Red, 15 finer. CAC: 2 in 65, 4 finer (9/17). NGC ID# 2752, PCGS# 3650

**1873 Closed 3 Two Cent, PR65 Brown
Some Mint Red Remains**

16180 1873 Closed 3 PR65 Brown NGC. It is possible that some 1873 Closed 3 proofs were melted as unsold when April 1 arrived, and with it the mandate to switch to the Open 3 design. This Gem example avoided the melting pot, and instead was well-preserved by careful hands. An overlay of bluish-brown patina allows faint glimpses of Mint red to survive and embellish the sharply struck surfaces. All Closed 3 proofs are considered "originals," while the 1873 Open 3 proofs are so-called restrikes. Census (Closed 3): 15 in 65 Brown, 9 finer (9/17). NGC ID# 2753, PCGS# 3651

THREE CENT SILVER

**1858 Silver Three Cent, MS66
Lightly Toned and Appealing**

16181 1858 MS66 PCGS. The final Type Two issue in the series, the 1858 three cent silver is conditionally scarce in MS66 and rare finer. This piece displays sharp definition on the reverse with only minor softness on the obverse central shield lines. Original powder-blue border toning surrounds light golden interiors. Population: 43 in 66 (2 in 66+), 12 finer (9/17). NGC ID# 2227, PCGS# 3674

16182 1860 MS65 PCGS. CAC. The 1860 three cent silver piece is a rarity in Gem condition, and finer coins are exceedingly scarce. This piece is satiny and brilliant on the obverse with light olive-gold toning over the reverse. Both sides show minor strike weakness, as normal for this type. Housed in an old green label holder with CAC endorsement. Population: 26 in 65, 17 finer. CAC: 8 in 65, 9 finer (9/17). NGC ID# 5LDM, PCGS# 3678

16183 1862 MS66 PCGS. Softly frosted luster showcases delightful sea-green, lemon-gold, peach, and lavender toning. No abrasions are seen, and the eye appeal is outstanding. A weak strike at the centers is typical for the issue. PCGS lists only 20 numerically finer examples (8/17). NGC ID# 222B, PCGS# 3680

PROOF THREE CENT SILVER

16184 1864 PR65 Cameo PCGS. As the Civil War progressed into its fourth year and hoarding of silver coins became more and more of a problem, the Philadelphia mint reduced its production of smaller silver denominations to token mintages. Just 460 proofs and 12,000 business strikes were issued of the diminutive three cent silver. This glittering specimen exhibits pinpoint sharpness and appreciable contrast. The obverse is essentially brilliant while a veil of steel-violet toning coats the reverse. A small planchet flaw is noted near the reverse border at 7 o'clock. Population: 14 in 65 Cameo, 16 finer (9/17). NGC ID# 27CA, PCGS# 83714

**1865 Three Cent Silver, PR66
Beautifully Toned**

16185 1865 PR66 PCGS. Rich layers of golden-brown, red-brown, crimson, and electric-blue patina adorn the surfaces of this Premium Gem proof. Only the center of the reverse remains untoned. A crisply struck piece that is entirely free of surface distractions. Ex: FUN Signature (Heritage, 1/2011), lot 3201. NGC ID# 27CB, PCGS# 3715

**1873 Silver Three Cent, Nostalgic PR65 Cameo
Final-Year of the Silver Three Cent Piece**

16186 1873 PR65 Cameo PCGS. CAC. Struck during the final year of the silver three cent series, the 1873 was a proof-only issue from a mintage of just 600 pieces. This Gem Cameo survivor was well-preserved, retaining its mirrored fields with dappled amber-gold and gray toning around the frosted central elements. There are no serious marks or shortcomings in the strike, while generous natural eye appeal remains strong. Population: 25 in 65 (2 in 65+) Cameo, 14 finer. CAC: 14 in 65, 12 finer (9/17). NGC ID# 27CJ, PCGS# 83724

THREE CENT NICKELS

**1873 Three Cent Nickel, MS66
Closed 3, None Graded Higher**

16187 1873 Closed 3 MS66 PCGS. CAC. This glittering Premium Gem nickel offers scintillating luster and complete brilliance, appearing as it did the day it was struck. Bold design elements are seen on each side. A loupe fails to reveal any marks worth mentioning. Encapsulated in a first-generation holder. Population: 13 in 66, 0 finer. CAC: 7 in 66, 0 finer (9/17). NGC ID# 22NP, PCGS# 3739

16188 1873 Open 3 MS65 PCGS. The later type with the 3 in the date widened to appear less like an 8. This sharp Gem is champagne-tinted stone-gray in color with unmarked surfaces and excellent eye appeal. Finer examples are rarities. Population: 48 in 65 (4 in 65+), 6 finer (9/17). NGC ID# 22NR, PCGS# 3740

16189 1875 MS66 PCGS. The overall trend of declining mintages in the three cent nickel series continued in 1875, when a new low was set with the production of 228,000 pieces. This Premium Gem has crisp borders, curls, and columns on the denomination. Each side remains wholly brilliant, and horizontal die polish lines appear in the reverse fields. Population: 33 in 66 (6 in 66+), 4 finer (9/17). NGC ID# 22NS, PCGS# 3743

16190 1883 MS62 PCGS. With one of the lowest mintages in the series (4,000 circulation strikes), the 1883 three cent nickel is exceedingly challenging in any Mint State grade. This piece is more attractive than the grade implies with even steel-gray toning and a strong strike. Scattered ticks are seen. Population: 17 in 62, 30 finer (9/17). NGC ID# 2765, PCGS# 3751

1884 Three Cent Nickel, AU55 Only 1,700 Circulation Strikes

16191 1884 AU55 NGC. Only 1,700 three cent nickels were coined for circulation in 1884, making this one of the most in-demand dates in the series. The average certified grade for the 1884 is marginally higher than XF45. Examples graded higher than this nickel-gray Choice AU offering are rare. Smooth and well-struck with trivial merging and minor marks. Census: 1 in 55, 16 finer (9/17). NGC ID# 2766, PCGS# 3752

16192 1887 MS66 PCGS. A delightful Premium Gem, with sharply detailed design elements and vibrant mint luster on both sides. The well-preserved surfaces show a few subtle hints of pale gold toning. Eye appeal is outstanding. NGC ID# 22NU, PCGS# 3755

16193 1889 MS66 PCGS. Vibrant, frosty, and untuned mint luster gives this Premium Gem considerable "pop" even from a distance. The strike is sharp, and a lack of abrasions further complements the eye appeal. Finer 1889 three cent nickels are rarely offered. Population: 31 in 66 (3 in 66+), 19 finer (9/17). NGC ID# 275J, PCGS# 3758

PROOF THREE CENT NICKELS

16194 1866 PR65 Cameo PCGS. CAC. Cameos are scarce in this grade; CAC-endorsed Gem proofs are rare. This Gem Cameo displays a full strike and mirrored, unblemished fields. Hints of light sky-blue and champagne toning grace each side. Population: 38 in 65 Cameo, 22 finer; 8 in 65 Deep Cameo, 16 finer. CAC: 16 in 65, 19 finer (9/17). NGC ID# 275L, PCGS# 83762

1866 Nickel Three Cent, PR66+ Elusive Deep Cameo Coin

16195 1866 PR66+ Deep Cameo PCGS. CAC. This high-end Premium Gem is sharp throughout and deeply contrasted with mirrored fields. A few microscopic threadlike strike-throughs lint marks are seen with a glass. The coin is essentially brilliant. Proof 1866 three cent nickels are scarce in all Cameo grades. Finer representatives are out of reach for many enthusiasts, yet this sole Plus-graded example with CAC endorsement may offer a reasonable alternative to the next-highest level. Population: 10 in 66 (1 in 66+) Deep Cameo, 6 finer. CAC: 13 in 66, 3 finer (9/17). NGC ID# 275L, PCGS# 93762

16196 1868 PR66 PCGS. CAC. Although a number of Cameos are certified in this and finer grades, the present Premium Gem proof 1868 nickel three cent is tied with just four others as the finest non-Cameo at PCGS (9/17). Sharp, satiny design elements reside amid reflective fields with no hindrance of toning. The obverse alone would arguably qualify for a Cameo designation, although the reverse is less well-contrasted. NGC ID# 29NA, PCGS# 3764

16197 1877 PR64 NGC. Golden toning warms reflective fields on this razor-sharp near-Gem proof. A few microscopic marks do not detract. The 1877 three cent nickel was produced only in proof format, with a mintage of 900 pieces. Housed in a prior generation holder. NGC ID# 275X, PCGS# 3773

16198 1878 PR67 Cameo PCGS. Intense, frosty luster on the motifs appears as though this coin has never been dipped. The fields are reflective, and each side displays warm yellow-gold toning. Cameo contrast is immediately apparent. Population: 40 in 67 (6 in 67+) Cameo, 1 in 68, 1 in 68 Cameo (9/17). NGC ID# 275Y, PCGS# 83774

16199 1878 PR67 Cameo PCGS. CAC. A proof-only date. This Superb Gem shows the usual satiny appearance of the 1878 proof, although sufficient mirroring in the fields produces a cameo quality on each side. A hint of champagne toning complements sharp design elements. Population: 40 in 67 (6 in 67+) Cameo, 1 finer; 1 in 67 Deep Cameo, 0 finer. CAC: 39 in 67, 0 finer (9/17). NGC ID# 275Y, PCGS# 83774

1879 Nickel Three Cent, PR68 Subtle Field-Device Contrast A High-End Condition Rarity

16200 1879 PR68 PCGS. This glimmering Superb Gem proof displays modest field-motif contrast and is deeply reflective. Warm golden toning appears on each side, and the strike is sharp. The 1879 proof three cent nickel is rare this fine and unknown numerically finer. Population: 3 in 68, 0 finer; 1 in 68 Cameo, 0 finer (9/17). NGC ID# 275Z, PCGS# 3775

16201 1881 PR67+ Cameo NGC. CAC. This well-contrasted, brilliant Superb Gem proof displays full detail and pristine surfaces. Eye appeal is magnificent, such that few other PR67 Cameos can match it. Scarce in this grade and rare finer. Census: 38 in 67 Cameo (1 in 67+, 4 in 67 ★), 11 finer. CAC: 34 in 67, 3 finer (9/17). NGC ID# 2763, PCGS# 83777

16202 1884 PR67 Cameo PCGS. CAC. A deeply struck, well-contrasted Superb Gem Cameo with CAC endorsement. Both sides are brilliant and devoid of contact marks. The 1884 is scarce this fine and rare in higher grades. Population: 32 in 67 (1 in 67+) Cameo, 4 finer; 3 in 67 (1 in 67+) Deep Cameo, 0 finer. CAC: 23 in 67, 2 finer (9/17). NGC ID# 2766, PCGS# 83780

16203 1885 PR67 PCGS. CAC. Gold-toned overall with a few lavender streaks on the reverse. Under the patina is a carefully preserved Superb Gem proof with watery fields. Population: 41 in 67 (2 in 67+), 1 finer. CAC: 23 in 67, 0 finer (9/17).
Ex: *Denver Signature* (Heritage, 8/2006), lot 546; *ANA Signature* (Heritage, 3/2011), lot 3189.
NGC ID# 2767, PCGS# 3781

16204 1886 PR67 Cameo PCGS. CAC. Brilliant throughout with shimmering surfaces that are moderately mirrored with a slight cartwheel effect interspersed. A splendid type coin. No finer Cameos are reported (9/17).
Ex: *FUN Signature* (Heritage, 1/2005), lot 5671. NGC ID# 5E5Y, PCGS# 83782

SHIELD NICKELS

16205 1866 Rays MS65 PCGS. CAC. The date is recut on this piece — the same obverse as FS-901 but paired to a different reverse that is not damaged below the 5. The obverse is also in a much later die state, showing such bold clash marks that almost every design element from the reverse is impressed into the obverse fields. On the reverse, no prominent clash marks are seen, but cracks and die buckling are evident at 4 o'clock. The central devices show some strike weakness. Both sides are brilliant and satiny with no major abrasions. NGC ID# 22NX, PCGS# 3790

**1867 No Rays Shield Nickel, MS66+
Tied for Finest at Either Service**

16206 1867 No Rays MS66+ PCGS. CAC. This is an exquisitely toned, high-end Premium Gem Shield nickel, with lavender and pale-violet hues at the margins that meld into light, wheat-gold centers. The strike is needle-sharp throughout both sides, with crisp horizontal shield lines and razor-sharp stars. The coin is struck from a resilient die marriage, with no signs of damage or wear other than a few faint die cracks around the tops of the reverse legend. A pair of tiny die lumps and an L-shaped strike-through are Mint related anomalies inside the upper stars. Population: 24 in 66 (2 in 66+), 0 finer. CAC: 7 in 66, 0 finer (9/17). NGC ID# 22NZ, PCGS# 3794

16207 1870 MS66 PCGS. The 1870 is deceptively scarce in mint condition and very rare in MS66. This is a Registry-quality representative with brilliant surfaces that glisten with satiny luster. Myriad die cracks and polish lines appear on each side but are especially prominent above the annulet. Boldly defined. Population: 35 in 66 (4 in 66+), 0 finer (9/17). NGC ID# 22P4, PCGS# 3797

16208 1871 MS65 PCGS. CAC. A satiny nickel-gray Gem with unabraded surfaces and pleasing eye appeal. The 1871 is seldom offered this fine and is genuinely rare in higher grades. The present example shows strike weakness on the stars and horizontal shield stripes. Housed in a first generation holder with CAC endorsement. Population: 36 in 65 (3 in 65+), 14 finer. CAC: 15 in 65, 8 finer (9/17). NGC ID# 22P5, PCGS# 3798

16209 1874 MS65 PCGS. The 1874 Shield nickel is seldom encountered in MS65 condition. This sharply detailed Gem displays well-preserved, lustrous surfaces, under delicate shades of pale gold toning. A number of spidery die cracks are evident on the obverse. Population: 48 in 65 (2 in 65+), 16 finer (9/17). NGC ID# 22P9, PCGS# 3803

16210 1876 MS66 PCGS. The 1876 Shield nickel is usually available in Mint State, although Premium Gems are conditionally rare and none are known finer. This piece displays sharp relief detail and satiny luster, all cast in warm golden toning with no obtrusive abrasions. Population: 18 in 66 (2 in 66+), 0 finer (9/17). NGC ID# 22PB, PCGS# 3805

16211 1879 MS60 ANACS. Fletcher-04, Repunched Date. The repunching is faint. The 1879 Shield nickel is a scarce date with a mintage of just 25,900 pieces. This example displays sharp design elements and satiny, golden-gray luster. Surprisingly, no singular abrasions are present, despite the grade. A hint of reflectivity is visible in the reverse fields, while the obverse luster is more muted. NGC ID# 5KWK, PCGS# 3808

**1880 Shield Nickel, AU55
Only 16,000 Circulation Strikes Produced**

16212 1880 AU55 ANACS. Repunched Date. The 1880 is the key to the Shield nickel series with only 16,000 circulation strikes produced. While a low mintage does not always equal rarity, in this case it does. The same dies were used for both proofs and business strikes, making it very difficult to discern a shallowly mirrored proof from a genuine strike for circulation. Almost all business strike pieces show some degree of remaining initial die polish, which yields semireflective fields. This example is bright overall with gray-brilliant surfaces. As expected, some die polish still remains in the fields, but not enough to cast doubt on the coin's status as a strike intended for circulation. NGC ID# 276E, PCGS# 3810

16213 1882 MS66 PCGS. CAC. Sun-gold, lavender, mint-green, and ice-blue hues merge and blend as they share pristine, satiny surfaces on this Premium Gem 1882 Shield nickel. The strike is sharp, and the familiar array of peripheral die cracks is present. Housed in an old "rattler" holder with a CAC green label. PCGS lists only eight numerically finer examples. CAC: 29 in 66, 3 finer (9/17). NGC ID# 276Y, PCGS# 3812

PROOF SHIELD NICKELS

1866 Rays Nickel, PR65 Excellent Quality for the Grade

- 16214 1866 Rays PR65 PCGS. CAC.** A reported mintage of 600+ pieces makes the first-year 1866 Rays nickel proof one of the keys to the series in this format. This spectacular Gem has reflective fields and, unsurprisingly, fully struck devices with a thin overlay of frost. Evidence of contact is essentially unseen, and the quality is undeniably high-end for the grade. NGC ID# 276G, PCGS# 3817

1866 Shield Nickel, PR66 Golden-Toned Rays Type Coin

- 16215 1866 Rays PR66 PCGS.** This golden-toned proof is devoid of contact marks and has subtle cameo contrast on the obverse. The strike is a trifle weak at the inner points of the rays and on the horizontal shield lines, but this is unnoticed by the naked eye. Housed in a green label holder. Finer pieces are extremely rare. Population: 42 in 66 (2 in 66+), 1 finer; 37 in 66 (1 in 66+) Cameo, 3 finer; 3 in 66 (1 in 66+) Deep Cameo, 1 finer (9/17). NGC ID# 276G, PCGS# 3817

1867 No Rays Shield Nickel, PR66 Razor-Sharp Detail

- 16216 1867 No Rays PR66 PCGS.** Star points between AM in AMERICA. This glimmering Premium Gem proof is fully struck and boasts modest cameo contrast on the obverse. A hint of light lavender-gold toning graces each side. The 1867 No Rays proof is rarely encountered this fine, with or without a Cameo designation. Housed in a green label holder. Population: 13 in 66 (1 in 66+), 0 finer; 18 in 66 (1 in 66+) Cameo, 1 finer; 4 in 66 (1 in 66+) Deep Cameo, 0 finer (9/17). NGC ID# 4T4L, PCGS# 3821

- 16217 1868 PR66 PCGS. CAC.** This piece is tied for the finest proof 1868 Shield nickel at PCGS, although that service does list a number of Cameos and one Deep Cameo in this same numeric grade. Sharp design elements and reflective fields complement light golden toning. Population: 13 in 66, 0 finer. CAC: 6 in 66, 0 finer (9/17). NGC ID# 276J, PCGS# 3822

- 16218 1870 PR66 Cameo PCGS. CAC.** A brilliant and well-struck Gem with seemingly pristine surfaces. The cameo contrast is especially profound on the obverse. The reverse die has been heavily lapped, as struck, and many letters in the reverse legends have absent uprights or serifs. Population: 27 in 66 (3 in 66+) Cameo, 2 finer. CAC: 12 in 66, 0 finer (9/17).
Ex: Long Beach Signature (Heritage, 9/2002), lot 5809. NGC ID# 276L, PCGS# 83824

- 16219 1871 PR66 Cameo PCGS. CAC.** A well-contrasted Cameo with razor-sharp details and just the faintest touch of champagne color. Cameo proof 1871 Shield nickels are rare this fine and uncollectible finer for many enthusiasts. Population: 26 in 66 (3 in 66+) Cameo, 2 finer; 2 in 66 (1 in 66+) Deep Cameo, 0 finer. CAC: 19 in 66, 1 finer (9/17). NGC ID# AMU3, PCGS# 83825

1872 Shield Nickel, PR67 Concentric Rainbow Toning

- 16220 1872 PR67 PCGS.** Beautiful rainbow toning surrounds the margins on this Superb Gem proof, leaving the interiors with a delicate lavender-blue hue. No distractions are seen and the strike is sharp. The 1872 proof is rarely seen this fine. Encapsulated in a green label holder. Population: 4 in 67, 0 finer; 5 in 67 (1 in 67+) Cameo, 0 finer (9/17). NGC ID# 22P6, PCGS# 3826

- 16221 1873 Closed 3 PR66 Cameo PCGS Secure. Fletcher-2, Repunched Date. CAC.** All proof 1873 Shield nickels feature the Closed 3 logotype. This high-end Cameo shows recutting on the 1 in the date and has sharp design definition. A hint of champagne color warms the modestly contrasted surfaces. Finer Cameos are rare, and no Deep Cameos are reported at PCGS. Population: 41 in 66 (2 in 66+) Cameo, 2 finer (9/17). NGC ID# 276P, PCGS# 83827

- 16222 1877 — Obverse Rim Filed — ANACS. PR60 Details.** A reflective proof with brilliant surfaces and a sharp strike. No distracting abrasions are seen across the interiors, save for a couple of tiny ticks near the right obverse border. Any rim filing is hidden by the holder. The 1877 Shield nickel was struck only in proof format. The quantity issued was just 900 pieces. NGC ID# 276U, PCGS# 3831

**1877 Shield Nickel, PR63
Total Mintage of 900 Proofs**

16223 1877 PR63 NGC. Nickel production was famously limited to proofs only in 1877. The Mint struck merely 900 pieces, and any collector looking to put together a complete date run is required to obtain an example of this elusive issue. This Select proof displays slight golden accents over partly reflective surfaces. Fewer marks than the grade implies. NGC ID# 276U, PCGS# 3831

**1877 Shield Nickel, PR65
Appreciably Reflective**

16224 1877 PR65 PCGS. CAC. The 1877 Shield nickel was struck only in proof format, with a mintage of 900 pieces. Cameos are scarce, but this Gem non-Cameo is a collectible and eye-appealing alternative. The design elements are fully struck, and the champagne-tinted fields exhibit deeper mirroring than usual for this often satiny issue. The obverse has slight cameo contrast. CAC-approved in a green label holder. NGC ID# 276U, PCGS# 3831

**1877 Shield Nickel, PR65 Ultra Cameo
Dramatic Contrast and Appeal**

16225 1877 PR65 Ultra Cameo NGC. A popular proof-only issue with a mintage of 900 pieces, the 1877 Shield nickel is typically seen with a satiny appearance rather than deeply prooflike mirroring. Ultra/Deep Cameos are rare. This Gem is one of only eight Ultra/Deep Cameos in all grades at NGC and PCGS combined. The strike is sharp, and each side displays brilliant, stark white-on-black contrast and deep mirroring. Eye appeal far surpasses that of most other 1877 proofs that we have seen. Census: 3 in 65 Ultra Cameo, 2 finer (9/17). NGC ID# 4YTA, PCGS# 93831

16226 1878 PR61 ANACS. Repunched Date. ANACS notes repunching of the date, faintly visible inside the lower loop of the 8. The 1878 proof often comes satiny rather than deeply reflective, as is the case with this nickel-gray example. The strike is sharp, and no major contact marks are observed. NGC ID# 276V, PCGS# 3832

16227 1878 PR66 PCGS. CAC. Although slightly reflective, this Premium Gem displays the typical satiny look of 1878 proof Shield nickels. The strike is sharp, and each side is largely brilliant. Only proof Shield nickels were issued in 1878. Housed in an old green label holder with CAC endorsement. PCGS lists 20 finer non-Cameos, plus a number of Cameos and Deep Cameos in this and higher grades (9/17). NGC ID# 276V, PCGS# 3832

16228 1879/8 PR67 PCGS. CAC. The obverse is satiny while the reverse shows appreciable mirroring. This Superb Gem proof displays champagne toning and sharp design elements. The overdate feature is visible in the loops of the 9 under magnification. Housed in a green label holder. Population: 33 in 67 (2 in 67+), 7 finer; 8 in 67 Cameo, 0 finer. CAC: 15 in 67, 0 finer (9/17). NGC ID# 22PG, PCGS# 3834

16229 1880 PR67 Cameo PCGS. Only a single Deep Cameo proof is reported at PCGS, grading just PR64. Thus, this Superb Gem Cameo will be among the top considerations for Registry Set collectors. The strike is sharp, and each side offers modest field-motif contrast. No mentionable toning is present. Population: 27 in 67 (4 in 67+) Cameo, 1 finer (9/17). NGC ID# 276W, PCGS# 83835

16230 1881 PR67 Cameo PCGS. This modestly contrasted Superb Gem features warm golden toning and sharp design elements. The fields are faintly reflective with an overall satiny appearance. Conditionally elusive this fine. Population: 29 in 67 (1 in 67+) Cameo, 0 finer; 3 in 67 Deep Cameo, 0 finer (9/17). NGC ID# 276X, PCGS# 83836

16231 1881 PR67 Cameo PCGS. CAC. A brilliant, deeply reflective Superb Gem Cameo with sharp motifs and well-contrasted devices. Cameos are rare this fine, and Deep Cameos are exceedingly so. No numerically finer coins are reported at PCGS. Population: 29 in 67 (1 in 67+) Cameo, 0 finer; 3 in 67 Deep Cameo, 0 finer. CAC: 28 in 67, 0 finer (9/17). NGC ID# 276X, PCGS# 83836

16232 1882 PR67 Cameo PCGS. This is a stunning beauty with pale gold toning over parts of the light gray surfaces. A reflective, satiny Superb Gem proof with excellent contrast. The devices are frosty and lustrous. Examples are elusive so fine. Population: 25 in 67 Cameo, 1 finer; 4 in 67 (1 in 67+) Deep Cameo, 0 finer (9/17). Ex: *Long Beach Signature* (Heritage, 9/2006), lot 826; *FUN Signature* (Heritage, 1/2012), lot 5186. NGC ID# 5EBF, PCGS# 83837

16233 1883 PR67 PCGS. CAC. Delicate lavender and champagne hues grace the Superb Gem surfaces of this CAC-approved final-year proof. The strike is sharp, and eye appeal is outstanding. Although a handful of Cameos are listed in the same numeric grade, this 1883 Shield nickel is among the finest proofs numerically certified at PCGS. Housed in a green label holder. Population: 40 in 67 (1 in 67+), 11 PR67 Cameos finer. CAC: 21 in 67, 0 finer (9/17). NGC ID# 276Z, PCGS# 3838

LIBERTY NICKELS

**1883 No Cents Liberty Nickel, MS67
Delicately Toned Top-Grade Example**

16234 1883 No Cents MS67 PCGS. CAC. A boldly struck, nearly flawless Superb Gem No Cents type coin with lavender-blue toning over frosty mint luster. An array of peripheral die cracks is seen on the obverse, but the reverse is in an earlier die state. No Cents Liberty nickels are scarce this fine and unknown finer. In a green label holder with CAC endorsement. Population: 42 in 67 (2 in 67+), 0 finer. CAC: 16 in 67, 0 finer (9/17). NGC ID# 2772, PCGS# 3841

16235 1883 With Cents MS66 PCGS. CAC. A CAC-endorsed Premium Gem in a green label PCGS holder. Were it not for a tiny graze near star 8, an even higher grade might have been achieved. The strike is sharp, and both sides exhibit vibrant, frosty mint luster with no mentionable toning. Population: 97 in 66 (23 in 66+), 7 finer. CAC: 37 in 66, 2 finer (9/17). NGC ID# 22PH, PCGS# 3844

16236 1884 MS65 PCGS. The 1884 Liberty nickel is conditionally scarce finer than MS65. This collectible Gem displays satiny, champagne-tinted mint luster and a bold strike. The usual array of peripheral die cracks is apparent on each side. NGC ID# 22PJ, PCGS# 3845

1884 Liberty Nickel, MS66 Delightful Color and Surfaces

16237 1884 MS66 PCGS Secure. CAC. Unlike the 1883 varieties, which were heavily saved due to the novelty of a new design, the 1884 Liberty nickel is scarce in MS66 and rare so fine with a CAC green label. Higher-grade pieces are extremely rare and none have been CAC-endorsed. This piece has outstanding eye appeal. The design elements are fully struck, and satiny champagne and lavender toning graces the unblemished surfaces. Population: 44 in 66 (11 in 66+), 1 finer. CAC: 21 in 66, 0 finer (9/17). NGC ID# 22PJ, PCGS# 3845

1885 Shield Nickel, MS62 In-Demand Series Key

16238 1885 MS62 PCGS. The 1885 Shield nickel claims a low mintage of 1.5 million pieces, making it an elusive issue in high grade and the acknowledged key to the series. This impressive MS62 specimen exhibits a sharper than average strike, with some individual kernels of corn distinguishable on the ear left of the bow. The lustrous, lightly marked surfaces are enhanced by shades of pale gold and lavender toning. NGC ID# 2773, PCGS# 3846

16239 1886 AU58 PCGS. CAC. A moderately well-struck example of this key date, showing satiny silver-gray luster with no obvious wear points. A partially clogged die produces weakness on the first 8 in the date, but the lower portion of the wreath shows above-average definition. Only a dozen AU58 coins are CAC-approved. CAC: 12 in 58, 53 finer (9/17). NGC ID# 277U, PCGS# 3847

16240 1886 MS63 PCGS. CAC. This satiny Select example displays remarkably sharp design elements and champagne-gray luster. A few light abrasions limit the grade, but none are individually bothersome. A collectible Mint State example of this key Liberty nickel issue. NGC ID# 277U, PCGS# 3847

1886 Nickel, Satiny MS65 Elusive This Fine

16241 1886 MS65 PCGS. CAC. Although not heralded as highly as the 1885, the 1886 Liberty nickel is actually the scarcer of the two key dates in high grade. This CAC-endorsed Gem is satiny with warm champagne-gray toning and no distracting abrasions. Several obverse stars are weakly struck, although the lower wreath shows slightly better definition. Population: 70 in 65 (7 in 65+), 11 finer. CAC: 9 in 65, 10 finer (9/17). NGC ID# 277U, PCGS# 3847

16242 1887 MS66 PCGS. Satiny with attractive champagne toning and no abrasions. This Premium Gem 1887 Liberty nickel displays a bold obverse but is weak on the reverse at the lower-left wreath, as usual. Examples are scarce in this grade and extremely rare any finer. Population: 39 in 66 (4 in 66+), 3 finer (9/17). NGC ID# 22PL, PCGS# 3848

16243 1889 MS66 PCGS. CAC. A conditional rarity at the Premium Gem level, the 1889 Liberty nickel saw an increase in the number of pieces struck per average die over previous years. This piece is fairly well-struck on the obverse save for stars 1 and 2, and some detail shows on the lower wreath details. The surfaces are faintly pebbly and lustrous with an attractive gold-gray appearance. Population: 47 in 66 (5 in 66+), 0 finer. CAC: 20 in 66, 0 finer (9/17). Ex: *Central States Signature (Heritage, 4/2013), lot 1467*. NGC ID# 2775, PCGS# 3850

16244 1890 MS66 PCGS. CAC. Frosty, unabraded mint luster gives this vibrant Premium Gem outstanding eye appeal. A blush of light golden toning appears on each side. The corn ear left of the wreath bow shows the usual weakness, but the stars are sharp. Population: 33 in 66 (9 in 66+), 1 finer. CAC: 11 in 66, 0 finer (9/17). NGC ID# 22PM, PCGS# 3851

16245 1891 MS66 PCGS. CAC. Ex: Frank Thomas. An above-average strike complements frosty, untuned mint luster on this CAC-approved Premium Gem. The 1891 nickel is seldom offered this fine, and higher-grade coins are extremely rare. Population: 33 in 66 (6 in 66+), 2 finer. CAC: 11 in 66, 1 finer (9/17). NGC ID# 2776, PCGS# 3852

16246 1892 MS66 PCGS Secure. This brilliant, radiantly lustrous high-end example displays sharp definition of the stars and wreath, without distracting abrasions in the fields. The 1892 Liberty nickel is usually challenging to acquire in this grade, although the present coin represents a great opportunity for the Registry Set collector to acquire a top-level example. Population: 40 in 66 (5 in 66+), 0 finer (9/17). NGC ID# 2777, PCGS# 3853

16247 1893 MS66 PCGS. CAC. This Premium Gem 1893 showcases about as much eye appeal as one can imagine is possible for a Liberty nickel. Although the corn ear to the left of the wreath bow is a trifle soft, the exceptional preservation and frosty, luminous luster make that strike weakness almost unimportant. A trace of lavender toning on each side is highly appealing. CAC-stickered in an old green label holder. Population: 36 in 66 (4 in 66+), 1 finer. CAC: 16 in 66, 2 finer (9/17). NGC ID# 2778, PCGS# 3854

16248 1894 MS65+ PCGS. CAC. Examples of the 1894 Liberty nickel are scarcely seen in Gem condition, particularly those as overtly high-end for the grade as this piece. Vibrant luster emanates from well-preserved, untuned surfaces. This Gem is needle-sharp and destined for a fine set. NGC ID# 2779, PCGS# 3855

16249 1894 MS66 PCGS. CAC. This frosty Premium Gem displays vibrant cartwheel luster with hints of light golden toning. The lower-left wreath area and several stars are weak, but the outstanding preservation is highly appealing. Finer 1894 Liberty nickels are prohibitively rare. Population: 41 in 66 (8 in 66+), 1 finer. CAC: 16 in 66, 0 finer (9/17). NGC ID# 2779, PCGS# 3855

16250 1895 MS66 PCGS. Vivid shades of powder-blue, peach-gold, and rose-violet patina delicately color this marvelously preserved Premium Gem nickel. Liberty's hair, the stars, and the wreath elements exhibit a nearly full impression. Population: 34 in 66 (3 in 66+), 1 finer (9/17). NGC ID# 277A, PCGS# 3856

16251 1895 MS66 PCGS. CAC. Frosty, original mint luster is permeated with undertones of lavender, gold, and powder-blue beneath a dusting of olive-gold. The corn ear to the left of the wreath bow is slightly soft, but the stars and hair details are well brought up. The 1895 nickel is rare in this grade and almost unknown numerically finer. Population: 34 in 66 (3 in 66+), 1 finer. CAC: 15 in 66, 1 finer (9/17). NGC ID# 277A, PCGS# 3856

1895 Nickel, Luminous MS66 Only One Coin Finer

16252 1895 MS66 PCGS. CAC. Most Uncirculated 1895 Liberty nickels grade MS64 or lower, and Gems are scarce. This Premium Gem is conditionally rare and only a handful of finer pieces are known. Well-struck design elements benefit from smooth, luminous cartwheel luster and uniform pewter-gray toning. Population: 34 in 66 (3 in 66+), 1 finer. CAC: 15 in 66, 1 finer (9/17). NGC ID# 277A, PCGS# 3856

16253 1895 MS66 PCGS. CAC. A conditionally scarce Premium Gem with the coveted and rare CAC endorsement. Frosty cartwheel luster is warmly toned in golden hues, and the design elements are boldly defined. Population: 33 in 66 (3 in 66+), 1 finer. CAC: 15 in 66, 1 finer (9/17). NGC ID# 277A, PCGS# 3856

16254 1896 MS66 PCGS. Tawny iridescence covers the obverse in attractive shades of tan and peach-gold with glimpses of olive and emerald-green. The reverse displays subtly iridescent silver-gray patina. The troublesome ear of corn to the left of the wreath bow notwithstanding, a sharp strike prevails on Liberty's hair, stars, and throughout most of the reverse elements. Abrasions are virtually nonexistent. Neither PCGS nor NGC report any numerically finer examples. NGC ID# 277B, PCGS# 3857

1896 Nickel, Toned MS66 Among the Finest Known

16255 1896 MS66 PCGS. CAC. This CAC-approved Premium Gem is among the finest 1896 Liberty nickels certified and it is conditionally rare as such. Satiny surfaces display concentric multicolor hues that blend into reddish-gold and olive toning overall. The corn ear to the left of the wreath bow is predictably weak, although the stars are better-defined. Population: 25 in 66 (3 in 66+), 0 finer. CAC: 11 in 66, 0 finer (9/17). NGC ID# 277B, PCGS# 3857

16256 1897 MS66 PCGS. Vibrant, sweeping luster dominates this faintly toned and sharply impressed Premium Gem. Even the left ear of corn has exemplary detail. Thorough evaluation locates only inconsequential contact. Population: 27 in 66 (5 in 66+), 1 finer (9/17).

Ex: *Dallas Signature* (Heritage, 7/2006), lot 360; *Central States Signature* (Heritage, 4-5/2009), lot 1403. NGC ID# 22PN, PCGS# 3858

16257 1905 MS66+ PCGS. CAC. A minute fraction of the nearly 30 million Liberty nickels struck in 1905 can match the quality or eye appeal of this blazing, untuned Premium Gem. Exceptionally nice for the grade, as evidenced by the CAC sticker and Plus designation. Strongly struck with several tiny marks on the neck. PCGS shows four finer examples (9/17). NGC ID# 277G, PCGS# 3866

16258 1906 MS66 PCGS. CAC. A deeply struck example with sharp interior detail and a broad wire rim along the upper-right obverse. Satiny surfaces show mint-green and gold toning with satin luster. The 1906 Liberty nickel is conditionally scarce in this grade and unknown numerically finer. Population: 44 in 66 (8 in 66+), 0 finer. CAC: 12 in 66, 0 finer (9/17). NGC ID# 277H, PCGS# 3867

16259 1907 MS66 PCGS. CAC. Champagne and lavender-gray toning graces the satiny surfaces of this Premium Gem type coin. The corn ear to the left of the wreath bow is slightly soft, but the strike is otherwise pleasing despite die erosion that produces metal flowlines in the margins. Population: 45 in 66 (6 in 66+), 1 finer. CAC: 15 in 66, 0 finer (9/17). NGC ID# 277J, PCGS# 3868

16260 1908 MS66 PCGS. Ex: Friend. Faint traces of rose toning warm the vibrantly lustrous surfaces of this Premium Gem 1908 Liberty nickel. The strike is impressively sharp, and no distracting abrasions are. This piece is among the finest at PCGS and is rare as such. Population: 33 in 66 (6 in 66+), 0 finer (9/17). NGC ID# 24FR, PCGS# 3869

16261 1910 MS66 PCGS. CAC. Ex: Palace Collection. An outstanding Premium Gem, this 1910 Liberty nickel has deep gray surfaces with frosty luster beneath pale gold and iridescent toning. Rarely are examples of this issue seen in finer grades, with just one each at PCGS and NGC. Population: 37 in 66 (5 in 66+), 1 finer. CAC: 14 in 66, 0 finer (9/17).

Ex: *Central States Signature* (Heritage, 4/2013), lot 1483. NGC ID# 277L, PCGS# 3871

**1912-D Nickel, Golden-Toned MS66
None Finer at PCGS**

16262 1912-D MS66 PCGS. The 1912-D is a scarce date in MS66 and unknown finer at PCGS. This golden-toned representative displays a solid strike and unabraded satin surfaces. As the only Denver issue in the series, the 1912-D Liberty nickel is a popular issue; top-grade examples are in high demand among Registry Set collectors. Housed in a green label holder. Population: 53 in 66 (4 in 66+), 0 finer (9/17). NGC ID# 277R, PCGS# 3874

16263 1912-S MS64 PCGS. CAC. Golden toning warms the traditional satin luster of this Choice 1912-S Liberty nickel. The strike is above-average for the issue, and only a few light abrasions are seen. The CAC green label is an added appeal that is encountered on few examples of this semikey branch mint issue. NGC ID# 277R, PCGS# 3875

16264 1912-S MS65 NGC. The 1912-S represents the first nickel struck at a branch mint and claims a tiny production of 238,000 coins. This Gem displays a pinpoint impression and glimmering mint luster over each untuned side. Rarely seen finer. NGC ID# 277R, PCGS# 3875

16265 1912-S MS65 PCGS. It took a mere four days to strike the entire mintage of 1912-S nickels totaling only 238,000 pieces. The small mintage was an immediate attraction to collectors and speculators alike. This pleasing Gem example is satin-smooth and lustrous with all of the 1912-S characteristics on full display. The undulating planchet and lightness of strike at the hair are diagnostic of the issue. Likewise, weakness at the bottom-left wreath elements typifies the issue. Wisps of pale-gold patina add eye appeal. Few pieces grade any finer: PCGS reports just 38 coins in a higher numeric grade (9/17). NGC ID# 277R, PCGS# 3875

**1912-S Nickel, Satiny MS66
Among the Finest Certified**

16266 1912-S MS66 PCGS. Other than a handful of Plus- or Star-designated coins in the same numeric grade, there are no 1912-S Liberty nickels certified finer than this Premium Gem. The design elements are fully struck, and the satiny surfaces are free of significant abrasions. Light golden toning warms each side. Population: 37 in 66 (2 in 66+), 0 finer (9/17). NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKELS

16267 1883 With Cents PR67 PCGS. CAC. The 1 and 3 in the date are lightly recut on this Superb Gem proof. Delicate rainbow hues grace the mirrored fields, and the strike is sharp. A hint of cameo contrast is visible on the obverse. Population: 9 in 67, 1 finer; 6 in 67 (1 in 67+) Cameo, 0 finer; 2 in 67 Deep Cameo, 0 finer. CAC: 2 in 67, 0 finer (9/17). NGC ID# 277S, PCGS# 3881

16268 1885 PR65 PCGS. CAC. A popular issue due to the key-date status of its circulation strike counterpart. This Gem proof is sharply struck and shows moderate field-device contrast on each side with mainly brilliant surfaces. Eye appeal surpasses expectations for the grade. Housed in a green label holder with CAC endorsement. NGC ID# 277T, PCGS# 3883

16269 1885 PR66 Cameo NGC. CAC. W.J. Skiles Collection. Proof 1885 nickels have long been popular with collectors because of the absolute and condition scarcity of business strikes. This is a very deeply mirrored example that displays moderate mint frost over the devices. Lightly toned throughout with no obvious or mentionable contact marks. Census: 39 in 66 Cameo (1 in 66+, 3 in 66★), 19 finer. CAC: 26 in 66, 15 finer (9/17). NGC ID# 277T, PCGS# 83883

**1885 Nickel, PR67 Cameo
Popular Date, Conditionally Rare**

16270 1885 PR67 Cameo PCGS. CAC. This CAC-approved Superb Gem is among the finest Cameos certified, with no Deep Cameos as fine at PCGS. Fully struck design elements are frosty and offer modest field-motif contrast amid varying shades of champagne toning. There are no distractions or hairlines. Population: 17 in 67 (2 in 67+) Cameo, 0 finer. CAC: 15 in 67, 0 finer (9/17). NGC ID# 277T, PCGS# 83883

**1889 Nickel, Lightly Toned PR67
Among the Finest at PCGS**

16271 1889 PR67 PCGS. CAC. Delicate ice-blue and champagne hues decorate mirrored fields and satiny devices on this Superb Gem 1889 proof. The strike is full, and no distractions are present. This CAC-approved coin is among the finest at PCGS, making it essential for a Registry Set. Population: 12 in 67, 0 finer; 1 in 67 Cameo, 0 finer. CAC: 6 in 67, 0 finer (9/17). NGC ID# 277X, PCGS# 3887

16272 1890 PR66 Cameo PCGS Secure. CAC. An absolutely stunning Premium Gem Cameo proof, this 1890 Liberty nickel has pristine light gray surfaces with mirrored fields and fully lustrous devices, displaying slight milking overtones on the reverse. Population: 24 in 66 (4 in 66+) Cameo, 4 finer. CAC: 9 in 66, 1 finer (9/17). NGC ID# 277Y, PCGS# 83888

16273 1894 PR66 Cameo PCGS. CAC. Sharp stars and an equally well-defined wreath complement appreciable cameo contrast on this Premium Gem proof 1894 Liberty nickel. The surfaces are brilliant and devoid of abrasions. Few finer examples are known. Population: 23 in 66 (4 in 66+) Cameo, 11 finer. CAC: 14 in 66, 6 finer (9/17). NGC ID# 5EJM, PCGS# 83892

16274 1897 PR67 PCGS. CAC. Beautifully concentric pastel hues deliver lovely rainbow colors on the obverse of this Superb Gem proof, while the reverse displays uniform light golden toning. A sharp strike and a lack of contact marks produce strong eye appeal. Modest cameo contrast is apparent on both sides. Population: 32 in 67 (7 in 67+), 1 finer; 21 in 67 (5 in 67+) Cameo, 3 finer; 1 in 67 (1 in 67+) Deep Cameo, 0 finer. CAC: 11 in 67, 0 finer (9/17). NGC ID# 2787, PCGS# 3895

16275 1898 PR66 Cameo PCGS. CAC. An exquisite Premium Gem Cameo proof, this piece has deeply mirrored fields that frame the sharply defined and fully lustrous devices, yielding excellent field-to-device contrast. There is no toning evident on the light gray surfaces of this beauty. Population: 30 in 66 (2 in 66+) Cameo, 15 finer. CAC: 18 in 66, 8 finer (9/17). NGC ID# 2788, PCGS# 83896

16276 1899 PR67 PCGS. Flawlessly struck, with glittering mirrored surfaces that are delicately accented in lemon-yellow and steel-blue shades. Seldom available in this lofty condition. Population: 13 in 67 (1 in 67+), 1 finer (9/17). NGC ID# 2789, PCGS# 3897

16277 1901 PR67 PCGS. CAC. An extraordinary turn-of-the-century Superb Gem, this lovely nickel displays brilliant proof surfaces with mirrored fields and satin devices beneath delicate lemon-yellow, pale lilac, and light turquoise toning. A few minuscule carbon flecks are noted on each side of this delightful Liberty nickel. The chameleon-like toning changes colors with different light angles. Housed in a green label holder. PCGS has graded one numerically finer example (8/17). NGC ID# 278B, PCGS# 3899

16278 1901 PR67 Cameo PCGS. A total of 1,985 Liberty nickels were struck in proof format in 1901. This Superb Gem ranks among the finest certified examples in the Cameo category, and there are only seven other proofs at PCGS with Deep Cameo designations. Reflective mirrors, frosty motifs, and light golden patina are hallmarks. Population: 11 in 67 (1 in 67+) Cameo, 0 finer (9/17). NGC ID# 278B, PCGS# 83899

1901 Nickel, PR65 Deep Cameo Starkly Contrasted Type Coin

16279 1901 PR65 Deep Cameo PCGS. CAC. PCGS and NGC combined have certified only nine Deep/Ultra Cameo examples of the 1901 proof Liberty nickel. Grade is not so much a concern, as almost all are Gem or better. This PR65 Deep Cameo CAC coin displays stark white-on-black contrast and sharp design elements. A faint trace of light champagne toning is discernible upon close examination. Population: 1 in 65 Deep Cameo, 5 finer. CAC: 1 in 65, 2 finer (9/17). NGC ID# 278B, PCGS# 93899

16280 1902 PR67 PCGS. CAC. Glimmering fields and boldly struck, satiny devices reside amid warm golden toning on this top PCGS-graded non-Cameo proof. Eye appeal is outstanding, as the CAC endorsement indicates. CAC-approved in a green label holder. Population: 19 in 67 (1 in 67+), 0 finer; 10 in 67 Cameo, 0 finer. CAC: 10 in 67, 0 finer (9/17). NGC ID# 278C, PCGS# 3900

16281 1903 PR67 PCGS. CAC. Ex: Groman. A hint of ice-blue toning graces the mirrored fields and satiny devices of this razor-sharp proof. Subtle cameo contrast heightens the eye appeal. The 1903 proof Liberty nickel is conditionally scarce this well-preserved, with or without a Cameo designation. Population: 27 in 67 (1 in 67+), 1 finer; 20 in 67 (3 in 67+) Cameo, 2 finer; 1 in 67 Deep Cameo, 0 finer. CAC: 8 in 67, 2 finer (9/17). NGC ID# 27MY, PCGS# 3901

16282 1905 PR67 PCGS. Magnificent blue, green, violet, and peach-gold toning colors each side. The fields are flashy and completely devoid of contact. Strike detail is unsurprisingly razor-sharp. One of 2,152 proofs struck. Population: 32 in 67 (4 in 67+), 1 non-Cameo finer (9/17). NGC ID# 278F, PCGS# 3903

16283 1905 PR67 PCGS. Lavender border toning surrounds yellow-gold and mint-green interior hues, giving this Superb Gem proof excellent eye appeal and originality. The strike is sharp throughout. No contact marks are seen. Population: 32 in 67 (4 in 67+), 1 finer; 4 in 67 Cameo, 0 finer (9/17). NGC ID# 278F, PCGS# 3903

16284 1906 PR67 Cameo PCGS. CAC. Lovely but subtle pastel patina graces both sides, glints of gold around the obverse stars and near-subliminal light-olive in the centers. The reverse deepens into pinkish-gold and pale green. Close to a full strike. Population: 28 in 67 (3 in 67+) Cameo, 2 finer. CAC: 21 in 67, 0 finer (9/17). Ex: *Central States Signature (Heritage, 4/2011)*, lot 3119. NGC ID# 278G, PCGS# 83904

16285 1907 PR67 PCGS. CAC. Although not designated as such, this piece has light cameo contrast between the fully mirrored fields and satiny devices. The obverse exhibits blue and lilac toning, while the reverse has reddish-gold color. A lovely Superb Gem. Population: 32 in 67 (6 in 67+), 5 finer. CAC: 17 in 67, 0 finer (9/17). NGC ID# 278H, PCGS# 3905

16286 1908 PR67 PCGS. The 1908 claims one of the smallest mintages in the Liberty nickel series with only 1,620 proofs struck. This Superb Gem ranks among the finest non-Cameo examples available. Each side is lightly toned with partly reflective fields and a thin veneer of frost over fully struck devices. Population: 33 in 67 (5 in 67+), 1 finer (9/17). NGC ID# 278J, PCGS# 3906

16287 1908 PR67 PCGS. CAC. This Superb Gem proof type coin is fully struck and satiny with glimmering mirrored fields. Warm golden and cool sky-blue hues decorate each side. Cameos are rare this fine, and no Deep Cameos are reported at PCGS. Housed in a green label holder with CAC endorsement. Population: 33 in 67 (5 in 67+), 1 finer; 7 in 67 (2 in 67+) Cameo, 1 finer. CAC: 18 in 67, 1 finer (9/17). NGC ID# 278J, PCGS# 3906

16288 1909 PR67 PCGS. CAC. Rose-gold and pale olive hues give this Superb Gem proof original appeal, while a hint of field-device contrast shines through on the obverse. The strike is well-executed. Finer 1909 proof nickels are rare. Population: 54 in 67 (2 in 67+), 3 finer; 34 in 67 (3 in 67+) Cameo, 2 finer; 2 in 67 (2 in 67+) Deep Cameo, 0 finer. CAC: 26 in 67, 1 finer (9/17). NGC ID# 278K, PCGS# 3907

16289 1909 PR67+ PCGS. CAC. This nicely detailed Superb Gem proof Liberty nickel has pleasing gold and iridescent toning on both sides with exceptional eye appeal. Design weakness is evident at the lower left part of the wreath as normal for the design. Population: 54 in 67 (2 in 67+), 3 finer. CAC: 28 in 67, 1 finer (9/17). NGC ID# 278K, PCGS# 3907

16290 1911 PR67 PCGS. CAC. Ex: Groman. Light gold toning visits the obverse and reverse surfaces of this Superb Gem proof that displays fully mirrored fields around the sharply defined and lustrous devices. Wisps of pale blue add to the marvelous presentation. Population: 13 in 67 (1 in 67+), 1 finer. CAC: 5 in 67, 0 finer (9/17). NGC ID# 278M, PCGS# 3909

BUFFALO NICKELS

16291 1913-S Type One MS66 PCGS. This frosty Premium Gem is brilliant with a few wisps of pale gold. The centers are well-defined, softening slightly around the edges. The 1913-S Type One Buffalo nickel becomes a major rarity in higher grades. NGC ID# 22PY, PCGS# 3917

16292 1913-D Type Two MS65 PCGS. CAC. This first-year Denver Gem featuring the Type Two design displays daubs of gold coloration over its satiny, nickel-gray surfaces. The hair braid and horn are bold, though the bison's head lacks definition. A lovely original example struck from rotated dies. NGC ID# 254M, PCGS# 3922

16293 1914-S MS65 NGC. The 1914-S is moderately accessible through Gem condition despite the relatively low mintage of 3.4 million coins. This brilliant, softly frosted example is generally well-struck, though the date, LIBERTY, and the bison's head are a trifle soft. NGC ID# 22R6, PCGS# 3926

16294 1915-S MS63 PCGS. CAC. Central weakness is typical for the 1915-S Buffalo nickel and may have resulted in a slight grade reduction as this coin is lovely, featuring light gold toning on each side. CAC: 15 in 63, 53 finer (9/17).

1917 Buffalo Nickel, MS67 Remarkably Rare at This Level

16295 1917 MS67 NGC. From a mintage of more than 51 million coins, the 1917 Buffalo nickel is surprisingly scarce in MS66 with only a couple of hundred pieces certified at NGC and PCGS combined. Those numbers fall to seemingly impossibly low levels in MS67, where the issue becomes conditionally rare. This is a softly frosted Superb Gem, boldly struck and toned in pale shades of lilac and rose. Completely devoid of any singular ticks or flecks. Census: 5 in 67, 1 finer (9/17). NGC ID# 22RD, PCGS# 3934

16296 1917-S MS63 NGC. The 1917-S is a challenging date in high grade. This collectible MS63 coin shows strong eye appeal for the grade with rich multicolor toning that features an olive-gold overlay. The strike is above-average for the issue. NGC ID# 22RF, PCGS# 3936

1917-S Nickel, MS65 FS-401 Two-Feather Variety

16297 1917-S Two Feathers, FS-401 MS65 PCGS. The highest graded example certified by PCGS of this interesting variety, in which die lapping has removed the third feather usually seen behind the neck of the Indian. This is reminiscent of the more famous three-legged 1937-D Buffalo nickel, on which most of the fourth leg was similarly removed. The 1917-S is usually unimpressive in terms of strike and luster; while this piece has much to recommend it, it shares these general traits. Population (for variety): 1 in 65, 0 finer (9/17).

1918/7-D Nickel, FS-101, VF25 Famous 20th Century Variety

16298 1918/7-D FS-101 VF25 NGC. The case could certainly be made that the 1918/7-D Buffalo nickel is the most famous variety of the 20th century, challenging the 1955 Doubled Die Obverse cent and the 1937-D Three-Legged nickel. Golden-olive patina covers this well-circulated key date representative. A few wispy marks appear on the Indian's head. The all-important overdate is strong. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

16299 1919-D MS63 PCGS. Golden tones appear across the obverse in a woodgrain pattern. Otherwise, this satiny Select Uncirculated nickel is toned steel-gray and lilac. For an issue with a mintage of 8 million coins, the 1919-D is surprisingly scarce at this grade level. Incompletely struck on the feathers, bison's head, and denomination. NGC ID# 22RM, PCGS# 3942

1920-D Nickel, Concentrically Toned MS65

16300 1920-D MS65 NGC. Numerous thin die cracks on this Gem 1920-D nickel identify an eroded die state, along with the beginning stages of metal flowlines in the fields. The coin is nonetheless well-struck, despite the reputation of the 1920-D, and has original multicolor toning around the borders that lightens to lavender-blue at the centers. Census: 26 in 65, 3 finer (9/17). NGC ID# 22RR, PCGS# 3945

16301 1921 MS66 PCGS. Sharply struck with blue and gold patina over the highly lustrous surfaces. A small mark is noted just to the right of the bridge of the nose. PCGS has graded 31 numerically finer examples (9/17). NGC ID# 22RT, PCGS# 3947

1921-S Nickel, Scarce MS63

16302 1921-S MS63 NGC. David Lange explains that the 1921-S Buffalo nickel is one of the scarcest issues in the series, usually seen in low to mid-circulated grades and often offered with a variety of problems (i.e. laminations, toning streaks). This Select example has softly frosted luster and pale golden patina with strong strike detail over the centers. The borders show areas of slight incompleteness that do not affect the overall appeal. NGC ID# 22RU, PCGS# 3948

16303 1924-S AU53 PCGS. What the 1924-S lacks in terms of sharpness it makes up for in scarcity. Just 1,437,000 pieces were struck — the second-lowest Buffalo nickel mintage of the 1920s, behind only the 1926-S. This is a smooth-yet-softly struck About Uncirculated example, virtually unmarked, with mint luster glowing beneath attractive, fossil-gray toning. One of the key dates in this popular series. NGC ID# 22RZ, PCGS# 3953

16304 1924-S AU55 NGC. Only 1.4 million nickels were struck at the California branch mint in 1924 — one of the lowest totals in the set. This Choice AU offering is far finer than the average VF30 representative. Remarkably well-struck with wisps of gold color over nickel-gray surfaces. NGC ID# 22RZ, PCGS# 3953

16305 1926-S AU50 PCGS. A key issue in the Buffalo nickel series that is rarely seen in grades higher than VG. This piece has natural light gray surfaces with a hint of iridescent toning. Scattered marks are trivial and grade consistent. NGC ID# 22S7, PCGS# 3959

16306 1926-S AU53 ANACS. The 1926-S Buffalo nickel is the only issue in the series with a mintage lower than 1 million pieces (970,000 coins). This AU example displays good detail despite extensive die erosion that leaves metal flowlines in the fields. Light olive-gold toning graces each side. NGC ID# 22S7, PCGS# 3959

16307 1926-S AU55 ANACS. Some metal flowlines are evidence in the fields, but the sharpness of the strike is unaffected. Satiny olive-gold surfaces show hints of luster and no major abrasions. A pleasing Choice AU example of this semikey San Francisco issue. NGC ID# 22S7, PCGS# 3959

1927 Buffalo Nickel, MS67 Tied for Finest at PCGS

16308 1927 MS67 PCGS. From a substantial mintage of nearly 38 million pieces, the 1927 Buffalo nickel is surprisingly scarce at the MS67 grade level. This delightful Superb Gem exhibits sharply detailed design elements in most areas, with just a trace of softness on the hair above the braid. The impeccably preserved ice-blue surfaces radiate vibrant mint luster throughout. Population: 16 in 67, 0 finer (8/17). NGC ID# 22S8, PCGS# 3960

1927-S Nickel, MS64 Golden Patina

16309 1927-S MS64 NGC. This well-detailed near-Gem exhibits a fully formed horn and a relatively strong tail, though characteristic softness is apparent around the edges. Golden patina covers lightly frosted surfaces. A few ticks on the jaw and hair braid are of little importance. Most examples of the conditionally elusive 1927-S are found in circulated condition. NGC ID# 22SA, PCGS# 3962

16310 1928-S MS65 PCGS. Eye-catching pastel shades of powder-blue and peach-gold deliver fantastic visual appeal to match the excellent preservation of this Gem 1928-S nickel. Typically struck for an S-mint example from the period with radiant luster. Housed in an old green label holder. Population: 84 in 65 (5 in 65+), 13 finer (9/17). NGC ID# 22SD, PCGS# 3965

1930 Nickel, Warmly Toned MS67 Among the Finest Certified

16311 1930 MS67 PCGS. A plentiful issue in lower grades, the 1930 Buffalo nickel is rare in MS67. This golden-toned blazer is among the finest known. Hints of lavender accentuate the eye appeal, and well-struck design elements are free of mentionable abrasions. A true Registry coin and worthy of a premium bid. Population: 37 in 67 (1 in 67+), 0 finer (9/17). NGC ID# 22SH, PCGS# 3969

16312 1936 Doubled Die Reverse, FS-801, MS64 PCGS. CAC. Minor die doubling occurs on all reverse lettering, easily identified by extreme thickness of the letters. PCGS has certified relatively few Uncirculated examples of this variety with attribution. The current Choice example displays brilliant, satiny luster and is devoid of obvious abrasions. The strike is sharp and from fresh dies with no metal flowlines in the fields. Population (FS-801): 5 in 64, 7 finer (6/17). NGC ID# 22SS, PCGS# 38470 Base PCGS# 3977

16313 1937-D Three-Legged, FS-901, AU58 PCGS. Nearly full luster is evident on this light gray and gold toned near-Mint Three-Legged Buffalo nickel. A few scattered marks are evident on each side, as expected since this piece saw a limited time in circulation. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

16314 1937-D Three-Legged, FS-901, AU58 PCGS. An early die impression after the bison's leg was lapped off, showing metal flowlines on each side but not quite to the severely eroded extent seen on most Three-Legged nickels. The rust lumps under the bison's belly confirm the die variety. This piece is well-detailed and shows warm olive-gold, lavender, and powder-blue toning. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

16315 1937-D Three-Legged, FS-901, AU58+ PCGS. Only a touch of rub keeps this razor-sharp, 3-Legged nickel from full Mint State status. All of the design elements are fully rendered except, of course, the most important of all — the bison's right leg, which is blatantly missing from stump to foot. Tinges of turquoise and tan-gold embellish the nickel-gray surfaces. One of just six examples granted the Plus designation at the AU58 level by PCGS (9/17). NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

16316 1937-D Three-Legged, FS-901, AU58+ PCGS. CAC. An attractive near-Mint example, this tripodal Buffalo has a strong strike with excellent design definition. Both sides exhibit vibrant gold toning with splashes of pale blue overtones. As one of the few *Guide Book*-listed varieties, this Buffalo variant enjoys strong demand. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

16317 1937-D Three-Legged, FS-901 — Reverse Wheel Mark — NGC Details. Unc. This is a perennial favorite *Guide Book* variety caused by excessive die lapping. Boldly struck with minor evidence of die erosion. The wheel mark occurs on the bison and is minimally distracting.

16318 1937-D Three-Legged, FS-901 — Improperly Cleaned — NGC Details. Unc. A nickel-gray example with smooth fields but some areas of roughness and porosity among the raised devices, visible on the chief's cheekbone, face, within the hair, and at the back of the neck as well as at the bison's spine and trailing leg. This is a genuine Uncirculated 3-Legged nickel, but compromised (in our opinion) by eroded and failing dies rather than by any overt cleaning.

16319 1937-D Three-Legged, FS-901, MS62 NGC. Concentric bands of vivid rainbow toning visit both sides of this Mint State 3-Legged nickel. The coin is struck from a late state of the dies — which clashed earlier on, and then were famously effaced at the bison's right foreleg by an overzealous Mint employee. The die fatigue is almost as stunning as the toning. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

PROOF BUFFALO NICKELS

1913 Type One Buffalo Nickel, PR64 Sharp Matte Proof Type Coin

16320 1913 Type One PR64 PCGS. This razor-sharp Type One proof displays luminous golden-toned luster and unmarked fields. Only the most trained eye will be able to differentiate this piece from higher-grade examples. The Type One Buffalo nickel proof comes from a mintage of 1,520 pieces, the highest of any issue in the five-year matte proof series, although only by a margin of six coins over the Type Two 1913. NGC ID# 278R, PCGS# 3988

1913 Type One Buffalo Nickel, PR66+ Ideal for Type Purposes

16321 1913 Type One PR66+ PCGS. CAC. Type collectors will want to closely consider this high-end Premium Gem Type One matte proof Buffalo nickel. The strike is full, and the matte surface texture attractively accents the details. Each side shows light golden toning, and there are no bothersome contact marks. Finer examples of this one-year proof type are infrequently seen. NGC ID# 278R, PCGS# 3988

1914 Nickel, Brilliant PR67 Few Pieces Known Finer

16322 1914 PR67 PCGS. The 1914 matte proof is occasionally seen in this grade but is rare finer. The current coin is brilliant, pristine, and fully struck, appearing just about as flawless as when it came out of the coining press more than a century ago. The 1914 is known for its often high quality of strike, and the present example does not disappoint. Population: 96 in 67 (9 in 67+), 11 finer (9/17). NGC ID# 278T, PCGS# 3991

1916 Nickel, Sharp PR66 Key to the Proof Series, Just 600 Struck

16323 1916 PR66 PCGS. Just 600 matte proofs were struck in 1916, eschewed by collectors then, but exceptionally popular now. This is a fully struck Premium Gem with pinpoint definition throughout both sides. Reddish-gold accents gild the silvery nickel surfaces for outstanding eye appeal. Mirrored edges confirm the proof format. NGC ID# 278V, PCGS# 3993

16324 1936 Type One — Satin Finish PR66 NGC. This Satin Finish proof is fully struck and devoid of contact marks. Warm golden toning blankets each side, adding to the eye appeal. Only 4,420 proof Buffalo nickels were struck in 1936, including both the Satin and Brilliant finishes. NGC ID# 278X, PCGS# 3994

16325 1936 Type Two — Brilliant Finish PR65 PCGS. CAC. Olive-gold toning on this Gem proof displays veins of rose-pink and mint-green throughout each side. The strike is full, and the fields display attractive mirroring. Elusive with a CAC green label and original toning. NGC ID# 278Y, PCGS# 3995

16326 1936 Type Two — Brilliant Finish PR66 PCGS. The faintest blue toning is detected on each side of this lovely Premium Gem that exhibits a brilliant mirrored finish in the fields, and satin reflectivity on the devices. This is a lovely example for an advanced specialized set or type collection. NGC ID# 278Y, PCGS# 3995

16327 1937 PR65 PCGS. Gold CAC. Housed in a first-generation PCGS holder, this lovely Gem proof Buffalo nickel exhibits delicate gold toning on both sides that accent the bold strike. More than 3,400 1937 Buffalo nickels are graded PR65 or finer at PCGS and NGC, yet only 25 pieces have earned the Gold CAC assessment. Gold CAC: 16 in 65, 9 finer (9/17). NGC ID# 278Z, PCGS# 3996

16328 1937 PR66 PCGS. A gorgeous Premium Gem proof, this 1937 Buffalo nickel exhibits delicate champagne toning. While a glass reveals myriad microscopic spots, this piece has exceptional eye appeal. NGC ID# 278Z, PCGS# 3996

16329 1937 PR66 PCGS. A beautifully rendered proof with deeply mirrored fields and sharp, satiny devices. A hint of light champagne toning graces the pristine surfaces on each side, delivering strong eye appeal. Housed in a scarce old doily label holder. NGC ID# 278Z, PCGS# 3996

16330 1937 PR66 PCGS. CAC. This Premium Gem proof is razor-sharp with glimmering fields and unmarked surfaces. A hint of light champagne toning graces each side. Housed in a green label holder with CAC endorsement. NGC ID# 278Z, PCGS# 3996

16331 1937 PR66 PCGS. Gold CAC. A stunning Premium Gem proof, this piece remains in its first-generation PCGS holder. Both sides exhibit an exquisite strike with fully mirrored fields and reflective devices, all beneath wispy champagne and pale blue toning. Gold CAC: 9 in 66, 0 finer (9/17). NGC ID# 278Z, PCGS# 3996

JEFFERSON NICKELS

16332 1939 Doubled Monticello, FS-801, MS65 NGC. The doubling on MONTICELLO and FIVE CENTS is wide and dramatic. Lesser doubling exists on UNITED STATES OF AMERICA. This frosted and near-immaculate Gem offers exceptional eye appeal. Translucent gold and lilac shades coruscate with underlying mint luster. We seldom see a nicer representative of this important *Guide Book* variety. Housed in an old, pre-barcode and pre-hologram NGC holder. NGC ID# 22T8, PCGS# 38481 Base PCGS# 4004

16333 1939 Doubled Monticello, FS-801, MS66 PCGS. The reverse is die doubled, most evident on MONTICELLO and FIVE CENTS. A lovely Premium Gem, this piece exhibits light gold and blue toning over satiny luster. Population: 39 in 66 (2 in 66+), 8 finer (9/17). NGC ID# 22T8, PCGS# 38481 Base PCGS# 4004

1943-S Jefferson Nickel, Exceptional MS68 Leading Registry Set Candidate

16334 1943-S MS68 PCGS. Exquisite sun-gold, apple-green, and ruby-red toning endows both sides of this pristine wartime nickel. The strike is unfailingly sharp except for minor incompleteness on the lower steps of Monticello. The eye appeal of silver-content war nickels can be exceptional, and this Superb Gem takes that attribute to its maximum. There are no numerically finer pieces at either service. Population: 2 in 68, 0 finer (9/17). NGC ID# 22TT, PCGS# 4021

SMS JEFFERSON NICKEL

16335 1966 SP67 Deep Cameo PCGS. The Mint abstained from striking proofs from 1965 through 1967, instead issuing so-called Special Mint Sets. This black-and-white Superb Gem nickel is certainly prooflike with Deep Cameo contrast, full strike definition, and excellent preservation. Population: 19 in 67 Deep Cameo, 2 finer (9/17). NGC ID# 27AE, PCGS# 94198

PROOF JEFFERSON NICKEL

1953 Doubled Die Nickel, PR67 Deep Cameo Intense Contrast, Nearly Flawless Mirrors

16336 1953 Doubled Die Obverse, FS-101, PR67 Deep Cameo PCGS. Richly frosted devices contrast with watery, deep-mirrored fields for exceptional contrast. As usual, the doubling on IN GOD WE TRUST is narrow and requires patience to view. *Cherry-pickers'* variety aside, the surfaces of this Superb Gem Deep Cameo proof seem poised for an even higher grade, supported by stunning eye appeal and razor-sharp motifs. Population: 9 in 67 (1 in 67+) Deep Cameo; (Doubled Die): 2 in 67 Deep Cameo, 0 finer (9/17). PCGS# 38548 Base PCGS# 94185

EARLY HALF DIMES

1794 Flowing Hair Half Dime, VF20 V-2, LM-2, Great Problem-Free Example

16337 1794 V-2, LM-2, R.5, VF20 NGC. Attribution points for this rare first-year Flowing half dime die variety include the leaf tip under the center of the U, and the R in LIBERTY mostly right of the forecurls. The reverse was previously paired with a different obverse to strike LM-1, the only variety rarer than this one. Medium gray patina covers each side. Liberty's portrait retains good detail, as does the eagle's right (facing) wing. All legends are bold. Multiple shallow pinscratches are barely detectible. NGC ID# 22ZU, PCGS# 38582 Base PCGS# 4250

16338 1795 V-5, LM-8, R.3, Fine 15 PCGS. Olive, blue, and russet toning in the fields complements light golden patina overall. Wear is even, although strike weakness on the lower hair curls and the eagle's left (facing) wing is evident even at this grade level. A pleasing Flowing Hair type coin. Housed in a green label holder. NGC ID# 22ZV, PCGS# 38592 Base PCGS# 4251

BUST HALF DIMES

16339 1832 V-6, LM-13, R.3, MS65 NGC. This pleasing Gem has attractive light silver-gray surfaces with sharp hair detail, bold stars, and full feathers on the eagle. Both sides exhibit light gold toning with blue accents on the reverse. NGC ID# 232E, PCGS# 38684 Base PCGS# 4279

16340 1834 3 Over Inverted 3, V-5, LM-1, FS-301, R.2, MS65 NGC. This Gem Capped Bust type coin is thoroughly lustrous and unabraded, showing sharp detail at the centers and peripheries. The obverse is mainly ocean-blue with some lighter greenish accents, while the reverse displays more traditional lavender, gold, and aquamarine coloration. Census (all varieties included): 59 in 65 (2 in 65+), 41 finer (8/17). NGC ID# 232G, PCGS# 38705 Base PCGS# 4281

SEATED HALF DIMES

16341 1853 Arrows MS66 PCGS. This luminous Premium Gem shows sharp design definition despite moderate die erosion in the fields. Ice-blue luster features warmer olive-gold overtones across the interiors on each side. Finer 1853 Arrows half dimes are rarely offered. Population: 54 in 66 (10 in 66+), 11 finer (9/17). NGC ID# 233Y, PCGS# 4356

**1859 Half Dime, MS67+
Beautifully Toned, Practically Flawless**

16342 1859 MS67+ PCGS. The Mint struck 340,000 half dimes in 1859 from a new obverse hub designed by Anthony Paquet. A number of examples survive in MS66 and even MS67. Few, however, can match the visual quality of this colorfully toned Superb Gem, showing variegated blue, green, golden-orange, and magenta toning from the centers out. The reverse is decidedly lighter in hue, but no less lustrous. Fully struck and practically pristine. Population: 29 in 67 (17 in 67+), 5 finer (8/17). NGC ID# 233W, PCGS# 4371

16343 1860 MS67 PCGS. V-3b, Flynn-RPD-001. The date is boldly repunched on this variety. A dash of gold toning appears on the shield of this otherwise brilliant and untuned first-year type issue featuring the statutory legend on the obverse. Both sides have frosty luster and excellent design definition. Population: 52 in 67 (7 in 67+), 4 finer (9/17). NGC ID# 2347, PCGS# 4377

16344 1869 MS66 PCGS. A richly toned and well-preserved Premium Gem, with semireflective fields beneath attractive, multicolor iridescent hues on the obverse, coupled with a near-brilliant reverse. The strike is sharp except on the rock near U of UNITED, and a corresponding area on the reverse at the upper left wreath, where Mint-related roller marks and faint planchet striations are present. There are essentially no other marks on the coin. Population: 14 in 66 (3 in 66+), 6 finer (9/17). NGC ID# 234R, PCGS# 4394

16345 1870 MS66+ PCGS. The 1870 half dime is available through MS64, but this high-end Premium Gem is decidedly rare. Boldly struck design elements are surrounded by concentric rainbow toning amid frosty, unabraded luster. Population: 11 in 66 (2 in 66+), 7 finer (9/17). NGC ID# 234T, PCGS# 4396

PROOF SEATED HALF DIMES

16346 1863 PR65 PCGS. CAC. Housed in a first-generation PCGS holder, this Civil War era half dime survives in exceptional condition from a small proof mintage of only 460 pieces. Delicate gold and lilac toning appear on both sides, displaying fully mirrored fields that contrast nicely with the frosty devices. Population: 34 in 65 (1 in 65+), 15 finer. CAC: 11 in 65, 7 finer (9/17). NGC ID# 235Y, PCGS# 4446

16347 1869 PR65 NGC. The 1869 half dime is a relatively plentiful date but one that is scarce in high grade. This Gem example displays a bold strike and glimmering mirrored fields. Lovely blue, lavender, and mint-gold hues appear over each side. The reverse has modest cameo contrast. Census: 36 in 65, 26 finer; 4 in 65 Cameo, 18 finer (9/17). NGC ID# 2366, PCGS# 4452

16348 1873 PR65 PCGS. CAC. Each side of this final-year Gem displays light violet and blue patina. The fields are clean and flashy, and the strike is predictably full. From a mintage of 600 proofs, all with a Closed 3. Housed in an old green label holder. Population: 38 in 65 (1 in 65+), 26 finer. CAC: 7 in 65, 11 finer (9/17). NGC ID# 236A, PCGS# 4456

EARLY DIME

**1807 JR-1 Dime, Choice AU
Final Year of the Heraldic Eagle Type**

16349 1807 JR-1, R.2, AU55 NGC. A single die pair is known for the final year of the Heraldic Eagle design. The same reverse was used to strike thousands of quarter eagles, in addition to the reported mintage of 165,000 1807 dimes. Die bulging near ERTY and clash marks throughout indicate a late die state. Central design details are needle-sharp, softening on the stars and reverse legend. Steel-gray and light blue surfaces display flashes of luster. NGC ID# 236T, PCGS# 38770 Base PCGS# 4480

BUST DIMES

16350 1829 Medium 10C, JR-11, R.4, MS62 PCGS. The design elements of this attractive MS62 specimen are sharply detailed and the surfaces are blanketed in shades of powder-blue, sea-green, and lavender toning, with traces of prooflike reflectivity underneath. The JR-11 is easily located in lower circulated grades, but Mint State examples are elusive. PCGS# 38837 Base PCGS# 84511

16351 1829 Medium 10C, JR-12, R.3, MS62 PCGS. A vertical die crack from the border to the bust bisects the 8 in the date. Varieties JR-11 and JR-12 are the Medium 10C varieties, and JR-11 is slightly scarcer. This JR-12 is an ideal candidate for Guide Book collectors. Both sides show some design weakness, but exhibit full mint luster on the frosty surfaces. Hints of gold toning are evident. NGC ID# 2378, PCGS# 38838 Base PCGS# 84511

16352 1832 JR-1, R.2, MS62 NGC. The C in AMERICA is repunched. The obverse is richly toned in shades of gunmetal-blue and antique-gold, while the reverse is somewhat lighter. Boldly struck on the stars but a touch softer on the middle curls and talons. Seldom offered in Mint State. NGC ID# 237C, PCGS# 38855 Base PCGS# 4521

**1835 Dime, MS64+
JR-9, Repunched 3**

16353 1835 JR-9, R.2, MS64+ PCGS. Smoky peripheries and vibrant centers make this eye-catching Capped Bust dime an attractive selection for a type set, while its high technical grade will satisfy date collectors and the dramatically repunched 3 will appeal to variety specialists. Well-struck and problem-free with steel-gray toning. Population (all varieties): 74 in 64 (4 in 64+), 17 finer (9/17). NGC ID# 237F, PCGS# 38887 Base PCGS# 4527

**1836 JR-3 Dime, MS64
Mint-Fresh Appearance**

16354 1836 JR-3, R.3, MS64 NGC. The relative survivorship of the 1836 Bust dime (1.1 million coins struck) is low compared to other issues in the series. Many coins from the reported mintage were likely dated 1835. Three varieties are known, this one showing the 10 far from the C. in the denomination and a Block 8 in the date. Both sides are strongly detailed with softness limited to Liberty's curls. Brilliant surfaces radiate frosty luster, and few major blemishes are seen. Census (all varieties): 32 in 64 (2 in 64+), 12 finer (8/17). NGC ID# 237G, PCGS# 38890 Base PCGS# 4528

SEATED DIMES

**1837 F-102 Dime, Brilliant MS64
No Stars, Small Date**

16355 1837 No Stars, Small Date, F-102, R.3, MS64 NGC. This Small Date variety shows the base of the 7 centered between two dentils. The reverse die is rotated six degrees and features a crack through UNI. Liberty's head, drapery, and the wreath elements are all strongly detailed. Each side remains virtually brilliant and radiantly lustrous with the slightest hints of gold border toning. A fantastic near-Gem example of the first Seated Liberty dime and the two-year No Stars type. NGC ID# 237R, PCGS# 537638 Base PCGS# 4562

16356 1843-O F-101, R.3, XF40 NGC. The 1843-O is a scarce date that experienced extensive circulation in the 1840s and '50s. Uncirculated examples are prohibitively rare. This lightly circulated example displays lightly marked battleship-gray surfaces with minor high-point wear. Eye appeal is pleasing. Census: 5 in 40, 6 finer (9/17). PCGS# 537816 Base PCGS# 4584

16357 1853-O Arrows AU58 PCGS. CAC. A wonderful example, and hard to find so fine, this piece has original gray, gold, and iridescent toning on each side. Nearly full luster is visible beneath the toning with light high point rub and a few insignificant abrasions. Population: 10 in 58, 11 finer (9/17). NGC ID# 2399, PCGS# 4604

16358 1854 Arrows MS65 PCGS Genuine. A lovely Gem, this 1854 Arrows dime is an excellent candidate for a specialized collection of Liberty Seated dimes, or for a high quality 19th century type set. This piece is brilliant and untoned with strong detail and excellent eye appeal. Die cracks at the lower obverse may aid in variety identification.

**1858 Dime, MS65+
Eye-Catching Toned Gem**

16359 1858 MS65+ PCGS. A sharp Gem Uncirculated piece with beautiful multicolored obverse toning incorporating red and blue, yellow and brown. Obverse blemishes must be carefully sought under magnification. The reverse, smoothly toned in a lovely golden hue, is abraded above the N of ONE — the only marks to speak of. 1858 dimes are often encountered with a poorly struck head; this example is a solid exception. Population: 8 in 65 (1 in 65+), 7 finer (9/17). NGC ID# 238Z, PCGS# 4616

16360 1860-S F-102, High R.4, AU58 PCGS. A toned, satiny near-Mint example, showing original olive-gold, russet, and peach coloration. The design elements are sharp, and neither side exhibits distracting abrasions. The 1860-S is a scarce issue with a mintage of only 140,000 pieces, and Uncirculated coins are rare. Population: 2 in 58, 14 finer (8/17). PCGS# 538147 Base PCGS# 4622

**1873-CC Arrows Dime, VG10
Highly Sought-After Carson City Key**

16361 1873-CC Arrows, F-101, R.4, VG10 PCGS. Given the impossibility of acquiring the unique 1873-CC No Arrows dime, collectors must instead compete for surviving examples of the low-mintage 1873-CC With Arrows issue (18,791 coins). The strong demand and limited supply makes even the most heavily circulated representatives highly sought-after. This well-worn dime is richly toned with a clear date and mintmark. Liberty and the wreath are reduced to outlines. Population: 6 in 10, 50 finer (9/17). NGC ID# 23BH, PCGS# 538326 Base PCGS# 4666

16362 1876 MS67 NGC. Struck from clashed and lapped dies with minor weakness on the wreath bow. Brilliant, frosty interiors cede to vivid amber, violet, and ocean-blue border toning. A few tiny grazes under a loupe do not reduce the grade. The 1876 Seated dime is rare this fine and unknown numerically finer. Census: 10 in 67 (1 in 67+, 1 in 67 ★), 0 finer (9/17). NGC ID# 23CZ, PCGS# 4679

**1878-CC F-101 Dime, MS64
Type One, Doubled Die Reverse**

16363 1878-CC Type One Reverse, Doubled Die Reverse, F-101, R.4, MS64 PCGS. Two die defects appear on Liberty's right arm, and doubling occurs on the final E's in the denomination. The scarcer Type One reverse is distinguished by two points on the left ribbon end. This richly toned near-Gem enjoys a layer of mixed violet and cobalt-blue toning over sharply struck devices and clean fields. Marks are well-hidden. Population (all varieties): 11 in 64, 16 finer (8/17). PCGS# 538637 Base PCGS# 4686

16364 1890-S MS65 NGC. Frosty silver luster shines through the light gold and iridescent toning on both sides of this lovely Gem. Although the mintmark and lower parts of the wreath are weak, the balance of detail on both sides is bold. Census: 17 in 65, 8 finer (9/17). NGC ID# 227N, PCGS# 4705

16365 1891-O F-124a, R.5, MS66 PCGS. Splendid toning showcases delicate powder-blue and lavender centers surrounded by peripheral bands of gold, orange, crimson, and forest-green. The strike is adequate and the surfaces free of detracting imperfections. A heavy die break on the reverse from 10 to 11 o'clock identifies this scarce late die state variety. Population: 13 in 66, 3 finer (8/17).
Ex: *Baltimore Signature* (Heritage, 7/2003), lot 6566. PCGS# 538949 Base PCGS# 4707

PROOF SEATED DIMES

16366 1866 PR64 Deep Cameo PCGS. CAC. F-102, R.3. A die defect between shield lines 6 and 7 distinguishes F-102 from the other proof die, F-101. Pale golden hues complement deeply contrasted, mostly brilliant surfaces with thickly frosted relief elements. A few wispy contact marks appear on each side, but the eye appeal remains excellent. Population: 4 in 64 Deep Cameo, 7 finer. CAC: 3 in 64, 4 finer (9/17). NGC ID# 23CP, PCGS# 94759

16367 1873 Arrows, F-102, R.4, PR64 PCGS. CAC. Die defects on Liberty's leg, reflective fields, and needle-sharp definition help confirm the proof origin of this near-Gem Arrows dime from a mintage of 500 coins. Both sides exhibit blushes of gold and powder-blue, but remain mostly brilliant. Housed in an old green label holder with matching CAC approval sticker. NGC ID# 23DH, PCGS# 539033 Base PCGS# 4769

16368 1879 F-101, R.5, PR65 NGC. CAC. This glimmering Gem proof displays stark, undesignated cameo contrast, complemented by lovely lavender toning on each side. The preservation and eye appeal are equally outstanding. Housed in a prior generation holder and CAC-approved. PCGS# 539042 Base PCGS# 4776

**1881 Dime, Attractively Toned PR67
Rare Fortin-103**

16369 1881 F-103, High R.6, PR67 NGC. Ocean-blue centers are bounded by caramel-gold. Glimpses of lilac-red appear on both sides. Satiny and pristine with reflective fields and a good strike. The rare F-103 was unknown to Awash, and in fact was not reported to Fortin until September 2014. John Dannreuther was the discoverer. He believes that that 50 proofs delivered during the second quarter of 1881 were the F-103 variety. The logotype was entered further right, with an upward slope, relative to the "common" F-101 and F-102 proofs. NGC ID# 23D6, PCGS# 539051 Base PCGS# 4778

**1883 Dime, PR67 Cameo
Rarely Offered So Fine**

16370 1883 PR67 Cameo PCGS. F-103, R.3. The more frequently seen proof die marriage with the date positioned right. This Superb Gem Cameo is well-struck and starkly contrasted, being rare as such in this numeric grade. Champagne-tinted interiors cede to amber and ocean-blue border toning. Eye appeal is exceptional. Population: 8 in 67 Cameo, 2 finer (including one Deep Cameo in PR67) (9/17). NGC ID# 23D8, PCGS# 84780

16371 1886 PR66 PCGS. Subdued gold and light blue toning visits the mirrored surfaces of this Premium Gem proof. Slight design weakness is noted at the upper obverse and lower reverse. Population: 26 in 66 (2 in 66+), 25 finer, including Cameo and Deep Cameo examples (9/17). NGC ID# 23DB, PCGS# 4783

BARBER DIMES

**1892-O Dime, Frosty MS66
Only One Finer at PCGS**

16372 1892-O MS66 PCGS. CAC. This Premium Gem is razor-sharp and frosty with original, untuned mint luster. A sole, small mark on Liberty's cheek is all that prevents an even finer grade. The 1892-O Barber dime is rare this fine and exceedingly so with a CAC green label. Population: 12 in 66 (3 in 66+), 1 finer. CAC: 8 in 66, 1 finer (9/17). NGC ID# 23DL, PCGS# 4797

16373 1893-O MS65 PCGS. A better date in the Barber series and one that is noticeably scarcer in the better grades of Uncirculated. This is a brightly lustrous example whose light golden centers deepen to russet at the margins. Sharply struck. NGC ID# 23DR, PCGS# 4801

16374 1898-S MS64 PCGS. CAC. The mint luster is bright and thickly frosted, as one would expect from a San Francisco product. Each side is almost brilliant and the devices are sharply detailed throughout. Population: 25 in 64, 13 finer. CAC: 6 in 64, 7 finer (9/17). NGC ID# 23E8, PCGS# 4817

1899-S Dime, Toned MS66 Few Coins Known This Fine

16375 1899-S MS66 PCGS. Uncirculated 1899-S Barber dimes are distributed across most grade levels, although pieces as fine as MS66 are rare, and higher-grade examples are extremely rare. This toned Premium Gem shows olive-gold, sea-green, amber, and russet hues. The strike is sharp, and Liberty's cheek is clean. Population: 21 in 66 (8 in 66+), 4 finer (9/17). NGC ID# 23EB, PCGS# 4820

16376 1902 MS66 PCGS. CAC. Even though 21.3 million pieces were produced, there are surprisingly few Gem or finer examples that are known, and no one has put forth a convincing explanation why this is so. Each side displays light gray-rose toning that deepens slightly around the margins. Population: 42 in 66 (20 in 66+), 2 finer. CAC: 6 in 66, 0 finer (9/17). NGC ID# 23EJ, PCGS# 4827

16377 1902-O MS64 PCGS. CAC. Even though 4.5 million pieces were struck, there are surprisingly few Uncirculated examples known of the 1902-O dime. This is satiny example that shows just the slightest gray patina over each side with the devices surrounded by pale golden. Population: 26 in 64 (2 in 64+), 11 finer. CAC: 7 in 64, 3 finer (9/17). NGC ID# 23EK, PCGS# 4828

16378 1903 MS66 PCGS. With a mintage of 19.5 million pieces, the 1903 is generally available in whatever grade is desired. This is a multicolor Premium Gem whose vibrancy is enhanced by the underlying brightness of the mint luster. Population: 14 in 66 (1 in 66+), 2 finer (9/17). NGC ID# 23EM, PCGS# 4830

1903-O Barber Dime, MS65 Conditionally Rare New Orleans Issue

16379 1903-O MS65 PCGS. CAC. In Mint State, this New Orleans issue is seldom found without heavy abrasions. Gems are decidedly rare, and only a handful of finer pieces are known. This coin is sharply struck and satiny with light golden toning. Small areas of the reverse fields appear semiprooflike when tilted beneath a light. Housed in a green label holder. Population: 15 in 65, 7 finer. CAC: 4 in 65, 7 finer (9/17). NGC ID# 23EN, PCGS# 4831

16380 1903-S MS65 PCGS. Housed in a first-generation PCGS holder, this Gem 1903-S Barber dime exhibits satiny silver luster beneath pleasing gold and iridescent toning. An important opportunity for the advanced Barber dime specialist. Population: 8 in 65, 11 finer (9/17). NGC ID# 23EP, PCGS# 4832

1903-S Dime, MS65 CAC-Approved Condition Rarity

16381 1903-S MS65 PCGS. CAC. A satiny Gem with semiprooflike fields and well-struck design elements. Lemon-gold, sea-green, peach, and lavender hues appear on each side. No major abrasions detract from the eye appeal. The 1903-S is a scarce date in Uncirculated condition, and Gems are rare. This CAC-approved coin is among the most eye-appealing examples we have seen in this grade. Population: 8 in 65, 11 finer. CAC: 2 in 65, 6 finer (9/17). NGC ID# 23EP, PCGS# 4832

16382 1904 MS66 PCGS. CAC. While always available in lower circulated grades, the 1904 is surprisingly difficult to locate in the better grades of Uncirculated. The softly frosted mint luster enhances the emerald, rose, and blue toning seen on each side. Sharply detailed. Population: 11 in 66 (2 in 66+), 1 finer. CAC: 8 in 66, 0 finer (9/17). NGC ID# 23GH, PCGS# 4833

1904-S Dime, Semiprooflike MS65 Few Coins Survive This Fine

16383 1904-S MS65 PCGS. The 1904-S Barber dime is a better date in Uncirculated condition, and Gem examples are decidedly rare. This piece is semiprooflike and sharply struck. Original blue, violet, and amber border toning surrounds champagne-tinted interiors. No distracting abrasions are seen. Population: 9 in 65, 9 finer (9/17). NGC ID# 23ES, PCGS# 4834

16384 1905 MS66 PCGS. CAC. Both sides of this delightful Premium Gem exhibit brilliant and frosty silver luster with peripheral gold and blue toning on the obverse, and champagne toning at the reverse border. Population: 11 in 66 (1 in 66+), 4 finer. CAC: 6 in 66, 5 finer (9/17). NGC ID# 24FX, PCGS# 4835

16385 1906-O MS66 PCGS. Brilliant interiors progress toward glints of orange-russet and green tones peripherally. This New Orleans Premium Gem dime is incredible, fully struck. Magnification yields microscopic tips on the neck, but not much else. Population: 21 in 66 (2 in 66+), 9 finer (9/17). NGC ID# 23EZ, PCGS# 4840

**1906-S Dime, Lightly Toned MS66
Few Examples Known Finer**

16386 1906-S MS66 PCGS. CAC. A conditionally rare Premium Gem example of an otherwise plentiful San Francisco issue. This CAC-approved 1906-S Barber dime displays satiny mint luster and sharp design elements. Olive-gold, lavender, and powder-blue hues tone the surfaces, masking any microscopic ticks that prevent an even finer grade. Population: 24 in 66 (4 in 66+), 4 finer. CAC: 15 in 66, 1 finer (9/17). NGC ID# 23F2, PCGS# 4841

16387 1910 MS66 PCGS. CAC. A stunning example for the specialist or type collector, this Premium Gem has champagne-toned surfaces with peripheral iridescence over frosty silver luster. Population: 27 in 66 (2 in 66+), 34 finer. CAC: 10 in 66, 12 finer (9/17). NGC ID# 23FF, PCGS# 4854

**1911 Dime, Toned MS67
An Elite High-Grade Survivor**

16388 1911 MS67 PCGS. CAC. Merely 40 grading events are reported in MS67 or better condition at PCGS and NGC combined for an issue that boasts a mintage in excess of 18.8 million coins. This is one of the elite survivors, destined for a fine set of Barber dimes. Vibrant luster emanates from surfaces dramatically toned in shades of russet, orange, rose, and green patina. Strike detail and preservation are both excellent. A single tick occurs on the 1 in DIME. Population: 25 in 67 (2 in 67+), 2 finer. CAC: 12 in 67, 2 finer (9/17). NGC ID# 23FJ, PCGS# 4857

**1911-S Barber Dime, MS67
None Finer at PCGS**

16389 1911-S MS67 PCGS. This frosty Superb Gem is among the finest 1911-S dimes at PCGS, and only a single piece is numerically finer at NGC (9/17). The obverse shows die lapping at Barber's initial and the ribbons, but the design elements are otherwise sharply rendered on both sides. No abrasions are seen. Population: 10 in 67 (1 in 67+), 0 finer (9/17). NGC ID# 23FL, PCGS# 4859

**1913 Dime, MS67
Tied for Finest at Both Services**

16390 1913 MS67 NGC. Dappled olive-gold, russet, and crimson patina provides color to this otherwise brilliant 1913 Barber dime. The devices display pinpoint detail, including the corn kernels, and the fields are essentially unmarked. Two tiny ticks on the upper cheek and chin prevent an even higher grade for this top-certified Registry candidate. Census: 5 in 67, 0 finer (9/17). NGC ID# 23FR, PCGS# 4863

16391 1913-S MS65 PCGS. An important issue, the 1913-S is scarce in all Mint State grades. This green-label PCGS Gem is a lovely representative that exhibits wisps of champagne toning over its brilliant and highly lustrous silver surfaces. Population: 25 in 65 (1 in 65+), 25 finer (9/17). NGC ID# 23FS, PCGS# 4864

**1913-S Barber Dime, MS66
Low-Mintage San Francisco Issue**

16392 1913-S MS66 PCGS. The 1913-S is a semikey date in the Barber dime series and one that excites many collectors far more than some realize. This cataloger recalls a coin club acquaintance years ago who made it a collecting goal to fill a full roll of the date in problem-free circulated condition. This Premium Gem is far finer than the average 1913-S, being conditionally rare and arguably underappreciated at this level. Frosty luster and unabraded silvery surfaces complement sharp design elements, while a lone russet toning fleck on the R in AMERICA serves as a pedigree marker. Population: 18 in 66, 7 finer (9/17). NGC ID# 23FS, PCGS# 4864

16393 1914-S MS66 PCGS. Ex: Pittman-Law. This lovely Premium Gem exhibits mostly brilliant silver surfaces with splashes of gold at the obverse border. Both sides are sharp with satin luster. Population: 32 in 66 (13 in 66+), 2 finer (9/17). NGC ID# 23FV, PCGS# 4867

16394 1915-S MS65 PCGS. CAC. A rare CAC-approved example of this conditionally scarce Barber dime. The strike is sharp, and the satiny surfaces display light golden toning with no distracting abrasions. Finer representatives are exceedingly rare. Housed in a green label holder. Population: 26 in 65 (1 in 65+), 12 finer. CAC: 4 in 65, 9 finer (9/17). NGC ID# BLAS, PCGS# 4869

1916 Barber Dime, MS67
Among the Finest Certified

16395 1916 Barber MS67 PCGS. CAC. A hint of champagne toning touches the frosty, unabraded surfaces of this Superb Gem final-year type coin. Slight strike weakness is seen on OF AMERICA and the high points of the right wreath branch, but the remainder of the design is well-struck. The 1916 Barber dime is available overall but rarely seen in MS67. No finer representatives are known. Population: 9 in 67 (2 in 67+), 0 finer. CAC: 8 in 67, 0 finer (9/17). NGC ID# 23FY, PCGS# 4870

PROOF BARBER DIMES

1895 Dime, Border-Toned PR67
Rare With CAC Endorsement

16396 1895 PR67 PCGS. CAC. This sharp Superb Gem proof is among the finest non-Cameos at PCGS, and it is conditionally rare as such. Modest field-motif contrast is discernible on each side, with brilliant interiors and borders that show daubs of lavender and blue toning. Eye appeal is excellent. Population: 13 in 67 (1 in 67+), 0 finer; 13 in 67 (1 in 67+) Cameo, 1 finer; 3 in 67 Deep Cameo, 0 finer. CAC: 9 in 67, 3 finer (9/17). NGC ID# 23G8, PCGS# 4879

16397 1897 PR67 PCGS. Deep blue-green and cerise patina graces both sides of this luscious Superb Gem coin, yet it fails to dampen either the luster or the viewer's enthusiasm. An appealing example from this emission of only 731 proof pieces, well struck and nearly distraction-free. Population: 19 in 67, 3 finer; 11 in 67 Cameo, 4 finer; 1 in 67 (1 in 67+) Deep Cameo, 0 finer (9/17). Ex: *Central States Signature (Heritage, 5/2007)*, lot 393. NGC ID# 23GA, PCGS# 4881

16398 1898 PR66 Cameo PCGS. CAC. The Mint manufactured 735 Barber dime proofs in 1898. Production quality was of the highest order, as evidenced by this marvelous, boldly contrasted Premium Gem. The surfaces are mostly brilliant with the slightest indication of pale gold. Great eye appeal. NGC ID# 26KV, PCGS# 84882

16399 1905 PR67 PCGS. A fully struck Superb Gem proof with appreciable Cameo contrast on the obverse. Both sides have original sea-green and deep golden-gray toning that complements the mirroring in the fields. The preservation is outstanding. Proof 1905 Barber dimes are rare this fine. Population: 19 in 67 (2 in 67+), 0 finer; 7 in 67 Cameo (1 in 67+), 0 finer; 1 in 67 Deep Cameo, 0 finer (8/17). NGC ID# 23GJ, PCGS# 4889

MERCURY DIMES

16400 1916 MS67 Full Bands PCGS. CAC. The search of a high-end first-year Mercury dime type coin could easily end with the acquisition of this brilliant Superb Gem. The central bands on the fasces are fully delineated, and the strike is similarly strong elsewhere. Softly frosted and attractive with only 12 finer examples at PCGS (9/17). NGC ID# 23GX, PCGS# 4905

16401 1916-D VG8 PCGS. Original battleship-gray patina gives this VG 1916-D Mercury dime pleasant eye appeal. The surfaces are smooth, and the rims are complete. This issue's small 264,000-coin mintage was a result of the Denver Mint being ordered to cease dime production in late 1916 in order to divert resources into the coinage of millions of Barber quarters. NGC ID# 23GY, PCGS# 4906

16402 1916-D Fine 12 PCGS. CAC. This is the perfect example for the Mercury dime enthusiast on a budget, but for whom quality is paramount. The highest points of the design are well-worn on this Fine representative, yet every design feature remains clear. The date and mintmark are bold. Housed in a green label holder. NGC ID# 23GY, PCGS# 4906

1916-D Mercury Dime, VF30
Low-Mintage Series Key

16403 1916-D VF30 PCGS. An impressive VF30 specimen of this first-year key, from a series-low mintage of 264,000 pieces. The coin offered here displays moderate, even wear on the design elements, with a bold mintmark and the diagonal bands on the fasces still visible. The pleasing lavender-gray surfaces are lightly abraded and the overall presentation is most attractive. NGC ID# 23GY, PCGS# 4906

16404 1918 MS65 Full Bands PCGS. CAC. This fully brilliant and delicately toned Gem 1918 Mercury dime, housed in a first-generation PCGS holder, exhibits bold design features, including fully split central bands on the reverse. PCGS has only certified 55 finer examples in over 30 years of grading services (9/17). NGC ID# 23H5, PCGS# 4917

16405 1918-S MS63 Full Bands PCGS. A charming Select example of this early series issue, with sharply detailed design elements and Full Bands definition on the fasces. The lightly marked, lustrous surfaces are visited by delicate shades of pale gold toning. NGC ID# 23H7, PCGS# 4921

16406 1919-D MS62 Full Bands PCGS. CAC. The obverse die is heavily cracked on this late die state coin, although the strike is nonetheless boldly executed. Satiny luster shows a hint of champagne-gray toning with minimal abrasions for the grade. Eye appeal is excellent. The 1919-D is a slightly better date in Uncirculated condition with Full Bands. NGC ID# 23H9, PCGS# 4925

16407 1920-D MS66 PCGS. This piece possesses blazing, frosty luster with a trace of light golden toning overall. The centers are weakly struck, preventing a Full Bands designation. Non-Full Bands representatives of the 1920-D dime are rare in MS66 or better condition. Population: 12 in 66 (1 in 66+), 1 finer (9/17). NGC ID# 23HC, PCGS# 4930

16408 1920-S MS64 Full Bands NGC. A sharply struck near-Gem with dusky olive-gold toning over satiny mint luster. No distracting abrasions are seen. The 1920-S is seldom offered finer in Full Bands. Census: 40 in 64 (1 in 64+) Full Bands, 29 finer (9/17). NGC ID# 23HD, PCGS# 4933

1921 Dime, MS64 Full Bands Lustrous, Vibrant Surfaces

16409 1921 MS64 Full Bands PCGS. The scant mintage of just 1,230,000 pieces instantly guaranteed the key date status of the 1921 Philadelphia issue. Still, the small number of coins struck did little to prevent overuse of the dies, and as a result most of the mintage is strong at the centers and weaker at the peripheries. This Choice Full Bands example follows that pattern, with texturing in the fields and metal flow lines as well as incompleteness at the lower obverse rim. The central definition is sharp and pleasing, with a sharp portrait of Liberty and fully rounded, split bands on the fasces. There are virtually no post-Mint defects or marks to disturb the brilliant-white, high-luster surfaces. NGC ID# 23HE, PCGS# 4935

16410 1923 MS67 Full Bands PCGS. CAC. The 1923 Mercury dime is a well-made issue, with most high-end examples showing Full Bands definition. This CAC-approved Superb Gem is sharp and lustrous with original golden-russet toning. Tinges of forest-green and violet appear near the borders. No abrasions are seen. Population: 81 in 67 (3 in 67+) Full Bands, 4 finer. CAC: 22 in 67, 2 finer (8/17). NGC ID# 23HG, PCGS# 4939

16411 1924-D MS65 Full Bands NGC. The 1924-D is a scarce issue in high-grade Full Bands, making this Gem highly sought-after. The design elements are sharp, and each side displays softly frosted luster with a delicate champagne hue. Census: 48 in 65 (2 in 65+) Full Bands, 36 finer (9/17). NGC ID# 23HK, PCGS# 4945

16412 1925-S MS64 Full Bands PCGS. Dappled shades of greenish-gray and amber toning visit the lightly marked surfaces of this impressive Choice example. The design elements are sharply detailed, with Full Bands definition on the fasces. NGC ID# 5LX3, PCGS# 4953

16413 1926-S MS62 Full Bands NGC. Full Bands examples of the 1926-S Mercury dime are scarce, as this issue is seldom seen well-struck. The present example displays satiny, brilliant mint luster and remarkable sharpness. Light handling marks define the grade. Census: 9 in 62 Full Bands, 30 finer (9/17). NGC ID# 5LX7, PCGS# 4959

1926-S Dime, MS64 Full Bands Late Die State Obverse, Early Die State Reverse

16414 1926-S MS64 Full Bands PCGS. This mid-1920s San Francisco issue has a reputation for weak strikes and is scarce with Full Bands. Dies were frequently used well-past their normal life span during this period, as is indicated by the cracks and metal flowlines on the obverse of this piece. The reverse is less eroded, producing the sharp Full Bands detail and suggesting a younger die. Both sides are satiny with light golden toning. Population: 51 in 64 Full Bands, 39 finer (9/17). NGC ID# 5LX7, PCGS# 4959

16415 1927 MS67 Full Bands PCGS. A hint of gold toning resides on the obverse of this boldly defined Superb Gem Mercury dime. The reverse also exhibits wispy gold. Here is an outstanding opportunity for the top Set Registry collector of this series. Population: 33 in 67 (2 in 67+) Full Bands, 0 finer (9/17). NGC ID# 5KLC, PCGS# 4961

16416 1928-D MS64 Full Bands PCGS. The 1928-D ranks just outside the top quartile of Mercury dimes with Full Bands definition. Satiny luster enlivens surfaces that exhibit noticeably few major marks for the MS64 grade level. All-brilliant and scarcely seen finer. NGC ID# 23HY, PCGS# 4969

16417 1928-D MS65 Full Bands NGC. A conditionally scarce Gem Full Bands example of this otherwise plentiful Denver issue. The design elements are sharp, and each side displays frosty, brilliant mint luster. Minor strike doubling is evident on the date numerals. Census: 20 in 65 Full Bands, 18 finer (9/17). NGC ID# 23HY, PCGS# 4969

16418 1928-S MS65 Full Bands NGC. Relatively few Gem 1928-S dimes are certified with the Full Bands designation, and finer pieces are genuinely scarce. This coin displays frosty luster and a bold strike. A few light grazes on Liberty's cheek limit the grade. Census: 17 in 65 Full Bands, 12 finer (9/17). NGC ID# 23HZ, PCGS# 4971

16419 1929-D MS67 Full Bands PCGS. CAC. Glistening mint luster engulfs this pristine Full Bands dime in eye-catching ice-blue luster. The extreme outer edges of the peripheral legends show occasional weakness, but the strike is otherwise sharp. No distracting abrasions are present. The 1929-D dime is scarce in this grade and prohibitively rare finer. Population: 62 in 67 (3 in 67+) Full Bands, 2 finer. CAC: 18 in 67, 1 finer (8/17). NGC ID# 5LXC, PCGS# 4975

16420 1930-S MS66 Full Bands PCGS. Blazing surfaces appear all-brilliant at first glance, but they reveal a splash of translucent gold color at over the left side of the reverse. The centers feature pinpoint detail and fully split bands, and the date is strong. Free of overt marks and rare any finer. NGC ID# 84NT, PCGS# 4981

16421 1931-S MS65 Full Bands PCGS. With a mintage of only 1.8 million pieces, the 1931-S is among the more elusive Mercury dime issues of the period in Mint State condition, and Full Bands representatives are scarce in Gem or finer condition. This MS65 example displays frosty ice-blue and pale golden luster, with a few tiny navy accents seen near the obverse rims. Sharp motifs and primarily clean surfaces contribute to the eye appeal. NGC ID# 23J9, PCGS# 4987

16422 1934-D MS67 Full Bands PCGS. This coin derives its high grade designation primarily from the thick mint frost seen over each side, secondarily from the original surfaces that show a faint glimmer of golden toning over the reverse. Fully struck, of course. Population: 54 in 67 (6 in 67+) Full Bands, 0 finer (9/17). NGC ID# 23JB, PCGS# 4991

16423 1935-D MS67 Full Bands PCGS. A difficult dime to locate in high grades and also with full band separation. This is a Superb Gem whose pearl-gray surfaces show almost no abrasions. Bright, satiny underlying luster. Population: 52 in 67 (7 in 67+) Full Bands, 0 finer (9/17). NGC ID# 23JD, PCGS# 4995

**1935-S Mercury Dime, MS67+ Full Bands
Just One Numerically Finer at Either Service**

16424 1935-S MS67+ Full Bands PCGS. CAC. Given the scarcity of Superb Gem 1935-S dimes with Full Bands and the importance of the PCGS Plus designation (as well as CAC endorsement), one can argue that this smoothly lustrous, blazing-white dime is one of the dozen finest-known examples at this point in time. The obverse appears altogether pristine, while a few minuscule ticks on the reverse and a hint of flatness at TES of STATES are the only deterrents to an even finer grade. Population: 10 in 67+ Full Bands, 1 finer (9/17). NGC ID# 23JE, PCGS# 4997

**1936 Mercury Dime, MS68
None Certified Finer With Full Bands**

16425 1936 MS68 Full Bands PCGS. Multicolored iridescence at the upper obverse border expands to faint rainbow hues throughout the lightly toned, frosted surfaces of this immaculate Superb Gem dime. Nearly pristine and fully struck from edge to edge, the fields and devices radiate vibrant silver luster. PCGS and NGC combined report no numerically finer examples. PCGS Population: 20 in 68 (2 in 68+) Full Bands, 0 finer (9/17). NGC ID# 23JF, PCGS# 4999

**1938-D Dime, MS68 Full Bands
Memorable Eye Appeal**

16426 1938-D MS68 Full Bands PCGS. Snowy-white, frosted silver luster dominates the brilliant portions of this uniquely toned Superb Gem dime. A dominant intrusion of electric-blue toning interrupts the frosted brilliance and spawns smaller bits of blue patina at irregular intervals around the margins. A razor-sharp strike and spectacular full, rounded bands complete the nearly flawless quality of this exceptional 1938-D dime. The PCGS population has hardly changed over the past 10 years, with none finer. Population: 13 in 68 Full Bands, 0 finer (9/17). NGC ID# 3DAC, PCGS# 5013

16427 1939-S MS67 Full Bands PCGS. This spectacular Superb Gem exhibits sharply detailed design elements, with Full Bands definition on the fasces. The impeccably preserved brilliant surfaces radiate vibrant mint luster throughout. Population: 49 in 67 (5 in 67+) Full Bands, 1 finer (9/17). NGC ID# 23JT, PCGS# 5021

16428 1940-D MS68 Full Bands PCGS. The surfaces are mostly brilliant with light powder-blue elements centrally and delicate multicolored rim iridescence. Razor-sharp design features are unmarred by grade-limiting abrasions. Population: 25 in 68 Full Bands, 0 finer (9/17). NGC ID# 23JV, PCGS# 5025

16429 1941-D MS68 Full Bands PCGS. Razor-sharp definition is evident on all design elements of this magnificent MS68 specimen, with fully split and rounded bands on the fasces. The impeccably preserved surfaces exhibit vibrant mint luster on both sides. NGC ID# 23JY, PCGS# 5031

16430 1942/1 FS-101 AU58 NGC. CAC. The date is visibly doubled on the 4 and the 2, identifying the popular *Guide Book* variety. This lightly worn and lightly abraded near-Mint specimen is attractively toned in delicate shades of greenish-gold and lavender-gray. NGC ID# 23K4, PCGS# 145473 Base PCGS# 5036

16431 1942/1-D FS-101 AU58 PCGS. Bold underdigits quickly confirm this *Cherrypickers'* Guide variety. A hint of gray-golden color lightly covers still-lustrous, nearly Uncirculated surfaces. The bands lack full separation, but the strike is sharp nonetheless. NGC ID# 23K6, PCGS# 145475 Base PCGS# 5040

**1942/1-D Dime, MS62 Full Bands
Boldly Struck and Scarce**

16432 1942/1-D FS-101 MS62 Full Bands PCGS. Scattered abrasions on both sides keep this Denver piece issue from the Select Uncirculated level, but with full bands and a bold overdate, this dime has much to offer. The obverse has gold and rose toning with darker streaks to the left, while the well-struck reverse has more subtle, mottled toning. The overdate on the Denver issue can best be seen at the 4 of the date. Population: 9 in 62 Full Bands, 38 finer (9/17). NGC ID# 23K6, PCGS# 145476 Base PCGS# 5041

16433 1942-D MS68 Full Bands PCGS. Highlights of sea-green, violet-gray, and amber toning surround the brilliant centers of this delightful MS68 specimen, with sharply detailed design elements, including Full Bands definition on the fasces. The virtually pristine surfaces radiate vibrant mint luster throughout. NGC ID# 23K5, PCGS# 5039

16434 1942-S MS67+ Full Bands PCGS. CAC. The strike is virtually complete with a few areas of trivial softness at the extremities. The bands display complete separation. Light toning covers the obverse, while the other side maintains its original brilliance. Nearly 50 million dimes were struck at San Francisco in 1942. PCGS shows just four higher grading events (9/17). NGC ID# 23K7, PCGS# 5043

16435 1943-D MS68 Full Bands PCGS. The satiny untuned obverse contrasts nicely against the pinkish- and gold-toned reverse, and both sides show a sharp strike and impeccable preservation. Population: 41 in 68 (2 in 68+) Full Bands, 0 finer (9/17). NGC ID# 23K9, PCGS# 5047

16436 1944 MS67+ Full Bands PCGS. Subtle shades of greenish gold toning visit the impeccably preserved surfaces of this Plus-graded Superb Gem, with sharply detailed design elements and vibrant mint luster through out. PCGS has graded four numerically finer examples (9/17). NGC ID# 23KB, PCGS# 5051

16437 1944-S MS67+ Full Bands PCGS. CAC. This is a boldly struck, frosty Superb Gem with blazing untuned luster and pristine surfaces. The Plus designation confirms the outstanding quality among MS67-graded 1944-S dimes. This piece is worthy of consideration for Registry Sets. PCGS lists 11 finer Full Bands representatives. CAC: 63 in 67, 4 finer (9/17). NGC ID# 5A96, PCGS# 5055

PROOF MERCURY DIMES

16438 1941 PR68 NGC. Peppered purple and hazel toning accents the mostly brilliant surfaces. Impressive reflectivity complements the powerfully impressed devices. There are virtually no marks on either side. Census: 61 in 68 (11 in 68★), 2 finer (9/17). NGC ID# 27DM, PCGS# 5076

16439 1942 PR68 PCGS. CAC. A spectacular array of rainbow tones covers much of this exquisite 1942 proof Mercury dime. The central areas remain partly brilliant, surrounded by shades of blue, green, gold, violet, and orange. Not a mark worthy of mention. Population: 89 in 68 (7 in 68+), 1 finer. CAC: 55 in 68, 1 finer (9/17). NGC ID# 27DN, PCGS# 5077

ROOSEVELT DIMES

16440 1947-S MS68 PCGS. Increased interest in Registry building and original multicolor toning should drive demand for this spectacular, top-graded MS68 Roosevelt dime. The obverse displays a complete layer of cobalt-blue, violet-rose, and peach-gold patina. Similar hues encircle brilliant centers on the reverse. Population: 8 in 68, 9 finer, including Full Bands (9/17). NGC ID# 23KP, PCGS# 5087

16441 1959-D MS67+ Full Bands PCGS. Shades of cerulean-blue and burnt-orange toning visit the impeccably preserved obverse surfaces of this Plus-graded Superb Gem, while the reverse remains mostly brilliant. The design elements are sharply detailed, with Full Bands on the torch. PCGS has graded two numerically finer examples (9/17). NGC ID# 23LR, PCGS# 85119

PROOF ROOSEVELT DIMES

16442 1950 PR67+ Deep Cameo PCGS. Razor-sharp definition is evident on all design elements of this Plus-graded Superb Gem, and the deeply mirrored fields contrast profoundly with the frosty devices. The brilliant surfaces are impeccably preserved and eye appeal is terrific. NGC ID# 27EJ, PCGS# 95225

16443 1953 PR69 Cameo NGC. Proof production of Roosevelt dimes reached 128,000 coins in 1953. Cameo representatives are exceedingly scarce, and only a couple of coins have been graded with Ultra Cameo contrast — all at lower levels. This near-flawless white-on-black example is perfect for a top Registry Set. Census: 7 in 69 Cameo, 0 finer (8/17). NGC ID# 27EM, PCGS# 85228

TWENTY CENT PIECES

16444 1875-CC AU58 PCGS. BF-2, R.1. Rich autumn-brown and forest-green toning embraces the obverse periphery. The reverse border displays light tan patina, and the remainder of the coin is brilliant. This momentarily circulated example is smooth except for a mark above the eagle's left (facing) shoulder. NGC ID# 23R6, PCGS# 5297

16445 1875-CC MS62 PCGS Secure. BF-2, R.1. Nearly 75% of the 1875-CC double dimes were struck from this die marriage, which shows the right side of 1 in the date aligned with the shield point and slight recutting of the 5 south of the loop. Brilliant-silver surfaces show a faint overlay of golden-gray patina and bright, frosted mint luster. As usual, the strike is slightly soft at Liberty's knee and shield, yet this example is sharper than normal and the star centers are pinpoint sharp. Housed in a PCGS Secure holder. NGC ID# 23R6, PCGS# 5297

PROOF TWENTY CENT PIECES

16446 1875 PR62 ANACS. Pronounced, undesignated cameo contrast is apparent on each side of this border-toned proof type coin. Lavender and blue peripheries surround sun-gold and silvery interiors, beautifully framing the sharp, frosty devices. Scattered handling marks limit the grade, but the strike is sharp, and eye appeal is exceptional. NGC ID# 27GZ, PCGS# 5303

16447 1875 PR62 PCGS. BF-1, R.1. Milky champagne toning graces mirrored fields on each side of this collectible proof 1875 twenty cent piece. Grade-limiting marks are minor, making this piece ideal for the budget-conscious type collector seeking a nice coin for the grade. NGC ID# 27GZ, PCGS# 5303

1875 Twenty Cent, PR64 Cameo Profound Mirrors

16448 1875 PR64 Cameo NGC. BF-1, R.1. The usual proof die pair with the shield point aligned with the left edge of the 1. About 90% of the 1,200 twenty cent proofs struck in 1875 were from this die marriage. The surfaces on each side of this PR64 Cameo representative are entirely brilliant with profound mirroring in the fields. Die polish lines are seen throughout. The sole post-Mint flaw is a thin mark left of Liberty's head. Census: 13 in 64 Cameo, 29 finer, including Ultra Cameo (9/17). NGC ID# 23X7, PCGS# 85303

16449 1877 — Cleaned — PCGS Proof Genuine. AU Details. From a limited mintage of 510 pieces, this impressive proof specimen shows just a trace of wear on the well-detailed design elements. The surfaces are lightly abraded, but the fields have lost most of their reflectivity, due to cleaning.

**1878 Twenty Cent, PR60
Low Proof-Only Production**

16450 1878 PR60 NGC. BF-1, R.3. A single die pair struck the entire production of 600 pieces for this proof-only issue. Muted deep-gray patina covers the entirety of each side. The design elements are well-struck, as expected, though we note a touch of softness on Liberty's head. Myriad marks, including scattered ticks and wispy flaws, explain the grade. A collectible example of this challenging, final-year twenty cent emission. NGC ID# 27H5, PCGS# 5306

EARLY QUARTERS

16451 1805 B-1, R.4, VF25 PCGS. Tompkins Die State 2/2. The scarce Browning-1 1805 often shows weakness at the top row of field stars and the clouds above, as does this example, yet the overall definition is bold for the VF grade. Pleasing silver-gray surfaces deepen in areas to bluish-gray. A few shallow lines and minor abrasions are scattered across the reverse, but remarkably few marks exist on the obverse. This is a nice midgrade coin with considerable appeal. NGC ID# 23RC, PCGS# 38923 Base PCGS# 531

16452 1805 B-3, R.1 — Obverse Spot Removed — NGC Details. AU. Tompkins Die State 5/2. Unnaturally bright on both sides from the noted spot removal. Little true wear is present, although areas of localized strike weakness are visible on each side; on the obverse, several stars, the E in LIBERTY, and the lower hair curls are incompletely struck, while the reverse shows weakness on the eagle's tailfeathers and on the stars and clouds. No major abrasions are observed.

16453 1806/5 B-1, R.2, Fine 15 PCGS. Tompkins Die Stage 2/3. Original problem-free surfaces display marginal shades of blue, red-violet, and gold that progress to steel-gray centers. The overdate is clear, and good detail remains over the portrait. Exceptionally appealing for the grade. NGC ID# 23RE, PCGS# 38938 Base PCGS# 5315

16454 1806/5 B-1, R.2, VF20 PCGS. CAC. Tompkins Die State 1/3. All but the letter "E" in E PLURIBUS UNUM are readable on this pleasing, golden-gray representative of the 1806/5 overdated quarter. Moderate wear exists to justify the VF grade, with slight weakness at the obverse border. The reverse is a notch sharper. Few marks exist, and the natural patina makes this an ideal collector coin. Housed in a previous generation green label holder with the green CAC endorsement seal. Population: 17 in 20, 101 finer. CAC: 4 in 20, 28 finer (9/17). NGC ID# 23RE, PCGS# 38938 Base PCGS# 5315

**1806/5 B-1 Quarter, VF30
Problem-Free Guide Book Variety**

16455 1806/5 B-1, R.2, VF30 PCGS. CAC. Tompkins Die State 2/3. The 1805 Browning-4 dies were reused — both obverse and reverse — to strike the overdated 1806 Browning-1 quarters. As a result, inherited die wear makes the variety look less-sharp than any actual wear entails. This is an original and attractive VF example with grayish-gold toning that lightens at the centers to silver-gray. Few marks exist, and the motifs are sharply defined for the well-used state of the dies. CAC-endorsed, housed in a previous generation green label holder. Population: 20 in 30, 73 finer. CAC: 3 in 30, 20 finer (9/17). NGC ID# 23RE, PCGS# 38938 Base PCGS# 5315

16456 1806 B-9, R.1, VF25 PCGS. Tompkins Die State 1/2. A strong die crack through 1 in the date is not yet apparent, although a cud above AT in STATES exists to confirm the Tompkins die stage. Walnut-brown surfaces contrast with stone-gray color on the exposed high points. Finely granular surfaces tend to obscure some strike definition, although all of the devices are present and bold for the VF level with the exception of a few field stars. We note a small rim bump outside of star 4. NGC ID# 23RD, PCGS# 38935 Base PCGS# 5314

16457 1807 B-1, R.2, VF20 PCGS. CAC. Tompkins Die State 4/2. The flag of 5 in the denomination is buried in the arrow fletchings to identify the Browning-1 die marriage. As usual, the dentils and edge reeding are missing between stars 6 and 8 at the upper obverse. This is a richly toned brownish-gray example with deep-tan shades on the high points. Strong definition exists throughout both sides for the VF designation. Two minor rim bumps exist on the obverse — one at 12 o'clock, the other at 3 o'clock — although they are of little concern on this CAC-endorsed coin. NGC ID# 23RF, PCGS# 38939 Base PCGS# 5316

BUST QUARTERS

16458 1818 B-2, R.1, XF40 PCGS. CAC. Tompkins Die State 2/1. A diagnostic crack runs from point-to-point stars 10 to 8, above the cap, and nearly to star 7 — a major crack to be sure, but just one stage removed from the perfect state of the dies and thus an earlier die stage. Lovely medium brownish-gray toning with tan overtones embraces sharply struck devices on both sides of this attractive XF coin. CAC endorsement confirms the quality and eye appeal. NGC ID# 23RH, PCGS# 38943 Base PCGS# 5322

16459 1818 B-4, R.2, XF40 PCGS. Tompkins Die State 1/1. Variegated toning occupies the obverse margins and much of the adjacent fields in shades of steel-blue, deep-umber, and amber-gold, while the portrait is silver-gray and only faintly toned. The reverse shows golden accents at the borders and a mostly brilliant surface. Faint lines and tiny marks combine with high point wear to determine the assigned grade. NGC ID# 23RH, PCGS# 38945 Base PCGS# 5322

16460 1818 B-9, High R.5 — Obverse Repaired — NGC Details. AU. A rare variety. The U in UNITED is recut and a spike extends inward from star 2. A heavy die break connects the eagle's wing to the rim through the N in UNITED. This coin is sharply detailed and evenly struck with gold-tinted patina. The area around Liberty's ear is tooled, and the fields exhibit prominent hairlines.

16461 1819 Large 9, B-1, Low R.5, VF35 PCGS. CAC. Tompkins Die Stage 2/1. Nearly two centuries after its production this Choice VF quarter retains its original surfaces with olive patina in the fields and steel-gray hues over lightly worn devices. A few spots of gunmetal-blue patina are also noted. This very scarce variety becomes exceedingly elusive in higher grades. Population: 8 in 35, 31 finer. CAC: 3 in 35, 5 finer (9/17). NGC ID# 23RK, PCGS# 38956 Base PCGS# 5326

16462 1825/4(2) B-2, R.2, AU55 NGC. Tompkins Die Stage 1/1. This is the usually seen variety for the year. Brilliant interiors merge with multicolor toning around the borders on each side. Light friction occurs on the highest points of the portrait and eagle, but the impression is strong. NGC ID# 23RS, PCGS# 38975 Base PCGS# 5336

16463 1828 25 Over 50C, B-3, R.5, VG8 NGC. Tompkins Die Stage 1/1 (as always). A "circulation cameo" example of the very scarce, blundered denomination Browning-3 variety. Light, cream-gray toning on the raised elements contrast boldly with deep, gunmetal-gray fields. Smoothly worn with only a few letters visible within the scroll, this VG example is nevertheless fully outlined on all of the devices with complete rims visible. A pair of tiny reverse rim nicks are the only marks, and they are of little concern for the assigned grade. Census: 3 in 8, 20 finer (9/17). NGC ID# 23RV, PCGS# 38979 Base PCGS# 5343

1834 B-4 Quarter, MS63 Shattered Reverse Die

16464 1834 B-4, R.1, MS63 PCGS. The reverse has several die cracks that are usually seen on even the earliest die states of this plentiful variety. As the only use of the reverse die, some of the reverse cracks probably occurred during the hardening stage before the die actually saw use. This Select Mint State example has satin luster with untoned ivory surfaces and scattered grade-consistent marks. NGC ID# 23RZ, PCGS# 38995 Base PCGS# 5353

1835 B-7 Quarter, MS63 Nearly Makes the Condition Census

16465 1835 B-7, R.2, MS63 PCGS. Tompkins Die Stage 1/4. The upper part of the N and the right part of the M are filled. No period follows the C in the denomination. Low-grade examples of the 1835 B-7 quarter are fairly plentiful, but coins "in EF to AU will present a challenge," according to Steve Tompkins. This Select piece nearly qualifies for the Condition Census. Mainly brilliant interiors turn to shades of olive and gunmetal tones around the borders. The stars and central motifs on each side are well brought-up. An impressive, conditionally scarce Capped Bust quarter. Population (all varieties): 21 in 63, 22 finer (9/17). NGC ID# 23S2, PCGS# 39003 Base PCGS# 5354

16466 1837 B-4, R.3, MS62 ANACS. Golden-brown and russet patina enriches the peripheries. A nicely struck piece with moderate satiny luster and unabraded surfaces. This popular variety is seldom encountered in Mint State. NGC ID# 23S4, PCGS# 39013 Base PCGS# 5356

SEATED QUARTERS

16467 1842-O Small Date Fine 15 PCGS. Briggs 1-A. This is a picture-perfect example of the very scarce Small Date early series key issue. Natural old-silver patina has a two-tone appeal, with lightly toned devices over rich-gray fields. The definition throughout both sides exceeds the Choice Fine grade, with LIBERTY fully readable on the shield and about 60% of the wing feathers defined. Full rims and unabraded fields make this an ideal collector coin, sure to attract many bidders. NGC ID# 23SN, PCGS# 5403

16468 1853 Arrows and Rays MS62 PCGS. The single year subtype of the Seated Liberty series is extremely popular with type collectors, and demand remains strong for all Mint State grades. Strike weakness is evident at the centers. This piece has frosty silver luster with inconsequential grade-consistent marks. NGC ID# 23U4, PCGS# 5426

16469 1853 Arrows and Rays MS62 PCGS. CAC. One could hardly imagine a more original example of this popular single-year type. Violet and peach gold patina drapes the entire obverse and surrounds brilliant centers on the reverse. Boldly struck on the stars, head, and feathers. Encapsulated in an old green label holder with CAC approval. NGC ID# 23U4, PCGS# 5426

1853 Arrows and Rays Quarter, MS64 Great Type Representative

16470 1853 Arrows and Rays MS64 PCGS. The Briggs reference describes the 119 obverse dies and 120 reverse dies needed to accomplish a substantial mintage of more than 15 million pieces — the second-highest mintage of the long series, exceeded only by the 17.8 million quarters produced in 1876. This lustrous example is boldly struck and lightly toned, with silvery surfaces and golden-gray overtones. A great selection for type. PCGS has seen only 36 submissions in higher numeric grades (9/17).

Ex: Long Beach Signature (Heritage, 6/2014), lot 3705; Houston Signature (Heritage, 12/2014), lot 3981. NGC ID# 23U4, PCGS# 5426

**1853 Arrows and Rays Quarter, MS64
Elusive CAC-Approved Example**

16471 1853 Arrows and Rays MS64 PCGS. CAC. A satiny near-Gem that is within the reach of many Seated Liberty type collectors. The strike is a little weak on the eagle's left (facing) leg but is sharp elsewhere. Champagne and russet toning on each side masks a few stray abrasions. PCGS lists only 36 finer representatives, and the CAC population is similarly small. CAC: 29 in 64, 11 finer (9/17). NGC ID# 23U4, PCGS# 5426

16472 1854-O Huge O, Briggs 1-A, FS-501, Fine 15 PCGS. The mintmark was apparently cut into the die by hand on this popular and scarce variety. The present coin displays good detail for the grade and light gray patina overall. All of LIBERTY is clear except the L. Population: 9 in 15, 47 finer (9/17). NGC ID# 23U7, PCGS# 395933 Base PCGS# 5434

**1860-S Quarter, XF Details
Famously Rare in High Grades**

16473 1860-S — Repaired — PCGS Genuine. XF Details. Briggs 1-A. The scarcity of the 1860-S quarter is undeniable. Specialists in this series immediately associate the date with the famous Gray-Gardner coin in MS61 — the only known example in mint condition. Perhaps a few hundred coins survive in all, most in lower circulated grades. This piece enjoys above-average detail with a bold shield and crisp feathers. Both sides are untuned. Tooling to remove marks in the fields explains the Details grade. Ex: Public Auction (Stack's, 4/2003), lot 1371, flip included.

16474 1867 VF35 PCGS. Briggs 1-A. On the reverse, a die scratch connects the ribbon to the eagle's left (facing) wing. This coin is well-detailed for the VF grade level, and the surfaces display pleasing olive-gray and lavender-gold toning. A few scattered abrasions are consistent with the grade. Population: 7 in 35, 56 finer (9/17). NGC ID# 23UD, PCGS# 5470

16475 1869-S XF45 PCGS. Briggs 1-A. A Choice XF specimen of this popular branch mint issue, from a mintage of 76,000 pieces. The well-detailed design elements show only light wear and the silver-gray surfaces are lightly abraded. Traces of a misplaced date show in the denticles below the 69. Population: 14 in 45 (1 in 45+), 15 finer (9/17). NGC ID# 442N, PCGS# 5475

16476 1874-S Arrows MS64 PCGS. Briggs 1-A. The short-lived Arrows (With Motto) type is a one-year necessity for both series and type collectors. This near-Gem example displays colorful iridescent on the obverse over brilliant-silver surfaces, with a faint golden hue over an equally lustrous and frosted reverse. The strike is quite sharp throughout. Population: 64 in 64 (1 in 64+), 91 finer (9/17). NGC ID# 23VY, PCGS# 5495

**1877 Quarter Dollar, MS67+
Lovely Border Toning**

16477 1877 MS67+ NGC. An outstanding With Motto, No Arrows type coin, this Superb Gem 1877 Seated Liberty quarter displays sharp central and peripheral definition and frosty, original mint luster. Brilliant centers cede to violet and ocean-blue border toning. No abrasions distract. Census: 38 in 67 (4 in 67+, 6 in 67 ★), 9 finer (9/17). NGC ID# 23V5, PCGS# 5504

16478 1880 MS64 PCGS. Briggs 1-A. This is a sharp near-Gem with hints of light golden toning over otherwise brilliant surfaces. The fields are semiprooflike, and a couple of ticks on Liberty's bust are the only obvious abrasions. A nice With Motto type coin. NGC ID# 23VC, PCGS# 5512

PROOF SEATED QUARTERS

16479 1860 PR64 PCGS. Briggs 9-H. This was the first year for which the Mint implemented a proofing fee, reducing demand for the 1,000 coins struck and resulting in 458 pieces being melted at the close of the year. Mixed shades of blue, violet, and gold appear throughout this near-Gem Seated quarter. The stars are always incomplete and not a result of a weak impression. NGC ID# 23WM, PCGS# 5556

16480 1862 PR64 PCGS. Briggs 5-E. One of 550 proofs struck, this brilliant example shows a slight encroachment of faint golden-tan toning. The raised motifs retain much frosted contrast with the glassy fields, although the near-Gem grade lacks any mention of cameo contrast. The strike is consistently sharp throughout both sides. Population: 45 in 64, 22 finer (9/17). NGC ID# 23WP, PCGS# 5558

16481 1864 PR63 PCGS. CAC. A collectible proof No Motto type coin, showing light golden toning and modest field-device contrast. Scattered hairlines limit the grade but pose little distraction. The CAC endorsement heightens the appeal. Only 470 proof quarters were struck in 1864. NGC ID# 23WS, PCGS# 5560

16482 1867 PR64 Cameo NGC. Briggs 2-B. Cobalt-blue, magenta, lavender, and golden-tan patination runs over both sides of this lovely near-Gem. Both sides exhibit outstanding Cameo contrast and razor-sharp devices. A few trivial handling marks define the grade. Census: 15 in 64 Cameo (1 in 64 ★), 16 finer; 0 in 64 Ultra Cameo, 1 finer (9/17). NGC ID# 23WY, PCGS# 85566

**1871 Seated Quarter, PR66
Richly Toned**

16483 1871 PR66 PCGS. Briggs 1-A. Intensely toned green, blue, and violet on the obverse with a small window of silver-frost hints at strong field-device contrast. The reverse has similar hues, better reflectivity, and additional peach color. A Premium Gem proof with great charm. Population: 5 in 66 (1 in 66+), 0 finer; 3 in 66 Cameo, 3 finer; 1 in 66 Deep Cameo, 0 finer (9/17). NGC ID# 23X4, PCGS# 5570

16484 1872 PR65 PCGS. Briggs 3-C. Shades of pale gold and cerulean-blue toning visit the well-preserved surfaces of this impressive Gem, from a proof mintage of 950 pieces. The design elements are well-detailed and the fields are deeply reflective, under the patina. NGC ID# 3TWH, PCGS# 5571

16485 1874 Arrows PR64 NGC. Briggs 5-D. A wormlike die scratch from the upper-left shield edge into the left (facing) wing feathers is an unusual marker for a proof die, but diagnostic on the 1874 Arrows proofs. This glassy-mirrored proof is nearly brilliant with a whisper of pale-gold patina at the central obverse. A few delicate lines and areas of minor, faint obverse cloudiness are noted, yet this moderately contrasted proof easily achieves its near-Gem grade level. Census: 84 in 64 (2 in 64+, 1 in 64★), 69 finer (9/17). NGC ID# 23XS, PCGS# 5575

16486 1874 Arrows PR64+ NGC. A Plus-graded Choice proof representative of the short-lived Arrows design, from a limited mintage of 700 pieces. This coin exhibits sharply detailed design elements and hazily reflective fields with a few minor hairlines and contact marks. NGC ID# 23XS, PCGS# 5575

16487 1877 PR66 PCGS. A die lump near the T in TRUST confirms this is a different tail die than the two proof reverses listed by Briggs. Premium Gem surfaces offer deep mirroring and sharp design elements. Sea-green toning blankets the obverse, while the reverse exhibits near brilliance with appreciable cameo contrast. NGC ID# 23X9, PCGS# 5578

16488 1880 PR65 PCGS. CAC. As the Philadelphia Mint and its branches concentrated on the coinage of silver dollars, mintages for the subordinate silver denominations were greatly reduced, although proof production remained relatively constant. This Gem, housed in a first-generation PCGS holder, has brilliant silver surfaces with peripheral iridescence. NGC ID# 23XC, PCGS# 5581

BARBER QUARTERS

1893 Quarter, Sharp and Colorful MS66+

16489 1893 MS66+ PCGS. Interest in saving examples of the 1893 Barber quarter was not nearly as widespread as it was for the first-year 1892. Consequently, Premium Gems are rarely seen, especially with a Plus designation. This fully struck example maintains cream-gray centers with surrounding shades of gold, blue, and violet patina. Eye appeal is excellent, and both sides appear unmarked. Population: 16 in 66 (5 in 66+), 1 finer (9/17). NGC ID# 23XW, PCGS# 5604

16490 1893-S MS64 PCGS. Sharply struck on the design elements and covered in a thin veneer of milky-champagne color. A few grade-defining marks are noted on Liberty's cheek. The 1893-S is typical of most S-mint Barber quarters, in that the majority of the coins produced saw heavy or terminal circulation. As a result, the present coin is considerably rarer than the original mintage of 1.4 million pieces might imply. Population: 20 in 64, 17 finer (9/17). NGC ID# 23XY, PCGS# 5606

16491 1894-S MS65 PCGS. CAC. Much of the initial die polish remains, imparting a bright semiprooflikeness to the fields on each side. Strike details are crisp throughout, as one would expect. A significant amount of brilliance is still seen over each side with dabs of golden-russet mostly seen around the margins. Population: 19 in 65, 6 finer. CAC: 3 in 65, 4 finer (9/17). NGC ID# 23Y3, PCGS# 5609

16492 1896 MS66+ PCGS. CAC. Uncirculated 1896 Barber quarters are available in the context of the series through MS65, but finer pieces are rare. This high-end Premium Gem with CAC endorsement is radiantly lustrous and frosty with a solid strike. A thin diagonal line on Liberty's chin is all that prevents an even finer grade. Mint-green, rose-gold, and champagne hues adorn the luminous surfaces. Population: 13 in 66 (4 in 66+), 6 finer. CAC: 7 in 66, 7 finer (9/17). NGC ID# 23Y7, PCGS# 5613

**1896-O Quarter, MS64
Scarce Issue in the Barber Quarter Series**

16493 1896-O MS64 NGC. Of this issue, David Lawrence (1994) notes: "Very scarce in Fine and above." This should come as no surprise to students of the Barber quarter series, since the majority of the 1.4 million coins delivered by the New Orleans Mint this year entered circulation and remained there. This fortunate survivor is free of the abrasions often associated with the MS64 grade. The outward appearance is one of frosty-white brilliance, save for a faint grease streak (as struck) in the obverse field area just to the right of Liberty's mouth. Well struck for an O-mint issue and exceptionally appealing for the grade.

Ex: Superior 10/03; Richard J. Chouinard Collection of United States Coins, Part Two / Long Beach Signature (Heritage, 2/2005), lot 6604, where it realized \$2,530. NGC ID# 23Y8, PCGS# 5614

16494 1901-O XF45 PCGS. CAC. The 1901-O Barber quarter plays second fiddle to the more famous 1901-S but is a semikey in its own right. Partial luster issues from the borders near the star recesses and legends. Each side is well-detailed with light, even silver-gray color. NGC ID# 23YP, PCGS# 5629

16495 1901-S AG3 PCGS. The obverse rim is complete and not merged with any of the peripheral elements, while smooth wear has eliminated any marks or abrasions to their minimal remnants. Close to three-fourths of the reverse legend is visible before blending into the worn-smooth edges. The all-important S mintmark is filled but distinguishable. Only trivial imperfections exist anywhere on the coin, which is high-end for its About Good grade level. NGC ID# 23YR, PCGS# 5630

16496 1901-S AG3 PCGS. While the internal details are mostly flat, the obverse of this pleasing pewter-gray piece has a complete rim that is not merged into any of the peripheral design elements. The reverse border is merged into the tops of about half the letters. There are no marks aside from the trivial circulation marks acquired over many years of use in commerce. NGC ID# 23YR, PCGS# 5630

16497 1913-S VG8 NGC. CAC. A clear mintmark, defined rims, and readable L and Y in LIBERTY characterize the grade on this CAC-approved 1913-S Barber quarter. An old mark in the field near star 7 is the only distraction, and it is minor. The surfaces display original battleship-gray patina. NGC ID# 23ZW, PCGS# 5666

16498 1916-D MS66 PCGS. CAC. This series-ending Denver Mint Barber quarter is also the most abundant issue and an obvious candidate for type. This dazzling, CAC-endorsed example is razor sharp and blindingly brilliant. A healthy dose of mint frost adds to the radiance. The 1916-D becomes scarce at the Premium Gem level, and PCGS recognizes just 18 pieces in a numerically finer grade (9/17). CAC: 61 in 66, 10 finer (9/17). NGC ID# 2426, PCGS# 5674

PROOF BARBER QUARTERS

16499 1903 PR64 Cameo PCGS. Once the Philadelphia Mint began operations at the third physical building in that city, proof coins were usually issued without contrast, mint officials believing the cameo look was be less desirable. Today, examples from the early 20th century with any degree of contrast are elusive. This brilliant and untuned Choice Cameo proof exhibits fully mirrored fields and moderate luster on the devices. Population: 23 in 64 (7 in 64+) Cameo, 52 finer (9/17). NGC ID# 242J, PCGS# 85689

16500 1904 PR66 PCGS. Due to the extreme rarity of Cameos in high grade, the 1904 proof Barber quarter is most heavily collected in high-end non-Cameo grades. This toned Premium Gem features lavender, gold, and gunmetal-blue toning over unmarked surfaces. The strike is full. NGC ID# 242K, PCGS# 5690

16501 1910 PR67 PCGS. From a low proof mintage of just 551 pieces, this fully struck Superb Gem displays profoundly deep mirroring in the fields with a heavy layer of frost over the devices. The obverse showcases beautifully intermingled hues of olive-gold, lavender, sea-green, and sunset-pink, while the reverse is awash in swirling golden-gray color. Close scrutiny fails to reveal even wispy hairlines beneath the lovely patina, leaving this coin with truly incredible appeal. NGC ID# 242S, PCGS# 5696

1911 Quarter, PR67 Cameo Delicately Toned, Conditionally Scarce

16502 1911 PR67 Cameo NGC. Contrasted 1911 proofs are rare in Superb Gem condition, as the population reports and auction data indicate. This champagne-tinted Cameo is nearly flawless in preservation and shows only a touch of strike weakness, on the reverse fletchings. The depth of mirroring in the fields is significant. Census: 13 in 67 Cameo (3 in 67 ★), 14 finer; 2 in 67 Ultra Cameo, 3 finer (9/17). NGC ID# 242T, PCGS# 85697

STANDING LIBERTY QUARTERS

16503 1917 Type One MS66 Full Head PCGS. Brilliant-white luster with fully formed devices. This issue is often seen well-struck, and this piece is no exception. However, it is unusual to see one so pure-white with only the most trivial imperfections. The specialist of this series will appreciate the remarkable "pop" that this coin delivers even at arm's length.
Ex: Central States Signature (Heritage, 4/2006), lot 1606. NGC ID# 242Z, PCGS# 5707

16504 1917 Type One MS66 Full Head PCGS. CAC. Intense mint luster illuminates frosty, remarkably well-preserved surfaces on this CAC-approved Premium Gem Full Head type coin. The obverse is frost-white, while the reverse displays a dusting of sea-green toning. Eye appeal is generous, as is the potency of the luster. NGC ID# 242Z, PCGS# 5707

16505 1917-D Type One MS66 Full Head PCGS. A sharp strike and unabraded surfaces are the hallmarks of this Premium Gem type coin, although mottled gold, sea-green, and lavender-gray toning also contributes to the visual appeal. A glistening cartwheel effect reveals itself when rotated beneath a light. PCGS has seen only 28 finer Full Head representatives (8/17). NGC ID# 2432, PCGS# 5709

16506 1917 Type Two MS66+ Full Head PCGS. The 1917 Type Two quarter is often seen with a sharp Full Head, although the date numerals are seldom also full. This high-end Premium Gem shows both areas in bold detail and includes satiny mint luster with a trace of iridescence. There is some weakness along the right-hand obverse border beads. No major abrasions are seen. PCGS reports 15 finer Full Head coins (9/17). NGC ID# 2434, PCGS# 5715

16507 1917 Type Two MS66 Full Head PCGS. CAC. This is a boldly struck, lustrous example from lightly rusted dies that show fine texture on the obverse. Daubs of blue and russet toning appear near the rim on the left-hand borders, leaving the majority of each side with delicate champagne tint. PCGS lists only 15 finer Full Head representatives (9/17). NGC ID# 2434, PCGS# 5715

16508 1918-D MS65 PCGS. A frosty, unabraded Gem that shows better surface preservation than some other MS65 coins that we have handled. Liberty's head is about 90% complete, although the shield rivets are predictably weak. A dusting of champagne toning blankets each side. Population: 68 in 65 (2 in 65+), 30 finer (9/17). NGC ID# 2438, PCGS# 5722

16509 1919-D MS63 PCGS. This Select 1919-D is quite appealing for the issue, showing satiny mint luster and varying degrees of sea-green, russet, and golden toning. Abrasions are minimal for the grade. As usual for the 1919-D, Liberty's head and the date numerals are flat, but the shield rivets on this piece show above-average definition. NGC ID# 243C, PCGS# 5730

16510 1920-D MS64 PCGS. The reverse is uncommonly sharp for a 1920-D quarter, although some weakness is visible on the obverse on Liberty's left (facing) thigh and the shield rivets. Head detail is about 70%. Other than a dash of olive and peach toning at the upper obverse border, this satiny Choice example is slate-gray. No major abrasions are seen. NGC ID# 243F, PCGS# 5736

16511 1920-S MS64+ PCGS. CAC. A generous portion of luminous satin luster engulfs this golden-toned near-Gem and contributes to its outstanding visual quality. Separated shield rivets and bold date numerals are a welcome and uncommon characteristic for the 1920-S, although Liberty's head is traditionally weak. Finer 1920-S quarters are elusive. NGC ID# 243G, PCGS# 5738

16512 1921 AU58 PCGS. With a mintage of 1.9 million coins, the 1921 stands among the popular semikeys in the Standing Liberty quarter series. Subdued luster glimmers from bright blue surfaces. The chainmail, rivets, and shield lines are well-detailed, while the date and head are slightly soft. Friction is barely visible. NGC ID# 243H, PCGS# 5740

16513 1921 MS64 PCGS. CAC. This well-struck near-Gem displays strong chain mail, rivets, and vertical lines of the inner shield. Glowing luster emanates from the silver-gray surfaces that reveal just a couple of grade determining marks on the eagle. The 1921 is popular as a relatively low-mintage piece less than 2 million. NGC ID# 243H, PCGS# 5740

16514 1923-S — Cleaned — PCGS Genuine. Unc Details. Collectors are always in search of the elusive 1923-S Standing Liberty quarter (only 1.3 million coins struck). This piece has Uncirculated sharpness with trivial softness on rivets 3 and 4. Muted, charcoal-gray patina is suggestive of a cleaning.

1923-S Quarter Dollar, MS65 Incredibly Eye-Appealing

16515 1923-S MS65 PCGS. This Gem key-date Standing Liberty quarter displays outstanding satin luster with daubs of olive-gold toning that attest to the originality of the surfaces. Liberty's head is about 90% complete, and the date and toes are sharp, as well as the stars and eagle's feathers. The shield rivets show traditional weakness. The obverse die exhibits heavy clash marks around Liberty's legs and die polishing lines in the fields; the reverse is a fresh die without damage. Housed in an old green label holder. NGC ID# 243K, PCGS# 5744

16516 1923-S AU58 Full Head PCGS. Just a trace of wear shows on the high points of the design elements, with just a touch of softness on a couple of shield rivets and Full Head definition on Liberty. The lustrous brilliant surfaces are lightly abraded. NGC ID# 243K, PCGS# 5745

16517 1924-S MS64 Full Head NGC. A well-struck example with sharp date numerals, although lacking completeness on the shield rivets. Satiny surfaces show die polishing lines and clash marks, as made. Flecks of blue, violet, and amber-orange toning appear on each side. One mentionable abrasion is seen on Liberty's knee. Census: 59 in 64 (2 in 64+) Full Head, 39 finer (9/17). NGC ID# 243N, PCGS# 5751

16518 1925 MS66 Full Head PCGS. An unusually sharp example that combines a Full Head with separated toes and mostly defined shield rivets. Satiny mint luster on each side yields light golden toning but few signs of surface contact. Higher-grade 1925 quarters are significant rarities. Population: 83 in 66 (3 in 66+) Full Head, 13 finer (9/17). NGC ID# 243P, PCGS# 5753

16519 1925 MS66 Full Head PCGS. CAC. Warm olive-gold toning blankets frosty, almost unabraded luster on this Premium Gem Full Head 1925 quarter dollar. The head, shield, toes, and stars are well-defined, bringing this piece as close to a full strike as the 1925 is typically seen. Housed in a first generation holder. Population: 83 in 66 (3 in 66+) Full Head, 13 finer. CAC: 14 in 66, 4 finer (9/17). NGC ID# 243P, PCGS# 5753

16520 1926-S MS64 PCGS. A satiny near-Gem with rose-gold toning over minimally marked surfaces. Die polishing lines remain visible in the fields. As usual for the 1926-S, Liberty's head, the shield rivets, and the eagle's breast exhibit minor strike softness. This issue is far more elusive in high grade than its mintage of 2.7 million coins would suggest. NGC ID# 4462, PCGS# 5758

16521 1927 MS66 Full Head PCGS. This gold-tinted Premium Gem displays full sharpness on Liberty's head and also has pronounced definition on the shield rivets and the eagle's breast feathers. No major abrasions are observed. Finer Full Head coins are rarely offered. Population: 68 in 66 (9 in 66+) Full Head, 7 finer (9/17). NGC ID# 243U, PCGS# 5761

16522 1927-S AU50 NGC. A paltry mintage of 396,000 coins makes the 1927-S the key issue among Recessed Date Standing Liberty quarters. Dappled border toning surrounds silvery centers on each side. The highest points of the design are incomplete, as expected. Nevertheless, a great example of this challenging condition rarity. NGC ID# 243W, PCGS# 5764

16523 1927-S AU53 PCGS. CAC. Light high-point wear is discernible on Liberty's knee, breast, and the inner shield, but other weakness on the head, eagle, and shield rivets is almost entirely from strike softness, not circulation. The satiny golden surfaces of this About Uncirculated 1927-S quarter will appeal to the series specialist who recognizes the scarcity of attractive AU coins for this issue. NGC ID# 243W, PCGS# 5764

WASHINGTON QUARTERS

16524 1932-D MS64 PCGS. CAC. CAC-approved in a first generation holder and undeniably high-end for the grade. The satiny surfaces of this near-Gem key-date Washington quarter are devoid of any imperfections visible to the unaided eye, and under a loupe only the most insignificant handling marks are apparent. Delicate pastel toning graces each side, and eye appeal surpasses expectations for the grade. Finer 1932-D quarters are seldom offered and command strong premiums from Registry Set collectors. NGC ID# 2448, PCGS# 5791

16525 1932-S MS65 PCGS. In high grades, the 1932-S is the second most-challenging Washington quarter after the 1932-D. Flecks of radiant fire-orange patina cling to the border areas, leaving strongly struck centers fully frosted and brilliant. A single tick appears on the neck. PCGS reports four finer grading events (9/17). NGC ID# 2449, PCGS# 5792

1934 Washington Quarter, MS65 Doubled Die Obverse

16526 1934 Doubled Die Obverse, FS-101, MS65 PCGS. Wisps of lavender and russet accent otherwise champagne surfaces on this highly lustrous and frosty Gem. Other than a tiny tick on Washington's cheek that determines the grade, there are no mentionable surface flaws. The die doubling of IN GOD WE TRUST is visible to the unaided eye if studied closely. Population (FS-101): 17 in 65 (3 in 65+), 16 finer (9/17). NGC ID# 244A, PCGS# 5900 Base PCGS# 5795

16527 1934-D Heavy Motto MS66+ PCGS. An incredibly strong strike and exceptionally clean surfaces define this high-end Premium Gem quarter. A couple of minute ticks near the temple prevent an MS67 assessment. Both sides are satiny and brilliant with an arc of sea-green and fire-orange patina at the left obverse border. Population: 58 in 66 (13 in 66+), 3 finer (9/17). NGC ID# 244C, PCGS# 85796

**1934-D Heavy Motto Quarter, MS67
Tied for Finest Certified at Both Services**

16528 1934-D Heavy Motto MS67 NGC. This virtually pristine Superb Gem is lustrous and sharply struck. Light tan-gray toning is predominant except for a crescent of sea-green and ruby-red on the reverse exergue. The 1934-D is a semikey issue in any condition of Mint State, and the issue is extremely rare at the MS67 level. Both the 1934 and 1934-D have Medium Motto and Heavy Motto varieties. Despite their significant difference in appearance, the *Guide Book* does not distinguish between the 1934-D motto varieties and omits the 1934 Medium Motto. Census (Medium and Heavy Motto varieties combined): 8 in 67, 0 finer (8/17). NGC ID# 244C, PCGS# 85796

16529 1938 MS67+ PCGS. CAC. This nearly flawless 1938 Washington quarter is tied for the finest at PCGS (9/17). The strike is sharp, and the softly frosted surfaces are devoid of abrasions. Much of each side displays faint lilac toning, although vivid multicolor hues appear around much of the obverse periphery and portions of the reverse rim. NGC ID# 244N, PCGS# 5806

**1948-D Washington Quarter, MS67+
Tied for Finest at PCGS**

16530 1948-D MS67+ PCGS. CAC. From a mintage of 16.7 million pieces, the 1948-D Washington quarter is collectible through the Gem level, but the issue is very scarce in MS67 condition. This Superb Gem is tied with eight other Plus-graded coins for finest certified honors at PCGS (9/17). The design elements are sharply detailed, and the impeccably preserved lustrous surfaces are blanketed in shades of orange, russet, violet, and green toning. Eye appeal is terrific. NGC ID# 245M, PCGS# 5837

16531 1950-S/D FS-601 MS65 PCGS. Radiant mint luster catches the attention of the viewer, which is subsequently drawn to well-preserved fields and strongly struck devices. Both sides are brilliant. Minor flecks appear on Washington's neck and temple. The repunched mintmark is clear upon close inspection. NGC ID# 245V, PCGS# 145639 Base PCGS# 5845

16532 1950-S/D FS-601 MS66+ PCGS. CAC. The upright and right curve of the underlying Denver mintmark is obvious beneath a loupe. This lustrous and crisply struck Premium Gem displays a narrow arc of autumn-brown and blue-green toning along the right obverse margin. Population: 63 in 66 (10 in 66+), 6 finer. CAC: 21 in 66, 2 finer (9/17). NGC ID# 245V, PCGS# 145639 Base PCGS# 5845

**1962-D Quarter, MS67
Tied for Finest Certified**

16533 1962-D MS67 PCGS. CAC. This piece is tied for the finest numerically certified by PCGS and NGC. A splendid Superb Gem, it exhibits wispy champagne toning over its satiny silver luster with extraordinary eye appeal. The 1962 quarter is a rarity in this condition. Population: 10 in 67 (1 in 67+), 0 finer. CAC: 7 in 67, 0 finer (9/17). NGC ID# 246R, PCGS# 5873

PROOF WASHINGTON QUARTER

16534 1938 PR67+ PCGS. CAC. Pastel shades of powder-blue, green, and violet conjure up images of the Aurora Borealis and give this magnificent Superb Gem proof terrific aesthetic quality. Additional orange accents color the borders. From a mintage of 8,045 pieces, PCGS reports merely three finer submissions (9/17). NGC ID# 27HR, PCGS# 5977

End of Session One

SESSION TWO

COLONIALS

1652 Oak Tree Shilling, AU50
Late Die State Noe-6

16601 1652 Oak Tree Shilling, IN at Bottom, AU50 NGC. Noe-6, W-480, Salmon 4-D, R.7. 68.8 grains. A late die state of Noe-6, rarer than Noe-6.1 and its associated states Noe-6.1.1 and "Noe-6.1.1.1" (Norweb: 1163). Heavy clash marks from XII and N DO affect the sharpness of the lower obverse. Half of the D in ENGLAND is consumed by a break, and other breaks enlarge near the AN in AN DOM. Nonetheless, the reverse is well-defined, as are the upper and right portions of the obverse. Well-centered and unblemished with glints of luster in the design recesses.

Ex: Public Auction Sale (Stack's, 3/1994), lot 5; Reed Hawn Collection of Massachusetts Silver (Stack's, 5/1998), lot 10; Donald Groves Partrick Collection (Heritage, 1/2015), lot 5534, which realized \$7,637.50. NGC ID# 2ARL, PCGS# 45362 Base PCGS# 20

1652 Pine Tree Threepence, MS62
Noe-36, No Pellets at Trunk

16602 1652 Pine Tree Threepence, No Pellets at Trunk, MS62 NGC. Noe-36, W-640, Salmon 2-B, R.4. 16 gr. Usual early die state. The strike is sharp and even with little of the "wave" effect in the planchet from the rocker press that is often seen on the larger denominations. The reverse is fairly well-centered with all legends intact. The obverse is off-center toward 8 o'clock with portions of HVSETS off the flan. The planchet is fairly circular. Each side of this piece is satiny and displays deep gunmetal-gray toning with no obvious distractions.

All varieties included, NGC and PCGS combined list only nine Mint State grading events of a Pine Tree threepence, of which only three or four are No Pellets coins. Our most recent previous auction appearance of an Uncirculated Noe-36 coin was in lot 5614 of the January 2015 FUN Signature sale, where the Partrick MS64 NGC example garnered nearly \$39,000. Listed on page 41 of the 2018 Guide Book. NGC ID# CFSF, PCGS# 45366

1785 Silver Immune Columbia, AU58
Vertically Reeded Edge, W-1985
The Enigmatic Ex: Lauder Specimen
Finest Certified

16603 1785 Immune Columbia, Nova Constellatio, Silver, Vertically Reeded Edge, 13 Stars, W-1985, R.7, AU58 PCGS. The silver Immune Columbia patterns rank among the most interesting post-Colonial, pre-federal issues. Not only are they rare, but they played an important role in a high-stakes attempt to gain a coinage contract from the Continental Congress prior to the establishment of a federal Mint and coinage system.

The Immune Columbia pieces owe their existence to the combined efforts of Gouverneur Morris, Robert Morris (no relation), and Benjamin Dudley, who wanted to establish a mint in Philadelphia and implement a decimal coinage system based on the dollar and the cent. The trio believed they had an inside track to gain the potentially lucrative contract, since the decimal system was favored by Thomas Jefferson, and Gouverneur Morris was a strong advocate and supporter of George Washington.

Other powerful forces were at work, and ultimately the Morris-Dudley proposal was not accepted by Congress. Gouverneur Morris (still in partnership with Robert Morris) then took one of their early copper patterns to Wyons' mint in England, and contracted for the design and mintage of Nova Constellatio coppers. It is likely that the silver Immune Columbia patterns were struck in 1785 as well, since the obverse die is common to the 1785 Nova Constellatio copper Crosby 3-B, in an earlier die state. Whether the silver patterns were actually struck in England or in the United States is open for debate.

Three edge varieties are known for the silver pieces. Both diagonal and vertical reeded edges exist, and at least one Plain Edge silver pattern is known as well. The present piece is a Vertical Reeded Edge example, although it historically has been classified as a Plain Edge coin. Walter Breen's Encyclopedia may be in part responsible for the misunderstanding, where he describes the Lauder specimen as having a plain edge, "plugged, withdrawn." He is incorrect on two counts — the edges show lightly impressed vertical reeds (it is not a Plain Edge pattern), and most importantly, there is no evidence of a plugged hole anywhere on the coin. Perhaps the edge reeding prompted its withdrawal from the Loye L. Lauder Collection (William Doyle Galleries, 12/1983) as lot 191, or, it may have been a question of the coin's authenticity. Both of those factors are put to rest with the present coin's PCGS encapsulation.

The surfaces of this exceptional near-Mint example are glossy and lightly iridescent. Attractive gunmetal-gray and blue shades prevail over the sharply defined surfaces. All of the Immune Columbia silver patterns are slightly incomplete in strike on the highest points of the obverse — knee, arm, and hand — yet this piece is sharper than (for example) the AU55 NGC Garrett/Ford/Partrick coin and other well-known pieces.

We believe between 13 and 15 silver patterns exist (all edge varieties combined). They have been eagerly collected from the hobby's early days by Colonial specialists and advanced collectors including Virgil Brand, Garrett, Roper, Picker, Robison, Oechsner, Norweb, and Lauder. Most specimens lay claim to lengthy and distinguished pedigrees. The silver Immune Columbia pieces are listed on page 57 of the 2018 *Guide Book*. This is the finest-certified example at either service (9/17).

Our thanks to Scott Rubin, for his help in confirming that the present coin is indeed the Lauder specimen, and to Scott Schechter at NGC for his valuable assistance clarifying the Census data for high-grade silver Immune Columbia pieces. NGC ID# 2AZD, PCGS# 829

1787 New York Excelsior Copper
Extraordinary XF45
W-5780, Eagle Right

16604 1787 New York Excelsior Copper, Eagle Right, Breen-979, W-5780, High R.6, XF45 PCGS. Any roster of high-grade Eagle Right Excelsior coppers must include this incredibly Choice XF example. Glossy, deep-chocolate surfaces are perfectly balanced side-to-side, untouched by any significant abrasions or marks and only the merest hint of granularity that hugs the raised elements, visible with a strong lens. The central definition on both sides suggests an even finer grade. John Bailey and Ephraim Brasher, New York neighbors and highly successful metalsmiths, independently sought contracts from the New York State legislature to manufacture copper coins. In actuality, they were most likely working together.

This is the New York Arms type of Excelsior copper, both eagles facing right. In light, the deeply toned surfaces display hints of burgundy that enrich the original, attractive patina. The preservation is exceptional for the issue, which is seldom offered and extremely rare this fine. It is the finest example we have offered in the 25-year compilation of our auction archives. Listed on page 66 of the 2018 *Guide Book*. Population: 1 in 45, 0 finer (9/17). NGC ID# B8E3, PCGS# 424

1787 Excelsior Copper, Exceptional AU50
Eagle on Globe Left, Eagle Reverse
New York Arms, W-5785

16605 1787 New York Excelsior Copper, Eagle Left, Breen-980, W-5785, R.6, AU50 PCGS. In contrast to many survivors that have corroded or granular surfaces, this smooth and appealing medium-brown example displays a remarkably hard, high-quality planchet. The reverse is a notch deeper in color but equals the obverse in surface quality and strike. Both sides show wear and a few small marks on the exposed central design elements — the sun and mountains on the obverse, and the shield stripes on the reverse.

Excelsior coppers have several design styles, all rare to extremely rare. This is the Eagle on Globe Facing Left variety, a strong R.6 although even rarer in About Uncirculated condition. Its companion piece, with the Eagle on Globe Facing Right, is rarer still. Other designs feature an Indian, George Clinton, and a variant with transposed arrows and branches. Engraver John Bailey is credited with the design, in partnership with Ephraim Brasher. The resemblance of Excelsior coppers to the famous Brasher doubloons add to their appeal. Listed on page 66 of the 2018 *Guide Book*. Population: 3 in 50, 3 finer (9/17). NGC ID# 2B3M, PCGS# 427

1796 Castorland Jeton, AU Details
W-9100, Relic of an Upstate New York Colony

16606 1796 Castorland Medal, Silver — Graffiti — PCGS Genuine. AU Details. W-9100, R.5. The Castorland jeton is a curious relic of a fleeting colony in Upstate New York. Conceived by French refugee Pierre Chassanis, who purchased 200,000 acres of farmland bounded by Lake Ontario and the Black River, these jetons were supposedly intended as keepsakes for colonists and trustees, though some researchers make a strong case for their being coins. Intentions aside, it appears some examples did see circulation, and the issue remains a popular entry in the colonial series. This lightly circulated olive and steel-gray example is boldly defined and well-centered. The right reverse field shows “#99” inscribed by hand.

HALF CENT

1795 C-2a, B-2a Half Cent, AU50
Lettered Edge, Punctuated Date

16607 1795 Lettered Edge, Punctuated Date, C-2a, B-2a, R.3, AU50 PCGS. Manley Die State 3.0, the usual late die state for this variety. Although a glass reveals a few trivial dents and minuscule marks, the olive-brown surfaces of this piece are quite impressive. Hints of cartwheel luster remain on both sides. The 1795 Lettered Edge, Punctuated Date half cents were the last Lettered Edge half cents struck at the old 104 grain standard. Our EAC grade XF40. NGC ID# 2224, PCGS# 35070 Base PCGS# 1015

SILVER CENTER CENT

1792 Silver Center Cent, VG Details
Rare, Historic Early Pattern
Judd-1, Pollock-1

16608 1792 One Cent, Judd-1, Pollock-1, High R.6 — Plug Replaced, Repaired, Scratched — NGC Details. VG. (3.9 g). Although the famous 1792 half dimes were struck earlier, in Philadelphia saw-maker John Harper's cellar, the 1792 Silver Center cents were probably the first coins struck inside the confines of the Philadelphia Mint. The Mint Act of 1792 specified the cent should contain 264 grains of pure copper, but it was felt a coin of that size would be too large and unwieldy for practical use. The Silver Center cent was an ingenious attempt to produce a coin with the intrinsic value of one cent in a more manageable size. The proposed cent consisted of a copper planchet worth 1/4 of a cent, with a small hole in the center in which a silver plug worth 3/4 of a cent was inserted. When the coins were struck, the silver plug would flatten and spread out on both sides, resulting in a secure bond with the host copper planchet, creating the nation's first bimetallic coin. The coins were struck in early December of 1792, as evidenced by Thomas Jefferson's December 18, 1792-dated letter to President George Washington:

"Th. Jefferson has the honor to send the President two cents made on Voigt's plan by putting a silver plug worth 3/4 of a cent into a copper worth 1/4 of a cent. Mr. Rittenhouse is about to make a few by mixing the same plug by fusion with the same quantity of copper. He will then make of copper alone of the same size, and lastly he will make the real cent as ordered by Congress, four times as big."

While Chief Coiner Henry Voigt was probably responsible for the actual design of the coin, the innovative bimetallic concept was originally suggested by famous patriot and author Thomas Paine (see *1792: Birth of a Nation's Coinage*, by Len Augsburger, Joel Orosz, and Pete Smith, for the definitive origin story). Unfortunately, the multi-step production process for the Silver Center cent proved too complicated for high-speed coinage operations, and the design was deemed impractical. Only a limited number of specimens were actually struck, to illustrate the concept to VIP's and congressmen. A total of 14 examples are known today, along with a single copper specimen that was struck without the plug in the center.

The history of the present coin can only be traced back to 2006, when it surfaced in a Modesto, California Police Department auction of unclaimed property. The value of the coin went unrecognized in that non-numismatic event, and a lucky collector from Northern California secured the lot for a mere \$400. It was later submitted to ANACS for certification, where it received a VG10 Details grade. The dark olive-brown surfaces of this coin are smooth, not granular, with no planchet voids. However, both sides show a number of long file marks that explain the Details grade. The date and about half of the obverse legend remain legible, and the bust is complete in outline, with some interior detail still intact. The reverse peripheral legend remains bold, but much of the central design detail has been effaced by the filing. No design details can be discerned on either side of the plug, which is also heavily filed. One possible prior appearance of this piece is known in the literature. Lot 209 of the H.G. Brown Collection (Lyman Low, 10/1904) reads:

"Silver Center Cent, 1792. LIBERTY PARENT OF SCIENCE & INDUSTRY: Head r. R Type of the wreath Cent of 1793. The centre has been abused, probably when reinstating the small silver piece, otherwise good. Extremely rare."

Low's description certainly fits this coin well, but a definitive link to the present specimen cannot be established. Auction sales of comparable examples include the Fine 15 PCGS example sold by American Numismatic Rarities in 2006 for \$253,000 and the VF30 NGC specimen offered by Heritage Auctions in 2012, which brought \$305,500. The unique copper specimen struck with no silver plug (MS62 Red and Brown NGC) was sold in lot 5502 of the Donald G. Partrick Collection (Heritage Auctions, 1/2015), where it realized \$446,500.

Unfortunately, when Heritage numismatists examined this coin, the lack of detail on the silver plug caused concern. It was decided to have the piece recertified by NGC, to maximize collector confidence and interest. In their initial investigation, the NGC graders determined that the "silver" plug was magnetic (apparently, ANACS failed to perform this simple test when they certified it in 2008). Elemental analysis revealed the plug is actually ferrous alloy (iron). The copper planchet is undoubtedly genuine, however. Colonial specialists and prominent numismatists Alan Weinberg, John Kraljevich, Ken Bressett, Julian Leidman, and Tony Terranova all examined this piece in November of 2008 and believed the copper planchet was authentic, but they had no way to test the composition of the plug. The silver plug was probably removed from the coin at an early date, before there was any numismatic market for rare coins in this country. The copper planchet was then carried as a pocket piece for some time. After coin collecting became widespread in the late 1850s, some enterprising coin doctor must have substituted the ferrous alloy plug to restore the coin's original appearance, if not its original composition. The noted scratches probably occurred when the plug was replaced, as the protruding plug would have to be filed down to the level of the copper planchet. The appearance is not unlike some early silver dollars that were holed, plugged, and filed to adjust their weight.

The Silver Center cent occupies a unique place in American numismatics, as one of the first products of the United States Mint and the precursor of the small-size cents we are so familiar with today. The coin offered here is one of only 14 survivors from the small early issue and this offering represents an important opportunity for some lucky collector to acquire a rare and valuable piece of numismatic history. *Coin World* article and ANACS certification tab accompanies the lot.

Ex: Possibly the H.G. Brown Collection (Lyman Low, 10/1904), lot 209; unknown intermediaries; Modesto California police auction (2006); the present consignor. Mentioned on page 219 of *Birth of a Nation's Coinage* by Len Augsburger, Joel Orosz, and Pete Smith. NGC ID# 2948, PCGS# 11001

LARGE CENTS

1793 Chain Cent, XF Details
S-2, B-2, AMERICA Reverse
Strong Design Definition

16609 1793 Chain, AMERICA, S-2, B-2, High R.4 — Repaired — PCGS Genuine. XF Details. This wide date, no periods variety shows BER spaced apart, and the E in ONE is close to the chain link. The significance of the 1793 Chain cent is well-known to collectors, but Breen summarized it well in his *Encyclopedia of United States Large Cents*, writing: "They are the first mass production coins in any metal issued by the federal government on its own machinery, and within its own premises. For all practical purposes, these are the first regular issue United States coins." Some 36,108 Chain cents, including all varieties, were reportedly struck, probably in March 1793. The reverse design was quickly denounced for invoking a symbol of slavery, though its intent was undoubtedly to signify the unity and strength of a young nation. Later in the year, a more traditional, less provocative wreath motif was employed.

Most collectors would be delighted to obtain any 1793 Chain cent for their sets, and indeed well-worn examples without virtually any design detail can sell for thousands of dollars. This impressive XF representative is boldly defined with clear portrait detail, strong legends, and razor-sharp chains. Olive-brown surfaces show signs of smoothing and reengraving, but the effect does not diminish the appeal or importance of the coin offered here. Our EAC grade Good 6.

1793 Chain Cent, Fine Details
Sheldon-3, AMERICA

16610 1793 Chain, AMERICA, S-3, B-4, Low R.3 — Repaired — PCGS Genuine. Fine Details. Breen Die State III. All legends are clear, including the date and fraction. The central devices are boldly outlined, and Liberty's eye is well-defined. The chain shows some separation between the links. Medium chocolate-brown surfaces offer pleasing visual appeal despite mild granularity on each side. Some faint tool marks in the right obverse field prevent a numeric grade. A lone, unobtrusive rim bump appears about 12:30 on the reverse, along with a few unimportant marks in the fields. Our EAC grade Good 4.

1793 S-4, B-5 Chain Cent, Good 6
Periods Obverse

16611 1793 Chain, AMERICA, Periods, S-4, B-5, R.3, Good 6 PCGS. The final Chain cent variety, struck in March 1793, has small periods following the date and LIBERTY that give this variety its name. This piece has pleasing chestnut and olive-brown surfaces, and lacks the corrosion that is found on so many other examples. Trivial rim nicks and scattered marks are evident, with a small concentration of marks at the center of the reverse. Our EAC grade AG3. NGC ID# 223F, PCGS# 35444 Base PCGS# 91341

**1797 S-135, B-5 Cent, Scarce MS65 Brown
Reverse of 1797, With Stems**

16612 1797 Reverse of 1797, Stems, S-135, B-5, R.3, MS65 Brown PCGS Secure. Three early cent varieties, 1796 S-119, 1797 S-123, and 1797 S-135, known as the Nichols Find cents, are encountered from time-to-time in attractive Mint State preservation. The story of these coins is that Massachusetts Senator Benjamin Goodhue acquired the coins from the Mint (or from a local bank who received them from the Mint), and that they were handed down in the family through his daughters. According to information at Ancestry.com, all five of his daughters passed away many years before David Nichols distributed the coins circa 1863.

While the PCGS "Brown" designation is technically correct, this gorgeous Gem exhibits delicate blue patina on its reflective and glossy walnut surfaces that give way to coral and orange near the borders, representing faded mint color. A glass reveals a number of original planchet marks from before the coin was struck, but there is no evidence of any post-minting imperfections. A trivial, inactive spot is noted above the second T in STATES. The strike is well-centered with full obverse and reverse borders, and boldly defined devices. This lovely cent is remarkably well preserved for a 220 year old copper coin. Our EAC grade MS64. Population: 9 in 65 (1 in 65+) Brown, 2 finer (9/17). NGC ID# 2242, PCGS# 35936 Base PCGS# 1422

**1799 Sheldon-189 Cent, Good 6
Normal Date, Famous Cornerstone Issue**

16613 1799 S-189, B-3, R.2, Good 6 PCGS. Close 99, die chip (or "mintmark") over the T in CENT. The cents of 1799 are among the most challenging and sought-after in the series after those of 1793. Sheldon-189 represents the only Normal Date variety for this year, its fame due in large part to the attention paid to it by noted numismatist Joseph Mickley (his birth year). This well-circulated example shows readable legends and clear motif outlines on each side. Deep brown surfaces display myriad cuts and marks, but the relatively good impression and problem-free nature of this offering more than make up for it. Our EAC grade Good 4. NGC ID# 2246, PCGS# 36140 Base PCGS# 1443

**1804 S-266a Cent, Fine 15
Early Die State**

16614 1804 S-266a, B-1, R.2, Fine 15 PCGS. Die State I. The rims are complete save for the upper reverse, where STATES slightly blends into the plain. All legends are clear, and the devices are boldly outlined with some hair detail remaining on Liberty's portrait. Reddish tints appear throughout otherwise chocolate-brown surfaces. Scattered light marks appear under a loupe. Housed in a green label holder. Our EAC grade VG7. Population: 16 in 15, 64 finer (9/17). NGC ID# 224H, PCGS# 36422 Base PCGS# 1504

**1833 N-5 Cent, MS66 Brown
Impressive Surface Quality**

16615 1833 N-5, R.1, MS66 Brown NGC. CAC. Recut 8 in date. A sharp and lustrous medium-brown cent enriched by glossy lilac and blue overtones. The strike is sharp despite a later die state, with lengthy die cracks that encircle most of both sides. A perfectly centered strike yields sharp dentils throughout except for a bit of blur at the upper reverse, which is rotated 40° clockwise. Wonderful smooth and hard surfaces are virtually free of any marks. Our EAC grade MS60. NGC ID# 225P, PCGS# 37030 Base PCGS# 1696

1840 Cent, MS65 Red and Brown
N-8, Large Date

16616 1840 Large Date, N-8, R.1, MS65 Red and Brown PCGS. CAC. Die State d. This is a late die state example with a series of obverse rim breaks below the date and star 13. An attractive and lustrous piece with considerable original mint color, especially on the reverse. The obverse has deeper orange color, subdued and faded to light brown. Light brown toning is evident on the reverse devices. Similar quality and die state to lot 31 in the 2002 Brown sale, that coin called fourth finest known. Our EAC grade MS63. Ex: *Central States Signature (Heritage, 4/2006)*, lot 295. PCGS# 395841 Base PCGS# 1821

1855 Cent, MS65 Red
Upright 55, N-4

16617 1855 Upright 55, N-4, R.1, MS65 Red PCGS. CAC. Grellman Die State a. Two die lumps on the jawline quickly confirm the die pair. This captivating red Gem with an uncracked reverse almost certainly derives from a large hoard. Comparable examples often serve as type coins, and this piece would be well-suited to such purposes. The star radials are incomplete, but the devices are otherwise sharp. Minor carbon and radiant luster appear over each side. Housed in a green label holder. Our EAC grade MS65. NGC ID# 226M, PCGS# 406155 Base PCGS# 1909

1856 N-6 Cent, MS65 Red
Upright 5, None Finer at PCGS

16618 1856 Upright 5, N-6, R.1, MS65 Red PCGS. A large die lump off the bust tip and a raised die line from the last A in AMERICA to the branch stem are pickup points for the Newcomb-6 variety. Copper-orange surfaces glisten with vibrant mint luster. Central design detail is sharp, though the stars lack radials. An eye-appealing Gem for Registry builders or type collectors. Housed in a green label holder. Our EAC grade MS64. Population (all varieties): 7 in 65 Red, 0 finer (9/17). NGC ID# BXR B, PCGS# 404590 Base PCGS# 404588

INDIAN CENTS

1864 Cent, MS65 Red
L On Ribbon

16619 1864 L On Ribbon MS65 Red PCGS. Red examples of the L On Ribbon subtype are scarce in MS65 and rare any finer. This piece displays a bold strike and satiny luster with bright golden coloration. A few wisps of reddish color appear throughout. No distracting abrasions are seen. Population: 35 in 65 (2 in 65+) Red, 6 finer (9/17). NGC ID# 227M, PCGS# 2081

1867 Indian Cent, MS65 Red
Rarely Encountered Any Finer

16620 1867 MS65 Red PCGS. Under magnification, the original red surfaces of this impressive Gem show a few tiny specks of carbon, but contact marks are minimal and vibrant mint luster radiates from both sides. The design elements are well-detailed and overall eye appeal is outstanding. Population: 31 in 65 (3 in 65+) Red, 1 finer (9/17). In addition, the PCGS Population includes some finer coins in other color designations: one coin in MS66 Brown, one in MS66 Red and Brown, and one in MS66+ Red and Brown (9/17). NGC ID# 227R, PCGS# 2090

1870 Indian Cent, MS65+ Red
Low-Mintage, Underrated Issue

16621 1870 MS65+ Red PCGS Secure. Bold N reverse. Lustrous, fire-orange surfaces display attractive red highlights on both sides of this lovely semikey cent. A bold strike shows strong detail on the headdress, wreath, and shield. Two or three microscopic spots on the reverse are visible with a glass, but do not distract in the least from the appeal of this vibrant Gem example. This is the only Plus-graded Mint State coin seen by PCGS for the issue. Population: 39 in 65 (3 in 65+) Red, 7 finer (9/17). Ex: *New York PNG Signature (Heritage, 10/2014)*, lot 4615. NGC ID# 227U, PCGS# 2099

**1877 Indian Cent, MS64 Red and Brown
Eagle Eye Photo Seal and Card**

16622 1877 MS64 Red and Brown PCGS. CAC. Eagle Eye Photo Seal, card included. Auburn, burgundy, and copper-orange hues are well-balanced on this near-Gem 1877 Indian cent. Strike weakness occurs on the upper headdress feathers, the wreath bow, and portions of the peripheral legend, although the remainder of the coin is sharp. No heavy abrasions are seen. CAC-endorsed coins in this and finer Red and Brown grades are scarce. CAC: 37 in 64, 22 finer (9/17). NGC ID# 2284, PCGS# 2128

**1887 Cent, MS66 Red
Rare in This Condition**

16623 1887 MS66 Red PCGS. A conditionally rare, high-end example of this otherwise plentiful Indian cent issue, showing satiny copper-orange mint luster and no distracting abrasions. The upper three headdress feathers show the usual softness, but the strike is otherwise boldly rendered. A few microscopic specks in the left obverse field are unseen by the naked eye. Only a handful of finer full Red coins are known. Population: 23 in 66 (6 in 66+) Red, 2 finer (9/17). NGC ID# 228F, PCGS# 2159

**1894/1894 Cent, MS64 Red
Repunched Date *Guide Book* Variety**

16624 1894/1894 Repunched Date, Snow-1, FS-301, MS64 Red PCGS. CAC. Eagle Eye Photo Seal, card included. All four date numerals are widely recut on this variety. Satiny copper-orange luster illuminates well-struck design elements and unabraded surfaces. This *Guide Book* variety is quite elusive in such fine preservation. Population (FS-301): 13 in 64 (1 in 64+) Red, 13 finer. CAC: 3 in 64, 3 finer (9/17). NGC ID# 228N, PCGS# 37584 Base PCGS# 92189

**1903 Cent, MS67 Red
Tied for Finest Certified**

16625 1903 MS67 Red PCGS. CAC. Ex: Perfection 1. A major condition rarity, tied with nine others as the finest at PCGS (9/17). This blazing Superb Gem 1903 Indian cent is tied with only three other pieces this fine with a CAC endorsement. The surfaces are almost flawlessly preserved, showing vibrant sun-orange luster with tinges of deep amber-red along the upper reverse border. There are no abrasions or bothersome carbon spotting. As is typical of the issue, slight strike weakness is seen on the top three headdress feathers and the reverse wreath bow. No 1903 Indian cents are certified finer than this paramount Registry coin. NGC ID# 228Y, PCGS# 2216

**1909-S Indian Cent, MS65 Red
Elusive San Francisco Issue**

16626 1909-S MS65 Red PCGS Secure. Traces of lavender toning appear on the mellow orange surfaces of this frosty and highly lustrous San Francisco Mint Indian cent. The 1909-S is the second and scarcer issue of only two Indian cents produced at the California facility. This piece has pristine surfaces and exceptional eye appeal. PCGS has only certified 28 finer Red examples (9/17). Ex: Long Beach Signature (Heritage, 2/2013), lot 3138; Central States Signature (Heritage, 4/2013), lot 1207. NGC ID# 2298, PCGS# 2240

PROOF INDIAN CENTS

1864 Copper-Nickel Cent, PR66 Cameo
Well-Contrasted Devices

16627 1864 Copper Nickel PR66 Cameo PCGS. The copper-nickel proof is elusive as a Cameo, and such pieces are rarely seen as fine as MS66. This example offers stark field-motif contrast and razor-sharp detail. The preservation is exceptional. A thin, threadlike strike-through in the field next to Liberty's brow is a reliable pedigree marker. Population: 10 in 66 Cameo, 1 finer (9/17). NGC ID# 229E, PCGS# 82265

1864 Indian Cent, PR67 Red and Brown
Bronze, No L, Tied for Finest at NGC

16628 1864 Bronze No L PR67 Red and Brown NGC. The first Bronze issue in the Indian cent series. Vivid crimson and chartreuse coloration adorns the exquisite surfaces of this beautiful Superb Gem proof. Fully struck and distraction-free throughout, with highly reflective fields. Only around 150 pieces of this issue were produced and, needless to say, Superb Gems are rare. Census: 2 in 67 Brown, 2 in 67 Red and Brown, 0 finer (9/17). NGC ID# 229F, PCGS# 2277

1864 Bronze No L Cent, PR67 Red and Brown
Dramatic Two-Sided Toning, CAC Approved

16629 1864 Bronze No L PR67 Red and Brown PCGS. CAC. Ex: Perfection 2. Eagle Eye Photo Seal, card included. The vivid two-sided color palette on this early Superb Gem Red and Brown proof Indian cent creates a coin of stunning eye appeal. The obverse is a lovely blend of yellow-orange with tinges of sage and rose in the fields, while the reverse takes on a deep reddish-orange color with brownish devices. This piece overall is far more Red than Brown. There is no visible sign of carbon or contact, and the preservation is uniformly excellent throughout both sides, as demanded at the Superb Gem proof grade level.

The proof mintage of the Bronze, No L 1864 Indian cents is estimated at 300 coins, but few survive as nice as this piece — and that is true both technically and aesthetically, the latter in spades. PCGS reports only one other submission in PR67 Red and Brown, a very attractive coin but one that is more uniform and lacks the dramatic two-sided contrast of this piece. Only two examples of the Bronze No L issue in this grade bear the CAC green approval sticker — this piece and one other (9/17). NGC ID# 229F, PCGS# 2277

1896 Cent, PR66 Red
Splendid Original Red Color

16630 1896 PR66 Red PCGS. Deeply mirrored fields and copper-red color provide a one-two punch for this deeply struck Premium Gem proof cent. The central devices are needle-sharp with the same impressive patina as the rest of the coin, which minimizes contrast but does not diminish the eye appeal one bit. Three or four tiny carbons exist but they are microscopic and easily overshadowed by the generous visual impact of this impressive proof. Population: 5 in 66 Red, 0 finer (9/17). NGC ID# 22AJ, PCGS# 2377

1914-D Cent, MS65 Red and Brown
Rarely Offered CAC Coin

16633 1914-D MS65 Red and Brown PCGS. CAC. Although the 1909-S VDB is the more extensively marketed key date, the 1914-D is actually the scarcer coin in high grade. This Gem Red and Brown example displays satiny luster and luminous autumn-red and auburn surfaces. A few specks in the right obverse field are not out of line for the grade. Population: 62 in 65 (2 in 65+) Red and Brown, 4 finer; 71 in 65 (8 in 65+) Red, 7 finer. CAC: 20 in 65, 2 finer (9/17). NGC ID# 22BH, PCGS# 2472

1897 Cent, PR67 Red
Two-Sided Contrast

16631 1897 PR67 Red PCGS. Undesignated cameo contrast is apparent on each side of this Superb Gem proof. The strike is sharp and the preservation is outstanding. Rich sun-orange interiors transition to deeper cherry-red at the borders. The 1897 proof is a rare issue this well-preserved and eye-appealing. Housed in an old "rattler" holder. Population: 4 in 67 Red, 0 finer; 4 in 67 (1 in 67+) Red Cameo, 1 finer (9/17). NGC ID# 7NJK, PCGS# 2380

1917 Cent, MS64 Red and Brown
Doubled Die Obverse

16634 1917 Doubled Die Obverse, FS-101, MS64 Red and Brown NGC. The date, IN GOD WE TRUST, and Lincoln's bowtie all show prominent die doubling. Fiery copper-orange luster frames the legends and central devices, while the exposed regions exhibit violet-tinged chestnut-brown toning. A few scattered flecks blend into the patina. The strike is sharply executed. Census: 3 in 64 Red and Brown, 0 finer (9/17). NGC ID# 22BS, PCGS# 37674 Base PCGS# 92496

LINCOLN CENTS

1909-S VDB Cent, MS66 Red and Brown
Lustrous and Attractive

16632 1909-S VDB MS66 Red and Brown PCGS. This luminous Premium Gem displays a full strike and unabraded surfaces. Golden and chestnut-brown hues intermingle over each side, although the former hue is dominant. Eye appeal is outstanding. Red and Brown examples of this key date are scarce in MS66 and almost unknown finer. There are a number of Red coins in this and finer grades. Population: 63 in 66 Red and Brown, 1 finer (8/17). NGC ID# 22B2, PCGS# 2427

1922 No D Cent, MS63 Red and Brown
Weak Reverse, Die Pair 3

16635 1922 No D, Weak Reverse, MS63 Red and Brown PCGS. Die Pair 3. Glossy with ample evidence of sunset-orange coloration in the protected areas. The wheat stalks display characteristic deficiency in strike and the D mintmark is only faintly visible — as it often is on Weak Reverse No D coins — being positioned just to the left of the first 2 in the date. Population (Weak Reverse): 22 in 63 Red and Brown, 10 finer (8/17). Ex: FUN Signature (Heritage, 1/2006), lot 217. NGC ID# 2U6G, PCGS# 2541 Base PCGS# 2538

PROOF LINCOLN CENTS

1941 Cent, PR67 Red
Tied for Finest Certified
Registry Set Essential

16636 1941 PR67 Red PCGS. The 1941 proof Lincoln cent is plentiful in most grades but becomes rare at the Superb Gem Red level. PCGS lists only nine submissions in PR67 Red and none finer, while NGC contributes just 10 more in this grade, also with none finer (9/17). No Cameos are known. These rare, top-tier coins are actively sought-after by Registry collectors. This piece is fully struck from highly polished dies, delivering watery, copper-orange fields that display unsurpassed preservation. A couple of tiny flecks appear near the T in TRUST, but there are no other mentionable imperfections. Eye appeal is outstanding. NGC ID# 3H34, PCGS# 3350

1990 No S Cent, PR68 Red Deep Cameo
Famous Missing Mintmark Variety

16637 1990 No S, FS-101, PR68 Deep Cameo PCGS. The last major missing mintmark variety in U.S. proof coinage is the No S 1990 cent, represented here by a Superb Gem. Pale copper-gold surfaces have outstanding contrast and intriguing "orange-peel" texture through the fields, a feature plain to the unaided eye.
Ex: *Chicago Signature* (Heritage, 8/2011), lot 3238. NGC ID# 274B, PCGS# 408239 Base PCGS# 93506

PROOF TWO CENT PIECES

1864 Two Cent, PR65 Red
First-Year, Large Motto Example

16638 1864 Large Motto PR65 Red PCGS. The first year of issue in the two cent series witnessed the production of Small and Large Motto coins. Breen suggests maybe 12 to 15 Small Motto proofs were struck and that 100 but possibly upward of 200 Large Motto pieces were manufactured. The *Guide Book* reports a mintage of 100+ proofs. Deep copper-orange hues reveal faint accents of magenta and rose. Very rarely seen this fine. Population: 16 in 65 Red, 5 finer, including Cameo and Deep Cameo (9/17). NGC ID# 274T, PCGS# 3623

**1865 Two Cent, PR66 Red
Seldom Seen With Original Red Color
Among the Finest Certified**

16639 1865 PR66 Red PCGS. CAC. The reported mintage for the 1865 proof two cent is 500+ pieces, but no official tallies were kept for minor proof coinage at that time. Most pieces that come to market have lost their original red coloration and display deeper brown or red-brown patina.

This spectacular Premium Gem two cent proof is a delightful exception. Each side is copper and amber-gold with magenta accents and strong field reflectivity. The strike is absolutely razor-sharp, as expected. This marvelously preserved offering would serve as a highlight in any set. It is housed in a green label holder with a CAC approval sticker to match. Among the finest in this category. Population: 7 in 66 Red, 10 finer, including Cameo and Deep Cameo. CAC: 2 in 66, 0 finer (9/17). NGC ID# 274U, PCGS# 3629

**1866 Two Cent, PR65 Red
Copper-Gold Color**

16640 1866 PR65 Red PCGS. CAC. At least 725 two cent proofs were distributed in 1866. Additional sales of minor proof coinage went unrecorded. This lovely Gem enjoys original copper-gold surfaces with slight woodgrain accents. There are a couple of tiny carbon spots, and a lint mark travels through the left obverse field to the adjacent olive leaves. Encapsulated in an old green label holder (PCGS 2.0, used from October to December 1989). Population: 30 in 65 Red, 6 finer. CAC: 6 in 65, 11 finer, including Cameo and Deep Cameo (9/17). NGC ID# 274V, PCGS# 3632

**1867 Two Cent, PR65 Red
Seldom Seen With Red Color**

16641 1867 PR65 Red PCGS. CAC. Despite a somewhat small production of 625 or so proofs, the 1867 can generally be found through PR66 Red and Brown with little difficulty. Those searching for a full Red example will have greater difficulty. PR65 Red is about the finest reasonably attainable level. Pumpkin-gold and copper-orange color grace each side. Moderate contrast is more apparent on the reverse. Well-preserved and pinpoint-sharp. Encapsulated in a green label holder. Population: 24 in 65 (1 in 65+) Red, 5 finer, including Cameo. CAC: 7 in 65, 0 finer (9/17). NGC ID# 274W, PCGS# 3635

**1868 Two Cent, PR65 Cameo
Very Rare With Field-Device Contrast**

16642 1868 PR65 Cameo PCGS. CAC. The 1868 two cent is very rare with overt Cameo contrast. PCGS and NGC have seen 12 and 11 submissions, respectively, that feature such contrast, while reporting hundreds of additional non-Cameo grading events. Each side of this amber-gold Gem features flashy mirrors set against lightly frosted devices. The effect is highly appealing and sure to impress specialists in this series. Population: 5 in 65 Cameo, 6 finer. CAC: 3 in 65, 5 finer (9/17). PCGS# 83638

1869 Two Cent, PR66 Red
None Finer at PCGS

16643 1869 PR66 Red PCGS Secure. CAC. Myriad die polish lines are seen in the obverse fields. Curiously, the reverse exhibits clash marks within the denomination — a rare sight on any proof product. The missing upper serif on the D in UNITED, however, confirms the coin's status as a veritable proof strike. Each side is copper-orange in hue. Eye appeal and technical quality are excellent. Population: 14 in 66 Red, 0 finer. CAC: 2 in 66, 0 finer (9/17). NGC ID# 274Y, PCGS# 3641

1871 Two Cent, PR66 Red
Flashy and Exquisitely Preserved

16644 1871 PR66 Red PCGS. Light pumpkin-gold surfaces are flashy and exquisitely preserved without any post-Mint contact to mention. There are several spindly lint marks on each side that will help identify this piece in future sales, but they, of course, have no impact on the technical quality or eye appeal. Strike characteristics are absolutely razor-sharp, which should come as no surprise. From a reported mintage of 960 proofs. Population: 18 in 66 (2 in 66+) Red, 2 finer, including Cameo (9/17). NGC ID# 22NH, PCGS# 3647

1873 Closed 3 Two Cent, PR66 Red
Proof-Only Issue, Supposed 'Original'

16645 1873 Closed 3 PR66 Red PCGS Secure. CAC. The 1873 two cent represents a curious proof-only issue. Most coins were struck contemporaneously, while others are supposed restrikes. The so-called "originals" feature a Closed 3 in the date. Their status as contemporary strikings can be traced to their inclusion in original 1873 proof sets. At least 600 Closed 3 two cent proofs were struck in 1873. Breen suggests an unknown quantity were probably melted after the denomination was abolished following the passage of the Coinage Act of 1873 on April 1. Uncertainties aside, survivors are definitely very rare at this grade level. A single proof is known finer.

Flashy pumpkin-gold surfaces are impeccably preserved without overt contact. A hint of reflectivity is apparent in the fields, and the central motifs show a thin layer of frost. A horizontal die scratch left of the 2 is diagnostic. Population: 15 in 66 Red, 1 finer. CAC: 3 in 66, 0 finer (9/17). NGC ID# 5L57, PCGS# 3653

1873 Open 3 Two Cent, PR66 Red
Tied for Finest at PCGS
Scarce Restrike

16646 1873 Open 3 PR66 Red PCGS. CAC. The ball is over the right edge of the 8, and the opening of the 3 is relatively wide, confirming the scarce Open 3 attribution. Only 600 or so 1873 two cent proofs were struck, including both Closed and Open 3 varieties. Open 3 two cent proofs are alleged restrikes. Breen writes in his *Proof Encyclopedia*: "One of these is seen for every 9 or 10 of the Closed 3. Die file mark through base of T(R)." Writing for PCGS CoinFacts, Ron Guth adds that "any Open 3 in PR66 or better is extremely rare."

This marvelous Premium Gem is a must-have for any serious Registry competitor. It features warm pumpkin-gold color over each side and predictably complete design detail. Contact is limited to two ticks under the shield. Population: 6 in 66 Red, 0 finer. CAC: 1 in 66, 0 finer (9/17). NGC ID# 2754, PCGS# 3656

PROOF THREE CENT NICKELS

1865 Three Cent Nickel, PR66 Cameo
Challenging First-Year Proof

16647 1865 PR66 Cameo PCGS Secure. CAC. The date is doubled, corresponding to Breen's variety 2-B. After the proof-only 1877, this first-year three cent nickel is the most challenging issue in the series to locate in proof format. An estimated 500 proofs were produced, and about half of the surviving population demonstrates Cameo contrast. This gorgeous Premium Gem is marvelously contrasted with crisp black-and-white surfaces. Three die lines appear near STA. Population: 33 in 66 Cameo, 16 finer, including Deep Cameo. CAC: 14 in 66, 2 finer (9/17). NGC ID# 275K, PCGS# 83761

1877 Three Cent Nickel, PR65
CAC-Endorsed Key Date

16648 1877 PR65 PCGS. CAC. The Mint limited three cent nickel production to proofs only in 1877. A grand total of 900 pieces were manufactured, making the 1877 the lowest-mintage issue in the entire series. This Gem would be a highlight in any carefully assembled set. Its brilliant surfaces feature undesignated field-device contrast. Contact is minimal, even for this high grade. Certified in a green label holder with CAC approval. NGC ID# 275X, PCGS# 3773

**1881 Three Cent Nickel, PR68 Cameo
Among the Finest Certified**

16649 1881 PR68 Cameo PCGS. The 1881 has a much higher circulation-strike mintage than its late-date peers, but proof production was typical for the period (3,575 pieces). This amazing PR68 Cameo representative is anything but typical, of course, ranking among the finest survivors. It enjoys dazzling, all-brilliant surfaces with profoundly mirrored fields and fully frosted motifs. As impressive in-hand as the grade suggests. Population: 4 in 68 Cameo, 0 finer (9/17). NGC ID# 2763, PCGS# 83777

**1882 Three Cent Nickel, PR68 Cameo
Top-Graded Registry Coin**

16650 1882 PR68 Cameo PCGS. Ex: Bruce Scher-R. Iskowitz. The year 1882 saw a combined production of only 25,300 three cent nickels, including 3,100 proofs. Examples of this quality are extremely rare. Pristine surfaces remain nearly brilliant with a light layer of rose patina and deep mirroring in the unmarked fields. A layer of frost blankets the devices, furthering the contrast. Remarkably clean and incredibly appealing. Population: 5 in 68 Cameo, 0 finer (9/17). NGC ID# 2765, PCGS# 83778

**1883 Nickel Three Cent, PR68
Top-Grade Registry Coin**

16651 1883 PR68 PCGS. This issue's proof mintage of 6,609 pieces is the highest in series, but quality of production seems to have been very high. It is not unusual to see a Gem or better specimen and they usually display excellent eye appeal. This amazing 1883 three cent nickel rests on the threshold of perfection, being intricately detailed and showing nary a trace of carbon or the slightest distraction. Unsurpassable quality. Population: 6 in 68, 0 finer; 1 in 68 Cameo, 0 finer (8/17).

Ex: FUN Signature (Heritage, 1/2005), lot 5656; FUN Signature (Heritage, 1/2006), lot 1210. NGC ID# 2765, PCGS# 3779

SHIELD NICKEL

**1879 Shield Nickel, Satiny MS66
Few Pieces Known Finer**

16652 1879 MS66 PCGS. The 1879 Shield nickel reinitiated circulation-strike coinage of this denomination after a two-year hiatus. Only 25,900 pieces were struck, and the date is elusive in Uncirculated condition today. This Premium Gem is high-end for the issue and shows beautiful satin luster with a trace of champagne toning. Sharp design elements complement the other outstanding aesthetic characteristics. Population: 28 in 66 (2 in 66+), 2 finer (9/17). NGC ID# 5KWK, PCGS# 3808

PROOF SHIELD NICKELS

1869 Shield Nickel, PR66+ Cameo Brilliant and Contrasted

16653 1869 PR66+ Cameo PCGS. CAC. The majority of proof 1869 nickels grade no finer than PR64, and this PR66+ Cameo is among the few finest at PCGS, in the Condition Census or nearly so. The gleaming silver-white surfaces show considerable contrast and impeccable surface preservation. A squiggly lint mark on the reverse appears left of the topmost star. This piece is one of the Wide Date varieties like all proofs, although the Wide Date-Narrow Date variants are not well-known. Population: 18 in 66 (4 in 66+) Cameo, 1 finer. CAC: 12 in 66, 0 finer (8/17). NGC ID# AMTZ, PCGS# 83823

1877 Nickel, PR66 Cameo Always in High Demand

16654 1877 PR66 Cameo PCGS Secure. CAC. Although the proof-only 1877 Shield nickel can usually be found in auctions and on bourse floors, it is subject to intense date pressure from collectors looking to fill this challenging space in their sets. Only 900 proofs were struck, limiting the supply, and many examples have been cleaned or otherwise impaired. This totally original Premium Gem has boldly contrasted frosted motifs and glassy mirrors. Translucent gold color is seen over both sides. NGC ID# 276U, PCGS# 83831

1878 Shield Nickel, PR67 Cameo Eye-Catching Radiance

16655 1878 PR67 Cameo PCGS. CAC. The second of two proof-only issues in the Shield nickel series, essential for a complete date collection. This Superb Gem Cameo displays a balance of radiant luster and mirrorlike reflectivity, leaning slightly toward the latter in the fields and the former on the devices. The strike is bold and the coin is devoid of distractions. Population: 7 in 67 Cameo, 0 finer. CAC: 5 in 67, 0 finer (8/17). Ex: FUN Signature (Heritage, 1/2015), lot 3524. NGC ID# 276V, PCGS# 83832

LIBERTY NICKELS

1885 Liberty Nickel, MS66+ Nearly Unsurpassable Quality

16656 1885 MS66+ PCGS. With a low mintage of less than 1.5 million pieces, the 1885 is the key issue in the Liberty Head nickel series, a date much in demand by collectors. It is easy to locate as a proof, but unquestioned Mint State business strikes are extremely elusive. Gem and finer examples, such as this Premium Gem, are especially desirable.

This problem-free, original coin is fully struck and nearly blemish-free. The surfaces are highly lustrous beneath an overlay of golden patina; faint reddish-apricot streaks appear on both sides. Population: 57 in 66 (25 in 66+), 3 finer (9/17). NGC ID# 2773, PCGS# 3846

1885 Liberty Nickel, MS67
Extremely Rare Top-Grade Registry Coin
First at Auction in More Than a Decade

16657 1885 MS67 PCGS Secure. The legendary key date status of the 1885 Liberty nickel drives unparalleled demand for high-grade representatives. While Uncirculated coins can usually be found for a price through MS65, Premium Gems are rarely offered, and finer pieces are so rare as to be uncollectible from the perspective of most Liberty nickel enthusiasts. This piece is the first Superb Gem that we have ever offered at auction, and it is the first coin in this grade to be auctioned publicly in more than a decade. In the American Numismatic Rarities sale of the Dale Friend Collection in March 2006, the Friend MS67 PCGS coin realized \$74,750. No top-grade representative has been auctioned since.

We believe that the combined PCGS and NGC certified population of four coins in this grade is likely accurate (8/17). The Friend coin is housed in the All-Time Finest PCGS Registry Set, and the present piece is from the only other Registry Set that contains a coin in this grade. A third PCGS example is plated on the CoinFacts webpage. NGC lists a single Star-designated Superb Gem, which is presumably the same as the MS67 NGC coin from a September 1999 Goldbergs auction reholdered, although this has not been confirmed.

At least two of the other MS67s — as well as a number of the Premium Gems known — are from the same cracked die pair, prominently showing a break through the date and another in the field left of Liberty's profile. This piece is from another die pair, only lightly cracked through AMERICA, with a horizontal tine extending inward from the border dentil above the final A. The strike is uniformly sharp, and the cartwheel luster is original and satiny. Delicate champagne, rose, and powder-blue hues decorate the surfaces. A 10x loupe fails to reveal a single notable flaw, although held at certain angles one can see the remnants of die polishing lines in the fields, indicative of an early die state. We would not be surprised if this glimmering Condition Census coin breaks the price record for the issue. NGC ID# 2773, PCGS# 3846

**1886 Nickel, Spectacular MS66
Lovely Color, Impossible to Upgrade**

16658 1886 MS66 PCGS Secure. CAC. Depending on how one evaluates such things, the 1886 is considered the key to the Liberty nickel series. The 1885 claims a lower mintage, but the 1886 is more challenging to locate in high grades, particularly in Mint State. CoinFacts estimates that merely 100 or so examples survive in Gem condition. This is one of 10 Premium Gems (two in MS66+) at PCGS. There are three more at NGC, and nine coins have been endorsed by CAC at this level (9/17).

Liberty's portrait is fully defined on this amazing, Registry-worthy nickel. The stars and lower-left wreath elements are slightly softer. However, immaculate preservation, scintillating luster, and eye-catching color make up for that virtually inconsequential and often-seen deficiency. The interiors display pale powder-blue color that turns to delicate golden hues around the borders. Small cracks are seen on each side. NGC ID# 277U, PCGS# 3847

**1888 Nickel, MS66+
A Single Coin Finer at PCGS**

16659 1888 MS66+ PCGS Secure. CAC. Bright silver surfaces are finely textured with coruscating luster and faint hints of gold. Liberty's portrait, the upper stars, and wreath elements all show crisp definition, while a touch of softness occurs over the lower obverse. Post-Mint contact is nearly unseen. The 1888 nickel was struck to the extent of 10.7 million coins, and yet only a handful survive this fine. Population: 22 in 66 (4 in 66+), 1 finer. CAC: 12 in 66, 0 finer (9/17). NGC ID# 2774, PCGS# 3849

**1900 Liberty Nickel, MS67
None Certified Finer**

16660 1900 MS67 PCGS. A respectable mintage of 27 million Liberty nickels was accomplished in 1900, and the present coin is among the finest-known survivors. The design elements are sharply detailed throughout and vibrant mint luster radiates from both sides. The impeccably preserved surfaces display subtle highlights of lavender and golden-tan toning. Eye appeal is terrific. Population: 11 in 67, 0 finer (9/17). NGC ID# 22PS, PCGS# 3861

**1900 Nickel, Dazzling MS67
None Graded Higher**

16661 1900 MS67 PCGS. CAC. The turn of the century brought with it a production of 27.2 million Liberty Head nickels, a mintage in keeping with other totals of the period. Generally, such major events result in a higher-than-average survival rate, but the 1900 is only marginally more accessible in MS67 than the issues that immediately precede or follow it. We should add that Superb Gems are very rare. This dazzling coin is brilliant with glimmering luster over pristine surfaces. Fully struck. Certified in a green label holder. Population: 11 in 67, 0 finer. CAC: 5 in 67, 0 finer (9/17). NGC ID# 22PS, PCGS# 3861

**1911 Nickel, Top-Graded MS67
Finest Example We Have Handled**

16662 1911 MS67 PCGS. Having the largest mintage in the series with 39.5 million coins might lead one to believe that the 1911 nickel is widely available in high grades. Such is not the case, however. The 1911 is scarce in MS66 and becomes a monumental condition rarity in MS67. Six Superb Gem grading events (possibly including duplications) are reported at PCGS and NGC combined. Those coins must be tightly held, because this is the first time we have handled any MS67 representative, according to our Permanent Auction Archives. Both sides display slight powder-blue overtones with accents of gold. The motifs are well-impressed, and the left ear of corn displays partial kernel detail. A couple of ticks on the bust tip and denomination are the only flaws. Encapsulated in a green label holder. Population: 5 in 67, 0 finer (9/17). NGC ID# 277M, PCGS# 3872

PROOF LIBERTY NICKELS

**1896 Nickel, PR67
Low Mintage of 1,862 Proofs**

16663 1896 PR67 PCGS. CAC. Liberty nickel proof production reached its lowest point to date in 1896, when 1,862 specimens were struck. A relatively low total of 8.8 million circulation strikes were also manufactured. Near-flawless surfaces display a moderate degree of field reflectivity and attractive glints of rose-gold under proper lighting conditions. This Superb Gem proof ranks among the top non-Cameo coins at both services. Housed in a green label holder. Population: 3 in 67, 4 finer, including Cameo and Deep Cameo. CAC: 2 in 67, 0 finer (9/17). NGC ID# 2786, PCGS# 3894

**1909 Nickel, Exceptional PR68
Colorful Concentric Toning**

16664 1909 PR68 PCGS. The 1909 Liberty Head nickel is collectible through PR67 but becomes a major condition rarity in PR68. That is true for non-Cameo and Cameo representatives alike. This essentially immaculate Superb Gem proof is partly contrasted, but insufficiently so for a formal designation. Rings of rose, gold, powder-blue, and mauve patina deliver exceptional visual appeal. Population: 3 in 68, 2 finer, including Cameo and Deep Cameo (9/17). NGC ID# 278K, PCGS# 3907

**1910 Nickel, PR68 Cameo
Finest at PCGS and CAC**

16665 1910 PR68 Cameo PCGS. CAC. Of the 2,405 proof Liberty nickels manufactured for sale to collectors in 1910, PCGS has seen seven coins in PR68. Four are non-Cameo submissions. This is one of three PR68 examples with a formal Cameo designation. CAC has awarded green stickers to three PR68 coins and two PR68 Cameo coins, including PCGS and NGC-graded representatives (9/17).

The green sticker here is wholly deserved. Dramatic field reflectivity is evident beneath a veil of even golden-rose patina. The motifs are thickly frosted and fully brought-up, accenting contrast against the glassy mirrors. Incredibly, both sides are utterly devoid of visible contact. NGC ID# 278L, PCGS# 83908

BUFFALO NICKELS

**1916 Buffalo Nickel, Exceptional MS67
Sharply Struck and Lustrous**

16666 1916 MS67 PCGS. Struck from fresh dies, there are no signs of granularity or die fatigue on either side of this Superb Gem 1916 Buffalo nickel. A faint aura of peach-gold glows from the sharply struck hair strands, although this nickel is primarily a refreshing and lustrous nickel-gray color. The reverse strike is exceptional, with the bison's eye definition nothing short of mesmerizing and razor-sharp definition on the horn, head, and fur. The tail is round (not flat) and bifurcated at the end. There are no numerically finer examples at PCGS. Population: 26 in 67 (1 in 67+), 0 finer (9/17). NGC ID# 22RA, PCGS# 3930

**1918/7-D Buffalo Nickel, AU Details
Famous *Guide Book* Overdate**

16667 1918/7-D FS-101 — Improperly Cleaned — NGC Details. AU. This pleasing AU Details specimen clearly shows the remnants of an undertype 7 below the final digit in the date, identifying the extremely popular FS-101 overdate variety. The well-detailed design elements exhibit just the slightest trace of actual wear, and the lightly abraded surfaces are blanketed in shades of lavender-gray and golden-tan toning. The luster is somewhat dimmed by the noted cleaning.

1918/7-D Buffalo Nickel, AU Details
FS-301, Famous Hubbing Error

16668 1918/7-D FS-101 — Reverse Tooled — NGC Details. AU. Intermixed shades of blue and deep rose patina adorn this lightly circulated example of the famous hubbing error and perennial collector favorite. The obverse is strongly defined and appealing, while the reverse displays scratches on the mound below the bison's forefeet. There has also been an attempt to efface a die crack below the bison's midsection. Despite the problems, this remains a well-detailed example with delicate patina and a bold overdate. A small lamination occurs near FIVE.

1919-D Buffalo Nickel, MS65
Conditionally Elusive Issue

16669 1919-D MS65 PCGS. The 1919-D Buffalo nickel is a challenging issue in high grade, with a decent strike. This impressive Gem exhibits sharply detailed design elements throughout, and the well-preserved surfaces display satiny mint luster under shades of greenish-gold and lavender toning. Population: 60 in 65 (5 in 65+), 20 finer (9/17). NGC ID# 22RM, PCGS# 3942

1921-S Nickel, Luminous MS65
CAC-Endorsed Condition Rarity

16670 1921-S MS65 PCGS. CAC. Struck from eroded dies, showing metal flowlines in the fields and fine cracks throughout. The sharpness of the strike also suffers as a result. Nonetheless, the frosty mint luster is beautifully preserved, and eye appeal is outstanding. A hint of champagne toning graces each side. The 1921-S is a better date in Gem condition and is rarely seen finer. Housed in a first generation holder. Population: 74 in 65 (3 in 65+), 9 finer. CAC: 10 in 65, 2 finer (9/17). NGC ID# 22RU, PCGS# 3948

1929-S Nickel, Multicolor MS67
The Single Finest at CAC

16671 1929-S MS67 PCGS. CAC. The 1929-S Buffalo nickel in MS67 is a major condition rarity, unknown finer. This example is the only top-grade coin endorsed by CAC. Previous offerings of a Superb Gem in our auctions have realized strong prices, with preference given to PCGS-graded coins. This is the first MS67 from either grading service to appear in our auctions since 2014, when another example realized \$11,750 (Heritage, 2/2014). The beautiful multicolor border toning, olive-gold interiors, satiny luster, and CAC-endorsement make this piece arguably the most appealing 1929-S nickel known. The strike is boldly rendered, offering increased interest for a San Francisco issue of this period. Population: 10 in 67, 0 finer. CAC: 1 in 67, 0 finer (9/17). NGC ID# 22SG, PCGS# 3968

JEFFERSON NICKEL

1942-D Over Horizontal D Nickel
FS-501, MS66 Full Steps

16672 1942-D D Over Horizontal D, FS-501, MS66 Full Steps PCGS.

The reverse and the left obverse are toned pumpkin-gold, while the right obverse is powder-blue and rose-red. A lustrous and boldly struck example of this *Guide Book* blundered mintmark variety. Carbon and contact are incidental only. *Cherrypickers'* describes the 1942-D Over Horizontal D as "the rarest of the major Jefferson nickel varieties in Mint State" and indeed, most PCGS-certified examples of the variety are in circulated grades, with one example each certified as Good 6 and VG8. Population: 3 in 66 Full Steps, 0 finer (9/17). NGC ID# 22TL, PCGS# 38496 Base PCGS# 84015

HALF DISME

1792 Half Disme, Good 6
Judd-7, Pollock-7
Famous American Prototype

16673 1792 Half Disme, Judd-7, Pollock-7, R.4, Good 6 PCGS. CAC.

The 1792 half dismes represent a major step forward in the history of American numismatics. And yet, the circumstances surrounding their production are somewhat unclear. Personal recollections and memoranda in place of official documentation make discerning truth from speculation a significant challenge. The recent publication of *Birth of a Nation's Coinage* by Smith, Orosz, and Augsburg has done much to separate fact from fiction as it pertains to the production of the 1792 coinage. Certain clarifications include:

- Thomas Jefferson likely delivered Spanish colonial silver coins for striking the half dismes.
- Sawmaker John Harper provided a facility for striking half dismes. The property was located at the corner of North Sixth and Cherry streets, one and a half blocks from the Mint site.
- A total of 1,500 half dismes were struck.
- There is evidence to suggest two striking periods for the 1792 half dismes. The first was between July 11 and 13. The second was reportedly October 9, 1792.
- There is no record of Washington receiving any half dismes from Jefferson when they met on September 30 or October 1, 1792. There is no evidence Washington handed coins out to foreign dignitaries.
- Jefferson paid out about 55 half dismes between July 19 and July 22 on his way to Monticello.

The authors provide a census of 169 1792 half dimes. We are unable to match this piece with any of the listings. Smooth surfaces feature a clear portrait and readable legends on each side. The eagle's right (facing) wing is typically soft. Light olive and antique-gold patina adorns the rims. NGC ID# 946T, PCGS# 11020

EARLY HALF DIMES

1795 Half Dime, AU50
V-4, LM-10, Nearly Mark-Free

16674 1795 V-4, LM-10, R.3, AU50 PCGS. LM-10 shows four distinct touch-points that define the obverse die: Star 1 joins curl 2, star 15 joins the bust tip, digit 1 touches the lowest curl, and digit 5 touches the bust truncation. On the reverse, 5 berries left and 5 berries right include no inside berries beneath the wings, and a single outer berry below the left wing. Struck from a lapped obverse die, with only faint remnants of die clashing and spindly stars. The finely granular surfaces display thick, medium-gray patina and reddish-tan toning. Muted luster is offset by nearly mark-free surfaces and no adjustment marks. Housed in a previous generation green label holder. NGC ID# 22ZV, PCGS# 38594 Base PCGS# 4251

1795 Half Dime, Colorful AU58
V-4, LM-10, Exceptional Type Coin

16675 1795 V-4, LM-10, R.3, AU58 NGC. Variegated cherry-red, violet, and blue shades glow with bright mint luster that remains on this briefly circulated LM-10 half dime. The date touches the portrait — 1 at the curl, and 5 at the neck truncation — to help confirm the variety of sharply struck and colorful example. Remnants of a few adjustment marks cross the eagle's breast. LM-10 is a readily available die marriage, making it an ideal candidate for the two-year Flowing Hair type. NGC ID# 22ZV, PCGS# 38594 Base PCGS# 4251

1795 Flowing Hair Half Dime, MS63
V-4, LM-10, Early Die State

16676 1795 V-4, LM-10, R.3, MS63 ANACS. The early die state, cracked on the obverse with bold clash marks in the fields but no rim cud above the TY in LIBERTY. The stars are sharp and bold in this die state, prior to the die lapping that was performed to efface the clash marks. This die pairing is fairly plentiful in the absolute sense, but any Uncirculated 1795 half dime is scarce compared to the demand that the Flowing Hair type experiences in such grades. This Select LM-10 coin is satiny and brilliant with only some light handling marks on the cheek preventing a finer grade. Considerable strike weakness on the eagle's breast and right (facing) wing mirrors incompleteness at the center of Liberty's hair curls; some degree of strike weakness is encountered on most examples of this type. Although produced on a screw press, this early half dime shows an even die impression and has complete dentils around each side. NGC ID# 22ZV, PCGS# 38594 Base PCGS# 4251

1796 Half Dime, Attractive VF30
V-1, LM-1, LIKERTY

16677 1796 LIKERTY, V-1, LM-1, R.3, VF30 NGC. A leaf tip touches the final A in AMERICA, while the B in LIBERTY is open at the top and bottom loops to vaguely resemble a K. Collectors have long liked the moniker LIKERTY, so the name sticks for the LM-1 variety. Moderate wear on Liberty's upper hair and shoulder and smoothness at the eagle's breast and leg determine the assigned grade. Still, this example is free of adjustment marks and retains bits of mint luster on both sides. A pair of minor dimplelike indents on the obverse — one on the neck, another near star 14 — plus a third on the reverse near the right wing shoulder may be planchet-related defects, and are altogether non-distracting. NGC ID# 22ZX, PCGS# 38596 Base PCGS# 4254

1797 V-4, LM-2 Half Dime, AU50
16 Stars Obverse, Blatantly Original

16678 1797 16 Stars, V-4, LM-2, R.4, AU50 PCGS. CAC. This 16 Stars obverse variety (LM-2) shows the leaf close to the first T in STATES. These coins are always collector favorites. At a certain point Mint officials recognized the futility of attempting to represent every new state in the Union with star. This was the highest number of stars reached before reverting to 13 stars for the original colonies. Golden-gray tones cover this lightly circulated early half dime. Abundant detail remains, though the centers are slightly soft. Seldom found so blatantly original. NGC ID# 22ZZ, PCGS# 38598 Base PCGS# 4259

BUST HALF DIMES

1831 V-4, LM-4 Half Dime, MS67
Stunning Prooflike Fields
Ex: Eliasberg, Gardner

16679 1831 V-4, LM-4, R.2, MS67 NGC. Star 2 is recut on LM-4, and the O in OF is doubled at its base. The reverse, shared with the V-2, LM-3 variety, shows MERI joined at their bases. The distinction between proofs and Mint State or Uncirculated specimens of early U.S. (and Colonial, for that matter) coinage is not always clear-cut, and many educated numismatists can disagree over the status of a particular piece, as in this case. The intent of the coiner is certainly hard or impossible to read — oftentimes centuries after the fact — save for whatever evidence remains on the coins themselves.

This immaculate coin was cataloged as a Premium Gem proof in the Bowers and Merena catalog of the Eliasberg Collection, but NGC has now graded it MS67. This coin was formerly also specifically mentioned in the census of the *Breen Proof Encyclopedia*. Beautiful multicolor toning graces each side of this exceptional Superb Gem half dime, complementing fully mirrored fields. The surfaces are well-detailed throughout, and faint die striations run diagonally from northeast to southwest on the obverse. Census (all varieties included): 19 in 67 (2 in 67+, 2 in 67 ★), 2 finer (9/17). Ex: Louis E. Eliasberg, Sr. Collection, Part I (Bowers and Merena, 5/1996), lot 916; Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98157; Dallas Signature (Heritage, 4/2017), lot 15684. NGC ID# 232D, PCGS# 38659 Base PCGS# 4278

1834 V-2, LM-3 Half Dime, MS66
3 Over Inverted 3, Guide Book Variety

16680 1834 3 Over Inverted 3, V-2, LM-3, FS-301, R.3, MS66 PCGS. As the variety flatly states, the 3 in the date is punched over an initially inverted 3. Valentine-2 is distinguished from Valentine-5 by the placement of the final S in STATES over the break between S and U. A trace of pale gold and ice-blue color complements mostly brilliant, incredibly clean surfaces. Light clash marks occur on each side. Sharp with softness limited to stars 12 and 13, and the tops of UNITED. Population (all varieties): 17 in 66, 9 finer (9/17). PCGS# 38706 Base PCGS# 4281

EARLY DIMES

1800 JR-2 Dime, Choice AU
Attractive Date Representative

16681 1800 JR-2, R.5, AU55 NGC. JR-2 is the scarcer of the two 1800 Draped Bust dime varieties, although neither is particularly plentiful. This Choice AU example displays a bold strike and little wear. The reverse border dentils are complete, although the obverse rim is weak from 1 to 3 o'clock. Daubs of violet and gold toning accent otherwise mainly silver surfaces. Census (both varieties included): 7 in 55, 11 finer (8/17). NGC ID# 236H, PCGS# 38755 Base PCGS# 4470

1805 Draped Bust Dime, MS63
JR-2, Four Berries Reverse

16682 1805 4 Berries, JR-2, R.2, MS63 NGC. The dimes of 1805 are known only by two die marriages that share a common obverse, with a small spine protruding from the top of the 5 in the date. The reverses show four or five berries, with the present 4 Berries reverse having narrow A's and leaves that are clear of the peripheral lettering.

This coin shows appealing medium-gray and golden highlights on each side, with few relevant abrasions. Some light adjustment marks appear in the central obverse. The strike is fairly sharp in the center, although some of the dentilation is softly defined.

Ex: *FUN Signature* (Heritage, 1/2010), lot 2474. NGC ID# 236S, PCGS# 38769 Base PCGS# 4477

1807 JR-1 Dime, MS62
Softly Lustrous Type Candidate

16683 1807 JR-1, R.2, MS62 PCGS. The frequency with which the 1807 Draped Bust dime appears on the market in Uncirculated condition ensures its suitability for type representation. Still, the vast majority of survivors are well-circulated, and Mint State examples remain scarce. Soft mint luster appears over silver-gray surfaces that show added blushes of gold. The devices exhibit softness around the edges, but the centers are strong. The obverse is heavily clashed. NGC ID# 236T, PCGS# 38770 Base PCGS# 4480

BUST DIMES

1822 JR-1 Dime, Attractive AU58
Ex: Winsor, Eliasberg

16684 1822 JR-1, R.4, AU58 PCGS. Ex: Eliasberg. The pedigree of this piece can be traced to the 19th century, when it was offered in the Chapman brothers' sale of the Richard B. Winsor Collection. The catalog described it as "Extremely fine" and "Extremely rare." By modern grading standards, this coin is firmly an AU58, and much luster remains in the fields. Russet, sea-green, and warm golden toning blankets each side. The lower stars exhibit the only discernible strike weakness.

The 1822 dime had a small mintage of 100,000 pieces from a single die pair. Examples are scarce in all grades today and genuinely rare in the upper AU and Mint State levels. A near-Mint coin such as this is a rare sighting at auction. Housed in a green label holder. Population: 6 in 58, 6 finer (8/17).

Ex: *Richard B. Winsor Collection* (S.H. and H. Chapman, 12/1895), lot 675, which realized \$42.00; *Louis E. Eliasberg, Sr. Collection* (Bowers and Merena, 5/1996), lot 1070. NGC ID# 236Z, PCGS# 38801 Base PCGS# 4497

1827 Capped Bust Dime, MS65
Popular JR-11 Example

16685 1827 Pointed Top 1, JR-11, R.2, MS65 NGC. Shades of lavender, sea-green, and amber toning visit the well-preserved surfaces of this delightful Gem, with vibrant mint luster on both sides. The design elements are well-detailed, with just a touch of the usual softness on the shield. The overall presentation is most attractive. Census (for the variety): 1 in 65, 0 finer (9/17). NGC ID# 2375, PCGS# 38821 Base PCGS# 4504

SEATED DIMES

1874-CC Arrows Seated Liberty Dime
Low-Mintage Key

16686 1874-CC Arrows, F-101, R.4 — Surface Damage — PCGS Genuine. The PCGS number ending in .98 suggests Surface Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VF specimen that has light corrosion and surface damage. The 1874-CC Seated Liberty dime claims a low-mintage of 10,817 pieces, all struck from a single pair of dies. The issue is elusive in all grades and conditions today. This specimen retains VF sharpness on the devices and the lightly corroded surfaces show a number of long scratches, most of them on the reverse. Pleasing shades of lavender-gray and pale gold toning visit both sides.

1886-S Seated Dime, MS67
Ex: Randall, Clapp, Eliasberg

16687 1886-S F-101, R.4, MS67 PCGS. Ex: Eliasberg. This boldly struck, satiny Superb Gem displays unabraded surfaces and rich luster. Daubs of russet toning accent mainly champagne-tinted surfaces, delivering strong eye appeal. The 1886-S is scarce in all Mint State grades, and Superb Gems are decidedly rare. Population: 4 in 67, 2 finer (8/17).
Ex: J. Colvin Randall, private sale to J.M. Clapp (3/1894); Clapp Estate, to Louis E. Eliasberg, Sr. (1942); Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 5/1996), lot 1230. NGC ID# 23B4, PCGS# 538720 Base PCGS# 4697

BARBER DIMES

1895-O Barber Dime, AU58
Key Date in Exceptional Condition

16688 1895-O AU58 PCGS. The 1895-O is the key date in the Barber dime series, coming from a mintage of only 440,000 pieces. This near-Mint example is well-detailed and original with deep olive-gray toning. Slight strike softness is evident on the lower wreath. The rarity of Mint State coins promotes strong collector demand for high-end AU examples of this and other key-date Barber coins. Population: 10 in 58, 38 finer (9/17). NGC ID# C4KL, PCGS# 4807

1896-O Dime, Fully Struck MS65
A Top Condition Rarity in the Series

16689 1896-O MS65 PCGS. Bowers writes in his *Guide Book of Barber Silver Coins*: "The 1896-O is one of the handful of top rarities among Barber dimes in grades MS-60 or higher." He adds of coins in MS65 or better: "One of the standard rarities among gem early Barber dimes." Indeed, only a very few examples have reached this exclusive level. Vibrant luster issues from bright surfaces that exhibit daubs of thin golden patina. A full strike is evident on the forecurls and wreath elements, including the corn kernels. Housed in a green label holder. Population: 8 in 65, 8 finer (9/17). NGC ID# 23DZ, PCGS# 4810

1902-S Dime, Sensational MS66
Ex: Duckor

16690 1902-S MS66 PCGS. CAC. Ex: Duckor. This is a sensational Premium Gem with fully brilliant surfaces and heavy mint frost over each side. The design elements are exceptionally bold throughout. A few minuscule tick marks are visible upon close examination. There is no doubt that the advanced Barber dime specialist will recognize the importance of this offering. Population: 10 in 66, 1 finer. CAC: 7 in 66, 2 finer (9/17).
Ex: Dr. Steven L. Duckor Collection / FUN Signature (Heritage, 1/2005), lot 1001. NGC ID# 23EL, PCGS# 4829

**1908-S Dime, Exceptional MS67
None Finer, Ex: Jung**

16691 1908-S MS67 PCGS. CAC. The 1908-S is the most elusive mintmarked Barber dime of the year in MS67. PCGS reports three examples in this grade, while NGC reports one more (9/17). This coin was formerly housed in an NGC holder, and that single listing may still represent the piece offered here. Moreover, we have only been able to identify one other MS67 coin — the Rich-Simpson-Hansen specimen that recently brought \$10,281 in a December 2016 Legend Auctions appearance. This luminous example is every bit as impressive, fully toned in original iridescent patina that includes shades of gold, blue, green, and violet. Both sides are razor-sharp and appear mark-free. Worthy of a premium bid.
Ex: Oliver Jung Collection (*American Numismatic Rarities*, 7/2002), lot 43. NGC ID# 23FA, PCGS# 4849

PROOF BARBER DIME

**1899 Dime, PR67 Deep Cameo
Tied for Finest at Both Services**

16692 1899 PR67 Deep Cameo PCGS. CAC. Totally brilliant surfaces generate a heightened degree of white-on-black contrast. The fields are deeply reflective, and the fully raised design features display a thick layer of frost. A mere five examples have reached this enviable grade level at PCGS, while another three pieces are reported in the same grade at NGC. CAC has endorsed three PR67 Deep or Ultra Cameo submissions (9/17). With low population totals and intense Registry competition, we expect spirited bidding from interested parties when this dazzling proof crosses the block. PCGS# 94883

MERCURY DIMES

**1916-D Mercury Dime, XF40
Elusive Grade**

16693 1916-D XF40 PCGS. CAC. The 1916-D had a mintage of only 264,000 coins, the smallest production of any Mercury dime, possibly other than the overdates (the mintage of the latter two varieties is not known). Examples in XF grades are elusive, far more so than in other grade categories. PCGS has certified 6,700 pieces in Fine and lower grades, 359 VF pieces, 207 examples in XF, 343 pieces in AU grades, and 374 Mint State coins. Housed in a green-label PCGS holder, this key Mercury dime displays pleasing light gray surfaces with delicate champagne overtones. NGC ID# 23GY, PCGS# 4906

**1918-S Mercury Dime, MS65 Full Bands
Seldom Seen in Finer Grades**

16694 1918-S MS65 Full Bands NGC. A delightful Gem representative of this popular early series issue, with sharply detailed design elements and fully split and rounded bands on the fascies. The well-preserved surfaces are lightly toned in attractive shades of pale gold and lavender, with vibrant mint luster underneath. Census: 8 in 65 Full Bands, 5 finer (9/17). NGC ID# 23H7, PCGS# 4921

**1919-S Dime, MS64 Full Bands
A Top Strike Rarity**

16695 1919-S MS64 Full Bands PCGS. The 1919-S is one of the top strike rarities in the series. Breen noted in his *Encyclopedia* that Uncirculated examples "are often weak," and CoinFacts places only one issue — the 1919-D — ahead of it with Full Bands. This wonderful near-Gem is fully struck, including the motto, date, and central bands. Dappled gunmetal and gold patina appears over each side with shimmering luster. NGC ID# 5LLN, PCGS# 4927

**1927-S Dime, Gem Full Bands
Rarely Seen So Strongly Defined**

16696 1927-S MS65 Full Bands PCGS. Perhaps as little as 5% of the surviving 1927-S population meets the requirements for an Uncirculated Full Bands assessment. This San Francisco dime is exceedingly rare in MS65 Full Bands. The strike is needle-sharp over the centers and peripheral areas with fully split central bands on the fasces. Each side retains its brilliance. A single mark is seen on the bust truncation. Population: 34 in 65 Full Bands, 19 finer (9/17). NGC ID# 23HW, PCGS# 4965

**1945 Dime, MS64 Full Bands
Rare CAC-Endorsed Example**

16699 1945 MS64 Full Bands PCGS. CAC. Although plentiful in most grades, the 1945 Mercury dime is a scarce issue with Full Bands definition. This near-Gem example displays satiny luster with hints of light golden border toning. No major abrasions are seen. The strike is first-rate, including the impression of clash marks behind Liberty's neck. CAC-approved Full Bands coins are decidedly rare in this grade. Population: 42 in 64 (1 in 64+) Full Bands, 57 finer. CAC: 7 in 64, 6 finer (9/17). NGC ID# 5A98, PCGS# 5057

**1942/1-D Mercury Dime, MS63
Full Bands Definition**

16697 1942/1-D FS-101 MS63 Full Bands NGC. The remnants of an undertype 1 are visible beneath the left side of the 2 in the date, identifying this popular *Guide Book* variety. In addition to the famous hubbing error, the obverse die is slightly doubled, as seen most clearly on the motto. This lightly marked Select specimen exhibits Full Bands definition on the fasces and vibrant mint luster throughout. NGC ID# 23K6, PCGS# 145476 Base PCGS# 5041

**1945 Mercury Dime, MS65 Full Bands
Sharply Detailed and Well-Preserved**

16700 1945 MS65 Full Bands NGC. A delightful Gem representative of this popular issue, with sharply detailed design elements and well-preserved surfaces that exhibit speckled amber and violet toning in selected areas. The bands on the fasces are fully split and rounded and satiny mint luster adds to the outstanding eye appeal. Census: 6 in 65 Full Bands, 11 finer (9/17). NGC ID# 5A98, PCGS# 5057

**1945 Mercury Dime, MS64 Full Bands
Final-Year of Design**

16698 1945 MS64 Full Bands PCGS. An attractive Choice specimen from the final year of the Mercury design, this coin displays well-detailed design elements, with Full Bands definition on the fasces. The well-preserved brilliant surfaces radiate vibrant mint luster on both sides and overall eye appeal is outstanding. Housed in an old green label holder. Population: 42 in 64 (1 in 64+) Full Bands, 57 finer (9/17). NGC ID# 5A98, PCGS# 5057

PROOF MERCURY DIME

1936 Dime, Lovely Rim-Toned PR67+

16701 1936 PR67+ PCGS. CAC. Spectacular eye appeal is the hallmark of this pristine Superb Gem proof 1936 dime, showing concentric violet, moss, orange, and indigo patina near the rims on each side, with a brilliant central obverse and a sun-gold interior on the reverse. Finer 1936 proofs are extremely rare. Population: 85 in 67 (5 in 67+), 3 finer. CAC: 36 in 67, 0 finer (9/17). NGC ID# 27DG, PCGS# 5071

TWENTY CENT PIECE

1875-S Twenty Cent, Frosty MS66
Few Pieces Known Finer

16702 1875-S MS66 PCGS. CAC. BF-10, R.3. The availability of the 1875-S twenty cent piece in Mint State makes it popular among type collectors, although examples are conditionally scarce in MS66 and rare finer. This frosty Premium Gem displays original luster and a shimmering cartwheel effect. The obverse is mostly brilliant, while the reverse displays russet and olive-gold toning. Minor strike weakness is seen on the right-hand stars and on the eagle's breast and upper wing edges. Population: 72 in 66 (6 in 66+), 5 finer. CAC: 18 in 66, 0 finer (8/17). NGC ID# 23R7, PCGS# 5298

PROOF TWENTY CENT PIECES

1876 Twenty Cent Piece, PR64 Cameo
Scarce CAC-Approved Cameo

16703 1876 PR64 Cameo PCGS. CAC. With only a handful of Deep Cameos known, and Cameos scarce in all grades, the proof 1876 twenty cent piece presents quite a challenge for date collectors seeking high-end examples of the issue. The 1876 also experiences heightened demand among proofs due to the scarcity of high-grade circulation strikes for this year. The current near-Gem proof Cameo displays golden border toning around contrasted, brilliant interiors. The strike is sharp and there are no obtrusive contact marks. Population: 32 in 64 Cameo, 24 finer. CAC: 10 in 64, 11 finer (9/17). NGC ID# 27H3, PCGS# 85304

1878 Twenty Cent, PR63 Cameo
Well-Contrasted Devices

16704 1878 PR63 Cameo PCGS. BF-1, R.3. The final proof issue in the twenty cent series, the 1878 is usually available but is seldom offered with cameo contrast. This Select representative displays stark white-on-black surfaces and sharp design elements. Faint, grade-limiting hairlines are mainly on the obverse. Eye appeal is pleasing. Population: 18 in 63 Cameo, 48 finer (9/17). NGC ID# 27H5, PCGS# 85306

EARLY QUARTERS

1796 Quarter, Well-Defined XF45
Low 6, Scarcer B-1 Die Pair

16705 1796 B-1, R.4, XF45 NGC. Tompkins Die State 3/3. The rarer of the two 1796 varieties, Browning-1 is attributed by a low 6 in the date, a lump between the 9 and the dentil, the date not equally spaced. The 7 and 9 are too close, the lower right star almost touches the drapery, and the upright of E in LIBERTY is centered over the curl. Both varieties share the same reverse. The late state of the reverse die indicates Browning-2 was struck first, then Browning-1.

The quarter dollar was issued on an irregular basis during the early years of the Mint. Coinage was low in some years, while others saw no production at all. The early Mint lacked a bullion fund to purchase silver, and processed each bullion deposit in the order it was received according to the wishes of the depositor. Usually, the depositor specified the denomination desired, and the needs of commerce were secondary. Steve Tompkins writes in his treatise *Early United States Quarters, 1796-1838*:

“There was a glut of Spanish colonial silver 2 reales already in circulation. Many of these pieces even being very worn, traded at par, so the need was small for new coins of the quarter denomination. Consequently, few depositors wished to have their deposits returned in quarter dollars.”

Tompkins continues:

“In fact, the new quarter denomination was not only unneeded, it was in all probability unwanted as well. Due to the lack of a denomination stated on the coin, the public even had trouble knowing what it was worth and how to use it for making change in daily commerce.”

Just 6,146 pieces were struck in 1796. Medium intensity golden-gray patination in the fields offers deep-blue accents and frames light-gray central motifs. The design elements are well-defined, and the dentils are bold. Both sides are remarkably clean for a coin having experienced some circulation, and both are devoid of adjustment marks. In summary, this Choice XF piece is strong for the grade and is a wonderful addition for an advanced type or date collector. Census: 8 in 45, 68 finer (8/17).

Ex: *Central States Signature* (Heritage, 4/2010), lot 2075. NGC ID# 23RA, PCGS# 38919 Base PCGS# 5310

1804 B-2 Quarter, VF20
Notable Series Scarcity, Rare This Fine

16706 1804 B-2, R.5, VF20 PCGS. With a mintage of just 6,738 pieces, the 1804 quarter is, in theory, about equally as challenging as the 1796 issue, which shows a similar number of pieces struck. In reality, the 1804 is much scarcer as a date. Like the 1796, two varieties exist — one with the final digit of the date high, the other with it low. The Browning-2 with a High 4 in the date is doubly scarce, both as a date and as a variety.

The average grade of any 1804 quarter seldom exceeds the VG level. This example, in contrast, is far finer than that, with sharply defined elements and natural, two-tone patina. Brownish-gray fields contrast with light-tan toning on the raised devices. We note a small planchet flaw at star 3 and a tiny void near star 4. Both defects are Mint-related and of minor significance. As usual, some blending of the field stars and clouds exist on the reverse. This is an excellent opportunity for the early quarter specialist, seldom offered and sharper than many of the Condition Census examples in the Rea-Koenings-Haroutunian reference. NGC ID# 23RB, PCGS# 38922 Base PCGS# 5312

1806 B-9 Quarter, AU55
Late Die State, Soft Luster Remains

16707 1806 B-9, R.1, AU55 PCGS. Tompkins Die State 6/5, the latest die stage described in Steve Tompkins' reference. The lowest hair curls are lapped and nearly gone near 1 in the date. A bold die crack bisects the obverse between 12 and 7 o'clock, and both sides are prominently clashed. This is an original, Choice About Uncirculated coin with light golden-brown and grayish-blue toning. The eagle's shield is softly defined, and a few faint abrasions are noted at the central reverse and at TE in UNITED. The coin is housed in a previous generation green label holder, which obscures some diagnostic rim cud and rim crumble that are the result of the legends being placed too close to the rim on Browning-9.

Ex: *Central States Signature* (Heritage, 4/2007), lot 417. NGC ID# 23RD, PCGS# 38935 Base PCGS# 5314

BUST QUARTERS

1818/5 B-1 Quarter, MS64
Extremely Late Die State

16708 1818/5 B-1, R.2, MS64 PCGS. CAC. Tompkins Die State 3/6. Struck with the reverse die in its near-terminal state, this lightly toned and lustrous near-Gem quarter is an outstanding example of the overdate. A clear remnant from the flag of a 5 remains within the top loop of the second 8. Struck from a lapped die, the frosted obverse surfaces are free of any distractions, with only faint reminders of double die clashing that typifies an earlier die state.

The reverse is far more advanced in its die life. The Tompkins reference suggests, "The latest die stages with the reverse die crack through the period and the bisecting crack is very scarce." This example qualifies on both of those diagnostics, with additional cracks and die clashing visible around the denomination. Strike doubling shows on the leaves, lower legend, and 25 C. Multiple intersecting die cracks at TAT in STATES make an impressive display. Much brilliance remains across the golden-gray, Choice Mint State surfaces, with sharp definition on the motifs in spite of the late die state. Population (both overdate varieties combined): 22 in 64, 14 finer. CAC: 5 in 64, 10 finer (8/17). NGC ID# 23RJ, PCGS# 38953 Base PCGS# 5323

1818 B-2 Quarter, MS65
Near-Terminal Die State

16709 1818 B-2, R.1, MS65 NGC. Tompkins Die State 5/4. The obverse has heavy clash marks and die cracks, including the main crack over the cap extending to star 10, and then boldly to the rim. Another crack joins the main crack and the rim at about 12 o'clock. Additional minor cracks are noted. The reverse also exhibits heavy clash marks and die cracks on this late-die state specimen. Later die states are known, but not much later than this near-terminal specimen. This Gem is impressively lustrous with hints of rose and peach toning over otherwise silver-white surfaces. It is well-struck and pleasingly preserved with great eye appeal. Census: 20 in 65 (1 in 65+), 12 finer (8/17).

Ex: Summer FUN Signature (Heritage, 7/2009), lot 443; FUN Signature (Heritage, 1/2013), lot 5591. NGC ID# 23RH, PCGS# 38943 Base PCGS# 5322

SEATED QUARTERS

1852-O Seated Quarter, AU53
Rare in All Grades

16710 1852-O AU53 PCGS. Briggs 1-A. Vertical die lines connect the arrow shafts. This example of the rare 1852-O quarter shares the same reverse as the Briggs 1-A 1851-O quarter. While the Briggs commentary that the 1852-O is “rare to nonexistent in grades XF or finer” is perhaps slightly overstated, the rarity of this New Orleans issue cannot be denied. The present About Uncirculated coin displays pale golden-gray toning over reflective and partially lustrous surfaces. We note a few light field lines but none are distracting. Seldom offered and well-defined for the grade, with characteristic rounded rims and tremendous appeal for date and mint collectors. Population: 1 in 53, 4 finer (9/17). NGC ID# 23T9, PCGS# 5420

1853/53 No Arrows Quarter, MS66
Repunched Date, Important Melt Rarity

16711 1853/53 No Arrows, Briggs 1-A, FS-301, MS66 PCGS. A brief mintage of 44,200 1853 quarters was struck before word came down from the Mint to reduce the amount of silver in 1853 coinage as a means of bringing the silver-to-gold ratio back in balance. Arrows were added on either side of the date to signify the reduced weight, as well as some ill-conceived rays on the reverse. By then, most of the “heavyweight” silver coinage was melted, either by the Mint or by speculators.

Consequently, 1853 quarters at the old standard are scarce-to-rare and readily identified by faint, broad repunching of 53 in the date. This Premium Gem example displays a colorful patina of reddish-gold and bluish-gray and a crisp strike. Silver mint luster glows beneath the toning and emerges in patches on the reverse. Most of the high-grade Uncirculated pieces come from a small hoard of coins that avoided melting. Population: 6 in 66, 3 finer (9/17). NGC ID# 23TA, PCGS# 395930 Base PCGS# 5421

**1860-S Quarter, AU50
Only Two Finer at PCGS**

16712 1860-S AU50 PCGS Secure. Briggs 1-A. The mettle of any Seated quarter collection is tested by its 1860-S, with only advanced collections holding high-grade pieces that are uncompromised by damage or improper handling. When Larry Briggs published his still-important reference, *Liberty Seated Quarters*, in 1991, he stated that no Uncirculated 1860-S quarters were known, and only two About Uncirculated pieces were ever seen.

Now more than 25 years later, a few more higher-grade pieces have emerged and the wonders of grade deflation have revealed a few more, yet just one Uncirculated piece (the former Gene Gardner coin) is certified, joined by just over a handful of AU coins. This example is at the low end of the AU spectrum, but sharply struck for an 1860-S with silver-gray patina and traces of luster at the margins. Marks are limited to few faint, hair-thin abrasions on the obverse amid light wear from short-lived circulation. Population: 1 in 50, 2 finer (9/17). NGC ID# 442R, PCGS# 5453

**1880 Quarter, MS67
Just One Coin Finer at PCGS**

16713 1880 MS67 PCGS. CAC. Briggs 1-A. The sole dies employed to coin 13,600 circulation-strike Seated quarters in 1880. Unneeded for circulation because of a large influx of quarters from abroad, this issue and its low-mintage contemporaries were mainly struck for collectors. Examples of the 1880 usually come semiprooflike, as here. The devices are frosted and well-struck, while unmarked fields radiate cartwheel luster. Entirely brilliant. Population: 16 in 67 (2 in 67+), 1 finer. CAC: 12 in 67, 0 finer (9/17). NGC ID# 23VC, PCGS# 5512

PROOF SEATED QUARTERS

**1858 Quarter, Mirrored PR66
Attractive Blue and Rose Patina**

16714 1858 PR66 NGC. Briggs 5-E. Proof mintages benefited from the Mint's willingness to strike a predetermined quantity for the public, rather than "on order and as needed" from favored dealers and paying clients as in preceding years. The new policy included a willingness to actively market the proofs. This is a brightly reflective, richly toned Premium Gem imbued with shades of cerulean-blue and reddish-rose. Unaccustomed to the large mintage, the Mint undoubtedly encountered some issues, as evidenced by a faint die crack through the arrowheads. Census: 8 in 66, 2 finer (9/17). NGC ID# 23WK, PCGS# 5554

**1868 Quarter Dollar, Richly Toned PR66
Undesignated Cameo Contrast**

16715 1868 PR66 PCGS. CAC. A review of PCGS grading data verifies the rarity of high-grade proof 1868 quarter dollars. That service has certified 10 other examples in PR66, two in PR66 Cameo, and only one Deep Cameo example in the current population data.

An example of unparalleled beauty, this Premium Gem combines delicate gold toning over light silver surfaces in the center, with peripheral blue, violet, and iridescent patina. Both sides are fully mirrored around lustrous devices, an obvious but undesignated Cameo proof. Population: 11 in 66, 0 finer. CAC: 3 in 66, 0 finer (9/17). NGC ID# 23WZ, PCGS# 5567

**1874 Arrows Quarter, PR66
Brilliant, Reflective Surfaces**

16716 1874 Arrows PR66 PCGS Secure. Briggs 5-D. The Arrows subtype of 1873-1874 represented a symbolic, if not meaningful weight increase of .03 grams. Proof production was limited to 500 pieces in 1873 followed by 700 additional coins in 1874. These specimens are always highly sought-after. Seldom are survivors found in this quality with brilliant, impeccably preserved surfaces and undesignated proof reflectivity. A few stray wisps and tiny contact marks are unimportant. Population: 29 in 66 (16 in 66+), 16 finer, including Cameo and Deep Cameo (9/17). NGC ID# 23XS, PCGS# 5575

**1883 Quarter, PR67+
Extraordinary Toning**

16717 1883 PR67+ PCGS. CAC. Waves of electric-blue, purple, and golden-orange patination are seen over each side of this gorgeous Superb Gem proof and the strike is complete in all areas. Beautifully preserved and extraordinary eye appeal. Population: 13 in 67 (2 in 67+), 0 finer. CAC: 11 in 67, 0 finer (9/17).
Ex: Central States Signature (Heritage, 4-5/2010), lot 698. NGC ID# 23XF, PCGS# 5584

BARBER QUARTERS

**1893-S Quarter, MS65
Colorful Overlay, Pinpoint Detail**

16718 1893-S MS65 PCGS. The 1893-S is far and away the most challenging of the three quarter issues from that year. More than 1.4 million coins were struck, but few were numismatically saved. This is a spectacular Choice Uncirculated representative with variegated lavender, green, and blue patina. Shimmering luster percolates through the colorful overlay, enhancing the aesthetic quality. The reverse is fully struck, and the obverse is nearly so. Population: 10 in 65 (1 in 65+), 7 finer (9/17). NGC ID# 23XY, PCGS# 5606

**1895-S Quarter Dollar, MS66
Recut Mintmark, Conditionally Rare**

16719 1895-S MS66 PCGS. DL-101, Repunched Mintmark. High-end Uncirculated examples of the 1895-S quarter dollar are rare, particularly Premium Gems. This is only the second MS66 coin that we have ever offered, although the numerically finer MS67 PCGS and MS68 NGC coins have each crossed our auction block on a few notable occasions. The last MS66 piece we offered was in lot 7271 of our June 2000 Long Beach sale, although that piece is the same as the more recently offered MS67 PCGS coin, which is now more accurately graded. These auction appearances clearly show the rarity of this issue in high grade.

The current coin is sharp and frosty with exceptional surface preservation. Lovely sea-green, gold, and amber hues adorn each side. The mintmark is recut, showing a secondary S to the left of the primary mintmark. Population: 6 in 66 (3 in 66+), 1 finer (9/17). NGC ID# 23Y6, PCGS# 5612

1897 Barber Quarter, MS67
Vibrant Luster, Vivid Toning

16720 1897 MS67 PCGS. Claiming a mintage in excess of 8 million coins, the 1897 Barber quarter is one of the more plentiful issues of the period from an absolute standpoint, but like most dates in the series, it becomes scarce at the Gem grade level and is rarely seen finer. Satiny luster shines through shades of yellow-gold, lavender-gray, and aquamarine toning on each side, with no obvious signs of contact observed upon close examination. The strike is bold throughout, though some minor die lapping is noted in the eagle's feathers around the shield and behind Liberty's ear. Population: 6 in 67 (2 in 67+), 0 finer (9/17). NGC ID# 23YA, PCGS# 5616

1901-S Quarter Dollar, VG8
Outstanding Collector-Grade Example

16721 1901-S VG8 PCGS. CAC. The 1901-S is the most difficult acquisition in the Barber quarter date and mintmark set, in both low circulated grades and Mint State. There is strong availability for coins in AG or even Fair condition, and Good 4 coins with barely-there rims are frequently seen. This CAC-approved VG coin with sharp, defined rims on both sides and a solidly visible LI-Y in LIBERTY is a scarce and in-demand level of quality among lower-grade circulated coins. The surfaces are two-toned cameo with light gray relief elements and deeper pewter-gray fields. No distracting marks are seen. NGC ID# 23YR, PCGS# 5630

1908 Barber Quarter, MS67
None Numerically Finer at PCGS

16722 1908 MS67 PCGS. CAC. A spectacular Superb Gem representative from a mintage of 4.2 million pieces, this coin exhibits well-detailed design elements with just a touch of softness on the arrow fletching and some obverse stars. The impeccably preserved surfaces radiate vibrant mint luster, under delicate shades of lavender and golden-tan toning. Population: 3 in 67 (1 in 67+), 0 finer. CAC: 2 in 67, 0 finer (9/17). NGC ID# 23ZC, PCGS# 5649

1913-S Quarter Dollar, MS63
Key Date in High Grade

16723 1913-S MS63 PCGS. The 1913-S is one of the three big keys of the Barber quarter series, along with the 1896-S and 1901-S. Of the three, the '13-S has by far the lowest mintage at only 40,000 pieces. Uncirculated survivors exist primarily by chance, as even the low-mintage dates in the Barber series failed to excite numismatists at the time of issue, and few high-end examples were set aside. The rather basal quality of artistic creativity in the design caused the Barber coins to become a workhorse of commercial transactions rather than a popular collectible. In the earliest part of the 20th century, coin collections were heavily weighted toward series with established rarity and challenge, interesting die varieties, or exceptional aesthetic appeal and intrigue — none of which the Barber quarters could claim at the time. Only in recent decades have the Barber dimes, quarters, and halves received due recognition as worthy collectibles.

This 1913-S quarter dollar has well-struck design elements and mauve, pale-blue, and speckled dark olive toning. Lustrous surfaces are relatively well-preserved, revealing just a few minute contact marks on Liberty's face. A high-end example of a rare date and mintmark combination.

Ex: *FUN Signature* (Heritage, 1/2005), lot 6527. NGC ID# 23ZW, PCGS# 5666

1914-S Barber Quarter, MS65
Low-Mintage, Late-Series Issue

16724 1914-S MS65 PCGS. A legitimately scarce issue in Mint State grades, made even more desirable by its low production of just 264,000 pieces. The uncommonly high grade survivor offered here displays swirling, satiny luster and is lightly toned at the margins. A few scattered reeding marks on the obverse are the only noticeable distraction. Population: 14 in 65, 8 finer (9/17). NGC ID# 23ZZ, PCGS# 5669

PROOF BARBER QUARTERS

1895 Quarter Dollar, PR67+
Toned and Original

16725 1895 PR67+ PCGS. CAC. The 1895 proof is a plentiful issue in most non-Cameo grades, but Superb Gems are conditionally rare. Cameos are scarce at all levels and extremely rare in grades comparable to the present non-Cameo. This Plus-designated, CAC-approved type coin offers needle-sharp detail and pristine surfaces. A Cameo designation would have easily been achieved by this piece were the original sea-green, lavender, and russet-gold hues on each side not quite as all-encompassing as they are. Population: 17 in 67 (6 in 67+), 4 finer. CAC: 12 in 67, 8 finer (9/17). NGC ID# 242A, PCGS# 5681

1897 Quarter, PR67 Cameo
Outstanding Contrast and Toning

16726 1897 PR67 Cameo PCGS. CAC. Superb Gem Cameo examples of this proof Barber quarter are rare. This CAC-approved example displays needle-sharp design elements and impressive field-motif contrast. Amber-gold and powder-blue border toning surrounds champagne interiors. The eye appeal is exceptional. Population: 14 in 67 (1 in 67+) Cameo, 2 finer; 8 in 67 (1 in 67+) Deep Cameo, 0 finer. CAC: 9 in 67, 2 finer (8/17). NGC ID# 242C, PCGS# 85683

1908 Quarter, Multicolor PR68 ★
Ex: John C. Hugon Collection

16727 1908 PR68 ★ NGC. Ex: Hugon. Concentric bands of orange-gold, powder-blue, and apple-green dominate the obverse. The reverse border shows golden-brown and aquamarine at the margin though the frosty eagle and nearby glassy field are untuned. A prize for the connoisseur of patinated silver proofs, this Star-Designated 1908 Barber quarter is tied for the finest non-Cameo proofs known. It is mainly the toning that keeps this piece from a Cameo designation, as the silvery central reverse shows moderate contrast between the eagle and the field. The strike is full throughout. Census: 1 in 68 ★, none finer with a Star designation, 1 finer as PR69 Cameo (11/12). Ex: FUN Signature (Heritage, 1/2005), lot 4190; FUN Signature (Heritage, 1/2013), lot 4238. NGC ID# 242P, PCGS# 5694

STANDING LIBERTY QUARTERS

1916 Standing Liberty Quarter, AU53
Attractive Collector Coin

16728 1916 AU53 PCGS. This is an eye-appealing AU example of the inaugural Standing Liberty quarter, showing satiny surfaces with only a trace of high-point friction. Steel-gray patina yields wisps of lavender, gold, and blue under a loupe. There are no distracting abrasions. The 1916 is the longest-recognized key date in the series, and other than the 1918/7-S (which is not essential for a complete date and mintmark collection in the eyes of some), it is the most elusive overall. NGC ID# 43XR, PCGS# 5704

1916 Standing Liberty Quarter, MS64
Strong Central Detail

16729 1916 MS64 PCGS. The 1916 Standing Liberty quarter dies were made from a different hub than that used for the 1917 dies and lack the sharpened details later requested by the Director of the Mint. As a result, all 1916-dated examples exhibit moderate softness, particularly on the obverse, and sharply struck pieces are virtually non-existent.

This near-Gem displays unusually strong central gown folds and nearly full head detail. Satiny luster emanates from beneath pale lavender and ice-blue hues on each side, with light, dappled russet toning seen across the obverse. This is a pleasing example of the first-year issue.

Ex: Long Beach Signature (Heritage, 1-2/2015), lot 3114; ANA Signature (Heritage, 8/2015), lot 4039. NGC ID# 43XR, PCGS# 5704

1917-S Type Two Quarter, MS66+ Full Head Sharp and Conditionally Rare

16730 1917-S Type Two MS66+ Full Head NGC. The Type Two San Francisco issue is the scarcest 1917 Standing Liberty quarter in high grade Full Head. This Plus-designated Premium Gem displays a sharp head and stars with only minor incompleteness on the shield rivets. Satiny luster displays a light champagne hue, and no major abrasions are present. Census: 13 in 66 (2 in 66+) Full Head, 4 finer (9/17). NGC ID# 2436, PCGS# 5719

1918-S Quarter, MS65 Full Head Well-Struck and Attractive

16731 1918-S MS65 Full Head PCGS. This Gem displays a bold strike, including sharp head detail and peripheral stars. The date is bold, and Liberty's toes are well-defined. The inner shield rivets exhibit the usual softness. A hint of champagne toning graces each side, and no abrasions are apparent. The 1918-S in this grade is rare, and finer pieces are exceedingly so. Population: 37 in 65 (1 in 65+) Full Head, 16 finer (9/17). NGC ID# 2439, PCGS# 5725

1919-S Quarter Dollar, MS65 Nearly Full Head Detail

16732 1919-S MS65 PCGS. Writing in 1986, Cline stated of this issue: "Usually mushy or soft, even when full head." The present Gem, while not fully struck up over Liberty's head and the eagle's breast feathers, displays uncommonly sharp definition over the balance of the features. The eye appeal is also captivating with dominant lilac-gray tinting yielding to a swath of olive-orange patina over the upper left reverse. A few speckles of pale russet color are noted toward the lower obverse rim, but we cannot find a single abrasion that would call into question the assigned grade. Population: 39 in 65 (1 in 65+), 15 finer (8/17).
Ex: FUN Signature (Heritage, 1/2003), lot 6874. NGC ID# 243D, PCGS# 5732

1921 Quarter, MS65 Full Head Bold Temple and Shield Rivets

16733 1921 MS65 Full Head PCGS. Liberty's temple is well-defined on this Gem, which is uncommon for the 1921 quarter, even on coins designated Full Head. The date numerals show more traditional flatness but are clear. Sharp stars and eagle feathers further complement the aesthetics. Light champagne toning and satiny mint luster are as typical for Uncirculated examples of this key-date issue. Population: 54 in 65 (2 in 65+) Full Head, 29 finer (9/17). NGC ID# 243H, PCGS# 5741

1927-D Quarter, MS66 Full Head Rare in This High Grade

16734 1927-D MS66 Full Head PCGS. The 1927-D is underrated in high-grade Full Head. This Premium Gem example is conditionally rare and among the finest certified at PCGS. The surfaces display satiny luster with irregular splashes of olive, gold, russet, and amber toning. Struck from worn dies but with adequate head detail on the figure of Liberty. The shield and toes are not fully defined. Population: 20 in 66 (1 in 66+) Full Head, 0 finer (9/17). NGC ID# 243V, PCGS# 5763

WASHINGTON QUARTERS

1932-D Quarter Dollar, MS65 A Key Date and Condition Rarity

16735 1932-D MS65 PCGS. This key-date Washington quarter is scarce in MS65 and extremely rare finer, being a major attraction at both levels among Registry Set collectors. The current coin shows frosty, champagne-tinted luster and sharp design elements. No distracting abrasions are observed. Only two dates in the Washington quarter series are considered absolute keys, and of the two, the 1932-D is the more difficult acquisition in high grade. NGC ID# 2448, PCGS# 5791

1932-D Quarter, MS65
Conditionally Rare Key Date

16736 1932-D MS65 PCGS. With a mintage of 436,800 coins, the 1932-D needs no introduction as the conditionally rare key to the Washington quarter series. Comparable Gems are very scarce, and only three examples are certified finer at PCGS and NGC combined. This quarter features glints of gold over nearly brilliant surfaces. Satiny luster and a relatively strong strike are additional attributes. A few microscopic ticks appear over the portrait. Population: 89 in 65 (3 in 65+), 2 finer (9/17). NGC ID# 2448, PCGS# 5791

EARLY HALF DOLLARS

1794 Flowing Hair Half Dollar, Good 4
First-Year Type, O-101

16737 1794 O-101, T-7, High R.3, Good 4 PCGS. Tompkins Die State 1/2. Olive-gold toning clings to the raised devices, surrounded by silver-gray fields and pale blue accents. Faint lines from an old wipe exist, but they are not really significant at the assigned grade. Stars 11 to 13 are worn as is the rim in that area, although all other elements are well-defined and the date is strong. We note a couple of minor bumps on the lower rim. As usual, the reverse is a grade level finer than the obverse in this earlier die stage. NGC ID# 24E6, PCGS# 39200 Base PCGS# 6051

1794 O-101 Half Dollar, VG8
Album-Toned Type Coin

16738 1794 O-101, T-7, High R.3, VG8 PCGS. Tompkins Die State 1/2. This smoothly worn first-year half displays attractive old album toning with deep, bluish-gray and aquamarine borders around golden-gray fields. The raised devices show contrasting silver-gray patina for added appeal. The rims are full except for the lower-right obverse border, yet the date is fully readable and all of the central motifs are well-outlined. Few marks exist, long softened by wear. Housed in a previous generation green label holder. NGC ID# 24E6, PCGS# 39200 Base PCGS# 6051

1794 Flowing Hair Half Dollar, VG10
O-101, Attractive Natural Patina

16739 1794 O-101, T-7, High R.3, VG10 PCGS. Tompkins Die State 1/2. The Tompkins reference suggests a survival estimate of between 650 to 800 1794 half dollars, all varieties combined. Of these, the vast majority are from the O-101 die marriage. While the obverse is struck from a perfect die in its first use, the reverse shows familiar die cracks at F in OF and below the first S of STATES. Pleasing, olive-gray toning displays hints of gold throughout both sides. We note numerous light hair-thin lines on the obverse, generally hidden in the toning but visible with a lens. NGC ID# 24E6, PCGS# 39200 Base PCGS# 6051

1794 O-101, T-7 Half Dollar, Fine 15
Middle State of the Dies

16740 1794 O-101, T-7, High R.3, Fine 15 PCGS. Tompkins Die State 1/3. A middle state of the reverse die shows the die crack near F in OF extending to the olive leaves below. This is a lightly toned, attractive early half with Choice surfaces for the Fine grade. A few small ticks accompany moderate wear on the obverse, which displays wisps of gold and sea-green toning at the margins around golden-gray interiors. The reverse is sharply defined, with a few old adjustment marks hidden in the right (facing) wing. 1794 half dollars are seldom this nice for the grade. NGC ID# 24E6, PCGS# 39200 Base PCGS# 6051

1794 Flowing Hair Half, VG10
O-101a, Nice Eye Appeal

16741 1794 O-101a, T-7, High R.3, VG10 NGC. Tompkins Die State 1/3. Struck from a mid-to-late state of the reverse die, with the cracks somewhat blurry and only minimal sinking of the upper reverse. The obverse shows remnants of a few minor adjustment marks in the hair and at the rims. A golden sheen overlays silver-gray surfaces and deepens slightly at the borders. The obverse shows a bit of weakness at the lower right edge, but the date is fully visible and all of the motifs are well-defined for the grade level. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 O-101a Half Dollar, Fine 12
Strongly Defined, Problem-Free

16742 1794 O-101a, T-7, High R.3, Fine 12 NGC. Tompkins Die State 1/4. The reverse crack below S in STATES is in a later stage, with slightly biplanar surface showing sinking of the die. This is a strong coin for the assigned grade, well-defined in most respects and problem-free. Attractive old-silver color lightens on the high points. The rims and dentils are bold on both sides, while about 50% of the hair strands and wing feathers remain visible. A glass reveals only superficial light marks across the finely granular surfaces. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 O-101a Half Dollar
Planchet Flaw, VF Sharpness

16743 1794 O-101a, T-7, High R.3 — Obverse Planchet Flaw, Improperly Cleaned — NCS Genuine. VF Details. Tompkins Die State 1/3. The late-state die crack between olive leaves is not yet seen, suggesting a middle die stage. A free-form planchet flaw or strike-through runs across the portrait, while the slightly mottled toning indicates an old cleaning. Still, this is an appealing mid-grade example of the always in-demand 1794 Flowing Hair half. VF definition remains, as does deep, golden-gray toning throughout both sides. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 O-104 Half, Good 6
Pleasing Original Surfaces

16744 1794 O-104, T-11, R.5, Good 6 PCGS. Tompkins Die State 1/2. Likely an intermediate state of the obverse die, with the crack from star 3 to the curls not fully formed, yet faint die clashing exists on both sides. O-104 is a lesser-seen variety in comparison to O-101, struck latest in emission sequence for 1794 halves (likely in 1795). This is a smoothly worn example with attractive golden-gray toning and sharp definition for the assigned grade. A few light lines in the right field near the nose and a couple more above the date are faintly visible but do not distract. NGC ID# 24E6, PCGS# 39204 Base PCGS# 6051

1794 Half Dollar, Fine Details
Slightly Better O-105 Variety

16745 1794 O-105, T-3, R.5 — Improperly Cleaned — NCS Genuine. Fine Details. Tompkins Die State 1/3. Patchy toning from improper cleaning takes the form of deep-gray, opaque patina that covers the slightly granular silver surfaces below. O-105 is a slightly better variety among 1794 halves, where it is the second-most available die marriage (trailing O-101 in that regard). The reverse is weak at the upper center from wear, a result of a sinking die in the late die stage. NGC ID# 24E6, PCGS# 39206 Base PCGS# 6051

1795 Flowing Hair Half Dollar, Pleasing VF35
O-116, Strong Eye Appeal

16746 1795 2 Leaves, O-116, T-11, R.4, VF35 PCGS. CAC. Tompkins Die State 2/2. Berries 7 left, 9 right. Numerous obverse die cracks and strong die clashing on both sides add interest to this late die state example of O-116. Deep-blue and gunbarrel-gray toning surrounds light, silver-gray accents on the high points of this attractive Flowing Hair half. The surfaces are smooth and Choice for the VF level. A few adjustment marks angle up from the lower reverse rim, but they are toned-over and softened by wear to be of little visual impact. CAC endorsed for quality and appeal. NGC ID# 24E7, PCGS# 39232 Base PCGS# 6052

1796 15 Stars Half Dollar, O-101
Well-Defined, Fine Details

16747 1796 15 Stars, O-101, T-1, R.5 — Plugged, Repaired — NGC Details. **Fine. Amato-158.** The present Fine Details offering is an important opportunity for the type collector to obtain a Draped Bust Small Eagle half dollar. This coveted piece of Americana is a significant “stopper” for anyone attempting to complete a type collection of United States coinage. Some may question the feasibility of investing in a coin that has been plugged and repaired. But the high prices being realized for original, problem-free specimens prevent many collectors from acquiring an example for their collection. Moreover, this particular coin exhibits well-defined design elements, especially on the obverse. Liberty’s hair shows fairly strong detail, as do the eye, ear, drapery lines, and the peripheral devices. Indeed, few would likely argue with the obverse being classified as Very Fine, maybe even VF25 Details. And in the opinion of this cataloger (JPA), even the reverse possesses some VF Detail.

Both sides reveal steel-gray patina and soft bluish accents. Some smoothing is noted in the obverse fields, and TY in LIBERTY was re-engraved, as was the lower-right reverse ribbon. The usually seen crack from the rim at 5 o’clock to the bottom of the bust has been removed by smoothing in that area, but becomes visible from the right side of the bust through stars 15-14. Despite the impairments, this coin will be an appropriate, and perhaps “affordable” addition to an advanced U.S. type collection.

Ex: John Stimson, Sr. Collection, Part 2, Long Beach Signature (Heritage Auctions, 2/2008), lot 527. NGC ID# 24E9, PCGS# 39261 Base PCGS# 6057

1803 Draped Bust Half, AU53
O-101, Large 3, Small Reverse Stars

16748 1803 Large 3, Small Reverse Stars, O-101, T-1, R.3, AU53 NGC. A minimally marked, cream-gray example of the Large 3 type with light, golden-brown and aqua patina near the margins. Slight highpoint wear is consistent with the AU53 grade level. Minor adjustment marks are visible at the lower right obverse, with die clashing noted on the reverse. Sharp definition exists on Liberty’s hair and many of the eagle’s breast feathers above the shield remain intact, while the beak and head show wear. Soft luster is strongest at the margins.

Ex: Dallas Signature (Heritage, 4/2007), lot 737; Long Beach Signature (Heritage, 2/2009), lot 1252. NGC ID# 24EF, PCGS# 39270 Base PCGS# 6066

1805 O-112 Half Dollar, AU55
Sharply Struck, Original Surfaces

16749 1805 O-112, T-2, R.2, AU55 NGC. Tompkins Die State 1/1. An original, Choice About Uncirculated example of O-112, one of the readily available 1805 die marriages. Traces of reddish-gold and olive-gray toning surround the stone-gray centers of this sharply defined Draped Bust half. A broad die-clashed “collar” along Liberty’s bust line and a long, curved die crack beneath STATES foreshadow the later die state, when a shifted cud obscures ES of STATES and causes a weak strike in the date area. NGC ID# 24EG, PCGS# 39286 Base PCGS# 6069

1806/5 Draped Bust Half Dollar, AU55
O-101 Overdate Variety, Large Stars

16750 1806/5 O-101, T-6, R.3, AU55 PCGS. Tompkins Die State 4/3. The obverse die was initially prepared for 1805 but remained unused when the new year came, when a round-top 6 was punched over the 5. A diagnostic die break over ITE on this example appears more advanced than usual, forming a retained cud. Intermingled toning in shades of light gold, orange, and green-blue adds to the eye appeal of this piece. The wear is even and there are no contact marks worthy of individual mention. This is an especially pleasing representative for the Choice About Uncirculated level. NGC ID# 24EK, PCGS# 39296 Base PCGS# 6077

1806 Half Dollar, AU53
O-106, Knob 6, Small Stars

16751 1806 Knob 6, Small Stars, O-106, T-4, R.4, AU53 PCGS. Tompkins Die State 2/1. The 8 in the date is minutely recut on this variety, with two prominent die scratches on the reverse — one from the upper-right shield corner, the other from the eagle's tail to the arrow fletchings. The present coin is partially lustrous and shows almost no true wear, although some strike weakness occurs on the stars and clouds above and to the right of the eagle's head, as well as on Liberty's lower bust. Silvery interiors cede to russet and olive border toning. Population (all Knob 6, Small Stars varieties combined): 6 in 53, 10 finer (9/17). NGC ID# 24EJ, PCGS# 39306 Base PCGS# 6075

1807 Draped Bust Half Dollar, O-103a
Choice About Uncirculated, Few Are Finer

16752 1807 Draped Bust, O-103a, T-11, R.3, AU55 PCGS Secure. Tompkins Die State 2/3. The O-103a is a condition rarity in the Draped Bust series, with a single Uncirculated example known and a Condition Census comprised of About Uncirculated pieces underneath that solitary Mint State coin. This still-lustrous example represents the latest die stage with prominent die cracks and die clashing on both sides. Mellow champagne-gold toning with intermittent warm-gray accents confirm the coin's original surfaces. The strike is quite sharp throughout, and only a few thin, light lines in the lower left field are of note. NGC ID# 24EM, PCGS# 39341 Base PCGS# 6079

BUST HALF DOLLARS

1807 O-113 Half Dollar, AU50, Small Stars Obverse

16753 1807 Capped Bust, Small Stars, O-113, R.2, AU50 PCGS. CAC. Both sides exhibit light clash marks, and the reverse has a die crack from the denomination through UNITED STATE, but lacks the late state die crack through S OF AMER that identifies the O-113a variant. This piece has pleasing pewter-gray surfaces with lovely peripheral blue and amber toning. Population: 8 in 50, 29 finer (9/17). NGC ID# 24EN, PCGS# 39359 Base PCGS# 6087

1818/7 O-101 Half Dollar, MS63
Large 8

16754 1818/7 Large 8, O-101, R.1, MS63 PCGS. An early die state with no evidence of the reverse die crack that forms later. The first 8 is large, and the top of the crossbar is visible above the slightly smaller second 8 in the date. This impressive Mint State example has satiny pewter-gray surfaces with vibrant peripheral gold and iridescent toning. Population for all three overdate varieties: 15 in 63, 12 finer (9/17). NGC ID# 24FA, PCGS# 39540 Base PCGS# 6115

1818 Capped Bust Half, MS64
Condition Census O-111 Example

16755 1818 O-111, R.1, MS64 PCGS. A small tine at the top of the cap confirms the O-111 variety. This sharply detailed near-Gem specimen exhibits lightly iridescent, lustrous surfaces, led by subtle shades of lavender-gray and pale-gold toning. The latest Steve Herrman report (Autumn, 2017) lists a single MS67 NGC as the finest known for the variety (which we sold back in 2002), with several MS64 coins tied for second-finest in the listing (9/17). NGC ID# 24F9, PCGS# 39528 Base PCGS# 6113

1824/4 O-110 Half Dollar, MS63
Doubled Profile
Ex: Green-Newman

16756 1824/4 O-110, R.2, MS63 PCGS. CAC. Ex: 'Col.' Green-Newman. The recut 4 in the date and the joined letters AME in AMERICA identify the O-110 variety. This well-detailed Select specimen displays full mint luster and brilliant silver centers surrounded by rings of album toning: vivid sea-green, copper, and violet. The eye appeal is first rate. Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$6.50; Eric P. Newman Numismatic Education Society (Heritage, 11/2013), lot 33588. NGC ID# 24FK, PCGS# 39644 Base PCGS# 6140

1829 Bust Half, MS66
Tied for Finest Known O-105

16757 1829 Small Letters, O-105, R.1, MS66 NGC. The T-I alignment on the upper reverse is a convenient diagnostic tool since the I is shifted far to the right of other varieties of this year. An early die state is confirmed by the recut upper arrow shaft that is clearly present, later states show lapping in this area.

This is a satiny, high-grade example of the variety. The surfaces are well-matched on each side with rose-gray centers that deepen to emerald-green at the margins. Pinpoint strike details are noted on Liberty's hair curls as well as the eagle's plumage. Unquestionably, this is among the finest-known O-105s, rivaled only (in our opinion) by the exceptional O-105 sold in our August, 2016 ANA auction of The Hamilton Collection. That coin brought a record \$17,625 as lot 4660, graded MS65 PCGS CAC. The present coin grades a point finer and is tied at the top of Stephen Herrman's Condition Census for the variety, and it is also tied as the finest 1829 Bust half regardless of variety. NGC ID# 8YZY, PCGS# 39784 Base PCGS# 6154

1831 O-109 Capped Bust Half, MS66
Tied for Finest on the Condition Census

16758 1831 O-109, R.1, MS66 NGC. A tiny tine above R in LIBERTY and a small lump in the field near star 5 are touchpoints to confirm the O-109 variety. The date is high with 18 noticeably elevated in relation to 31. On the reverse, lines 2 ad 3 of shield stripe 1 are joined at the bottom and barely apart at the top.

Even high-grade O-109 pieces show weakness at LUR of PLURIBUS within the scroll, although this Premium Gem example is much sharper than most. The U and R are slightly incomplete but fully readable. Pearlescent mint luster glows beneath shades of lilac and reddish-orange toning that deepens to reddish-umber at the margins. The portrait and eagle are exceedingly crisp and well-defined for the variety. We note that this coin is in many ways sharper than the Pogue example (MS66 PCGS, Ex: Eliasberg) that set a record for the variety at \$16,450 in February, 2016. NGC ID# 24FV, PCGS# 39845 Base PCGS# 6159

**1832 Half Dollar, Condition Census MS64+
Small Letters Reverse, O-119**

16759 1832 Small Letters, O-119, Low R.4, MS64+ PCGS. CAC.

A scarce die pairing, with only one finer appearance at auction according to the Spring and Summer, 2017 listings by Stephen Herrman — an MS65 PCGS CAC we sold at Summer FUN in July, 2009 as lot 1127. The present coin is nearly its equal. A high-end near-Gem, it displays reddish peach-gold and silver-lilac toning, with cartwheel mint luster over smoothly frosted surfaces. As usual, the obverse stars are flat and close to the edge, yet the coin is sharply struck nonetheless. The A in STATES is recut at the bases in stairstep fashion, possibly a large A over a smaller one. CAC endorsement accompanies this Choice coin, which resides near the top of the Condition Census for the variety. NGC ID# 24FW, PCGS# 39878 Base PCGS# 6160

**1836 Lettered Edge Bust Half, Radiant MS65
Arguably the Finest-Known O-122**

16760 1836 Lettered Edge, O-122, R.2, MS65 NGC. This is a lustrous, beautifully toned Gem example of Overton-122 — one of the “Dot-Dash” varieties, with a small die dot outside of the 6 in the date at mid-loop. The upper serif of E in STATES is recut with a line-like extension to left. The bottom line of the base of the shield is doubled between vertical stripes 3 and 4. Both the Steve Herrman listing and the Parsley reference note a single MS65 example of O-122 in their Condition Census listings. This remarkably well-preserved and attractive half could be that coin, which has not been seen at auction in recent times. stunning cobalt-blue and aquamarine toning at the margins yields to gold and ivory shades at the centers. Swirling mint luster embellishes a sharp strike and reveals no marks of note. The Condition Census stands at 65,64,64,64,63 (8/17). NGC ID# 24G2, PCGS# 39963 Base PCGS# 6169

REEDED EDGE HALF DOLLAR

**1836 Reeded Edge Half, GR-1, AU53
Attractively Toned**

16761 1836 Reeded Edge, GR-1, R.2, AU53 PCGS. The Thonnelier steam press at the Philadelphia Mint was first used to strike large cents on March 23, 1836. Capable of producing coins at the then-astrounding rate of 100 pieces per minute, the business of producing America's coinage changed in an instant from a labor-intensive endeavor to managed mass production. Reeded Edge half dollars (with a smaller diameter than their Lettered Edge precursors) comprised the second denomination struck on the new equipment. A lever supplied the striking pressure on the steam-powered equipment, rather than a screw mechanism. This example was sharply struck by the new method. Attractive golden-gray toning with blue accents provide nice eye appeal across the well-preserved surfaces. Population: 25 in 53, 86 finer (8/17). NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

SEATED HALF DOLLARS

1840 WB-102 Half Dollar, MS65
Reverse of 1839, Small Letters Reverse

16762 1840 Small Letters, Repunched Date, FS-301, WB-102, Die Pair 1, R.2, MS65 PCGS. CAC. Booming luster and a refreshingly mark-free appearance affirm the high quality of this early Seated half. Wisps of autumn-gold grace the obverse margin. Several star centers lack absolute detail, but the overall strike is good. Struck from clashed dies, and housed in an old green label holder with CAC endorsement.

This *Cherry-pickers'* variety shows clear repunching at 40 of the date — the 4 is repunched north, the 0 slightly northwest. A faint die crack bisects the reverse from N in UNITED to between E and R of AMERICA. A few other short, light die cracks confirm the mid-to-late state of the dies. Population: 8 in 65, 6 finer (9/17).
Ex: *Long Beach Signature* (Heritage, 5/2008), lot 652.. NGC ID# 24GM, PCGS# 392647 Base PCGS# 6234

1854-O Arrows Seated Half, MS65
Frosted Cartwheel Luster

16763 1854-O Arrows, WB-101, Die Pair 1, R.2, MS65 PCGS. The date is broadly doubled, indicating an early die state although diagnostic die cracks from a later die state exist on both the obverse and reverse, suggesting the coin was struck before any relapping or polishing of the obverse die. The strike is bold with just nominal weakness at the eagle's left (facing) talon. Strong mint luster radiates in cartwheels over silver-white surfaces interspersed with areas of amber and russet-gold toning. Population: 20 in 65, 19 finer (9/17). NGC ID# 24JM, PCGS# 572088 Base PCGS# 6280

CONFEDERATE STATES OF AMERICA

1861 Confederate Half Dollar, MS64
Choice Scott Restrike, Few are Finer

16764 1861 Scott Restrike MS64 NGC. The late 1870s was a particularly active time for innovators and keen-eyed marketers of numismatic items, and the well-known coin and stamp dealer J.W. Scott was at the forefront. The lingering effects of the Civil War and the contentious end to Reconstruction in 1877 served as a backdrop for Scott's purchase of the original C.S.A. half dollar die from fellow coin dealer Ebenezer Locke Mason, Jr. By then, the extreme rarity of the original Confederate half dollars was known (just four pieces were traced). The die was fragile and rusted, but Scott coaxed a number of store card-style tokens using the C.S.A. die as well as 500 federal Seated half dollars dated 1861, planing off the reverses to accommodate the Confederate impression.

All of the Confederate restrikes are imperfect reproductions. Struck on a screw press in a collar with a copper underlay, the federal obverses were flattened to one extent or another. Circular lathe marks on the reverse were not always eliminated by the strike. The present Choice restrike is a case in point — the strike was uneven at the top, visible at ATE and STA of CONFEDERATE STATES. Curved lines from the planing process still show in that area. The strike is otherwise quite sharp. The Confederate side is nearly brilliant, with a hint of toning at the bottom rim. Dappled russet patina remains on the federal side. Census: 12 in 64, 5 finer (9/17). NGC ID# 2C4R, PCGS# 340402

PROOF SEATED HALF DOLLARS

1847 Half Dollar, PR64
From the Garrett Collection

16765 1847 PR64 PCGS. CAC. Our research into this issue indicates that only 10 proof examples are known in all grades, and only one of those is clearly finer than the present piece from the famous Garrett Collection. One of the known pieces is held in the Smithsonian Institution, and another represents the 1847/6 overdate, so just eight of these non-overdated pieces are available to collectors. This Choice proof exhibits lovely dappled gold and iridescent toning over fully mirrored fields and sharp design elements. Population: 3 in 64, 0 finer. CAC: 1 in 64, 1 finer (9/17).

Ex: Randall Collection (Elliot Woodward, 6/1885), lot 400; John Work Garrett Collection (Stack's, 3/1976), lot 210; Don Kagin; Auction '90 (Stack's, 8/1990), lot 213; Public Auction Sale (Superior, 2/1991), lot 1721; The Rarities Sale (Bowers and Merena, 8/1999), lot 204; Pre-Long Beach (Superior, 10/2000), lot 4375; Fairchild Family Trust Collection (Ira & Larry Goldberg, 5/2001), lot 715. NGC ID# 27T9, PCGS# 6391

1868 Seated Liberty Half, PR66 Cameo
Only Two Finer Coins at PCGS

16766 1868 PR66 Cameo PCGS. Spectacular shades of cobalt-blue and emerald-green toning surround the mostly brilliant centers of this delightful Premium Gem. The sharply detailed, frosty design elements create dramatic cameo contrast with the deeply mirrored fields and the surfaces are impeccably preserved. Population: 2 in 66, 3 in 66 Cameo, 2 finer (9/17). NGC ID# 27U3, PCGS# 86426

1883 Half Dollar, PR67 Cameo
Tied for Finest Cameo at PCGS

16767 1883 PR67 Cameo PCGS. CAC. After the beginning of Morgan dollar production in 1878, mintages of smaller denomination coins dropped dramatically. For most silver issues from 1878 through 1891, business strikes are elusive, placing extra demand on the surviving proofs. One such piece is this amazing Superb Gem Cameo proof 1883 half dollar. Both sides feature highly lustrous and lightly toned design motifs framed by deeply mirrored fields. The obverse has light gold at the centers with peripheral blue and iridescent toning, while the reverse is evenly toned in delicate champagne. An impressive example of the coiner's art. Population: 4 in 67 Cameo, 0 finer; 1 in 67 Deep Cameo, 0 finer. CAC: 3 in 67, 0 finer (9/17). NGC ID# 27UJ, PCGS# 86444

BARBER HALF DOLLARS

1893 Half Dollar, Frosty MS67
Sole Finest at PCGS

16768 1893 MS67 PCGS. Like many second-year issues, the 1893 half dollar has a significant drop in high-grade availability from its predecessor. While PCGS has graded 14 1892 half dollars as MS67 or better, this is the *only* Superb Gem example of the 1893 half known to that service (9/17). Subtly frosted surfaces shimmer with bright, silver luster that shows no evidence of color on either side. Details are uncommonly crisp, particularly on the eagle's talons, and though a few tiny luster grazes affect the portrait, it is clear from the first glance that this coin is remarkable. NGC ID# 24LK, PCGS# 6465

1899 Half Dollar, MS66+
Sharply Detailed and Lovely

16769 1899 MS66+ PCGS. CAC. Despite a mintage of 5.5 million coins, the 1899 is a challenging issue in higher Mint State grades, partly due to the early 20th century preference for proof coins. The obverse is mostly brilliant with wispy heather toning on this sharply detailed Premium Gem. Full mint luster on the reverse shines through lovely gold and iridescent toning. Population: 11 in 66 (2 in 66+), 2 finer. CAC: 4 in 66, 2 finer (9/17). NGC ID# 24M6, PCGS# 6483

1903-O Half Dollar, MS65
New Orleans Condition Rarity

16770 1903-O MS65 PCGS Secure. The recent Bowers' reference of Barber silver coins has a simple description of Gem or finer 1903-O Barber half dollars: "Very hard to find." To that, we add "and extremely so with a full strike." This Gem example is crisp throughout including the troublesome right side of the reverse, which is well brought-up. The obverse stars and portrait are needle-sharp. Crescents of grayish-brown toning yield to frosted, lustrous silver centers for exceptional eye appeal. Housed in a Secure holder. Population: 10 in 65 (3 in 65+), 7 finer (8/17). NGC ID# 24MK, PCGS# 6496

1904 Half Dollar, MS67
Exceptional Rich Patina
Tied for the Finest Certified

16771 1904 MS67 NGC. The 1904 is among the more available Barber half issues. However, it is approximately 30 times rarer in Mint State than the 1904 Morgan dollar, which confirms the challenges faced by Barber collectors seeking high-grade coins. Most Uncirculated 1904 halves grade between MS61 and MS64. Smooth and lustrous pieces with a bold strike and dramatic original patina are great rarities.

The aquamarine obverse center of this extraordinary coin is framed with peripheral peach-red. The reverse is principally orange-gold and ruby-red but the margin is apple-green. The piece is lustrous and precisely struck with exceptional preservation. This is the sole finest 1904 Barber half at NGC, and the only comparable PCGS coin is the Duckor MS67+ (9/17), which last appeared at auction in our October 2012 ANA sale where it realized \$47,000. This piece is visually and technically its virtual equal. NGC ID# 5EPG, PCGS# 6498

**1908-O Half Dollar, MS66+
Excellent Type Candidate**

16772 1908-O MS66+ PCGS. CAC. Possibly once stored in a Wayne Raymond-style album page, this Premium Gem exhibits lovely gold, sky-blue, and iridescent peripheral toning around brilliant, champagne-toned centers. The strike is bold, particularly for a New Orleans half dollar, with weakness noted only at the eagle's dexter claw. Many collectors will be surprised to learn that the 1908-O is one of the most available Barber half dollar issues in MS65 and finer grades. As such, this issue is an ideal candidate for type collectors, who only seek a single representative of the design. Population: 22 in 66 (3 in 66+), 16 finer. CAC: 12 in 66, 11 finer (9/17). Ex: *Americana Sale (Stack's, 1/2003)*, lot 1809. NGC ID# 24N6, PCGS# 6514

**1915 Half Dollar, MS65
Brilliant Semikey, Very Rare Any Finer**

16773 1915 MS65 PCGS. CAC. Like most other Barber half dollars, the 1915 poses a challenge in MS65, particularly with an added CAC approval sticker. A low mintage of 138,000 coins adds another level of difficulty for collectors in search of an example of this semikey final-year issue. Each side of this Gem remains brilliant, and strike detail is strong. A reeding mark on the temple and a few thin field grazes are minimal for the grade. Population: 17 in 65 (1 in 65+), 6 finer. CAC: 5 in 65, 4 finer (8/17). NGC ID# 24NR, PCGS# 6532

**1915 Barber Half, Seldom-Seen MS66
Great Quality for Final Year of Design**

16774 1915 MS66 PCGS. The regions of the country served by the Philadelphia Mint had little need for additional half dollars from 1913 to 1915; none of the P-mint issues in those years broke the 200,000-coin mark, and in 1915, only 138,000 pieces were struck. This Premium Gem offers great quality from among the known survivors, richly toned blue-violet, peach, and gold with small streaks of light silver-gray. The streaks disguise the handful of true marks visible on each side, which are small in any event. The portrait has solid detail, and the eagle's talons are uncommonly well-defined. Population: 6 in 66 (2 in 66+), 0 finer (9/17). NGC ID# 24NR, PCGS# 6532

PROOF BARBER HALF DOLLARS

**1894 Barber Half, PR67+ Cameo
Delicately Toned**

16775 1894 PR67+ Cameo NGC. This high-end Superb Gem Cameo appears virtually flawless. The strike is full throughout, and the mirrored fields deliver excellent contrast. Both sides display dusky iridescent toning that attests to the originality of the coin. Cameo proof 1894 half dollars are rarely seen this fine. Census: 15 in 67 Cameo (2 in 67+), 6 finer, including four non-cameo examples (9/17). NGC ID# 24NW, PCGS# 86541

**1897 Half Dollar, Toned PR67
Modest Field-Motif Contrast**

16776 1897 PR67 PCGS. The 1897 proof is scarce in Superb Gem condition. This toned example displays yellow-gold and sea-green hues over both sides, and impressively sharp design elements deliver subtle cameo contrast even through the rich patina. No imperfections are observed. There are a number of Cameos and Deep Cameos in this and finer numeric grades. Non-Cameos are rare this fine. Population: 10 in 67, 3 finer (8/17). NGC ID# 24NZ, PCGS# 6544

WALKING LIBERTY HALF DOLLARS

1917-S Walking Liberty Half Dollar, MS65+ First Year With the Reverse Mintmark

16777 1917-S Reverse MS65+ PCGS. CAC. The mintmark was moved to the reverse partway through the year in 1917. Although the San Francisco Mint struck a substantial total of more than 5.5 million Walking Liberty half dollars with the new placement, the 1917-S Reverse is surprisingly difficult to locate in higher grades today. Most of the coins were released into circulation and few high-quality examples were saved for numismatic purposes.

The present coin is an attractive Gem, with a better-than-average strike that shows some slight separation between Liberty's thumb and fingers on the wreath hand. The well-preserved surfaces radiate vibrant mint luster, under low-intensity shades of lavender-gray and pale gold toning. Population: 52 in 65 (2 in 65+), 12 finer. CAC: 15 in 65, 3 finer (8/17). NGC ID# 24PU, PCGS# 6573

1919-D Half Dollar, MS62 In a Green Label Holder

16778 1919-D MS62 PCGS. The 1919-D is elusive in all Mint State grades and is the rarest date in the series in Gem or better condition. This MS62 coin remains collectible while still being scarce. Frosty luster is original and there is no true wear, although amber toning over the figure of Liberty has been produced by previous storage methods. The strike is deficient in the centers, as is seen to some degree on all 1919-D Walkers and in the case of this coin likely contributes to the grade. Housed in a green label holder. NGC ID# 24PZ, PCGS# 6578

1919-S Half Dollar, MS64 Glistening Mint Luster

16779 1919-S MS64 PCGS. CAC. An attractive example of a conditionally scarce issue, this Choice Mint State 1919-S Walking Liberty half dollar has satiny surfaces and above-average design definition. Both sides are partially brilliant with lemon-yellow toning at the lower obverse and upper reverse. Close study with a loupe reveals a few trivial ticks, not out of line for the grade. This San Francisco issue is among the less often seen dates from the early series and is a sought-after rarity in Gem condition. This attractive near-Gem will appeal to a range of collectors. PCGS has graded 52 finer examples (9/17).

Ex: ANA Signature (Heritage, 10/2012), lot 3684; ANA Signature (Heritage, 3/2016), lot 4936. NGC ID# 24R2, PCGS# 6579

1921-S Walking Liberty Half, AU Details Low-Mintage Key

16780 1921-S — Cleaning — PCGS Genuine. AU Details. From a small mintage of 548,000 pieces, the 1921-S Walking Liberty half dollar is one of the most challenging issues of the series in high grade. This impressive specimen shows a typical strike for the issue, with just a trace of actual wear on the well-detailed design elements. The surfaces are lightly abraded, but the luster is somewhat dimmed by the noted cleaning.

1921-S Walker, AU53
King of the Series

16781 1921-S AU53 PCGS. This issue is sometimes called the King of Walkers for its rarity in higher grades. Mintage of this issue was a paltry 548,000 coins, fifth lowest of the series. Pale gray surfaces have hints of dusky gold toning. Just a few typical abrasions are visible on each side. The reverse has a tiny rim bruise at 9:30, not encroaching upon the fields or design. High-grade circulated examples of the 1921-S continue to be a highly sought-after item among series date and mintmark collectors. NGC ID# 24R8, PCGS# 6585

1944 Half Dollar, Lightly Toned MS67+
Only One Coin Finer at PCGS

16782 1944 MS67+ PCGS. CAC. The 1944 Walker is occasionally available in MS67, but PCGS has Plus-graded only two dozen of these pieces and only a single finer coin is reported at that service (9/17). Hints of iridescence warm the champagne toning on this piece, and the frosty surfaces are devoid of abrasions. The strike is slightly above average, including partial thumb separation on Liberty's branch hand. NGC ID# 24SC, PCGS# 6621

FRANKLIN HALF DOLLAR

1952-D Half Dollar, MS67 Full Bell Lines
Condition Census, Finest at CAC

16783 1952-D MS67 Full Bell Lines NGC. CAC. Exactly five 1952-D Franklin halves are certified MS67 Full Bell Lines, including four at PCGS and this lone NGC coin, with none finer. This piece is also the sole finest Full Bell Lines coin with CAC approval (9/17). The strike is sharp, and the frosty surfaces are devoid of abrasions. Rich lemon-gold, mint-green, and crimson toning covers the obverse, while the reverse displays mottled olive-gold color. Eye appeal is generous, as one would expect for the grade and toning. We have not previously offered a 1952-D in this top grade. NGC ID# 24T4, PCGS# 86662

PROOF FRANKLIN HALF DOLLARS

1959 Half Dollar, PR69 Cameo
A Top-Grade Registry Coin

16784 1959 PR69 Cameo NGC. Ultra/Deep Cameo proof 1959 Franklin half dollars are rare, and at NGC the finest grade PR67. This Cameo is two points finer and a major condition rarity as such. The strike is full, and the brilliant surfaces display pleasing field-motif contrast. An outstanding Registry Set candidate. Census: 9 in 69 Cameo (1 in 69 ★), 0 finer (8/17). NGC ID# 27VJ, PCGS# 86700

**1962 Half Dollar, PR69 Deep Cameo
None Graded Higher**

16785 1962 PR69 Deep Cameo PCGS. Proof 1962 Franklin half dollars with Deep Cameo contrast are accessible through PR68, though they represent a small fraction of 1962 proofs available. Examples graded PR69 Deep Cameo are highly sought-after among the most advanced collectors in this series. This is a totally brilliant Registry candidate with dramatic field-device contrast. Population: 22 in 69 Deep Cameo, 0 finer (9/17). NGC ID# 27VK, PCGS# 96703

**1969-D Half Dollar, MS67+
The Sole Finest Certified**

16787 1969-D MS67+ PCGS. In 1969, only the Denver Mint struck half dollars for circulation. This issue is scarce in high grade and a genuine rarity at the Superb Gem level. Above MS65, it is every bit as scarce as the 1970-D, which was issued only in Mint Sets. This Plus-designated MS67 coin might have garnered an even finer grade were it not a few tiny ticks in the left obverse field. The piece is well-struck, and a light champagne hue on each side adds to its appeal. As it stands, this is the single finest 1969-D Kennedy half dollar certified, even if only by the margin of the Plus designation. Population: 21 in 67 (1 in 67+), 0 finer (9/17). NGC ID# 24U8, PCGS# 6712

KENNEDY HALF DOLLARS

**1966 Kennedy Half, MS67+
Extravagant Toning
Conditionally Rare Circulation Issue**

16786 1966 MS67+ PCGS. The regular issue 1966 Kennedy half dollar is scarce in MS66 and rare any finer. This Superb Gem is an essential acquisition for the advanced Registry collection. The strike is bold throughout, and the surfaces yield undisturbed, satiny luster. Both sides show large areas of crimson, violet, spruce-green, and sun-gold toning. Population: 15 in 67 (2 in 67+), 1 finer (9/17). NGC ID# 24WH, PCGS# 6709

SMS KENNEDY HALF DOLLAR

1967 Half Dollar, MS69 Ultra Cameo
Special Mint Set Issue

16788 1967 SMS MS69 Ultra Cameo NGC. When silver coinage was discontinued at the end of 1964, the government also discontinued issuing proof and mint sets, and they stopped putting mintmarks on coins. Beginning in 1965, special five coin sets were issued under the new name of Special Mint Set. These special sets were issued through 1967, and regular proof sets were again produced in 1968, but now at the San Francisco Mint. While the Special Mint Set coins were substantially higher quality than regular circulation-strike coins, they were not the same quality as proof coins, and for that reason, examples are rarely seen at the top grade levels. This amazing, nearly perfect, Superb Gem has brilliant silver surfaces with extraordinary field-to-device contrast. This is the only MS69 Ultra Cameo at NGC with nothing comparable at PCGS (9/17). NGC ID# 24WJ, PCGS# 96847

PROOF KENNEDY HALF DOLLARS

1964 Kennedy Half, PR68 Ultra Cameo
Accented Hair Proof

16789 1964 Accented Hair, FS-401, PR68 Ultra Cameo NGC. Type One Reverse. The 1964 Accented Hair "variety" is actually a subtype of the initial Kennedy half dollar issue of 1964. This issue, with its bold part in President Kennedy's hair, is seldom found with black-and-white contrast, and it is highly elusive in PR68 Ultra Cameo. This Superb Gem is fully brilliant with frosty silver devices and deeply mirrored fields. Census: 11 in 68 Ultra Cameo, 2 finer (9/17).
Ex: FUN Signature (Heritage, 1/2013), lot 5052. NGC ID# 24WG, PCGS# 145627 Base PCGS# 96801

1968-S Kennedy Half, PR70 Deep Cameo
Brilliant and Conditionally Rare

16790 1968-S PR70 Deep Cameo PCGS. The 1968-S proof Kennedy half dollar is a great rarity in PR70 Deep Cameo. PCGS lists only 16 coins so fine, and none are comparable at NGC (9/17). This piece is fully struck and brilliant with stark white-on-black contrast. The surfaces are perfect. Registry Set collectors should give this coin close consideration as the finest obtainable. NGC ID# 24WK, PCGS# 96804

EARLY DOLLARS

1795 B-9, BB-13 Dollar, MS62
Early Die State
Likely the Finest Known of the Variety

16791 1795 Flowing Hair, Two Leaves, B-9, BB-13, R.4, MS62 NGC.

Bowers Die State I. An early die state with no clash marks or cracks visible on either side. Both sides have bold denticles with a nicely centered strike, yielding wide border details. Slight die roughness is noted above the date and near the bust tip, with the 7 and 5 each repunched. The obverse die was used for BB-11, 12, and 13 (B-3, 11, and 9), the first three 1795 silver dollar varieties coined, according to the Bowers *Encyclopedia of United States Silver Dollars 1794-1804*. After the present variety was minted, the reverse was used for B-4, BB-14.

The Notable Specimens section of the current (2013) Bowers reference is not an official Condition Census, nor was it meant to be. Much of the information was compiled in the early 1990s as part of the two-volume *Silver Dollars & Trade Dollars of the United States, A Complete Encyclopedia*. Together, these two references are still the only published source of census information about the early dollars. The finest piece listed in the 1993 Bowers & Borckardt Notable Specimens was an MS63 Auction '90 specimen, except that is actually a B-13 (BB-24) dollar.

Today, we know that the Cardinal Collection included an AU58 PCGS specimen in 2005, and the catalogers at that time felt it was the finest known. Another AU58 example (certified by NGC) appeared in our ANA Signature auction of July, 2005. Other notable coins include an AU55 appearing in the 1987 Bowers and Merena sale of the Saunders Collection, and the AU55 Hesselgesser specimen. Another high-grade piece includes the Atwater specimen, a Mint State coin with heavy planchet lamination defects. Thereafter, about a dozen XF pieces exist.

The present MS62 NGC dollar is, in our opinion, the finest known B-9, BB-13 silver dollar, clearly finer than any of the above-listed candidates. This lovely dollar has light silver-gray surfaces with full frosty mint luster beneath wisps of champagne toning. Faint adjustment marks at the central obverse cause strike weakness at the central reverse. A shallow abrasion between UNITED and STATES plus some small streaks of medium-gray toning appear on the reverse. Here is a splendid Mint State early dollar for the advanced variety specialist, and a rare opportunity for the connoisseur of Flowing Hair dollars.

Ex: FUN Signature (Heritage, 1/2013), lot 5715. NGC ID# 24WZ, PCGS# 39980 Base PCGS# 6853

1795 Flowing Hair Dollar, VF25
Two Leaves Reverse, B-1, BB-21

16792 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2, VF25 PCGS. Bowers Die State Unlisted, with clash marks before the profile. BB-21 is a plentiful Two Leaves variety with the Head of 1795, star 1 touching the lowest curl, and berries arranged 9x10, including one under the right serif of A(MERICA). Examples are usually seen in the VF to XF range and are ideal for type purposes. This representative is well-circulated with blending over the curls and feathers. Still, outlines are bold and the legends are strong. Attractive patina includes steel-blue and antique-gold shades. Diagonal file marks across the reverse. NGC ID# 24WZ, PCGS# 39986 Base PCGS# 6853

1795 Flowing Hair Dollar, XF40
Condition Census B-12, BB-26 Variety

16793 1795 Flowing Hair, Three Leaves, B-12, BB-26, R.6, XF40 NGC. Bowers Die State I. Among the six Flowing Hair die marriages with a Three Leaves reverse, three of the die pairs are very scarce to extremely rare. This Bolender-12, BB-26 example is a scarce (R.6) pairing, while BB-19 and BB-28 are both R.8 varieties and virtually uncollectible (with just two or one piece known respectively). Perhaps 100 to 150 BB-26 dollars exist, but they are almost invariably in lower grades. We are aware of only two or possibly three AU examples that vie for the top of the roster, and XF coins make up the balance of the census. The present coin is clearly of Condition Census quality.

We do not recall seeing this exact coin previously among the two dozen or so B-12, BB-26 dollars that we have sold over the past 20 years. It displays remarkably smooth and glossy surfaces with attractive golden-gray toning and blue overtones. Struck from a desirable early state of the dies, there is no sign of the progressively stronger die crack through 7 in the date that signifies later die states. A few tiny ticks are scattered about the surfaces, but they are microscopic in nature, and there are no adjustment marks. The rims are ideal for the assigned grade. This is an important opportunity for early dollar specialists and we expect spirited competition when this exceptional specimen is called. NGC ID# 4EWV, PCGS# 39976 Base PCGS# 6852

1795 Centered Bust Silver Dollar
B-15, BB-52, AU53
 Scarce in About Uncirculated Grade

16794 1795 Draped Bust, Centered, B-15, BB-52, R.2, AU53 PCGS.

Bowers Die State V. The new Draped Bust design, influenced by portrait painter Gilbert Stuart, appeared first on the 1795 silver dollars. On all other silver denominations, as well as the cent, this design made its debut in 1796. Two obverse dies were utilized for the entire coinage of 1795 Draped Bust dollars, differing in the position of the central device, either centered or left of center and crowding the first few stars.

This example has pleasing gray-gold color with hints of iridescence. It is fairly well struck, with excellent details on each side. A faint toning streak in Liberty's hair strands runs across the internal die break that indicates a mid-to-late die state. Adjustment marks extend up from the lower reverse border, confined mainly to the margin and devices below the eagle's legs. Much definition remains on the eagle's breast feathers. Housed in an old blue label holder with the barcode on the back.

Ex: ANA Signature (Heritage, 8/2007), lot 1713. NGC ID# 24X2, PCGS# 39995 Base PCGS# 6858

1796 B-4, BB-61 Draped Bust Dollar, VF35
 Ideal Small Date, Large Letters Example

16795 1796 Small Date, Large Letters, B-4, BB-61, R.3, VF35

PCGS. Bowers Die State I. This Choice VF example of the Small Date, Large Letters type is seemingly perfect for the assigned grade. Moderate wear exists on the high points, while the fields and devices show only a few muted, small ticks. There are no adjustment marks or other Mint-related defects. The coin is well-centered and evenly toned in shades of blue and tan-gold with occasional reddish-brown accents. It will be challenging to improve on this midgrade Small Eagle dollar for type, date, or Draped Bust representation. Population: 40 in 35, 98 finer (9/17). NGC ID# CAUF, PCGS# 40000 Base PCGS# 6860

1796 Small Date, Large Letters Dollar, AU55
B-4, BB-61, Elusive This Fine

16796 1796 Small Date, Large Letters, B-4, BB-61, R.3, AU55 NGC. Bowers Die State III. This is a delightful, lightly toned Small Eagle dollar with golden-gray patina that deepens slightly at the borders. The smooth surfaces are free of adjustment marks or individually notable abrasions — just a few light lines and tiny marks are visible with a glass. Sharply struck from lapped dies, Liberty's hair strands are well-defined except for the outermost curls, which are reduced by resurfacing of the obverse die.

As always, the eagle's neck, breast, and leg feathers are diminished from a shallow impression into the working die. Nice mint luster remains across both sides. While BB-61 is the most-available variety of 1796 dollars, the opportunity to own a Choice About Uncirculated example seldom occurs. Based on the most recent population reports, fewer than a dozen 1796 Small Date, Large Letters dollars are certified in AU55 or finer grades, both services combined. NGC Census: 2 in 55, 3 finer (8/17). NGC ID# CAUF, PCGS# 40000 Base PCGS# 6860

1796 Draped Bust Dollar, VF30
B-5, BB-65, Large Date, Small Letters

16797 1796 Large Date, Small Letters, B-5, BB-65, R.2, VF30 NGC. Bowers Die State IV. An ever-enlarging die lump between I and C of AMERICA increases in size with each die state. Here, the lump is substantial, where it touches C and overruns the center of I while following the curve of C downward. Smooth wear mitigates most abrasions on this attractive VF example. Cool-gray fields contrast with silver-gray toning on the raised devices. There are no adjustment marks or other distractions to disturb the considerable eye appeal. Census: 8 in 30, 27 finer (8/17). NGC ID# 24X3, PCGS# 40002 Base PCGS# 6861

1796 Draped Bust Dollar, AU50
B-5, BB-65, Large Date, Small Letters

16798 1796 Large Date, Small Letters, B-5, BB-65, R.2, AU50 NGC.

Bowers Die State II. Richly toned in natural shades of steel-gray with tinges of russet and violet, this About Uncirculated early dollar is a splendid representative of the date and type. The surfaces are smooth and free of any meaningful distractions, while traces of silver luster emerge from the comprehensive patina in protected areas.

The strike is a trifle soft on Liberty's middle curls, as well as on stars 2-4 and the corresponding letters (STA of STATES) of the reverse. Even so, about half of the eagle's breast feathers remain visible. The diagnostic die lump between the IC in AMERICA is in a fairly early state and does not touch the C. BB-65 is the sole representative of the Large Date, Small Letters type, and as such, this minimally worn and unquestionably original Small Eagle dollar is sure to earn a generous bid. NGC ID# 24X3, PCGS# 40002 Base PCGS# 6861

1797 Silver Dollar, AU50
B-1, BB-73, Very Scarce This Fine

16799 1797 9x7 Stars, Large Letters, B-1, BB-73, R.3, AU50 NGC.

Ex: William Luebke Collection. Bowers Die State II. Seven stars right, leaf tip at center of M. Struck from an early die state before either side developed cracks. The point of the hair curl is missing from light die lapping. Pleasing champagne and lilac-gray colors on each side complement considerable remaining luster. A few tiny surface ticks are evident on each side. Aside from the 1794 dollars with but a single die variety, fewer dollar varieties were produced with the 1797 date than for any other early silver dollar issue. Each of the three known varieties is plentiful enough to be obtainable, and each represents a specific different subtype within the series of Small Eagle dollars coined from 1795 to 1798. Mint records indicate a total production of just 7,776 silver dollars during the year, but it is now believed that most or all were actually coins bearing the 1796 date. The production of silver dollars dated 1797 in all probability actually took place in 1798.

Ex: Tom Eckert (5/2001); The William Luebke Collection — FUN Signature (Heritage, 1/2007), lot 4964. NGC ID# 24X4, PCGS# 40003 Base PCGS# 6863

1798 Large Eagle, Knob 9 Dollar, XF45
5 Vertical Lines, 10 Arrows, B-6, BB-96

16800 1798 Large Eagle, Knob 9, 5 Vertical Lines, 10 Arrows, B-6, BB-96, R.3, XF45 PCGS Secure. CAC.

Bowers Die State V. This piece appears intermediate between Die States IV and V in the revised Bowers *Silver Dollar Encyclopedia*. The die cracks of State V are present on both sides, yet the reverse has not been relapped. Both of the headless arrow shafts are visible among the 10 complete arrows. This delightful, light-silver example displays considerable luster for the grade amid splashes of pale amber and iridescent toning that invigorate each side. A Choice example of this early type and an important *Guide Book* variety as well. Housed in a PCGS Secure holder with CAC endorsement.

Ex: Stack's (3/2006), lot 2812; Queller Collection / Central States Signature (Heritage, 4/2008), lot 2019; Long Beach Signature (Heritage, 2/2009), lot 1546; The Sonoran Monsoon Collection — FUN Signature (Heritage, 1/2016), lot 4222. NGC ID# 24X6, PCGS# 40011 Base PCGS# 40008

1798 Wide Date Dollar, XF45
Scarce B-20, BB-102 Variety, Pointed 9

16801 1798 Large Eagle, Pointed 9, Wide Date, B-20, BB-102, R.5, XF45 NGC. Bowers Die State II. A horizontal rim crack below the eagle's tail is just beginning to form, confirming the early die stage. Elusive in any grade above VF, the BB-102 is unknown in Uncirculated condition and the Condition Census for the variety consists entirely of About Uncirculated coins. The Bowers list of Notable Specimens includes one XF40 coin and two VF25 examples. The present coin is a Choice XF representative with rich, gunmetal-gray toning and deep-blue overtones that congregate at the margins. Struck a tiny bit off-center to the northeast, stretching the dentils in the lower-left quadrant. Census (for the variety): 4 in 45, 3 finer (5/17). NGC ID# 24X6, PCGS# 40019 Base PCGS# 40018

1799 B-23, BB-159 8x5 Stars Dollar, XF45+
Choice, Important *Guide Book* Variety

16802 1799 8x5 Stars, B-23, BB-159, R.3, XF45+ NGC. Bowers Die State II. The usual die state, with a faint, lumpy die crack from between B and E of LIBERTY into the upper-left field and no sign of die clashing. As the only 1799 variety with the 8x5 star arrangement, BB-159 is always in big demand among early dollar specialists and variety-minded type collectors. This high-end, Choice XF example with the NGC Plus designation shows moderate wear but retains much mint luster on both sides. The fields are smooth with few abrasions or marks, the devices sharply struck. Lovely amber-gold and gunmetal-blue toning at the margins lightens to golden-gray at the centers. NGC ID# 24X7, PCGS# 40063 Base PCGS# 6881

1799 7x6 Stars Dollar, Richly Toned AU50
B-8b, BB-165, Advanced Die Stage

16803 1799 7x6 Stars, B-8b, BB-165, R.3, AU50 NGC. Bowers Die State III. Like many Bust dollars, BB-165 examples are generally attainable up to the XF level, and then there is a sharp reduction in availability. This appealing About Uncirculated representative is notable for its smooth, problem-free surfaces and its rich, original coloration. Gunmetal-blue and brownish-gray shades combine with chestnut-gold undertones. Mint luster shines through the rich patina — especially at the margins. The strike is crisp except at the central field stars above the eagle's head, a striking feature that is often seen on the variety in its later die stages. NGC ID# 24X7, PCGS# 40056 Base PCGS# 6878

1799 Bust Dollar, Sharp AU55
B-8a, BB-165, 7x6 Stars

16804 1799 7x6 Stars, B-8a, BB-165, R.3, AU55 PCGS. Bowers Die State II. The 1 in the date is distant from the curl and Liberty's mouth is open, both useful identifiers for BB-165. A die crack from the inner two points of star 7 through LIB of LIBERTY confirms the obverse used, only to strike this variety. Likewise, the reverse die is unique to BB-165, with evidence of the N in UNITED originally cut upside down, then corrected, leaving a wayward serif between N and I. Shades of umber and blue enrich the borders, ceding to steel-gray with tan-gold undertones on this sharply struck Choice AU early dollar. Marks are few and far between — none of consequence — with traces of mint luster beneath the rich patina. NGC ID# 24X7, PCGS# 40056 Base PCGS# 6878

1800 B-13, BB-193 Dollar, AU55
Smooth, Appealing Surfaces

16805 1800 B-13 (B-18), BB-193, R.3, AU55 NGC. Bowers Die State III. A late state of the dies, with heavy die clashing at clouds 7 and 8 and through OF, plus a blurry die crack above AMERICA that sharpens into a more distinct break into the eagle's tail. The late state of the dies was once called Bolender-18. However, it is merely an advanced state of the B-13 dies. Attractive slate-gray toning glows with subtle underlying iridescence. The strike is especially sharp on all of the devices despite brief circulation, and the Choice About Uncirculated surfaces are smooth and nearly unabraded. NGC ID# 24X9, PCGS# 40077 Base PCGS# 6887

1801 B-3, BB-213 Dollar, AU55
Near Condition Census

16806 1801 B-3, BB-213, R.3, AU55 PCGS. CAC. Bowers Die State III, with light clash marks, minuscule rust marks, and trivial die cracks on each side. the Stack's-Bowers cataloger called this an intermediate die state, failing to observe the faint reverse clash marks through STATES that are characteristic of the late die state. Four varieties of 1801 silver dollars were coined at the first Philadelphia Mint, and we believe that the current BB variety numbers, 211 through 214, represent the actual order of emission. We believe that there are just four or five Mint State examples and perhaps 12 to 15 AU examples known of the BB-213 die marriage. This piece is tied for the seventh best in Dave Bowers' list of Notable Specimens in the second edition of his reference. A trace of high-point wear is noted, with delicate champagne toning over the brilliant and highly lustrous surfaces.
Ex: Jarapendo Collection (Stack's-Bowers, 7/2011), lot 4043. NGC ID# 24XA, PCGS# 40085 Base PCGS# 6893

1802/1 Bust Dollar, XF40
Narrow Date, B-4, BB-232

16807 1802/1 Narrow Date, B-4, BB-232, R.3, XF40 PCGS. Bowers Die State II. Traces of prooflikeness remain at the margins, where royal-blue and reddish-gold shades intermingle with the overall silver-gray patina. Struck from a middle state of the obverse die, with an unusual, short die crack through the right side of the bust to near star 13. Noticeably sharp definition exists on the devices despite 20 points of wear — the hair detail, field stars, and clouds are particularly well-defined. Light field abrasions are small and unobtrusive. This is a sharp and attractive example of the overdate, pleasingly toned. NGC ID# 24XC, PCGS# 40092 Base PCGS# 6898

GOBRECHT DOLLAR

1836 Gobrecht Dollar, PR62+
Original Striking, Medallic Alignment
Judd-60, Final Die State

16808 1836 Judd-60 Original, Medal Alignment, Pollock-65, R.1, PR62+ PCGS. CAC. Silver. Plain Edge. No Stars Obverse, Stars Reverse. Die Alignment IV (head of Liberty opposite the O in OF after a medal turn). Die State H. All the die markers from earlier die states are clean and crisp, undoubtedly due to the high degree of preservation on this piece. The last diagnostic, a rim nick above and to the left of the U in UNITED is apparent, but somewhat difficult to pick up at first glance because of its location on the edge of the coin. Struck, as are all Originals, in the final week of December 1836. This final die state indicates this must have been one of the final dollars struck before the end of the calendar year. The surfaces are remarkably bright with deeply mirrored fields. The interiors of each side are brilliant, surrounded by thin rings of golden-russet and blue toning around the margins. Fully detailed in all areas. Exceptionally well-preserved and definitely much finer in appearance than the PR62 grade would indicate. Population: 9 in 62 (1 in 62+), 12 finer. CAC: 1 in 62, 5 finer (9/17). NGC ID# BLWV, PCGS# 11226

SEATED DOLLARS

1840 Seated Dollar, MS63
Richly Patinated First-Year Coin

16809 1840 MS63 NGC. OC-3, R.3. Curiously, the Seated dollars of 1840 (61,005 coins minted) were little saved at the time of issue. This deviation from the normal rule of squirreling away first-year representatives could be a reflection of the “Hard Times” era in which they were struck. It could also reflect another economic reality: A dollar in silver was only worth about \$1.01 in gold throughout most of the 1840s, so the coins remained in circulation instead of being hoarded or melted, accounting for their prevalence in circulated grades. The *Silver Dollar Encyclopedia* comments: “In true Mint State the 1840 is exceedingly rare, and very few have a claim to MS-63 or higher grade.”

This outstanding Select Uncirculated first-year Seated dollar shows bold design definition throughout save for a bit of incompleteness on the reverse at the eagle’s left (facing) leg. Dusky violet-gray toning cedes to shades of blue, green, and russet around the margins. Scattered marks appearing on both sides are generally difficult to discern beneath the rich patina. Census: 8 in 63 (1 in 63★), 1 finer (9/17).

Ex: Purchased by Eugene Gardner from U.S. Coins (10/2007); Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98776. NGC ID# 24YA, PCGS# 6926

1873-CC Seated Dollar, XF Details
Good Color and Appeal

16810 1873-CC — Reverse Rim Filed, Cleaned — ANACS. XF Details, Net VF25. OC-1, High R.4. The file marks are seen from 12 to 3 o’clock on the reverse rim but are of little impact. Although lightly cleaned in the past, this 1873-CC Seated dollar now displays appealing olive-gray, gold, and bluish toning over each side. Detail is bold, including full readability of LIBERTY. This key-date coin will fit in well with an otherwise problem-free XF and AU date set. Only 2,300 examples were struck, and the date is the rarest of the Carson City issues in this series. NGC ID# 24ZN, PCGS# 6972

PROOF SEATED DOLLAR

1873 Seated Dollar, PR64 Cameo
Attractive Border Toning

16811 1873 PR64 Cameo PCGS. CAC. OC-P1, R.3. IN GOD WE TRUST is die doubled on this proof issue. The present Choice Cameo displays dramatic field-device contrast with bold strike definition. Blue, lavender, and sun-orange border toning surrounds champagne-tinted centers. No distracting marks are seen. Population: 25 in 64 (1 in 64+) Cameo, 10 finer; 9 in 64 (2 in 62+) Deep Cameo, 4 finer. CAC: 6 in 64, 2 finer (9/17). NGC ID# 252V, PCGS# 87021

TRADE DOLLARS

1875-CC Trade Dollar, MS63
Rare CAC-Approved Example

16812 1875-CC MS63 PCGS. CAC. The 1875-CC is a scarce date in attractive Mint State condition and is genuinely rare in MS64 or better grades. CAC-approved coins are rare in any grade level. This Select example displays brilliant, satiny mint luster and sharp design definition. A few light abrasions define the grade but are unobtrusive. Population: 63 in 63, 29 finer. CAC: 4 in 63, 5 finer (10/17). NGC ID# 2535, PCGS# 7038

**1876 Trade Dollar, Splendid MS65
Distinctively Toned, Uncommonly Attractive**

16813 1876 Type One Obverse, Type Two Reverse, MS65 PCGS. Richly frosted, dusky bronze patina envelops both sides of this smoothly coruscated Trade dollar in a complex mix of contributing colors. Direct light reveals the depth of toning — part grayish-blue, part rose-red, part pearlescent silver — entirely eye-stopping. Sharply defined for this Centennial issue, the crisp strike shows from Liberty's hair strands to the eagle's leg and talons. A stunning Gem, with only a few finer. Population: 26 in 65 (1 in 65+), 10 finer (9/17). NGC ID# 2539, PCGS# 40111 Base PCGS# 7041

**1880 Trade Dollar, PR65+
Modest Contrast, Attractively Toned**

16816 1880 PR65+ PCGS. A record mintage of 1,987 Trade dollar proofs were struck in 1880, but no circulation strikes — an irresistible temptation for speculators, who hyped the low mintage. Most of the proofs still exist today, although few are as well-preserved as this high-end Gem. The mirrored fields display tan-gold toning with bits of blue and violet at the borders. There are no hairlines or other signs of cleaning that accompany lesser-grade examples. A sharply struck proof, with only minor incompleteness on a few of the top hair strands. Population: 4 in 65+, 35 finer (9/17). NGC ID# 27YS, PCGS# 7060

PROOF TRADE DOLLARS

**1873 Trade Dollar, PR64 Cameo
First Year of Issue, CAC Endorsed**

16814 1873 PR64 Cameo PCGS. CAC. Arguably the rarest date in the entire regular Trade dollar series (1873-1883), the 865-piece mintage was generally unpopular with the public and many proofs were spent with no perceived numismatic value. The low survivorship is reflected in today's certified populations in all grades. This Choice Cameo example is better-preserved than most, with blue and russet toning at the margins and largely brilliant interiors. Frosted motifs contrast with the mirrored fields that show a few delicate lines but no other distractions. The strike is sharp except for minor weakness at the eagle's leg. Population: 14 in 64 (2 in 64+) Cameo, 2 finer. CAC: 10 in 64, 1 finer (9/17). NGC ID# 27YJ, PCGS# 87053

1883 Trade Dollar, Richly Toned PR65

16817 1883 PR65 PCGS. A richly toned specimen of the last broadly distributed proof Trade dollar issue, modestly contrasted through a rich drape of interior peach patina with blue-to-violet hues around much of the borders. As impressively preserved as it is eye-catching, and much more elusive at the next grade level. Population: 52 in 65, 25 finer (9/17). NGC ID# 5DP8, PCGS# 7063

MORGAN DOLLARS

**1878 8TF Dollar, Brilliant and Frosted MS66
VAM-17, Diagonal in 8, CAC Endorsed**

16818 1878 8TF Diagonal In 8, VAM-17, MS66 NGC. CAC. CAC endorsement adds to the appeal of this brilliant Premium Gem VAM-17 example. Multiple diagnostics confirm the variety, including a die scratch in front of the eye and a diagonal chip within the lower loop of the first 8 in the date. Cartwheel luster abounds throughout both sides of this frosted MS66 representative, which matches the finest shown in the PCGS and NGC populations for the variety combined (9/17). NGC ID# 253H, PCGS# 133818 Base PCGS# 7072

**1878 Trade Dollar, PR66
First Proof-Only Issue**

16815 1878 PR66 PCGS. CAC. The Trade dollar was only struck in proof format at the Philadelphia Mint in 1878, when a modest mintage of 900 pieces was accomplished. This delightful Premium Gem exhibits razor-sharp definition on all design elements and the fields are deeply reflective. The impeccably preserved surfaces are enhanced by highlights of pale gold and violet toning. NGC ID# 27YP, PCGS# 7058

1879-CC Morgan Dollar, MS61
Challenging Branch Mint Issue

16819 1879-CC MS61 PCGS. From a small mintage of 756,000 pieces, the 1879-CC is the second-most elusive Morgan dollar from the famous Carson City Mint. This impressive Mint State specimen exhibits sharply detailed design elements and vibrant mint luster throughout. The mostly brilliant surfaces show the expected number of minor contact marks for the grade, with a few traces of sea-green and violet toning at the rims. NGC ID# 253U, PCGS# 7086

1879-CC Morgan Dollar, MS63
Brilliant and Well-Struck

16820 1879-CC MS63 PCGS. Normal Mintmark. A lack of silver bullion at the Carson City Mint limited production to just 756,000 silver dollars in 1879 — a fact that collectors and speculators noticed early on. Relatively few pieces (4,123 coins) appeared in the GSA Morgan dollar distributions, adding to the notable scarcity. This brilliant silver-white Select Uncirculated example displays a sharp strike and strong cartwheel luster. Only minor luster grazes and a bit of field chatter determine the assigned grade. Housed in an old blue-label holder with the barcode on the back. NGC ID# 253U, PCGS# 7086

1879-CC Dollar, Frosty MS63
Elusive CAC-Approved Example

16821 1879-CC MS63 PCGS. CAC. This frosty Select 1879-CC Morgan dollar displays original mint luster and has minimal abrasions for the grade. Slight strike weakness is seen on the central high points, as usual. The 1879-CC is widely regarded as the second-scarcest Carson City Morgan in high grade, trailing only the 1889-CC. Much of the surviving Mint State population came out of the GSA sales of the 1970s, although only a few thousand coins were represented. NGC ID# 253U, PCGS# 7086

1879-CC Morgan Dollar, MS65
Normal Mintmark

16822 1879-CC MS65 NGC. This is the Normal Mintmark variant with the CC bold and sharp. The 756,000-coin mintage was the eighth highest of all Carson City Morgan dollars, but few examples were saved in the Treasury vaults. Since most examples entered circulation, high-level Mint State coins such as this one are elusive. Slightly merged hair strands over Liberty's ear are expected, although all other design elements are bold. Both sides exhibit scattered, microscopic marks on the frosty silver surfaces with delicate peripheral gold toning. Census: 42 in 65 (3 in 65+, 1 in 65★), 2 finer (9/17). NGC ID# 253U, PCGS# 7086

1879-O Morgan Dollar, MS66
Tied for Numerical Finest at Either Service

16823 1879-O MS66 PCGS. The New Orleans Mint had been out of commission since 1861, making its comeback issue a popular one with collectors. The mandate of the Bland-Allison Act of 1878 required massive production of silver dollars — a task well-suited to the New Orleans equipment. Nearly 2.9 million O-Mint Morgan dollars were struck in 1879.

Examples of this conditionally challenged issue are readily accessible through MS64 but scarce in Gem condition, and unknown any finer than the Premium Gem level. The cheek on the present vibrant and lustrous MS66 is unmarked, while a couple of tiny ticks occur on the neck. Clean, frosty fields are wholly brilliant, and the motifs are especially well-defined. Population: 26 in 66 (3 in 66+), 0 finer (9/17). NGC ID# 253X, PCGS# 7090

1880-CC Silver Dollar, MS66
VAM-7A, Reverse of 1878

16824 1880-CC 8/7 Dash, Clashed Obverse n, Small CC, Reverse of 1878, VAM-7A, MS66 PCGS. A Hit List 40 Variety. This is a brilliant and frosted Carson City Premium Gem example of the VAM-7A, with impeccable surfaces and a razor-sharp strike. A hint of golden-gray toning makes a fleeting appearance. Double die clashing below the chin and the faint Clashed n join the 8/7 overdate with a dash below the second 8 and a lack of chatter within the loops. The Small CC mintmark joins a parallel top arrow fletching to confirm the variety. NGC ID# AP7P, PCGS# 134049 Base PCGS# 7110

1880-CC Morgan Dollar, MS66
Popular VAM-7A Variety

16825 1880-CC 8/7, Reverse of 1878, VAM-7A, MS66 PCGS. CAC. A Hit List 40 Variety. The remnants of an undertype 7 are visible below the second 8 in the date and the parallel arrow feather indicates the Reverse of 1878. The double diagonal die clash from Liberty's neck into the field identifies the VAM-7A variety. The design elements of this delightful Premium Gem are sharply detailed and the impeccably preserved brilliant surfaces radiate vibrant mint luster. NGC ID# AP7P, PCGS# 134049 Base PCGS# 7110

1880-CC Morgan Dollar, MS66
Exceptional GSA Specimen, VAM-3

16826 1880-CC GSA MS66 PCGS. VAM-3. A delightful Premium Gem Morgan dollar from the famous GSA Hoard, this piece exhibits well-detailed design elements, with just a touch of the usual softness on the hair above the ear. The impeccably preserved brilliant surfaces radiate vibrant mint luster and eye appeal is outstanding. The VAM-3 was discovered by Walter Breen in 1964 and is identified by the "dash" under the second 8 in the date. No cardboard box or certificate included. Population: 18 in 66 (6 in 66+), 0 finer (9/17). NGC ID# 2542, PCGS# 518851 Base PCGS# 7100

1889-CC Morgan Dollar, AU50
Sharp for the Grade

16827 1889-CC AU50 NGC. The 1889-CC Morgan dollar is a challenging Carson City Mint issue, from a low mintage of 350,000 pieces. This impressive AU specimen shows only light wear on the well-detailed design elements and the lightly abraded lavender-gray surfaces retain traces of original mint luster. A tiny reverse rim bruise is evident at 6 o'clock. NGC ID# 2559, PCGS# 7190

1889-CC Silver Dollar, AU53
Nearly Brilliant

16828 1889-CC AU53 PCGS. This is a well-detailed, partially lustrous example of the 1889-CC Morgan dollar, ideal for the collector seeking to advance beyond the plethora of VF and lower-grade pieces scattered throughout the market. This coin shows bright surfaces with a hint of champagne toning. Slight wear appears on the eagle's breast and the hair above Liberty's ear. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, AU55
Challenging Branch Mint Issue

16829 1889-CC AU55 NGC. A limited mintage of 350,000 Morgan dollars was accomplished at the Carson City Mint in 1889, making the 1889-CC the most challenging date of the CC-mint series. This attractive Choice AU specimen exhibits light wear on the well-detailed design elements and the lightly abraded brilliant surfaces retain significant amounts of original mint luster. NGC ID# 2559, PCGS# 7190

1889-CC Silver Dollar, AU55
High-End and Lustrous

16830 1889-CC AU55 NGC. Peripheral die cracks appear on each side of this piece. The satiny surfaces are lustrous in the fields and show light high-point wear on the devices. A good strike prevails. Each side is well-preserved for the grade with light champagne toning. The 1889-CC in this grade is an elusive and popular issue, being the rarest of the Carson City Morgans and one of the most prominent key dates in the entire series from all mints. Most survivors are heavily circulated. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, MS63
The Carson City Key

16831 1889-CC MS63 NGC. VAM-4. Ex: Northern Lights Collection. The obverse die is perfect and the reverse die displays delicate die cracks through much of the legend. There are five documented die varieties, and any piece that does not match one of the five varieties is immediately suspect as a possible counterfeit. Such pieces abound. However, this unquestionably genuine Select Mint State piece will enjoy heightened bidder activity. Both sides are fully brilliant, untoned, and lustrous with satiny surfaces and outstanding eye appeal. NGC and PCGS have graded 250 examples of the 1889-CC in MS63 and finer grades (9/17). NGC ID# 2559, PCGS# 7190

1890-CC Dollar, MS64+
Condition Rarity of This Small GSA Release

16832 1890-CC GSA MS64+ NGC. CAC. The 1890-CC dollar had one of the lower number of coins held by the GSA with only 3,949 pieces released for sale in the 1970s. Of that low-release number, for the collector what is even more important are the small numbers certified in higher grades. NGC has only certified 18 other 1890-CC dollars in GSA holders as MS64, and this is the only MS64+. Notably, only one piece is finer, a single MS65 (8/17). This piece shows slight breaks in the otherwise thick mint frost and a few small abrasions. Strike details are fully brought up in the centers, and the surfaces are mostly brilliant. NGC ID# 255D, PCGS# 518878 Base PCGS# 7198

1890-S Morgan Dollar, Radiant MS67
Vibrant Mint Luster, Tied for Finest Certified

16833 1890-S MS67 PCGS. Blazing frost-white surfaces, a needle-sharp strike, and all-encompassing brilliant-silver cartwheel luster are the immediate impressions of this remarkable Superb Gem 1890-S dollar. The surfaces are exceedingly smooth and dazzling to behold. Marks are limited to a tiny nick on the rim outside of star 8 and a few almost imperceptible high point luster grazes. This is by the finest example we have seen in many years, and one of only three such coins that exist in our 25-year archives.

A sealed Mint bag of Morgan silver dollars contained 1,000 coins, from which perhaps 10 to 20 Gem-quality coins might be obtained. Since the majority of bags went into distribution or storage, few bags were actually cherrypicked for pristine examples. Despite more than 8.2 million pieces struck in 1890 at the San Francisco Mint, most Uncirculated examples that survive are bagmarked and fail to achieve even the MS64 or MS65 levels. This extraordinary MS67 example is one of just nine such coins certified by PCGS and NGC combined (9/17). NGC ID# 255F, PCGS# 7202

1891-CC 'Spitting Eagle' Morgan Dollar, MS66
Carson City Condition Rarity

16834 1891-CC Spitting Eagle, VAM-3, Top 100, MS66 PCGS. A Top 100 Variety. We have only seen a few Spitting Eagle dollars at the MS66 level, but whether the eagle is spitting or not, any Premium Gem 1891-CC example is rare. The Carson City Mint churned out more than 1.6 million silver dollars for the year, and most suffered the travails of transport and storage or were released into circulation. Lesser grades exist in quantity, while the few high-grade Mint State coins cannot possibly satisfy collector demand.

This is an incredibly smooth and nearly unmarked example, with pinpoint-sharp strike and intense mint luster. The fields approach perfection with a few minuscule grazes but no individually distracting marks. The coin is essentially brilliant, although fleeting glimpses of fawn-gold dart along the rims and from the strands of Liberty's hair. It will be a while before a finer 1891-CC will cross the block in one of our auctions. Population (all varieties): 35 in 66 (1 in 66+), 0 finer (9/17). NGC ID# 255H, PCGS# 133937 Base PCGS# 7206

1892-CC Silver Dollar, MS65 Prooflike
Tied for Numeric Finest in This Format

16835 1892-CC MS65 Prooflike PCGS. Sharp, frosty design elements provide stark cameo contrast on this Gem Prooflike 1892-CC dollar. The coin is brilliant, and grade-limiting grazes are trivial in nature. Frost-white devices add to the substantial contrast that earns this piece the much-desired Prooflike designation. The mirrored fields are only slightly diminished by sparse field chatter — an unavoidable result of Mint handling, transport, and government storage.

It was the penultimate year for Carson City coinage operations, and a high-mintage one. The Old West Mint produced 1,352,000 silver dollars — more than either the Philadelphia or San Francisco mints. Hardly any coins benefited from fresh dies and careful handling. As a result, Prooflike 1892-CC dollars are few and far between in Gem condition, and examples in a higher numeric grade are unknown. Population: 14 in 65 (1 in 65+) Prooflike, 0 finer; 2 in 65 Deep Mirror Prooflike, 0 finer (8/17). NGC ID# 255M, PCGS# 7215

1893-CC Morgan Dollar, MS62
Semiprooflike Fields

16836 1893-CC MS62 PCGS. Semiprooflike fields complement thick, frosty mint luster on the devices of this Mint State 1893-CC Morgan dollar. The coin is untoned and displays a radiant cartwheel effect. Scattered abrasions are in keeping with the grade. As expected for the final-year Carson City silver dollar, this piece displays moderate strike weakness on the central high points. A highly appealing aspect is the modest cameo contrast on each side. NGC ID# 255S, PCGS# 7222

1893-CC Morgan Dollar, MS63
Final Carson City Morgan

16839 1893-CC MS63 NGC. This attractive Select specimen represents the final year of coinage operations at the famous Carson City Mint, when a small mintage of 677,000 Morgan dollars was produced. This coin exhibits sharply detailed design elements and lightly marked brilliant surfaces, with vibrant mint luster on both sides. Overall eye appeal is outstanding. NGC ID# 255S, PCGS# 7222

1893-CC Silver Dollar, MS62
Final Carson City Morgan

16837 1893-CC MS62 PCGS. A lustrous, satiny Mint State example of the final Carson City silver dollar. The usual weakness is seen on the hair above Liberty's ear, and scattered abrasions limit the grade. Only a single 1893-CC dollar was represented in the GSA sales, limiting the number of high-grade coins available to collectors today. The 1893-CC is among the more challenging acquisitions in the Mint State Carson City short set. NGC ID# 255S, PCGS# 7222

1893-CC Morgan Dollar, MS63
Semireflective, Cartwheel Luster

16840 1893-CC MS63 PCGS. The fields are semireflective with enough frost to radiate nice cartwheel luster. The strike on this Select example is sharper than most including good hair definition above the well-struck ear. A faint hint of champagne-gold is confined mostly to the borders. A glass reveals a peppering of light marks on Liberty's portrait and in the surrounding fields, but there are no heavy marks. Housed in a prior generation blue-label holder (barcode on the back). NGC ID# 255S, PCGS# 7222

1893-CC Dollar, Brilliant MS62
Slightly Reflective Fields

16838 1893-CC MS62 PCGS. Semiprooflike fields are the hallmark of this brilliant Mint State example. Slight strike weakness on the hair above Liberty's ear is normal for the issue, and scattered light abrasions — mostly on the obverse — account for the grade. The popularity of the Carson City short set of Morgan dollars places strong collector demand on Uncirculated examples of all dates, exposing the moderate high-grade scarcity of the later issues. NGC ID# 255S, PCGS# 7222

1893-CC Silver Dollar, MS63
Refreshingly Clear Fields

16841 1893-CC MS63 PCGS. The final silver dollars were struck at the Carson City Mint in June, 1893 after a six-month production of 677,000 coins. No special care was taken for the issue, where weak strikes and bagmarks are the rule. This Select Uncirculated piece is sharp on the eagle's breast but soft at the ear. Bits of orange toning at the margins accompany remarkably clean fields, which are brilliant and reflective. NGC ID# 255S, PCGS# 7222

1893-CC Dollar, Champagne-Toned MS63
A Better Carson City Issue

16842 1893-CC MS63 PCGS. This frosty, champagne-toned Select Uncirculated 1893-CC Morgan displays clean fields with only a few light abrasions on Liberty's cheek. The central high points are considerably weak, as is often the case on Carson City Morgans of the 1890s, particularly the 1893. A pleasant cartwheel effect adds to the visual appeal. Demand remains strong for attractive late-date Carson City Morgans in high grade. NGC ID# 255S, PCGS# 7222

1893-O Silver Dollar, MS63
Attractive Satiny Luster

16843 1893-O MS63 PCGS. The 1893-O is a scarce date in pleasing Uncirculated condition and is seldom offered finer than MS63. This collectible Select example displays satiny luster and a hint of light golden border toning. Scattered marks on Liberty's cheek account for the grade. As is appropriate for a New Orleans issue of the 1890s, this piece shows minor strike weakness on the hair above Liberty's ear. NGC ID# 255T, PCGS# 7224

1893-O Dollar, MS64
Seldom Seen This Fine

16844 1893-O MS64 PCGS. The 1893-S gets most of the publicity, but its O-mint counterpart is a notably elusive issue in its own right, scarce at the Choice grade level and extremely rare any finer. This MS64 example displays satiny luster beneath deep pewter-gray toning that yields sun-gold, amber, and ocean-blue hues around the peripheries. Light, scattered abrasions limit the grade, but none are individually noteworthy beneath the thick patina. The eagle's breast and the hair above Liberty's ear show moderate striking weakness, not unusual for this poorly produced New Orleans issue. PCGS has seen only six numerically finer submissions (9/17). NGC ID# 255T, PCGS# 7224

1893-S Silver Dollar, VF35
Pleasing Color and Surfaces

16845 1893-S VF35 PCGS. Hints of gold and russet accent the deep pewter-gray surfaces of this Choice VF 1893-S dollar. Detail is pleasing for the grade, and the surfaces are attractively smooth. Some lighter battleship-gray wear points appear on the high surfaces of the devices. The 1893-S is collectible in most circulated grades, and this example strikes a balance between level of detail and affordability. NGC ID# 255U, PCGS# 7226

1893-S Silver Dollar, XF40
Top-Notch Surfaces

16846 1893-S XF40 PCGS. While problem-free midgrade examples of the famous 1893-S are available for a price, they are highly prized and the subject of great demand when available. This is a particularly smooth and attractive XF representative, with evenly dispersed medium-gray patina and some deeper accents in sheltered areas. Marks are a non-issue, since they are almost entirely absent from the fields and well-defined devices. The rims are perfect for the grade. NGC ID# 255U, PCGS# 7226

1893-S Silver Dollar, AU50
Clear Diagnostics

16847 1893-S AU50 PCGS. VAM-2. As the rarest circulation-strike Morgan dollar, this issue is frequently imitated. Although two die varieties are known, they share a common obverse die. This obverse die has a small die chip in the left foot of the R in LIBERTY, and a diagonal die line in the left top of the adjacent T. A parallel die line extends through the cap just above that T. This example has the second reverse with the S mintmark low and tilted slightly to the right. A good source of variety information and photos is www.vamworld.com. This satiny silver example has considerable luster with faint champagne toning. The fields are slightly reflective. NGC ID# 255U, PCGS# 7226

1894-O Morgan Dollar, MS63
Vibrant Mint Luster

16848 1894-O MS63 PCGS. The 1894-O ranks highly among New Orleans silver dollars in Mint State scarcity despite a mintage of more than 1.7 million pieces — more than the other two Mints combined for the year. This mostly brilliant example displays excellent cartwheel luster and a thin band of translucent gold at the rims. As usual, the strike is soft over the ear but reasonably sharp otherwise, with lively and attractive surfaces that are seldom seen for the issue. NGC ID# 255W, PCGS# 7230

1894-O Morgan Dollar, MS63
Appealing for the Grade

16849 1894-O MS63 PCGS. This Select 1894-O Morgan dollar is quite appealing for the grade, with light grade-limiting abrasions mainly restricted to Liberty's cheek and the eagle's breast; the reverse fields are seemingly pristine. This is an essentially brilliant coin with the usual strike weakness on the central high points. NGC ID# 255W, PCGS# 7230

1895-S Silver Dollar, MS63
Lustrous and Attractive

16850 1895-S MS63 PCGS. This frosty Select example displays semiprooflike fields and well-defined motifs. The surfaces are mostly brilliant save for some rose-gold border toning that makes occasional appearances around the peripheries. Scattered light marks, mostly on the obverse, define the grade. The 1895-S is a semikey Morgan dollar, coming from a small-for-the-series mintage of 400,000 pieces. NGC ID# 255Z, PCGS# 7238

1895-S Morgan, MS62 Prooflike
Elusive With Reflective Fields

16851 1895-S MS62 Prooflike PCGS. In the lower Mint State grades, 1895-S Morgan dollars are available, but only a small percentage feature fully prooflike fields. This is just such a coin, showing modest cameo contrast and considerable reflectivity. The strike is bold and the coin is brilliant. Scattered light abrasions account for the grade. Population: 26 in 62 Prooflike, 43 finer (9/17). NGC ID# 255Z, PCGS# 7239

1895-S Morgan Dollar, MS65+ Prooflike
Virtually Unavailable Any Finer

16852 1895-S MS65+ Prooflike PCGS. CAC. The 1895-S is a low-mintage semikey in the series and a formidable condition rarity in Gem or finer condition, with or without the Prooflike designation. This high-end Gem example runs contrary to all of the usual grade-limiting factors that affect the issue. Surface abrasions and bagmarks plague the 1895-S, with diminished eye appeal an inevitable result. Amazingly, none of those factors are present here.

As usual, the strike is crisp — indeed, nearly full throughout the coin. The Prooflike fields display strong mirroring while the frosted devices provide good contrast. Perhaps the greatest attribute is the lack of any significant marks. Tiny grazes and trivial nicks are found only with diligent use of a lens. Brilliant silver flash emanates from both sides. This is the sole Plus-graded Prooflike Gem at PCGS, with one numerically finer coin. Population: 2 in 65 (1 in 65+) Prooflike, 1 finer; 1 in 66 Deep Mirror Prooflike, 1 finer. CAC: 3 in 65, 1 finer (9/17). NGC ID# 255Z, PCGS# 7239

**1896-S Morgan Dollar, MS64
Scarce in Finer Grades**

16853 1896-S MS64 PCGS. The 1896-S Morgan dollar is a challenging issue in the higher ranges of Mint State, as most examples circulated heavily in the late 19th and early 20th centuries. This attractive Choice example displays well-detailed design elements and well-preserved surfaces with vibrant mint luster throughout. Highlights of golden-tan and magenta toning add to the outstanding eye appeal. NGC ID# 2564, PCGS# 7244

**1896-S Silver Dollar, MS64+
Elusive in Finer Condition**

16854 1896-S MS64+ PCGS. The availability of the 1896-S Morgan drops sharply at the Gem grade level, making this Plus-designated Choice coin immensely attractive to collectors seeking a high-quality piece at a lower price point. The strike is weak above Liberty's ear and on the eagle's breast, as usual for dollars of this period, but Liberty's cheek is remarkably clean and attractive. The coin is brilliant across the interiors with tinges of amber-red toning appearing at the extreme outer obverse periphery. NGC ID# 2564, PCGS# 7244

**1896-S Silver Dollar, MS64+
Highly Lustrous Surfaces**

16855 1896-S MS64+ PCGS. CAC. This Choice Mint State 1896-S is a virtual Gem, and has received the PCGS Plus designation for its exceptional quality at the MS64 grade level. The surfaces are highly lustrous and frosty with full untuned brilliance. While PCGS has certified more than 500 at this grade level, less than 10% of those have earned the Plus designation, and only 76 are graded finer (9/17). CAC: 58 in 64, 8 finer (9/17). NGC ID# 2564, PCGS# 7244

1901 Dollar, Lustrous MS62

16856 1901 MS62 PCGS. The fields of this Uncirculated 1901 Morgan are highly lustrous, while the devices show grade-limiting marks. Some strike weakness occurs on the central high points as is typical of the issue. Varying shades of lavender toning paint the margins, leaving the interiors with a warm champagne glow. NGC ID# 256J, PCGS# 7272

**1901 Morgan Dollar, MS62
Appealing for the Grade**

16857 1901 MS62 PCGS. A blush of yellowish champagne toning warms the softly lustrous surfaces of this Mint State 1901 Morgan dollar. The strike lacks complete sharpness above Liberty's ear, although there are no other faults. Scattered handling marks limit the grade but none are individually obtrusive. The 1901 is a famous condition rarity in Uncirculated grades. NGC ID# 256J, PCGS# 7272

**1902 Silver Dollar, MS66 Prooflike
No Finer Prooflike Examples**

16858 1902 MS66 Prooflike PCGS. Although PCGS has certified more than 8,700 submissions of 1902 silver dollars, only 66 have received the Prooflike designation, and just one example is called Deep Mirror Prooflike (9/17). These pieces are elusive and in strong demand. This example is the tied for the finest at PCGS and NGC with just 10 similarly graded examples at both services. Both sides are brilliant and untuned, save for a faint golden crescent on each side. The devices are satiny and attractive. NGC ID# 256M, PCGS# 7279

1903-S Morgan Dollar, MS62
Almost Fully Prooflike

16859 1903-S MS62 NGC. The 1903-S is a scarce issue in Uncirculated grades and is a major rarity with a Prooflike designation. This lightly abraded coin is brilliant and reflective, although the depth of mirroring is just shy of qualifying for NGC's Prooflike grade. Well-struck design elements further enhance the visual appeal. The 1903-S comes from a small 20th century mintage of little more than 1.2 million pieces. The present coin is visually far finer than most of its peers, in our experience. NGC ID# 256T, PCGS# 7288

1903-S Morgan, CAC-Approved MS64
Attractive Original Surfaces

16861 1903-S MS64 PCGS. CAC. This lightly toned near-Gem embodies the ideal collector-grade Mint State example of this semikey San Francisco issue. The surfaces show warm golden toning that deepens at the peripheries, and well-struck design elements offer an aesthetically pleasing complement. A few small marks prevent Gem classification but none distract. The scarcity and cost of finer coins makes this CAC-approved example especially appealing. NGC ID# 256T, PCGS# 7288

1903-S Morgan Dollar, MS63+
Lightly Toned, Sharp Strike

16860 1903-S MS63+ NGC. Although not as rare as it was once thought, the 1903-S is a confirmed semikey issue in the series with a low mintage (just over 1.2 million pieces) and perhaps only 1,500 Mint State survivors according to Miles Standish's well-thought estimate. This high-end Select Uncirculated example is more satiny than frosted yet brightly lustrous and lightly toned with tan-gold accents. Liberty's hair is razor-sharp, as are the other motifs. A few light abrasions on the cheek are the only noteworthy marks. NGC has recognized just three coins with the Plus designation at the MS63 level (9/17). NGC ID# 256T, PCGS# 7288

1903-S Dollar, MS65
Light Toning Around Brilliant Centers

16862 1903-S MS65 PCGS. The 1903-S was slowly released into the channels of commerce throughout the early to mid-20th century. Treasury reserves lacked any examples of the 1903-S by the early 1960s. High-grade representatives are elusive, and the issue becomes downright rare in MS66. Blushes of gold adorn the margins on each side with added shades of cobalt-blue around the reverse. The centers are frosty and untuned with crisp strike detail. Much finer than usually seen. NGC ID# 256T, PCGS# 7288

1904-S Dollar, MS64
Lustrous Surfaces, Rim-Toned

16863 1904-S MS64 PCGS. CAC. The 1904-S is one of the few Morgan dollar issues that was never available in bag quantity — along with the 1892-S and 1893-S — indicating most entered circulation shortly after striking. This example has surprisingly strong mint luster. The centers are mostly brilliant and surrounded by a ring of russet and blue toning around the rims. Upper-end, as indicated by the CAC sticker. NGC ID# 256W, PCGS# 7294

PROOF MORGAN DOLLARS

1879 Morgan Dollar, PR67 Cameo
Conditionally Rare, Stark Contrast

16864 1879 PR67 Cameo PCGS. The 1879 proof Morgan dollar is quite elusive in high grade with field-device contrast. Only two Deep Cameos are known in all grades (both at PCGS), and Cameos are rare in Superb Gem condition. We last offered a PR67 Cameo in lot 4220 of our August 2015 ANA Signature sale, where a PCGS coin realized \$14,100. This example is every bit its equal, showing stark contrast and warm champagne toning. The surfaces are pristine. This is only the third PCGS coin in this grade that we have handled. Population: 5 in 67 Cameo, 2 finer; 1 in 67 Deep Cameo, 0 finer (8/17). NGC ID# 27Z2, PCGS# 87314

1881 Morgan Silver Dollar, PR67+
Spectacular Patina
From the Gardner Collection

16865 1881 PR67+ PCGS. CAC. In his *Official Red Book of Morgan Silver Dollars*, Q. David Bowers (2007) wrote about the proof dollars of 1881 and gave particular praise to two attributes: "Excellent strike and deep cameo contrast go together on most pieces." Although it lacks the aforementioned cameo contrast, this coin makes up for it with spectacular patina and a razor-sharp impression. This delightful piece is one of the finest survivors from a mintage of just 984 proofs.

This gorgeous Superb Gem proof Morgan dollar displays bold detail, and a lightly toned region at the upper right obverse hints at the cameo effect that once appeared on that side. The rest of the specimen, however, now exhibits rich violet, blue-green, orange, and jade patina. The fields are exquisitely preserved, and the overall visual appeal is grand.

Ex: ANA Signature (Heritage, 8/2007), lot 1762; FUN Signature (Heritage, 1/2008), lot 2999; Eugene H. Gardner Collection (Heritage, 10/2014), lot 98628. NGC ID# 27Z5, PCGS# 7316

1881 Morgan Dollar, PR64 Cameo
984 Pieces Minted

16866 1881 PR64 Cameo PCGS. CAC. From a generous proof mintage of 984 pieces, this spectacular Morgan dollar is a visual treat. Razor-sharp definition shows on all design elements and a few hints of green toning are evident at the peripheries. The frosty devices contrast dramatically with the liquid mirrored fields. Population: 29 in 64 (1 in 64+) Cameo, 67 finer, including 44 non-cameo examples. CAC: 8 in 64, 9 finer (9/17). NGC ID# 27Z5, PCGS# 87316

1883 Morgan Silver Dollar, PR67 Cameo
Gorgeous Iridescent Toning

16867 1883 PR67 Cameo PCGS Secure. Morgan dollars and Trade dollars were issued in 1883, the final year of full scale Trade dollar production with a mintage of 979 proofs. A slightly higher production of 1,039 proof Morgan dollars was issued that year. This gorgeous Cameo proof exhibits delicate blue, gold, and iridescent toning on the obverse, with lighter gold toning on the reverse. The field-to-device contrast is excellent. This piece is tied with one other PCGS example for the finest Cameo proof. PCGS has only graded three Deep Cameo proof 1883 Morgan dollars, all certified at the PR66 grade level. Population: 2 in 67 Cameo, 2 finer non-Cameo (9/17). NGC ID# 27YV, PCGS# 87318

1884 Morgan Dollar
Premium Gem Cameo Proof

16868 1884 PR66 Cameo NGC. Deeply reflective, untuned fields surround nicely contrasted motifs of this Premium Gem, brilliant-white proof dollar. A bold strike is especially prominent on the eagle, and Liberty's hair and cap are sharp. Only a few of the 875 proofs struck survive any finer than this glittering example. Census: 12 in 66 Cameo, 14 finer (9/17). NGC ID# 27ZB, PCGS# 87319

1893 Morgan Dollar, PR68 ★ Cameo
Rarely Seen With Sharp Details
One of the Two Finest at NGC

16869 1893 PR68 ★ Cameo NGC. CAC. Ex: Simpson. The Mint produced an unexciting mintage of 792 proof Morgan dollars in 1893, but the issue was one of the more poorly rendered of the proof Morgans. The dies were spaced slightly too far apart in the press, causing numerous coins to show incomplete details on the central high points. The VAM reference calls the 1893 issue “the most poorly struck Morgan proofs.”

The coin offered here is an emphatic exception to this rule, with intricate detail evident on the hair strands above Liberty's ear and sharp definition on the eagle's breast. It would be difficult to find a coin with a better strike, even among the proofs of 1898, which are noted for their high quality. The small circulation-strike mintage of silver dollars from the Philadelphia Mint in 1893 (378,000 pieces) has always put added pressure on the supply of proofs to satisfy demand from quality-conscious collectors.

Pedigreed to Simpson, this piece was last seen at auction more than five years ago. Over the past two decades, only a handful of Cameos in this grade have ever appeared at auction, indicating an extremely short supply and feverish collector demand. Any proof 1893 Morgan dollar grading PR67 or better is a notable rarity, although the population of Cameo and Ultra/Deep Cameos in the top grades of PR68 and PR69 is strikingly small. The two finest pieces at NGC are this PR68 ★ Cameo and an Ultra Cameo in the same numeric grade; PCGS lists a coin each in PR68 Cameo and PR69 Cameo, with two Deep Cameos in the same numeric grades (9/17). At least two of these pieces are out of reach in high-ranking PCGS and NGC Registry Sets. We would not be surprised to see this piece added to the NGC Registry.

Extraordinarily colorful toning on both the obverse and reverse undoubtedly resulted in the Star designation on this eye-catching top-grade Cameo. The strong russet hues near Liberty's ear fade into a ring of blue and lighter yellow on her head, then transition to darker russet, sea-green and rose closer to the rim. The reverse is perfectly matched and equally colorful. As if this artist's palette wasn't enough, the surfaces of this coin are stunning and superbly preserved as well, with no trace of handling. If you demand vibrantly toned coins, then here is one to examine and add to an advanced collection.

Ex: ANA Signature (Heritage, 7/2005), lot 10299; Long Beach Signature (Heritage, 5-6/2012), lot 4457. NGC ID# 27ZN, PCGS# 87328

**1898 Morgan Dollar, PR67 Deep Cameo
A High-End Condition Rarity**

16870 1898 PR67 Deep Cameo PCGS. Proof 1898 Morgan dollars were struck largely in February and March, as well as again in December for the Christmas holiday season, with other small deliveries in June and September. The quality of the coins was high, and the 1898 proof has a reputation for strong strikes and good contrast. Nonetheless, Deep Cameos are conditionally rare in PR67 or better grades. This example is brilliant and starkly contrasted with a razor-sharp strike. A few wisps of milky patina are seen in the fields but do not detract. Population: 16 in 67 (2 in 67+) Deep Cameo, 3 finer (9/17). NGC ID# 27ZW, PCGS# 97333

**1900 Dollar, PR64+ Cameo
Scarcer Issue With Contrast**

16871 1900 PR64+ Cameo PCGS. The sale of 912 proof sets in 1900 translates to perhaps 450 to 500 well-preserved proof dollars that survive today. Of those, only about 20% display Cameo or Deep Cameo surfaces. This Plus-graded Choice example has a smoothly frosted portrait and even stronger contrast on the reverse. Lightly toned in even, translucent gold hues, the silver-mirrored surfaces show only a few light lines and a thin crescent of tiny grazes in the left obverse field. The eye appeal is excellent. Population: 23 in 64 (3 in 64+) Cameo, 28 finer (9/17). NGC ID# 3MNH, PCGS# 87335

**1902 Morgan Dollar, PR65
Only 777 Pieces Struck**

16872 1902 PR65 PCGS. A modest mintage of 777 proof Morgan dollars was accomplished in 1902, using a new, all-brilliant finish. This impressive Gem exhibits deeply mirrored surfaces, with highlights of sea-green and violet toning. Only a few minor hair lines are evident, but the design elements show a touch of softness on the hair above the ear and eagle's breast. NGC ID# 2822, PCGS# 7337

PEACE DOLLARS

**1924-S Peace Dollar, MS65
Important Condition Rarity**

16873 1924-S MS65 PCGS. CAC. Of the thousands of 1924-S Peace dollars, few have received the MS65 grade, and finer pieces are nearly impossible to acquire. This splendid Gem exhibits satiny silver luster with splashes of peripheral gold toning on each side. Population: 99 in 65 (8 in 65+), 5 finer. CAC: 21 in 65, 2 finer (9/17). NGC ID# 257K, PCGS# 7364

**1925 Peace Dollar, MS67+
Only One Coin Finer at NGC**

16874 1925 MS67+ NGC. CAC. The 1925 is among the most plentiful Peace dollar issues, making it ideal for the collector seeking a high-end type coin. Nonetheless, Superb Gems are scarce, and pieces grading finer than the present example are prohibitively rare. This representative is sharp and brilliant with vibrant, frosty mint luster. A lack of distracting abrasions promotes strong eye appeal. Census: 91 in 67 (3 in 67+, 1 in 67 ★), 1 finer. CAC: 42 in 67, 0 finer (8/17). NGC ID# 257L, PCGS# 7365

**1927 Peace Dollar, MS65+
Conditionally Elusive**

16875 1927 MS65+ PCGS. Less than 5% of all 1927 Peace dollars that PCGS has graded MS65 have earned the Plus designation, and that service has graded just 16 numerically finer submissions (9/17). This brilliant and untuned Gem features a bold strike and frosty silver luster with outstanding eye appeal. NGC ID# 257S, PCGS# 7370

**1934-S Peace Dollar, MS64
Famed Condition Rarity**

16876 1934-S MS64 PCGS. This famed condition rarity in the Peace dollar series claims a mintage barely in excess of 1 million coins. With an average certified grade just shy of AU50, the 1934-S is scarcely seen in Choice Uncirculated condition, and Gems are far beyond the reach of most collectors. Radiant luster cascades over all-brilliant surfaces. Minor chatter is minimally distracting, and the only noteworthy mark occurs on the O in DOLLAR. Typically struck. NGC ID# 257Z, PCGS# 7377

**1934-S Peace Dollar, MS64
Important Key Date**

16877 1934-S MS64 PCGS. CAC. The 1934-S Peace dollar is the most challenging issue of the series in high grade. The mintage was fairly small and few examples were saved by contemporary collectors. This attractive near-Gem representative is sharply detailed with especially vibrant mint luster and ample eye appeal. Ex: *Central States Signature* (Heritage, 4/2013), lot 5098. NGC ID# 257Z, PCGS# 7377

**1934-S Peace Dollar, MS64
Challenging Issue in High Grade**

16878 1934-S MS64 PCGS. CAC. The 1934-S Peace dollar claims a mintage of just over 1 million pieces, and the issue is quite elusive in grades above the MS64 level. This impressive Choice specimen exhibits sharply detailed design elements and well-preserved, lustrous surfaces, with subtle highlights of golden-tan toning. Overall eye appeal is outstanding. NGC ID# 257Z, PCGS# 7377

**1935 Peace Dollar, MS66+
Tied for the Finest at PCGS**

16879 1935 MS66+ PCGS. CAC. This piece is tied for the finest that PCGS has graded (9/17), and is one of just 40 examples that have earned the Plus designation from that service. It is an outstanding candidate for the Set Registry collector. Both sides of this frosty Premium Gem are highly lustrous and untuned, featuring exquisite design definition. We are looking forward to strong bidder activity when this piece crosses the auction block. NGC ID# 2582, PCGS# 7378

SACAGAWEA DOLLAR

2000-P 'Cheerios' Dollar, MS68
Among the Finest at PCGS

16880 2000-P Cheerios, FS-902, MS68 PCGS. This is the highly sought-after so-called "Cheerios" variety of the 2000-P Sacagawea dollar, which famously shows ribbed tailfeathers on the eagle, whereas the majority of the 2000-P issues exhibit smooth, plain tailfeathers. This variety appears to have only been distributed through the Cheerios cereal box program, intended to celebrate the new millennium. The example here offers brilliant golden luster and satiny, semireflective surfaces. No abrasions are seen. Also comes with a 2000 "Cheerios" cent, MS65 Red PCGS, and the original cereal box blister-pack and COA. Population: 39 in 68, 0 finer (9/17). (Total: 2 coins) NGC ID# 282J, PCGS# 147231 Base PCGS# 411990

GOLD DOLLARS

1853-O Type One Gold Dollar, MS65
Conditionally Rare New Orleans Issue

16881 1853-O MS65 NGC. Variety 1. High Date. New Orleans gold dollar output reached 290,000 coins in 1853. Mint State examples are collectible through MS63 and even MS64, but Gems are true condition rarities. This delightfully frosty, rose-gold example features full strike definition throughout the obverse. The reverse, too, is strongly defined. Bold clashing occurs in the fields on that side. Beautifully preserved. Census: 8 in 65, 2 finer (8/17). NGC ID# 25BX, PCGS# 7524

1855 Type Two Gold Dollar, MS63
Brief Three-Year Design

16882 1855 Type Two MS63 PCGS. While gold dollars filled an important need in commerce and were struck in large numbers throughout the 1850s by the Philadelphia Mint, the small size and was a never-ending source of headaches at the Mint, which struggled with clashed dies and metal flow problems. No less than three major design types were introduced during the decade, with many other minor adjustments and revised dies. This attractive Select Uncirculated example is from the short-lived Type Two design, with a small head of Liberty in its Indian Princess form. Frosted gold luster radiates from the well-struck surfaces. Die clashing and slight weakness at 85 in the date are noted, hallmarks of the design. NGC ID# 25C4, PCGS# 7532

1866 Gold Dollar, MS65, Conditionally Scarce

16883 1866 MS65 PCGS. Coming from a mintage of only 7,100 pieces, the 1866 gold dollar is a scarce and seldom seen issue in Mint State. Gem and finer examples are rare. This MS65 coin displays a sharp strike and satiny luster. Rich yellow-gold surfaces feature clash marks and die polishing lines, as normal for gold dollars of this period. Population: 10 in 65, 19 finer (9/17). NGC ID# 25D2, PCGS# 7565

PROOF GOLD DOLLAR

1888 Gold Dollar, PR65 Cameo
Ex: Byron Reed Collection

16884 1888 PR65 Cameo NGC. Ex: Reed. During the last six years of gold dollar production, the Philadelphia Mint ramped up the coinage of proof examples to more than 1,000 pieces each year, including 1,079 proofs in 1888. Many of these were sold to jewelers and they were often presented to family members as Christmas presents. This impressive piece has bold field-to-device contrast with sharp design motifs and fully mirrored yellow-gold fields. Census: 13 in 65 Cameo (1 in 65+), 28 finer, including eight Ultra Cameo examples (9/17).

Ex: Byron Reed Collection (Christies/Spink America, 10/1996), lot 425. NGC ID# 25EY, PCGS# 87638

EARLY QUARTER EAGLES

1825 Quarter Eagle, AU Details
BD-2, Well-Struck Type Coin

16885 1825 BD-2, High R.4 — Scratched — PCGS Genuine. AU Details. Bass-Dannreuther Die State a/a, with no discernible cracks or die bulges. BD-2 is the only one of the three 1825 quarter eagle varieties that is considered readily collectible, although even this issue is scarce with only 80 to 100 pieces believed known. The present example shows a diagonal scratch across the reverse from 11 to 5 o'clock, and the bright yellow-gold surfaces exhibit characteristics of cleaning. Scattered abrasions are otherwise typical of the issue and grade, and the design elements show good definition.

1832 Quarter Eagle, AU Details
BD-1, Sharp Details

16886 1832 BD-1, R.4 — Cleaned — PCGS Genuine. AU Details. Bass-Dannreuther Die State a/a. Sharp stars complement a bold Liberty portrait, although the reverse shows minor weakness along the left edge of the shield. This well-struck, yellow-gold type coin is quite attractive for a Details-graded coin, despite scattered hairlines that indicate a light cleaning. Both sides are bright and satiny. Only a single variety is known for this issue, and there are likely fewer than 100 pieces extant.

CLASSIC QUARTER EAGLES

1834 Classic Head Quarter Eagle, MS62
Collectible Inaugural-Year Issue

16887 1834 MS62 NGC. Breen-6138, Variety 1, R.1. Small Head. The 1834 Classic Head quarter eagle is far more available than its Capped Bust counterpart struck earlier in 1834. The new series saw a reduction in both weight and fineness to counteract the effects of rising gold prices. Orange-gold surfaces are well-struck throughout. Softly glowing luster radiates from each side. Wispy marks define the grade. NGC ID# 25FS, PCGS# 7692

1838-C Quarter Eagle, AU55
First Year of Charlotte Coinage

16888 1838-C AU55 PCGS. Variety 20, R.3. The only known die pair for the 1838-dated Charlotte quarter eagles, used to coin a total of 7,880 pieces. This piece represents the first year of U.S. Mint operations at Charlotte, North Carolina, and the first of just two Classic Head quarter eagles struck at that facility. This sharply struck green-gold example has trivial marks on each side that are consistent with the grade. The C-mintmark on the obverse is doubled. NGC ID# 25FZ, PCGS# 7697

1839-C Quarter Eagle, Unc Details
Variety 24, Early Die State

16889 1839-C — Improperly Cleaned — NGC Details. Unc. Breen-6149, Winter-3, Variety 24, R.4. This earlier die state shows a full branch and berry on the lower reverse, and is quite scarce as most examples seen were struck from heavily lapped dies. The 1839 is the second of only two Classic quarter eagles struck in the Charlotte mint. An estimated 300-400 examples are believed known today out of a mintage of 18,140 pieces. Only a small handful of survivors are known in Uncirculated. The surfaces are understandably bright from cleaning, and there are numerous small abrasions scattered over each side. Well struck throughout.

LIBERTY QUARTER EAGLES

1840-O Quarter Eagle, AU58
First New Orleans Issue in the Set

16890 1840-O AU58 NGC. Variety 1. The Large Mintmark variety is the more available variant, contrary to both Winter and Breen. In 2006, the former suggested 100 to 125 pieces survived in all grades, including 18-22 pieces in AU. Exactly 200 pieces have been graded by NGC and PCGS combined, so that estimate may be slightly low. This inaugural O-mint Liberty quarter eagle has bright yellow-gold surfaces and is fairly sharp for the facility. Wispy abrasions appear over each side. Census: 24 in 58, 14 finer (9/17). NGC ID# 54TU, PCGS# 7720

1848 CAL. Quarter Eagle, XF Details
Historic Gold Rush Memento

16891 1848 CAL. Quarter Eagle — Improperly Cleaned — NGC Details. XF. Other than war and financial panic/recession, no event in the history of the United States has inspired the socio-economic upheaval that the discovery of gold in California precipitated. In a roundabout way, the CAL. quarter eagles commemorate not just the importance of the discovery, but also the early recognition of how the fabric of life in the country might change, and the number of lives that would quickly unravel and need mending.

Military governor of California Colonel R. B. Mason was quick to realize the scope and significance of the gold find at Sutter's Mill. By sending 230 ounces of gold to the War Office in Washington City in 1848, he provided tangible evidence and a detailed report of the dire effect that the rush for riches had already caused in California. The simple counterstamp applied to 1,389 quarter eagles confirmed national awareness of the stunning event and the powerful allure of gold. Perhaps as few as 75 CAL. quarter eagles survive from the small mintage. This bright example of Sutter's Mill gold shows signs of light cleaning with moderate wear and a few small marks. NGC ID# 25HA, PCGS# 7749

1852-C Two and a Half, MS61
A Rarity in Uncirculated Condition

16892 1852-C MS61 PCGS. Variety 1. Fewer than 165 1852-C quarter eagles are extant, according to specialist Doug Winter, and Mint State pieces are “excessively rare.” PCGS reports eight Uncirculated examples, including possible resubmissions (8/17). This MS61 coin is only the second Uncirculated piece we have handled in the past five years. Recently, a PCGS coin in this grade garnered nearly \$13,000 (Heritage, 1/2016). The present coin is bright yellow-gold with some subtle reflectivity in the reverse fields. Strike weakness on the eagle’s leg and the left edge of the shield is normal for the issue. Scattered light abrasions determine the grade. Population: 6 in 61, 2 finer (8/17). NGC ID# 25HS, PCGS# 7764

1852-O Quarter Eagle, MS61
Semiprooflike Fields

16893 1852-O MS61 NGC. Variety 2. Mintmark left. A large mintage of 140,000 pieces was issued as the New Orleans Mint concentrated on lower gold denominations in 1851 and 1852, although a substantial number of double eagles were struck in those years as well. Bullion from the California gold fields was abundant and much of it made its way to the Southern facility. O-Mint gold dollars and quarter eagles circulated widely, and few pieces were saved. As a result, the issue is quite scarce in Mint State. This is a flashy Uncirculated example with substantial prooflike character. The strike is uneven at the centers but sharp peripherally. A few delicate lines are scattered about the reflective surfaces. Census: 17 in 61, 11 finer (8/17). NGC ID# 7HX8, PCGS# 7766

1856-S Two and a Half, MS61
Rare in Mint State

16894 1856-S MS61 PCGS. Although more than 72,000 quarter eagles were struck at San Francisco in 1856, this issue was heavily circulated in commerce. Mint State survivors are rare in any grade. This accessible MS61 coin displays a sharp strike and satiny yellow-gold luster with minor field chatter that limits the grade. Thin rim cuds are developing along the upper-left obverse border, and a small planchet defect appears below the eagle’s left (facing) wing. Population: 7 in 61, 15 finer (9/17). NGC ID# 25KL, PCGS# 7781

1878 Two and a Half, MS67
Condition Census Rarity

16895 1878 MS67 NGC. The 1878 quarter eagle is a relatively plentiful date through MS64, but Gems are scarce, and anything finer is a notable rarity. This magnificent Superb Gem is within the Condition Census and displays exemplary eye appeal and frosty, untouched mint luster. Trivial strike softness is seen on the reverse shield and the eagle's left (facing) leg feathers, although no other distractions occur. Rich honey-gold hues adorn each side. Eye appeal is outstanding. We have previously offered only one other 1878 quarter eagle in this grade — a PCGS MS67 that garnered nearly \$13,000 in lot 3275 of our July 2015 Summer FUN Signature sale. The present example is at least as attractive. Census: 3 in 67, 1 finer (9/17). NGC ID# 25KY, PCGS# 7828

PROOF LIBERTY QUARTER EAGLE

1903 Quarter Eagle, PR67 ★
Nearly a Cameo, Pristine and Rare

16896 1903 PR67 ★ NGC. Due to the excessive polishing of proof dies in 1903, proof quarter eagles of this date are extremely rare with a Cameo designation from the grading services, and the finest such pieces are only in PR65. This Superb Gem non-Cameo is within the Condition Census of proof 1903 quarter eagles and it is the only Star-designated piece in this grade. The NGC Star appears to have been awarded for this coin's near-Cameo appearance, which features subtle contrast on the obverse and pronounced contrast on the reverse. The glimmering fields are pristine and offer deep, watery appeal. The strike is razor-sharp. This is arguably the finest 1903 quarter eagle known when eye appeal and technical quality are considered in tandem. Census: 5 in 67 (1 in 67+, 1 in 67 ★), 0 finer (9/17). NGC ID# 288T, PCGS# 7929

INDIAN QUARTER EAGLES

1911-D Indian Quarter Eagle, AU58 Low-Mintage Series Key

16897 1911-D AU58 NGC. The 1911-D Indian quarter eagle is the acknowledged key to the popular series, with a modest mintage of 55,680 pieces. This impressive near-Mint specimen shows just a trace of friction on the high points of the design elements, like the eagle's shoulder. The orange-gold surfaces are still lustrous and lightly abraded. NGC ID# 7KR7, PCGS# 7943

1911-D Two and a Half, MS63 Sharp Strike and Mintmark

16898 1911-D MS63 NGC. The mintmark is sharp on this piece, as are the eagle's wing feathers, neck, and talons; the obverse headdress feathers are similarly well-defined, and a strong knife rim along the right-obverse periphery confirms the authenticity of this key-date coin. Satiny orange-gold luster has a faintly granular texture under magnification, as is the characteristic look of the 1911-D. A lack of severe abrasions makes this piece among the more appealing MS63-graded examples that we have handled. The 1911-D Indian quarter eagle in Mint State is a sought-after issue, but it is collectible in most grades for a price. However, finer than MS63, the date starts to become genuinely elusive. NGC ID# 7KR7, PCGS# 7943

1914 Indian Quarter Eagle, MS64+ Elusive Issue in High Grade

16899 1914 MS64+ PCGS. CAC. The 1914 Indian quarter eagle claims a small mintage of 240,000 pieces, making it one of the most challenging issues of the series, especially in high grade. This Plus-graded Choice specimen offers sharply detailed design elements and lightly marked orange-gold surfaces, with satiny mint luster on both sides. PCGS has graded 66 numerically finer examples (9/17). NGC ID# 7KRA, PCGS# 7946

THREE DOLLAR GOLD PIECES

1854-D Three Dollar Gold, VF35
Only D-Mint Three

16900 1854-D VF35 PCGS. **Variety 1-A.** The 1854-D three dollar gold piece is the only coin of that denomination ever struck at the Dahlonega Mint. From a small production total of just 1,120 pieces, the 1854-D has a fairly high survival rate, perhaps due to the hoarding of precious metal coinage that occurred during the Civil War. The issue was not well-produced and most examples seen have weak striking details and lackluster, heavily abraded surfaces.

The present coin is a Choice VF specimen, with light-to-moderate wear on the well-detailed design elements and lightly abraded surfaces that retain traces of original mint luster. The overall presentation is most attractive. NGC ID# 25M4, PCGS# 7970

1860-S Three Dollar Gold, AU53
Low-Mintage Branch Mint Issue

16901 1860-S AU53 NGC. Only 7,000 three dollar gold pieces were struck at the San Francisco Mint in 1860, and few examples were saved by contemporary collectors, making the issue elusive in all grades today. This attractive AU53 specimen shows just a trace of wear on the well-detailed design elements and the lustrous yellow-gold surfaces are lightly abraded. Census: 13 in 53, 40 finer (9/17). NGC ID# 7K5M, PCGS# 7981

1861 Three Dollar, AU55
Pale Reddish-Tinted Surfaces

16902 1861 AU55 NGC. The 1861 is a popular early issue in the three dollar series, and it is one that is occasionally available in AU condition. Only 5,959 pieces were struck, and the entire mintage was struck from a single die pairing (although three die pairs were available in case a larger mintage was needed). Faint glimmers of initial die polish can still be seen in the fields. Each side is moderately abraded and the strike details are well brought up overall. NGC ID# 7K5N, PCGS# 7982

1862 Three Dollar Gold, AU55
Small-Production Total

16903 1862 AU55 PCGS. The mintage of three dollar gold pieces fell to 5,750 pieces in 1862, and continued to slide even further in the ensuing years. This Choice AU specimen exhibits only light wear on the well-detailed design elements, and the orange-gold surfaces are lightly abraded, with traces of original mint luster on both sides. Population: 33 in 55, 79 finer (9/17). NGC ID# 7K5P, PCGS# 7983

**1864 Three Dollar Gold, AU55
Lightly Worn and Lightly Abraded**

16904 1864 AU55 NGC. The 1864 three dollar gold piece claims a typically low wartime mintage of 2,600 pieces and the issue is very scarce in high grade. This attractive Choice AU specimen shows just a touch of wear on the well-detailed design elements, and the pleasing apricot-gold surfaces are lightly abraded, with traces of mint luster on both sides. NGC ID# 7HSK, PCGS# 7985

**1874 Gold Three Dollar, MS64
High-Grade Type Coin**

16905 1874 MS64 PCGS. CAC. The 1874 is one of the three big type coins of the three dollar gold series, although its ready availability vanishes at the Gem grade level. This Choice example balances quality and affordability in a lustrous, sharp, and minimally marked CAC-approved package. Only under a loupe does one first notice a few tiny marks along the upper reverse border and some minor weakness on the wreath bowknot. PCGS lists 22 numerically finer representatives (9/17). NGC ID# 7KDE, PCGS# 7998

**1874 Three Dollar Gold, MS63 Prooflike
Deeply Reflective Fields**

16906 1874 MS63 Prooflike NGC. Although some degree of field reflectivity is normal for many three dollar gold issues, relatively few 1874 coins are designated Prooflike by NGC. This Select coin is tied with one other as the finest of 33 Prooflike pieces at that service (9/17). The devices are well-struck, and the grade reflects only light handling marks on the obverse. Bright yellow-gold luster adorns each side. NGC ID# 25MX, PCGS# 77998

1879 Three Dollar, MS64, Smooth, Semireflective Fields

16907 1879 MS64 PCGS. After a temporary period of mass production in 1878, output returned to normal in 1879, when only 3,000 coins were struck. Comparable examples are scarcely seen, and finer coins in Gem condition or better are truly rare. This smooth yellow-gold offering is strongly struck on the curls and wreath. Lustrous with a hint of semiprooflike reflectivity in the fields. NGC ID# 25N2, PCGS# 8001

**1879 Three Dollar Gold, MS65+
Conditionally Elusive, Semiprooflike Fields**

16908 1879 MS65+ NGC. Almost all Mint State 1879 three dollar gold pieces exhibit light or moderate abrasions, grading no finer than MS64. Gems are scarce, and higher-grade pieces are genuine rarities. Since 1993, we have offered an MS65 coin on only 19 different occasions, suggesting that there is some duplication in the certified population totals. The 1879 is several times scarcer in MS65 than the commonly seen 1878.

This Gem is the first Plus-graded coin in this grade that we have handled. It is impressively well-struck, particularly on the wreath bowknot and the headdress. The yellow-gold surfaces are devoid of major abrasions and show semiprooflike reflectivity in the fields. A few faint grazes left of Liberty's profile are all that deny a full Premium Gem grade. Census: 23 in 65 (3 in 65+, 3 in 65 ★), 3 finer (8/17). NGC ID# 25N2, PCGS# 8001

1889 Three Dollar, MS64+
Only 2,300 Pieces Minted

16909 1889 MS64+ PCGS. Gleaming straw-gold surfaces and rich luster provide this final-year near-Gem with exceptional eye appeal. Closer examination reveals subtle peach and orange hues. A couple of tiny alloy spots appear near 12 o'clock on the reverse. A small mark extends from Liberty's eye to her cheek. A number of tiny as-made strike-throughs are present, almost all of them on the reverse. Population: 66 in 64 (2 in 64+), 45 finer (9/17). Ex: *Central States Signature* (Heritage, 4/2014), lot 6290; *ANA Signature* (Heritage, 8/2014), lot 3847; *Central States Signature* (Heritage, 4/2015), lot 6168. NGC ID# 7KDU, PCGS# 8011

PROOF THREE DOLLAR GOLD PIECE

1885 Three Dollar, Unc Details
Low Total Mintage, 109 Proofs Struck

16910 1885 — *Altered Surfaces* — PCGS Genuine. Unc Details. With only 801 circulation strikes and 109 proofs manufactured in 1885, this is one of the keys to the three dollar gold series in any format. Bowers and Winter estimated in 2005 that 75 to 90 proofs were extant in all grades. That range remains viable today, though the actual number could be closer to 100 pieces.. Deeply reflective orange-gold surfaces are somewhat unnatural, appearing to have been puttied to reduce the appearance of field marks.

EARLY HALF EAGLES

1798 BD-5 Half Eagle, Choice VF
Large 8, 13 Stars Reverse

16911 1798 Large Eagle, Large 8, 13 Stars Reverse, BD-5, High R.5, VF35 PCGS. Bass-Dannreuther c/b. Diagnostic markers for BD-5 include a Large 8, star 8 close to the cap, and star 9 pointing to the upper serif of the Y. This late die state example features a die crack from star 7 through the curls and portrait to the 8. Red-gold surfaces are choice for the grade. Strong portrait, feather, and shield detail remains despite a combination of circulation, lapping, and shallow hubbing. John Dannreuther estimates that 30 to 40 BD-5 half eagles survive. A coin strongly worth considering for the specialist. NGC ID# BFX6, PCGS# 507325 Base PCGS# 8078

1800 BD-2 Half Eagle, AU53
Excellent Early Gold Type

16912 1800 BD-2, High R.3, AU53 PCGS. CAC. Bass-Dannreuther Die State c/d. Blunt 1 in date. A trio of tiny die cracks confirm the die state — a faint one between I and B of LIBERTY, and two others that bridge the short span from either edge to each nearby wing tip. BD-2 was a remarkably resilient die marriage for an early half eagle, striking approximately half of the entire 1800 mintage. It represents the most-available half eagle of its type, with more than 200 survivors.

The attractive About Uncirculated surfaces display honey-gold color and hints of luster at the margins. Light wear on the central motifs and a few small abrasions are incidental to the excellent overall eye appeal. No early half eagle is readily available, but the 1800 B-2 is a logical selection for type purposes. This one is CAC endorsed. NGC ID# 25NW, PCGS# 45592 Base PCGS# 8082

1802/1 BD-2 Half Eagle, AU55
Centered Overdate
Lustrous and CAC-Endorsed

16913 1802/1 BD-2, High R.4, AU55 PCGS. CAC. Bass-Dannreuther Die State c/c, but in the very earliest stages before the cud develops above OF. This is an especially pleasing, satiny example that is very well struck with subtle reddish accents. Clustered on the left side of the eagle's shield are a few short adjustment marks that are only visible with the coin held at a 90 degree rotation under a light. Some circular lathe lines are also visible within the recesses of the shield. The coin is evenly struck with minor weakness where the eagle's wings join the shield edges. Little high-point wear is present, and much luster remains. The 1802 has always been a favorite of early gold collectors because of its distinctive overdate feature and its availability in a wide range of grades. Fewer than 100 BD-2 coins are believed known.

Ex: FUN Signature (Heritage, 1/2007), lot 5774. PCGS# 519885 Base PCGS# 8083

1803/2 BD-4 Half Eagle, MS62
Popular Overdate Variety

16914 1803/2 BD-4, R.4, MS62 NGC. Bass-Dannreuther Die State c/c, with a prominent crack through the base of the date that extends left to star 1. Once thought to me a major rarity, this variety is now considered the second most plentiful of the year, and it is an ideal choice for date or type collectors. Two different overdate obverse dies are known for the 1803/2 half eagles, combined with three reverse dies to create four varieties. The bright lemon-yellow surfaces of this example are fully lustrous with minimal marks. Census for all 1803/2 varieties: 47 in 62, 52 finer (9/17). NGC ID# 25NY, PCGS# 504951 Base PCGS# 8084

1806 Capped Bust Right Half Eagle, AU55
Knob 6, 7x6 Stars, BD-6

16915 1806 Knob 6, 7x6 Stars, BD-6, R.2, AU55 NGC. Bass-Dannreuther Die State d/e. The only Knob 6 variety. From a late state of the dies, this coin shows clash marks on the reverse and a rust lump on the upright of the R in LIBERTY. The design elements are well-detailed and lightly worn and the lightly abraded orange-gold surfaces retain traces of original mint luster. NGC ID# BFXJ, PCGS# 45620 Base PCGS# 8089

1809/8 Half Eagle, AU53
BD-1, Sought-After 'Overdate'

16916 1809/8 BD-1, High R.3, AU53 PCGS. Bass-Dannreuther Die State a/b. Struck from an early die stage, with no die cracks visible and only faint die clashing on the reverse beneath the scroll and above the eagle's outstretched left (facing) wing. The so-called underdigit 8 may actually be a misplaced 9. A single die marriage produced the entire 33,875 piece mintage of 1809 half eagles. This is an attractive About Uncirculated BD-1 example with natural olive-gray accents in protected areas. Glimpses of orange luster peek through the patina. Sharply defined and minimally abraded, the coin shows only a slight flattening of the wire rim at 3 o'clock on the obverse, but no marks of any size. NGC ID# BFXK, PCGS# 507603 Base PCGS# 8104

1810 Large Date Half Eagle, AU58
BD-4, Large 5

16917 1810 Large Date, Large 5, BD-4, R.2, AU58 NGC. Bass-Dannreuther Die State a/a, uncracked. Parallel planchet roller marks are visible on the elevated reverse dentils but are struck out of the fields. The impression is even and sharp, and only light high-point friction is discernible across the design elements. Luster remains in the fields, and the surfaces display original olive-gold color. BD-4 is a plentiful 1810 half eagle variety, suitable for date or type purposes. NGC ID# BFXP, PCGS# 507598 Base PCGS# 8108

1810 BD-4 Half Eagle, Unc Details
Popular Type Issue

16918 1810 Large Date, Large 5, BD-4, R.2 — Obverse Improperly Cleaned — NGC Details. Unc. The 1810 Large Date, Large 5 half eagle is a plentiful variety that is available in all grades, including Mint State, and for that reason it is often chosen for type collections. This piece retains full luster with hairlines from cleaning that are visible on the obverse. The reverse is frosty and lustrous with only a few trivial marks.

1810 Half Eagle, BD-4, MS63
Remarkably Eye-Appealing Type Coin

16919 1810 Large Date, Large 5, BD-4, R.2, MS63 PCGS. Bass-Dannreuther Die State a/a. This is one of the few early half eagle varieties that can be considered available; more than 500 examples are believed to survive in all grades, which makes BD-4 an ideal choice for the collector seeking a single type or date representative. The present piece is a scarce Mint State example, however, and is a highly attractive piece, as well. The stars and central devices are boldly impressed and the surfaces exhibit remarkably frosty luster in medium green-gold hues. Some minor luster grazes on the cheek seem to be all that preclude an even finer grade on this truly eye-appealing type coin. Population: 59 in 63 (3 in 63+), 39 finer (8/17).

Ex: Long Beach Signature (Heritage, 1/2015), lot 3268. NGC ID# BFXP, PCGS# 507598 Base PCGS# 8108

1811 Half Eagle, Choice AU
Attractive Tall 5, BD-1 Example

16920 1811 Tall 5, BD-1, High R.3, AU55 NGC. Bass-Dannreuther Die State b/d. Pleasing olive-gold surfaces show glimpses of orange at the stars and legends. The lowest feather tip is well to the right of the Tall 5 flag on the reverse. Minor die clashing from the shield is visible beneath the ear on this Choice coin, which represents a middle die state. In a later stages, heavy die clashing above the date signifies the latest state of the dies. Somewhere between 175 and 250 pieces exist of the Tall 5 type. Census: 3 in 55, 41 finer (9/17). NGC ID# BFXS, PCGS# 507600 Base PCGS# 8110

1811 Small 5 Half Eagle, MS61
BD-2, High-End for Grade

1813 Half Eagle, BD-1, MS62
Frosty, Original Surfaces, CAC Endorsed

16921 1811 Small 5, BD-2, R.3, MS61 NGC. The 1811 Small 5 half eagle shares a mintage of 98,851 pieces with the other variety of this date, the Tall 5. The Small 5 is slightly more common and ranks as one of the most available Capped Bust Left half eagles, and it is recommended for inclusion in a complete type set. The characteristic Small 5 numeral punch was previously used on two rare half eagle varieties in 1810 (BD-2, BD-3) and continued to be used in 1812 (BD-1, BD-2).

This Mint State coin will attract the attention of type collectors and early half eagle specialists alike. The coin is high-end for the assigned grade, with only light field chatter visible on both sides but no singularly mentionable abrasions. Tiny adjustment marks are noted at the obverse rim above stars 6 and 7, scarcely visible without a glass.

Ex: Long Beach Signature (Heritage, 9/2008), lot 3603, where it sold for \$12,075. NGC ID# BFXR, PCGS# 507599 Base PCGS# 8109

16922 1813 BD-1, R.2, MS62 NGC. CAC. Bass-Dannreuther Die State a/a. The 1813 half eagle is the only representative of the Capped Bust series that exists in numbers that are somewhat available to collectors. Struck in bold relief, this lustrous and frosted Mint State example displays attractive, greenish-gold surfaces. The strike is sharp including the problematic left-hand stars, which sometimes come weak.

Just two die pairs were required to strike a total of 95,428 pieces. BD-1 outnumbered its BD-2 counterpart by approximately 3 to 1. A survival of perhaps 450 to 650 pieces makes BD-1 the logical choice for type and, as such, it is always in demand. Uncirculated coins are scarce but available. Census: 56 in 62 (1 in 62+), 60 finer. CAC: 14 in 62, 28 finer (9/17). NGC ID# 25PM, PCGS# 519907 Base PCGS# 8116

1813 BD-1 Half Eagle, MS64
Challenging Type, Rarely Finer

1813 BD-2 Half Eagle, AU58
Lustrous and Appealing

16923 1813 BD-1, R.2, MS64 NGC. Bass-Dannreuther Die State b/b. While the Capped Head To Left design technically carries on from 1813 through 1834, substantial changes were made along the way. Large Diameter coins were issued through 1829, and reduced diameter coins were struck 1829-1834 with smaller letters, dates, and stars. The earliest Capped Head fives were struck in Bold Relief, but only in 1813-1815.

This first-year-of-issue 1813 example is a splendid near-Gem representative of the Large Diameter, Bold Relief design. Flashy sun-gold surfaces display vibrant and frosted cartwheel mint luster across deeply struck motifs. The stars are needle-sharp. Die clashing shows within the recesses of LIBERTY and among the shield stripes to confirm a late state of the dies, now lapped. In general, the Capped Head type is many times scarcer than half eagles dated 1812 and prior. The 1813 is the only date of the type that is somewhat available in high Uncirculated grades — in fact, most other dates through 1829 are exceedingly rare regardless of grade — making it essential for an advanced type set. It will require an extraordinary coin indeed to exceed the eye appeal and technical quality of this outstanding example. Census: 19 in 64, 5 finer (8/17). NGC ID# 25PM, PCGS# 519907 Base PCGS# 8116

16924 1813 BD-2, R.4, AU58 PCGS. Bass-Dannreuther Die State d/b, clashed and lightly cracked on both sides. BD-2 is the scarcer of the two 1813 half eagle varieties, although it is still a collectible type coin in AU condition. This near-Mint representative offers a bold, even strike with complete border dentils and good definition of the eagle's left (facing) wing. Much luster remains in the fields amid original olive-gold patina, and the design elements exhibit only slight high-point friction. BD-1 and BD-2 share a common obverse die; the reverses are most easily differentiated by studying the placement of the first S in STATES in relation to the E P below. NGC ID# 25PM, PCGS# 45648 Base PCGS# 8116

1820 Square Base 2 Five, BD-2
Lustrous and Sharply Struck MS62

16925 1820 Square Base 2, Large Letters, BD-2, High R.5, MS62 NGC. The tipoff to this die variety, other than the Square Base 2 in the date, is the T in STATES lower than the E adjacent, marking this as the rare (20-25 pieces known) BD-2 pairing. There are four varieties of 1820 half eagle with Square Base 2, all Large Letters, and all are rare to extremely rare. For that matter, the five Curl Base 1820 half eagle die pairings (which come with Small Letters or Large Letters reverses) are rare to extremely rare as well.

John Dannreuther writes: "... as a date, it appears that 1820-dated coins are fairly available, and they are, but with examples spread among nine varieties, the individual pairings, except BD-2, BD-3, and BD-5, are either very rare or exceedingly rare!" This MS62 example of the BD-2 boasts generous luster and excellent eye appeal over lightly marked surfaces that show some darker copper-orange accents in the fields. The strike is excellent. Census: 8 in 62, 30 finer (8/17).

Ex: *Central States Signature* (Heritage, 4/2013), lot 4516. PCGS# 519921 Base PCGS# 8125

CLASSIC HALF EAGLES

1836 Half Eagle, Honey-Gold MS63
McCloskey 4-D, Bold Impression

16926 1836 MS63 PCGS. Breen-6509, McCloskey 4-D, R.2. Second Head, Large Date. Star 13 is relatively close to the curl, the date features a Block 8, (UNIT)ED is closely spaced, and the arrowhead is away from the last A in AMERICA. With a mintage of 553,147 coins (second-highest total in the series), the 1836 Classic Head half eagle is a popular target for type purposes. However, most collectors settle for a high-end XF or AU representative. Mint State examples are very scarce and usually found in MS61 or MS62.

This Select offering radiates frosty luster over warm honey-gold surfaces, generating a degree of eye appeal that exceeds expectations for the grade. Each side features a strong impression and minor marks, but the only mentionable imperfections are two thin pinscratches in the right obverse field. Population: 14 in 63, 20 finer (9/17). NGC ID# 25RY, PCGS# 8174

1838-C Classic Head Five, XF45
Choice One-Year Type Coin

- 16927** 1838-C Breen-6517, Normal 5, Variety 1, R.4, XF45 NGC. The Classic Head five is a one-year type and, by definition, a first-year-of-issue coin. As such, it is revered by branch mint gold and type collectors alike. A combination of factors make it difficult to find the 1838-C in higher grades: Central strike weakness, lapped dies, and numerous abrasions all contribute to the lack of Choice specimens. This lustrous, green-gold example shows some unavoidable deficiencies of strike, but it retains much of its luster and eye appeal. Abrasions, although frequent, are relatively minor. Doug Winter suggests 200 to 250 pieces survive. Census: 32 in 45, 39 finer (9/17). NGC ID# 25S5, PCGS# 8177

LIBERTY HALF EAGLES

1840-C Half Eagle, Bright AU55

- 16928** 1840-C AU55 PCGS. Variety 2. Bold die lines on each side of the eagle's legs attribute the variety. The bright yellow-gold surfaces of this Choice AU example display mint luster in the recessed areas. Aside from the usual softness on the eagle's left (facing) leg and the arrow feather, the design elements are well impressed. A shallow scrape under Liberty's chin will help to identify the coin. Population: 11 in 55, 17 finer (9/17).
Ex: FUN Signature (Heritage, 1/2014), lot 6629. NGC ID# 25VD, PCGS# 8196

1844-C Half Eagle, AU53
Late Die State

- 16929** 1844-C AU53 PCGS. Variety 1. This is the only die pair identified for the production of 23,631 half eagles at the Charlotte Mint in 1844. This example is a late die state with a prominent crack through the first A in AMERICA to the right facing wing, a second crack from the border at 10:30 to the left facing wing, and a third from the eagle's neck through the crossbars to the left shield border. A lovely example despite myriad trivial marks, this half eagle examples brilliant yellow surfaces with splashes of orange toning and considerable luster. Population: 12 in 53, 21 finer (9/17). NGC ID# 25T8, PCGS# 8220

1854-C Liberty Half Eagle, AU58
Weak Mintmark, Variety 2

- 16930** 1854-C Weak C, Variety 2, AU58 PCGS. This is a much scarcer date than expected, with a relatively higher mintage of 39,283 pieces. Although the Charlotte mintmark is faint, it is fully outlined. The mintmark was evenly but lightly impressed into the die, and all C-mint half eagles struck from this reverse die have this feature. The present piece has a reasonable strike considering the mint of origin. The fields are impressively void of marks, although a few shallow mint-made strike-throughs are present. Population: 8 in 58, 6 finer (9/17).
Ex: Dallas Signature (Heritage, 10/2006), lot 2769; FUN Signature (Heritage, 1/2008), lot 4253; FUN Signature (Heritage, 1/2009), lot 5423. NGC ID# 25UJ, PCGS# 98257 Base PCGS# 8257

1870-S Half Eagle, AU53
Scarce in All Grades

16931 1870-S AU53 PCGS. The 1870-S half eagle is scarce in all grades — most estimates agree that fewer than 100 pieces are likely extant; none are reported in Mint State. The 17,000-coin mintage circulated extensively, and today AU coins are rare and represent the finest pieces available. This coin is well-detailed with glimpses of prooflike reflectivity in the protected regions of the fields. Original orange-gold surfaces yield hints of deeper rose in the recesses. A few scattered marks are consistent with the grade. Population: 5 in 53, 14 finer (9/17). NGC ID# 25WB, PCGS# 8321

1872-CC Liberty Five, VF35
Ideal Collector Coin, CAC-Endorsed

16932 1872-CC VF35 NGC. CAC. Variety 1-B. Natural, olive-gold patina and smooth, minimally abraded surfaces set this Choice VF half eagle apart from other circulated Carson City fives. Bits of orange toning around the well-defined devices with a few areas of deep build-up adds to the original appearance of this moderately worn, CAC-endorsed piece. Doug Winter estimates a surviving population of between 70 and 80 examples in all grades from the low mintage of 16,980 pieces. Census: 5 in 35, 38 finer. CAC: 1 in 35, 14 finer (9/17). NGC ID# 25WG, PCGS# 8326

1891-CC Five Dollar, MS64
Frosty and Original

16933 1891-CC MS64 PCGS. Variety 2-A. The top of the 1 in the date is faintly recut on this variety. As a date, the 1891-CC half eagle is in high demand as a readily available Carson City gold piece. However, it is conditionally scarce in MS64 and rare finer. This near-Gem offers sharp design definition and frosty, original mint luster. Light, scattered surface ticks determine the grade. A few unobtrusive coppery discolorations are also noted. Population: 87 in 64 (4 in 64+), 2 finer (9/17). NGC ID# 25Y5, PCGS# 8378

1892-CC Five Dollar, MS63
Among the Finest Known

16934 1892-CC MS63 NGC. Variety 1-A. This later die state is characterized by the bottom of the scroll below WE being partially polished away but the mintmark is normal. Sharply defined throughout, the surfaces are original and show attractive orange-gold coloration with minimal abrasions evident. Census: 8 in 63, 3 finer (8/17).
Ex: FUN Signature (Heritage, 1/2003), lot 8656. NGC ID# 25Y7, PCGS# 8380

1893 Half Eagle, MS67
Impeccable Preservation and Strike

16935 1893 MS67 NGC. The 1893 half eagle was struck in a prodigious quantity exceeding 1.5 million coins, and fortunately, there are a few high-grade, well-made survivors today, although not as many as the large mintage would lead one to believe. This Superb Gem displays full mint bloom throughout the orange-gold surfaces on each side, accompanied by an impeccable strike and a complete lack of mentionable distractions. This piece would make an impressive type set candidate. The top three coins in the Condition Census are this example and two MS68 pieces, one each reported by PCGS and NGC (9/17).
Ex: Houston Signature (Heritage, 12/2013), lot 3853. NGC ID# 25YA, PCGS# 8383

1904 Half Eagle, MS66+
Delicate Lavender Accents

16936 1904 MS66+ PCGS. CAC. Frosty luster radiates from each side of this yellow-gold Premium Gem, with delicate splashes of lavender that complement the rich, eye-catching coloration. Well-struck with bold detail on the lower portion of the eagle. The 1904 is readily available through most grades, but not so in MS66. Superb Gems are genuinely rare. Population: 25 in 66 (4 in 66+), 5 finer. CAC: 11 in 66, 4 finer (9/17). NGC ID# 25Z6, PCGS# 8409

1904 Half Eagle, MS67
Beautifully Preserved, Condition Census

16937 1904 MS67 NGC. A highly lustrous and nicely struck apricot-gold Superb Gem, this high-end 1904 Liberty half eagle is both eye-catching and conditionally rare. The obverse is especially clean.

The 1904 Liberty half eagle is an available date, but the certified population declines significantly at the Gem level, and higher-grade coins are genuinely rare. None are graded finer than MS67 at PCGS, and NGC lists only one coin better. NGC and PCGS combined report only 15 grading events of this date in MS67 and finer. The conditional rarity is mainly a result of the incredible quality mandated by the grade, since this date is plentiful in the bagmarked grades of MS64 and lower. The 1904 is one of only a small number of Liberty half eagle issues that can be considered collectible in Superb Gem condition, even if barely. Census: 9 in 67, 1 finer (9/17).

Ex: Long Beach Signature (Heritage, 6/2015), lot 7840. NGC ID# 25Z6, PCGS# 8409

PROOF LIBERTY HALF EAGLE

1902 Liberty Half Eagle, PR62
162 Pieces Struck

16938 1902 PR62 NGC. The Philadelphia Mint switched to an all-brilliant finish for proof coins in 1902, making coins with cameo contrast few and far between. This attractive PR62 example is typical of the new style, with razor-sharp definition on all design elements and deeply reflective fields, but little in the way of field/device contrast. The lemon-yellow surfaces show a few minor hair lines and contact marks, but overall eye appeal is outstanding. From a reported mintage of 162 pieces. Census: 1 in 62, 21 finer, including 9 finer Cameo specimens (9/17). NGC ID# 28D8, PCGS# 8497

INDIAN HALF EAGLES

1909-O Half Eagle, AU55
Partially Lustrous and Attractive

16939 1909-O AU55 NGC. Clear mintmark. Light high-point wear leaves this Choice AU example with elements of original straw-gold luster in the recesses and some areas of the fields. There are no heavy abrasions and detail is bold. This key-date New Orleans issue is occasionally available for a price, although there is never a lack of demand. Recent offerings of AU55 pieces have easily surpassed \$15,000 at auction. This is one of the preferred collecting grades for the issue, as Mint State examples are prohibitively expensive for most Indian half eagle enthusiasts. The present example will fit in well with an otherwise Mint State date and mintmark collection. NGC ID# 25ZK, PCGS# 8515

1911-S Half Eagle, Scarce MS64
Repunched Mintmark

16940 1911-S MS64 PCGS. FS-501, Repunched Mintmark. Auction appearances of the 1911-S half eagle in MS64 or better condition have been few and far between, even in recent years. Two recent offerings of a near-Gem in our auctions, in 2015 and 2016, realized nearly \$13,000 each, indicating sustained collector demand for high-end examples of this date from several years earlier, when an NGC coin in the same grade realized a similar price (\$12,650). This example is satiny and well-struck, showing beautiful orange-gold, lavender, and silvery hues across minimally abraded surfaces. FS-501 shows an errant S mintmark south of the primary S. This interesting Indian gold variety is readily collectible. Population: 27 in 64 (1 in 64+), 8 finer (9/17). NGC ID# 252M, PCGS# 8522

1915 Indian Half Eagle, MS65
Registry Grade Specimen

16941 1915 MS65 PCGS. From a business-strike mintage of 588,000 pieces, the 1915 Indian half eagle is an elusive issue in MS65 condition, and no examples have been certified in higher numeric grades. This attractive Gem offers sharply detailed design elements and well-preserved, lustrous orange-gold surfaces. Population: 60 in 65 (6 in 65+), 0 finer (9/17). NGC ID# 28DX, PCGS# 8530

1929 Half Eagle, Attractive MS64
Few Examples Known Finer

16942 1929 MS64 PCGS. In the 1920s, and in some regions even earlier, gold coinage had largely become absent from circulation, replaced by gold certificates and federal reserve notes after the establishment of the Federal Reserve System in 1913. Continued coinage of physical gold was largely intended as backing for the paper substitute, as well as for trade and circulation in banks. As such, large denomination double eagles were the production of choice. Half eagles were last coined at Philadelphia in 1915, and in San Francisco in 1916. A rather healthy restart of half eagle coinage in 1929 amounted to 662,000 coins, although almost none of these coins ever reached the general public. The widespread destruction of gold coins in the mid-1930s following a recall order from President Roosevelt turned the high-mintage final-year issue of the Indian half eagle series into one of the most sought-after gold rarities of the 20th century.

The typical surviving 1929 half eagle is Mint State, as one would expect for an issue that experienced almost no active circulation. Although frequently offered at auction, high-grade examples of this issue never fail to draw strong bidding and collector interest. The present coin stands out from its peers with frosty, original luster that shows a blend of champagne and orange-gold hues, with wisps of lavender throughout. The lower headdress feathers show minor softness, and a few small marks determine the grade. Eye appeal is outstanding. PCGS lists 10 finer coins (9/17). NGC ID# 28E2, PCGS# 8533

EARLY EAGLES

1798/7 Capped Bust Eagle, XF45
Scarce 9x4 Stars, BD-1 Variety

16943 1798/7 9x4 Stars, BD-1, High R.4, XF45 PCGS. Two varieties of 1798 Capped Bust Right eagles are known to numismatists today, both struck from 1797 obverse dies that were overdated with the later date. The reverse die is believed to be one of three created by John Smith Gardner in 1796. The present coin represents the BD-1 variety, easily recognized by the 9x4 obverse star pattern. The 2018 *Guide Book* reports the mintage of the BD-1 variety as 900 pieces, but other sources believe as many as 1,600 examples may have been struck. Die state evidence indicates this issue was actually struck before some of the 1797 dated eagles, further confusing the issue. The BD-1 is certainly a scarce variety today, with John Dannreuther estimating a surviving population of 80-100 pieces in all grades.

As a general rule, collecting large denomination gold coins did not become popular until the 1930s, but the early eagles are an exception to this axiom. The historical importance of these early issues, and the short length of the series (1795-1804) tempted many early numismatists to include them in their collections. The 1798/7 was prized as a date, and the two separate varieties were quickly recognized by early catalogers. In Lot 851 of the Randall Collection (Woodward, 6/1885), the cataloger noted:

“1798 No. 5; die altered from 1797; 13 stars, 4 of which are facing; splendid proof, one of the rarest of the eagles.”

The present coin shows light wear on the well struck devices, and most of the original detail remains intact. Likewise, most original mint luster is still present. The pleasing surfaces are an attractive greenish-gold color, and only minor abrasions can be detected. A characteristic die crack is observed, from the edge, through L in LIBERTY, and through the cap. Population: 4 in 45, 22 finer (9/17).

Ex: *Houston Signature* (Heritage, 12/2010), lot 4494, where it realized \$40,250. NGC ID# BFYR, PCGS# 45720 Base PCGS# 8560

1799 BD-7 Eagle, XF45
Small Obverse Stars
Well-Detailed Type Coin

16944 1799 Small Obverse Stars, BD-7, R.3, XF45 NGC. Bass-Dannreuther Die State d/d. Dentil crumbling around the left obverse border and a die crack from the rim through the upper-left serif of the E in LIBERTY confirm the late die state. BD-7 ranks among the most often seen early eagle varieties. Nevertheless, survivors are very scarce, with John Dannreuther estimating 250 to 350 pieces extant. The obverse die was used to strike an unknown quantity of BD-7 eagles before it was paired with a new reverse to strike the entire run of 2,500 to 3,500 BD-8 ten dollar gold pieces. It was subsequently re-paired with its original reverse. (This coin was produced after BD-8). In all, somewhere between 10,000 and 15,000 coins were struck from this die marriage.

Much of Liberty's hair and portrait detail remains distinct, and the stars are well brought-up. Definition is slightly softer on the reverse. Each side features light reddish-gold coloration and myriad tiny field marks, none of which are excessively distracting. This briefly circulated Choice XF ten dollar would fit perfectly into a gold type set. NGC ID# 2625, PCGS# 45730 Base PCGS# 98562

1801 Eagle, BD-2, AU50
Well-Detailed Type Coin

16945 1801 BD-2, R.2, AU50 PCGS. Bass-Dannreuther Die State b/b. The 1801 BD-2 is the most plentiful of early eagles produced from 1797 to 1804. Star 8 has two points oriented toward Liberty's cap, and the eagle's beak nearly touches star 13 at its top. The two lowest left stars on the obverse are softly struck on this piece. This example shows still-lustrous canary-gold centers that deepen to amber-gold near the peripheries. A bit of highpoint rub is visible as a color change on the cheek and elevated strands of the hair, and a bit of light field chatter is consistent with the grade. A small dig is noted at the I in LIBERTY. An excellent choice for a type coin. NGC ID# 2627, PCGS# 45734 Base PCGS# 8564

1801 Capped Bust Right Ten, AU Details
Popular BD-2 Variety

16946 1801 BD-2, R.2 — Scratches, Cleaned — NGC Details. AU. Bass-Dannreuther Die State a/a. Although this example shows no evidence of clashing, the usual mysterious spikes are present on the cap. Just a trace of wear shows on the strongly impressed design elements and the pleasing orange-gold surfaces retain traces of original luster, despite the noted cleaning. Some fine pin scratches are evident in the lower obverse field, on either side of the bust.

1801 BD-2 Ten Dollar, Unc Details
Sharp Large Eagle Type Coin

16947 1801 BD-2, R.2 — Altered Surfaces — PCGS Genuine. Unc Details. Bass-Dannreuther Die State a/a. No clashing or lapping is present, although the usual "spikes" appear in Liberty's cap, imparted by die damage unrelated to clashing. This piece has bright, faintly etched surfaces reminiscent of a shipwreck coin and is thus denied a numeric grade despite its clean surfaces and sharp design elements. No adjustment marks or other distractions are seen.

1803 Eagle, BD-5, AU58
Large Stars Reverse, Star on Cloud

16948 1803 Large Reverse Stars, Star on Cloud, BD-5, High R.4, AU58 NGC. Bass-Dannreuther Die State g/a, no reverse cracks. BD-5 is one of the more plentiful 1803 eagle varieties, although it is still scarce with only 90-110 pieces believed known in all grades. Only BD-5 and -6 employ a Large Stars reverse die, and this subtype has a combined population from the two varieties estimated to be less than 120 coins. Uncirculated examples are rare.

BD-5 is also distinctive for the tiny extra star that appears on the right-most cloud above the eagle's wing, for which numismatists still debate an explanation since it is smaller than any of the star punches known to have been in use during that period. The extra star is faint on this near-Mint example due to a network of planchet adjustment marks that criss-cross the reverse. The obverse shows no adjustment marks. The coin exhibits a good strike overall and has partially lustrous straw-gold surfaces. NGC ID# 262A, PCGS# 45739 Base PCGS# 98565

LIBERTY EAGLES

1849 Ten Dollar, MS62
Reflective Fields, Great Color

16949 1849 MS62 PCGS. In Mint State, the 1849 Liberty eagle is rare regardless of numeric grade. This MS62 coin displays semiprooflike obverse fields and fully prooflike reverse fields, complemented by rich orange-gold color. Minor strike weakness is seen on the hair curls around Liberty's face and on the eagle's left (facing) leg. Scattered light handling marks limit the grade. An outstanding No Motto type coin of a less often seen date. NGC ID# 2635, PCGS# 8601

1862 Liberty Eagle, AU53
Elusive Low-Mintage Issue

16950 1862 AU53 NGC. A meager mintage of 10,995 Liberty eagles was struck in 1862, certainly a small total in absolute terms, but about average in the context of the series. This AU53 example shows a trace of wear on the hair and coronet but the pleasing orange-gold surfaces are lightly abraded and the overall presentation is quite attractive. Census: 16 in 53, 33 finer (8/17). NGC ID# 2649, PCGS# 8635

1877-CC Ten Dollar, VF25
In-Demand in All Grades, CAC Example

16951 1877-CC VF25 NGC. CAC. Variety 1-A. The small mintage of only 3,332 pieces combines with the charismatic Carson City origin to elevate this smoothly worn 1877-CC above others at its grade level. Lively orange-gold surfaces show few marks and easily justify the CAC green label — at present, the sole VF25 NGC to receive such endorsement. This is a scarce, highly sought collector-grade eagle from the legendary CC-Mint with excellent surfaces and eye appeal. Census: 3 in 25, 34 finer. CAC: 1 in 25, 6 finer (8/17). NGC ID# 265G, PCGS# 8678

1882-CC Ten Dollar, AU55
Scarce, Low-Mintage CC Issue

16952 1882-CC AU55 NGC. Variety 2-A. This variety is characterized by misplaced digits in the denticles below the date on the obverse, and die lines within the left part of the shield on the reverse. A mere 6,764 ten dollar gold pieces were struck in Carson City in 1882. This is a bright example with significant portions of mint luster remaining and only minimal abrasions. NGC ID# 2663, PCGS# 8696

1903 Ten Dollar, Rare MS65+
Beautiful, Frosty Surfaces

16953 1903 MS65+ PCGS. CAC. The 1903 Liberty eagle is a great condition rarity in MS65. We have previously offered a Gem or better example on only nine occasions, of which just two were for Plus-designated coins. This CAC-approved example is easily among the finest 1903 eagles that we have seen. The strike is sharp, and the frosty wheat-gold surfaces are nearly perfect aside from a lone mark behind Liberty's eye that determines pedigree. Population: 8 in 65 (2 in 65+), 1 finer. CAC: 1 in 65, 1 finer (9/17). NGC ID# 267V, PCGS# 8752

1906-D Ten Dollar, MS65
Elusive This Fine

16954 1906-D MS65 PCGS. The 1906-D eagle is available through MS64, but this Gem is conditionally scarce. Finer pieces are extremely rare and will be out of reach for most collectors. This example is sharply struck and frosty with original wheat-gold mint luster. Eye appeal and preservation are excellent. Population: 31 in 65 (1 in 65+), 3 finer (9/17). NGC ID# 7JHG, PCGS# 8760

INDIAN EAGLES

1907 No Periods, No Motto, Eagle, MS65
Exceptional for the Grade

16955 1907 No Motto MS65 PCGS. CAC. The technical grade — derived from the presence of very faint grazes that are visible under a loupe — does not do the eye appeal of this No Motto type coin justice. The CAC endorsement helps, although we recommend that Indian eagle enthusiasts examine this Gem in person to fully appreciate its astounding eye appeal. The strike is sharp, and the luminous yellow-gold mint luster is original. A faint reddish area near the reverse rim at 8:30 helps as a pedigree marker. NGC ID# 28GF, PCGS# 8852

1907 No Periods Eagle, MS66
Outstanding No Motto Type Coin

16956 1907 No Motto MS66 NGC. The 1907 No Periods Indian ten is a favorite No Motto type coin, available through MS65. In MS66, examples become moderately scarce, and NGC has seen only 34 finer submissions (8/17). This Premium Gem displays a bold strike and luminous straw-gold mint luster with no distracting abrasions. Eye appeal is outstanding. NGC ID# 28GF, PCGS# 8852

1908 Indian Eagle, MS66
Outstanding No Motto Type

16957 1908 No Motto MS66 NGC. It took an act of Congress to force President Theodore Roosevelt to make the motto IN GOD WE TRUST part of the nation's newly designed coinage. The legislation was passed in May, 1908 — by then, a small mintage of ten dollar gold pieces had been struck without the motto at both the Denver and Philadelphia Mints. The Denver total was 210,000 pieces, and the Philadelphia Mint struck a mere 33,500 No Motto eagles.

Only a few Premium Gem No Motto coins exist from that small Philadelphia mintage. This example displays satiny, medium-gold color with virtually no marks to mention. The strike is needle-sharp throughout the central motifs, with only a bit of blending at the bottom two headdress feathers. An essential variety for both series and type collectors, this lustrous and nearly pristine No Motto ten will pique the interest of many gold specialists. Census: 14 in 66, 6 finer (9/17). NGC ID# 28GG, PCGS# 8853

1908 With Motto Indian Ten, MS65
Vibrant Mint Luster

16958 1908 Motto MS65 PCGS. In Gem condition, the 1908 With Motto Indian eagle is the most plentiful 1908-dated issue, making it the ideal choice for type collectors. However, it is still scarce in such a high grade. This representative is well-preserved with original cartwheel luster that shows straw-gold and wheat-colored hues. The strike is well-executed, and only a few minor abrasions are observed beneath a loupe. NGC ID# 28GJ, PCGS# 8859

1911-D Saint-Gaudens Ten Dollar, AU58+
Only 30,100 Coins Minted

16959 1911-D AU58+ NGC. CAC. The 1911-D is a series key date with a tiny production of 30,100 coins. Both NGC and CAC state this coin is high-end for the AU58 grade, and we concur. The two lowest headdress feathers are razor-sharp, though detail is softer on the eagle's shoulder and talons. Satiny luster washes over pleasing red-gold surfaces. A couple of marks occur on the cheek, but the fields are clean. NGC ID# 28GU, PCGS# 8869

1914-D Ten Dollar, MS65
Conditionally Elusive

16960 1914-D MS65 PCGS. The availability of the 1914-D Indian eagle drops off sharply at MS65, and finer pieces are genuinely rare. This attractive Gem displays sharp design elements and luminous peach-gold luster without distracting abrasions. Eye appeal is outstanding. Recent auction appearances of Gem 1914-D eagles have easily breached the five-figure mark. Population: 32 in 65 (2 in 65+), 10 finer (9/17). NGC ID# 28H3, PCGS# 8876

1914-S Ten Dollar, MS63
Uncommonly Attractive for the Grade

16961 1914-S MS63 PCGS. The 1914-S Indian eagle is significantly scarcer in Mint State than its mintage of 208,000 coins would suggest. A substantial population in XF and AU grades indicates that this issue actually circulated, which is consistent with the West Coast economy in the early 20th century. This MS63 coin is in a collectible grade but displays eye appeal that rivals higher-grade coins that we have seen. Light handling marks on the cheek are only noticed under a loupe, and the wheat-gold, satiny surfaces are otherwise almost unabraded. Finer coins are increasingly scarce. NGC ID# 28H4, PCGS# 8877

1915-S Eagle, AU58
Much Luster Remains

16962 1915-S AU58 PCGS. With a famously low mintage of 59,000 pieces, the 1915-S Indian eagle is a sought-after and conditionally elusive semikey. Uncirculated examples are particularly challenging to acquire with good eye appeal, leading many collectors to seek attractive and lustrous high-end AU coins, such as this near-Mint PCGS coin. The strike is sharp, and the satiny yellow-gold surfaces retain significant mint luster. Light friction over the high point of the eagle's wing defines the grade. NGC ID# 28H6, PCGS# 8879

1916-S Indian Ten, MS63
Attractive Orange-Gold Color

16963 1916-S MS63 PCGS. Frosty orange-gold luster with warm peach-orange hues gives this Select 1916-S ten outstanding eye appeal despite light, scattered abrasions that limit the grade. The strike is sharp, and a luminous cartwheel effect complements the original patina. The 1916-S is a scarce issue in MS63 and is seldom offered finer. NGC ID# 28H7, PCGS# 8880

1920-S Indian Eagle, Choice XF
Partially Lustrous With Outstanding Color

16964 1920-S XF45 PCGS. By 1920, there was little commercial demand for ten dollar gold pieces in circulation; gold certificates and federal reserve notes had become the preferred medium of exchange, particular in the Eastern states. The San Francisco Mint issued gold eagles sporadically after 1916, and only in limited quantities. The 1920-S mintage amounted to 126,500 pieces, but most of these never left bank or government vaults and were easily recalled and destroyed after President Roosevelt's Executive Order to that effect in 1933. Survivors are scattered throughout the lower Mint State and upper circulated grades.

The present coin is one of only 67 1920-S eagles certified by PCGS. It is near the lower end of the grade placement, but this only makes it more appealing to budget-restricted collectors. The surfaces display lovely rose and coppery-gold color with hints of luster in the fields. Detail is strong, and no distractions are observed. Eye appeal is outstanding. Population: 3 in 45, 62 finer (8/17).
Ex: Morrison Family and Licht Collections (*Stack's*, 3/2005), lot 1878.
NGC ID# 28H8, PCGS# 8881

1926 Ten Dollar Indian, MS66
Superior Quality Overall

16965 1926 MS66 NGC. CAC. As a date, the 1926 eagle is the second most common of all the Indian Head ten dollar gold coins. Gems are not difficult to locate. However, the situation changes dramatically at the MS66 level. The present coin is a particularly pleasing example of this Premium Gem rarity. The fields are virtually free of abrasions, with only a short reeding mark above D in the denomination to serve as a pedigree marker. The obverse displays thick, frosted mint luster with intense red-gold color and generous portions of lilac interspersed over each each side. The strike is strong and crisp overall with all of the details of Saint-Gaudens beautiful design shown to best advantage. This exquisite Premium Gem eagle represents the highest goal a collector can aspire to for this date. Census: 51 in 66 (1 in 66+, 2 in 66★), 0 finer. CAC: 6 in 66, 0 finer (9/17). NGC ID# 28H9, PCGS# 8882

PROOF INDIAN EAGLE

1909 Indian Eagle, PR65
Only 74 Examples Struck
Rarely Seen Finer

16966 1909 PR65 PCGS Secure. CAC. Mintage of proof Indian eagles declined significantly in 1909 to a meager 74 examples (down from 116 pieces the year before). The lower mintage was a reflection of the shrinking collector demand for proofs, brought on by dissatisfaction with the dark matte finish used on proof issues in 1908. In an effort to make the gold proofs more appealing, the Mint modified the finish to produce a satiny, semireflective surface that was called the "Bright" finish by contemporary numismatists, according to Roger W. Burdette (also known as the Roman Gold finish to later collectors). Unfortunately, the new proof format was not enthusiastically received and sales continued to stagnate or drop in following years. Prominent collector William H. Woodin, who would become Secretary of the Treasury in the Franklin D. Roosevelt administration, complained:

"I am surprised at the statement that the dull finish of the gold proof coins was objected to by many collectors. If any collectors objected to this finish it was because they did not understand that the St. Gaudens [sic] designs are not adapted to the production of polished proofs. The present proofs of the St. Gaudens designs and of the Pratt designs are simply rotten. I know of no other word to express it."

Even so, enough proof eagles were distributed in 1909 to make the issue one of the more available dates in today's market, and it is likely that 40-60 specimens survive in all grades.

The present coin is a spectacular Gem, with razor-sharp definition on all design elements and no mentionable distractions. The well-preserved yellow-gold surfaces are much more vibrant than the typical matte proof issue and show bright satiny luster, with highlights of orange and rose. Population: 9 in 65, 4 finer. CAC: 5 in 65, 0 finer (8/17). NGC ID# 28HF, PCGS# 8891

LIBERTY DOUBLE EAGLES

1850 Twenty Dollar, AU53
First-Year Type Coin

16967 1850 AU53 NGC. Bright yellow-gold surfaces retain hints of luster in the protected regions of the fields. Light high-point wear accompanies scattered abrasions on each side, consistent with the grade. The 1850 Philadelphia issue was coined largely with gold bullion shipped from the California gold fields during the height of the Gold Rush. NGC ID# 268F, PCGS# 8902

1850 Double Eagle, AU55
Debut Year for the Liberty Twenty

16968 1850 AU55 NGC. The smooth surfaces of this Choice About Uncirculated double eagle are minimally marked for the grade, with a natural patina that wavers between honey and butterscotch coloration, for the overall look of fine antique gold. Traces of mint luster add to the eye appeal. Liberty's curls show moderate wear, although all of the motifs are well-defined. Always popular for its first-year-of-issue status, the 1850 is almost always heavily abraded at the AU level but not so here. NGC ID# 268F, PCGS# 8902

1850 Twenty Dollar, AU58
Inaugural Philadelphia Coinage

16969 1850 AU58 NGC. The bright yellow-gold hue of this near-Mint 1850 double eagle is consistent with the appearance of Philadelphia gold coins struck with California ore. Luster remains in the protected regions, and the sharp design elements are only lightly worn on the high points. The surfaces are relatively smooth. The double eagle denomination was approved by Congress in 1849, in response to a massive increase in the amount of gold bullion that the Mint needed to coin. NGC ID# 268F, PCGS# 8902

1851-O Double Eagle, Choice XF
Original, Appealing Surfaces

16970 1851-O XF45 PCGS. CAC. Variety 1. A familiar die variety of the most collectible New Orleans double eagle. In 1851, California gold that was not shipped abroad or assayed locally in the San Francisco area was largely shipped by steamboat to the federal mints at New Orleans and Philadelphia. New Orleans received a smaller portion of the newly mined gold than Philadelphia, but double eagle production was still substantial compared to what the branch mint produced in 1854 and later years, when California deposits largely ceased. The 1851-O twenty comes from a mintage of 315,000 pieces and is highly sought-after as one of the few readily collectible O-mint issues in the series. This piece is well-struck and partially lustrous with lightly abraded orange-gold surfaces. Housed in a green label holder with a CAC green sticker. NGC ID# 268J, PCGS# 8905

1851-O Double Eagle, AU53
Partially Reflective Fields

16971 1851-O AU53 NGC. Variety 2. Some reflectivity in the fields complements a general lack of heavy abrasions on this unusually eye-appealing New Orleans double eagle. The coin is well-struck and displays the typical yellow-gold hue common to New Orleans and Philadelphia issues struck prior to 1854, when much of the gold bullion used for coinage came from California. Only slight high-point wear is present. Finer examples of this O-mint double eagle will be challenging to acquire. NGC ID# 268J, PCGS# 8905

1851-O Twenty Dollar, AU53
Good Candidate for New Orleans Type

16972 1851-O AU53 NGC. Variety 3. Only a few Type One double eagles are readily available for New Orleans type. The 1851-O leads the way thanks to a sizeable mintage of 351,000 pieces. This example retains nice mint luster and displays flashy, medium-gold surfaces. Small abrasions frequent the fields and central devices, but they create minimal impact at the assigned grade level. Sharp definition remains on the devices and the eye appeal is undeniable. NGC ID# 268J, PCGS# 8905

1851-O Double Eagle, MS62 Gold Rush Composition

16973 1851-O MS62 NGC. Variety 1. Several minor die varieties exist for the 1851 New Orleans double eagles. This example, that ranks in the Condition Census for the issue, has myriad tiny rust lumps on Liberty's bust, especially on the neck and around the eye. A late die state, the obverse exhibits a fine die crack through star 7 to the coronet, tops of LIB, Liberty's hair, and the right field to star 12. A faint die polishing line is noted over the date. The reverse has a microscopic die crack through the denomination, with many die polishing lines.

This is the most plentiful double eagle issued at the New Orleans Mint, with a coinage of 315,000 pieces. That may not seem like a large mintage, but it is nearly double the next highest mintage New Orleans double eagle. The original gold deposit records for the Louisiana Mint are preserved at the National Archives branch in Fort Worth, Texas, and show that more than 90% of the deposits from 1850 to 1853 consisted of California Gold Rush-mined gold.

This impressive piece ranks high on the list of surviving examples. NGC and PCGS have each certified a single MS63 submission, followed by six and eight MS62 examples, respectively (9/17). The surfaces are brilliant lemon-yellow with sharp details, full luster, and reflective fields. A single mark on Liberty's cheek prevents a higher grade. The MS63 PCGS example that Goldberg Coins sold in June 2016 is from the same reverse die as this piece. Raised die lines within the constellation that we first thought were planchet rifts appear on the reverse of that coin as well, proving they are die defects. This coin is stunning, and destined for a top-quality collection of Liberty double eagles. The present offering is equal to the finest 1851-O double eagles we have offered in any of our auctions, and the second appearance of this piece in one of our Signature sales.

Ex: ANA Signature Sale (Heritage, 8/2004), lot 7552. NGC ID# 268J, PCGS# 8905

1852 Twenty Dollar, AU58
Flashy Type One Representative

16974 1852 AU58 PCGS. Bright yellow-gold surfaces display considerable prooflike flash in protected areas — seldom seen on a Type One double eagle, while the strike is sharp throughout both sides. Little actual wear can be discerned. The reflective fields amplify a multitude of small marks and field chatter, yet the eye appeal of this near-Mint twenty is substantial. Much Mint-fresh appeal remains. NGC ID# 268K, PCGS# 8906

1853/2' Double Eagle, AU50
Pleasing for the Grade

16975 1853/2' FS-301 AU50 PCGS. A large raised die dot beneath the R in LIBERTY easily identifies this popular variety despite the lapped die state. The overdate status of FS-301 has been debunked by photographic overlays, although the intrigue of the anomaly in the date remains. This About Uncirculated representative displays yellow-gold surfaces with hints of luster in the protected regions. Light chatter is consistent with the grade. NGC ID# 268M, PCGS# 145730 Base PCGS# 8909

1853-O Double Eagle, AU Details
Lustrous and Appealing

16976 1853-O — Reverse Improperly Cleaned — NGC Details. AU. Variety 1. The obverse shows die lapping at James B. Longacre's initials, as usual; the reverse is stronger. Some luster remains in the fields, and this coin is quite attractive despite some faint hairlines on the reverse that prevent a numeric grade from NGC. Sharp design elements and a lack of heavy abrasions are among the appealing attributes. The 1853-O is the last of the moderately available New Orleans double eagles.

1853-O Twenty, AU58
Final Large Scale O-Mint Coinage

16977 1853-O AU58 NGC. Variety 1. Following the coinage of 717,000 double eagles from 1850 through 1853, including 71,000 of this 1853 issue, the New Orleans Mint coinage of twenty dollar gold coins quickly dwindled, with a total of only 112,191 double eagles minted there for the next eight years from 1854 through 1861, an average of only 14,000 coins each year. The reason for this change, of course, was the opening of the San Francisco Mint that meant California gold miners no longer had to ship or carry their gold to Louisiana, a distance of more than 4,600 nautical miles by sea (with a dangerous crossing at Panama), or nearly 2,300 equally dangerous miles by land. Either way, it was a trip of weeks rather than days. The best scenario is 16 days by horse and carriage, but three to four weeks is likely for that trip.

Only one die variety is documented for the 1853-O double eagles. The mintmark is slightly left of center below the eagle's tail, and tilts slightly to the right. There are no die cracks, clash marks, or other anomalies. This piece has brilliant yellow surfaces with sharp details and reflective fields, and appears to be fully Mint State until examined closely. NGC ID# 268N, PCGS# 8910

1854-S Double Eagle, AU55
The Debut S-Mint Twenty

16978 1854-S AU55 NGC. Several private minting firms sprang into business after gold was discovered in California, and the federal government soon established an assay office in San Francisco that had coinage capabilities. Finally, in 1854, an official branch of the United States Mint began operations in that city. The 1854-S gold dollars, eagles, and double eagles are popular with collectors, while the quarter eagles and half eagles are major rarities in the U.S. gold series. Silver coinage production began the following year with 1855-S quarters and half dollars. This Choice AU double eagle has trivial surface marks on its pleasing light yellow surfaces with faint traces of rose patina, and substantial luster. NGC ID# 268U, PCGS# 8913

1855-O Twenty, AU53
Low-Mintage Double Eagle

16979 1855-O AU53 NGC. Variety 1. The New Orleans Mint coined a mere 8,000 double eagles in 1855, the fourth lowest mintage behind the 1854-O, 1856-O, and 1860-O twenties. Many of these coins have been lost to attrition over the decades since they were minted, and all four issues have a survival rate of less than 1%, with only about 60 to 70 examples of the 1855-O known in all grades. The combined NGC and PCGS population for this issue is 15 that grade AU53 and 24 finer pieces (9/17).

Only one die variety is known for the 1855-O double eagles, and no unusual die markers are evident. There are no die cracks or other die defects on this piece. Myriad marks are evident on the honey-gold surfaces of this piece that retains traces of luster beneath wispy rose toning. Census: 6 in 53, 17 finer (9/17). NGC ID# 268W, PCGS# 8915

1856 Liberty Double Eagle, MS60
Colorful, Lustrous Surfaces

16980 1856 MS60 PCGS. The 1856 double eagle issue is scarcer than generally realized, despite a mintage of more than 329,000 coins. Only a few dozen submissions have crossed the Mint State threshold at the two leading services. This example offers full mint luster on attractive apricot-gold surfaces that are well-struck. Extensive scrapes and abrasions on both sides limit the grade to basal Mint State, however. Much eye appeal is nonetheless present. Population: 3 in 60, 30 finer (9/17). NGC ID# 268Y, PCGS# 8917

1858 Liberty Twenty, AU55
Attractive Color and Detail

16982 1858 AU55 PCGS. CAC. The 1858 double eagle is scarce in AU and genuinely rare at the Mint State level. CAC-approved coins are rare in both AU and Mint State. This Choice About Uncirculated CAC coin displays lustrous fields and original olive-gold patina. Relatively few surface abrasions are present, and high-point wear is light. Population: 32 in 55, 53 finer. CAC: 9 in 55, 10 finer (9/17). NGC ID# 2697, PCGS# 8923

1857-O Twenty, AU53
Lovely Rose Toning

16981 1857-O AU53 NGC. Variety 1. After three years of lean production at the New Orleans Mint, double eagle coinage increased to 30,000 coins, more than double the production of the previous three years, combined. The 1857-O double eagle coinage was accomplished from a single pair of dies. Pale straw-gold surfaces exhibit trivial marks as expected on this large gold piece that spent some time in commerce. Wispy rose toning is evident on both sides. Winter notes a small raised die rust lump that is located at almost the exact center of the obverse, and might be a centering dot. Census: 23 in 53, 56 finer (9/17). NGC ID# 2694, PCGS# 8921

1859 Double Eagle, Semireflective AU58
Extremely Rare in Higher Grades

16983 1859 AU58 PCGS. Yellow-gold surfaces display semireflective fields and a hint of frost over central devices that feature pinpoint definition. Strike detail is softer around the peripheries. Chatter occurs on each side, as usual. The 1859 has the second-lowest mintage among Philadelphia No Motto issues. Only 43,597 examples were struck. Moreover, the date becomes extremely difficult to locate in Mint State, where merely nine submissions have been seen by PCGS and NGC combined. This near-Mint example is conditionally rare in its own right and sure to find a good home in an advanced collection. Population: 19 in 58 (1 in 58+), 3 finer (8/17). NGC ID# 269A, PCGS# 8926

1860-S Twenty Dollar, AU58
Lustrous Original Surfaces
Rarely Offered in Mint State

16984 1860-S AU58 PCGS. CAC. This early Type One San Francisco issue circulated extensively. Mint State survivors are rarely offered and usually have unsightly abrasions that reduce visual appeal. This CAC-approved near-Mint coin has partially lustrous rose-gold and peach surfaces with bold design elements and only slight high-point friction. Surprisingly few abrasions are observed, considering the reputation of Type One S-mint twenties in this grade for having extensive surface contact. Population: 50 in 58 (1 in 58+), 36 finer. CAC: 32 in 58, 5 finer (9/17). NGC ID# 269F, PCGS# 8931

1861 Double Eagle, MS61
Mint State Type Coin

16985 1861 MS61 NGC. The 1861 used to be the most common Type One double eagle in Mint State, and while its rarity (or lack thereof) has not changed, the rarity of the 1857-S issue has dropped dramatically after several thousand coins were found at the bottom of the Atlantic ocean. Today, the 1861 remains a plentiful and popular issue. This is a pleasing and lightly abraded example with rich yellow-gold luster, great color, and only minor abrasions. Ex: *Central States Signature* (Heritage, 5/2005), lot 8931. NGC ID# 269G, PCGS# 8932

1861 Double Eagle, MS63
Prooflike Surfaces

16986 1861 MS63 PCGS. With a mintage of nearly 3 million coins, the 1861 double eagle had the highest coinage total of all Type One Liberty double eagles, and the third highest mintage of all three types behind the 1904 and 1904-S issues. In fact, there were only six double eagles of any issue from 1850 to 1933 that had higher production quantities. This extraordinary example is conditionally rare in grades better than MS62. The surfaces are brilliant and highly lustrous with trivial marks. The fields are prooflike and present excellent cameo contrast. Population: 35 in 63 (2 in 63+), 17 finer (9/17). NGC ID# 269G, PCGS# 8932

1861-O Double Eagle, Choice XF
Some Prooflike Reflectivity Remains

16987 1861-O XF45 NGC. Variety 1. Ex: Eagle Collection. A single die pair was used to coin double eagles at New Orleans in 1861, but three different governing entities struck the coins: the federal government, the state of Louisiana, and the Confederacy. It is unknown how many coins were struck by each authority, although the total recorded mintage amounted to only 17,741 pieces. Almost all of these coins experienced heavy circulation, as the denomination was not struck again at New Orleans until 1879. As a result, the 1861-O double eagle is both historically significant and scarce in all grades.

This example shows light wear with prooflike mirroring evident in the protected portions of the fields. Even the worn areas are free of major abrasions — an unusual aspect on New Orleans gold of this period. The lower portions of the date numerals are weak from die polishing. NGC ID# 269J, PCGS# 8934

1862-S Liberty Twenty, AU55
Pleasing Colorful Surfaces

16988 1862-S AU55 PCGS. From a mintage of 854,173 pieces, the 1862-S Liberty double eagle circulated widely at the time of issue, and few examples were saved by contemporary collectors. The present coin is an attractive Choice AU specimen that shows just a touch of wear on the well-detailed design elements. The pleasing orange-gold surfaces are lightly abraded and display faint traces of original mint luster. Population: 47 in 55, 85 finer (9/17). NGC ID# 269N, PCGS# 8938

1866 Type Two Twenty, Choice AU
Doubled Motto

16989 1866 Doubled Motto, FS-801, AU55 PCGS. For a brief period of time, the motto IN GOD WE TRUST was hand-punched into the working dies until new master dies were prepared. It was tricky business for the die sinker to properly align the lettering. This *Cherrypickers'* variety is perhaps the most spectacular example of hand-punching the motto. The N is repunched widely, with lesser repunching of the G, E, R, and U. This medium-gold example is lightly abraded with slight wear on Liberty's hair and good remaining mint luster. NGC ID# 38JK, PCGS# 145733 Base PCGS# 8949

1866-S Liberty Twenty, AU55
First Type Two Issue

16990 1866-S Motto AU55 PCGS. Much of the original luster persists despite light, even wear. The usual handling marks are present on the yellow-gold surfaces, and the strike is typical. Yet this mildly circulated coin has many factors in its favor. It is from the first issue of the Motto variety, and only a low number of survivors is known in all grades. Most of these are VF or lower as well, compounding the general difficulty with the added stress of a conditionally elusive issue. Population: 53 in 55 (1 in 55+), 53 finer (9/17). Ex: *Dallas Signature* (Heritage, 10/2006), lot 3227. NGC ID# 26B2, PCGS# 8950

1871 Twenty Dollar, AU58
Rarely Seen Finer

16991 1871 AU58 PCGS. With the lowest mintage of any Philadelphia Type Two double eagle, the 1871 is scarce in high About Uncirculated condition and rare in Mint State. Light abrasions and bagmarks do little to diminish the luster of this frosted near-Mint example. Light wear on the curls indicates a brief time in circulation. Population: 20 in 58 (1 in 58+), 19 finer (9/17). NGC ID# 26AA, PCGS# 8960

1871-S Double Eagle, MS61
Lustrous and Pleasing

16992 1871-S MS61 PCGS. This Type Two San Francisco issue is the most plentiful double eagle of the year in high grade, although Mint State coins are yet scarce. Frosty yellow-gold luster shows well-detailed design elements with the expected scattering of light abrasions on each side. Most 1871-S twenties in Mint State grade MS60 or MS61, and finer examples are seldom offered. Population: 59 in 61, 33 finer (9/17). NGC ID# 26ND, PCGS# 8962

1872 Twenty Dollar, MS61
Scarce in Mint State

16993 1872 MS61 PCGS. With few exceptions, Uncirculated Type Two double eagles are scarce. The 1872 is elusive in any Mint State grade and is genuinely rare above MS61. This collectible example displays a bold strike and vibrant yellow-gold luster. Heavy abrasions limit the grade, as expected. Population: 54 in 61, 13 finer (9/17). NGC ID# 26AD, PCGS# 8963

1873 Twenty Dollar, MS61
Elusive Closed 3 Variant

16994 1873 Closed 3 MS61 PCGS. Uncirculated Closed 3 1873 double eagles are rarely offered at auction, and almost all such coins exhibit unsightly abrasions. Despite the grade, this MS61 coin is among the more attractive Mint State pieces we have handled. The strike is sharp, and each side displays bright yellow-gold cartwheel luster. Scattered light handling marks are not individually obtrusive. Population: 29 in 61, 7 finer (9/17). NGC ID# 26AL, PCGS# 8966

1873 Open 3 Twenty Dollar, MS63
Few Pieces Known Finer

16995 1873 Open 3 MS63 PCGS. An uncommonly well-preserved Open 3 coin, and really an outstanding example of the date overall, this Select 1873 double eagle displays frosty wheat-gold luster and bold motifs with only occasional contact marks in the fields. There are no singular abrasions, and eye appeal is excellent. PCGS lists 11 numerically finer representatives (9/17). NGC ID# 26AL, PCGS# 8967

1873 Open 3 Double Eagle, MS63
Radiant Mint Luster

16996 1873 Open 3 MS63 NGC. This Select Open 3 coin features frosty, radiant mint luster and sharp design elements. The yellow-gold surfaces show scattered light marks consistent with the grade. The Open 3 variety is common in MS61 and MS62 but scarce in MS63. NGC has seen only three coins numerically finer (9/17). NGC ID# 26AL, PCGS# 8967

1873 Open 3 Twenty Dollar, MS63
Doubled LIBERTY

16997 1873 Open 3, Doubled Die Obverse, FS-101, MS63 PCGS. LIBERTY is boldly die doubled on this Open 3 variety. The current coin is among the finest pieces attributed as FS-301 at PCGS, and it is an above-average Mint State example of the date overall. Bold design elements and frosty orange-gold mint luster produce strong eye appeal, while light, scattered abrasions are in harmony with the grade. NGC ID# 26AH, PCGS# 148749 Base PCGS# 8967

1873-S Closed 3 Twenty, MS62
A Higher-End Example

16998 1873-S Closed 3 MS62 NGC. Most Uncirculated 1873-S double eagles grade MS60 or MS61; this is true of both the Closed 3 and Open 3 varieties. The current Closed 3 coin is high-end for the issue. The strike is bold, and the lustrous surfaces yield original rose-gold coloration. Scattered abrasions determine the grade. Census: 48 in 62 (4 in 62+), 4 finer (9/17). NGC ID# 26AL, PCGS# 8969

1874-CC Double Eagle, AU50
Wide CC Mintmark

16999 1874-CC AU50 PCGS. Variety 4-A. The mintmark is positioned over the N in TWENTY with a wider spacing of the C's than on the other reverse used for double eagle coinage at Carson City in 1874. The date is high and well-centered. About Uncirculated 1874-CC double eagles are collectible alternatives to rare Mint State pieces, and this example retains partial luster and has original olive-gold patina. Scattered light abrasions are as expected for the grade. NGC ID# 26AP, PCGS# 8971

1874-CC Double Eagle, AU50
Collectible Carson City Issue

17000 1874-CC AU50 PCGS. Variety 3-B. The mintmark is closely spaced on this variety. The 1874-CC double eagle is an available date in the Carson City short set, although Mint State examples are rare. This collectible About Uncirculated coin delivers partially lustrous olive-gold surfaces and well-detailed design elements. Scattered light abrasions accompany the grade. NGC ID# 26AP, PCGS# 8971

1876-CC Double Eagle, AU53
Pleasing for the Grade

17001 1874-CC AU53 NGC. Variety 3-A. Bright, yellow-gold surfaces and prooflike flash around the stars and legends counterbalance myriad small ticks and marks that characterize the 1874-CC. The issue was roughly handled at the Mint and during transport. Most pieces circulated at least briefly. A mushy strike on the hair does little to help the eye appeal, although this example is better than many in that regard. This is a challenging Type Two CC-Mint twenty to find any finer for the grade. NGC ID# 26AP, PCGS# 8971

1874-CC Double Eagle, Choice AU
Above-Average Preservation

17002 1874-CC AU55 NGC. Variety 3-A. The die chip behind Liberty's eye and the Wide CC mintmark quickly confirm the die pair, one of six combinations known to have struck 115,085 double eagles at the Carson City Mint in 1874. Deep reddish-gold color covers this Choice AU Type Two twenty. Strike detail is good. Myriad abrasions, as usual. NGC ID# 26AP, PCGS# 8971

**1874-CC Liberty Double Eagle, AU58+
Excellent Branch Mint Type Coin**

17003 1874-CC AU58+ NGC. Variety 1-A. Double eagle production really hit its stride in 1874 at the Carson City Mint, when a substantial mintage of 115,085 pieces was accomplished. The coins were released into circulation and used to settle large accounts in both foreign and domestic trade. The 1874-CC is one of the more available Carson City twenties in today's market, and a popular choice with branch mint type collectors, but Mint State specimens are elusive.

The present coin exhibits just a trace of wear on the well-detailed design elements. The pleasing orange-gold surfaces retain much of their original mint luster and show the expected number of minor contact marks for the grade. NGC has graded 17 numerically finer examples (9/17). NGC ID# 26AP, PCGS# 8971

**1874-S Twenty, MS62
Lovely Original Patina**

17004 1874-S MS62 PCGS. This lovely Type Two double eagle has rich and frosty orange-gold luster with dusky green patina on the high points, typical of examples that have been repatriated from overseas. The MS62 grade for this issue is an excellent value, given that PCGS has only certified four submissions in higher grades (9/17). NGC ID# 26AR, PCGS# 8972

**1875 Liberty Twenty, MS63
Very Rare Any Finer**

17005 1875 MS63 PCGS. Of the six gold denominations issued by the Philadelphia Mint in 1875, only the double eagle was produced in more than token quantities. This impressive Select specimen exhibits sharply detailed design elements and lightly marked orange-gold surfaces, with vibrant mint luster and outstanding eye appeal. Population: 83 in 63 (3 in 63+), 4 finer (9/17). NGC ID# 2547, PCGS# 8973

**1875-CC Double Eagle, AU53
Inarguably Original, Partly Lustrous**

17006 1875-CC AU53 PCGS. CAC. Variety 8-B. The 7 is centered between two dentils, and the right edge of the second C in the mintmark is aligned with the T. There can be no denying the originality of this lightly circulated Type Two twenty from the Carson City facility. It enjoys khaki and orange-gold surfaces with lots of remaining luster within the design recesses. Blending and marks are in accordance with the grade. NGC ID# 26AT, PCGS# 8974

1875-CC Liberty Twenty, MS61
Popular Type Two Branch Mint Issue

17007 1875-CC MS61 PCGS. CAC. **Variety 2-B.** From a large mintage of 111,151 pieces, the 1875-CC Liberty double eagle is the most available Type Two twenty from the Carson City Mint. Circulated examples are easily located, and even in lower Mint State grades, the 1875-CC can be found with a little patience. Accordingly, the 1875-CC is the favorite choice of branch mint type collectors. This impressive MS61 specimen offers well-detailed design elements and vivid orange-gold surfaces with vibrant mint luster on both sides. The expected number of minor contact marks is evident, but the overall presentation is most attractive. NGC ID# 26AT, PCGS# 8974

1876-CC Double Eagle, AU53
Attractive, Brassy-Gold Color

17008 1876-CC AU53 NGC. CAC. **Variety 3-A.** Despite its large mintage of 138,441 pieces and regardless of foreign hoard coins that returned to the U.S. over the past few decades, the 1876-CC remains stubbornly scarce with decent surfaces and color. This CAC-endorsed About Uncirculated example will satisfy even the choosiest collector. Abrasions are light and natural orange-gold surfaces retain plentiful luster. A shallow scrape near star 5 is the sole mark of note. NGC ID# 26AW, PCGS# 8977

1876-CC Twenty Dollar, AU55+
Reflective Fields, Few Marks

17009 1876-CC AU55+ NGC. **Variety 3-A.** Much of the original prooflike surface remains on this high-end, Choice 1876-CC twenty. Not only is the issue scarce in Choice About Uncirculated condition or finer, it is almost always found heavily abraded. The present example is a welcome exception, with only minor field marks and light chatter. Rich, sun-gold color retains most of the original mint luster. Some smooth wear on the upper hair strands suggests brief circulation. NGC ID# 26AW, PCGS# 8977

1877-CC Double Eagle, AU58
First Type Three Issue

17010 1877-CC AU58 NGC. Variety 1-A. In 1877, the denomination on the reverse of the double eagle was changed from TWENTY D. to TWENTY DOLLARS. The change may have been for European bankers who were not immediately familiar with the American coinage denominations, or it may have been to avoid confusion with the D mintmark of the Denver Mint. Although gold coins were not struck there until 1906, the initial intention when the Denver Mint was authorized in 1862 was the eventual coinage of gold. This lovely example has light yellow-gold surfaces with satin luster, reflective fields, and minimal marks. NGC has only certified 24 numerically finer examples (9/17). NGC ID# 26AZ, PCGS# 8983

1878-S Twenty Dollar, MS63+
Noticeably High-End for the Grade

17011 1878-S MS63+ PCGS. Collectible in MS62, the 1878-S double eagle becomes substantially rarer just one grade point finer. The present coin is arguably the most visually appealing MS62 example known. It is the only Plus-graded PCGS coin. The well-struck design elements boast sharp detail and show brightly frosted, radiant mint luster. Nothing more than a few stray lines on the obverse limit the grade from even higher consideration, and the reverse is pristine. The eye appeal is simply exceptional. PCGS reports only one finer coin, an MS64 (9/17). NGC ID# 338K, PCGS# 8987

1879-CC Double Eagle, AU58
Conditionally Elusive

17012 1879-CC AU58 NGC. **Variety 1-A.** Only one documented die pair was used to produce 10,708 double eagles at the Carson City Mint in 1879. NGC has only certified 10 Mint State 1879-CC double eagles, likely including resubmissions, making this near-Mint example an excellent value, offering an attractive coin at a presumably reasonable price. This piece is typical of 1879-CC twenties, with a sharp strike, nearly complete mint frost, and minimal marks of no consequence. Although below the Mint State grade level, this piece probably ranks among the dozen finest surviving examples. Census: 51 in 58, 10 finer (9/17). NGC ID# 338L, PCGS# 8989

1879-O Double Eagle, AU50
The Only New Orleans Type Three Twenty

17013 1879-O AU50 NGC. **Variety 1.** Remaining dormant since the early days of the Civil War, the New Orleans Mint was readied for reopening in the late 1870s, with coinage commencing in 1879. Morgan dollars were the order of the day (and week, month, and year), and a small emission of 1,500 eagles and 2,325 double eagles were also coined. The 1879-O double eagle was the only New Orleans issue of the Type Three design, and the low survival rate means examples are always in demand since New Orleans type collectors compete with specialists for the limited supply. This pleasing piece has light yellow surfaces with the usual trivial marks. The fields exhibit slight reflectivity. Census: 8 in 50, 40 finer (9/17). NGC ID# 26B8, PCGS# 8990

1880-S Liberty Double Eagle, MS62
Nice Luster and Color

17014 1880-S MS62 PCGS. Like most Type Three twenties, the 1880-S is not difficult to locate in lower grades, but it becomes scarce at the MS62 grade level, and finer examples are quite rare. This attractive MS62 specimen offers well-detailed design elements and lustrous orange-gold surfaces that show the expected number of minor contact marks for the grade. Population: 94 in 62 (2 in 62+), 15 finer (9/17). NGC ID# 26BB, PCGS# 8993

1881-S Liberty Double Eagle, MS62
Elusive Issue in Finer Grades

17015 1881-S MS62 PCGS. Although the yellow-gold surfaces of this piece show some light field chatter, there is also considerable prooflikeness apparent on both sides, apparently a fresh strike—and a sharp one, at that—from new dies front and back. Like so many Type Three double eagles, this issue is seldom seen in finer grades. PCGS has graded 25 numerically finer examples (9/17). Ex: *Long Beach Signature* (Heritage, 9/2008), lot 4218. NGC ID# 26BD, PCGS# 8995

1882-CC Liberty Twenty, AU53
Popular Branch Mint Type Issue

17016 1882-CC AU53 PCGS. Variety 1-B. A lengthy vertical spike on Liberty's nose in front of the eye is common to both known die marriages, leaving identification of the variety to the slope and position of the mintmark. Variety 1-A is scarce and shows a down-sloping mintmark. Variety 1-B is the usual reverse, with the mintmark on an upward tilt. This 1-B example displays natural orange-gold color with rose overtones. A few deep freckles at the front of the coronet are noted. NGC ID# 26BF, PCGS# 8997

1882-CC Double Eagle, AU58
Nearly Full Luster Remains

17017 1882-CC AU58 PCGS. Variety 1-B. Frosted, yellow-gold color flows evenly across both sides of this briefly circulated, Choice Carson City double eagle. Honey-gold accents add depth to the coloration. Like most 1882-CC twenties, the strike is sharp. We note a small vertical abrasion disguised in the hair below the ear, but most other marks are confined to tiny field chatter. NGC ID# 26BF, PCGS# 8997

1882-CC Twenty Dollar, AU58+
Lustrous and High End for the Grade

17018 1882-CC AU58+ PCGS. CAC. Variety 1-B. This variety is easily attributable by the die crack along the bases of the letters in TWENTY DOLLARS and, to a lesser extent, by the vertical spike in front of the eye of Liberty. Even though only 39,140 pieces were struck from two die pairs, the 1882-CC twenty is one of the more available CC double eagles. Just the slightest thinning is noticeable in the fields, while most of each side is still covered in thick mint frost. Strike definition is bold throughout and there are a number of abrasions, the most easily seen ones are a series of shallow, horizontal marks across the cheek of Liberty. NGC ID# 26BF, PCGS# 8997

1882-CC Double Eagle, MS60
Elusive in Mint State

17019 1882-CC MS60 PCGS. Variety 1-B. The Liberty double eagle series is so vast that a complete date and mintmark collection is out of reach for all but the most ambitious and well-funded collectors. However, several subsets are widely popular and offer a more manageable avenue for collecting this denomination and type. Perhaps the most popular subset of the Liberty double eagle is the Carson City short set, which is both challenging, educational, and intriguing to assemble. The Carson City set has a few stoppers, but there are many plentiful issues such as the 1882-CC that can be acquired in Mint State. The present coin is both sharp and lustrous, showing original yellow-gold coloration. Scattered, heavy abrasions are as expected for the grade. Population: 12 in 60, 74 finer (9/17). NGC ID# 26BF, PCGS# 8997

1882-CC Liberty Twenty, MS61
Popular Branch Mint Type Issue

17020 1882-CC MS61 PCGS. Variety 1-A. Double eagle coinage was suspended in 1880 and 1881 at the Carson City Mint. When coinage resumed in 1882, an adequate mintage of 39,140 Liberty double eagles was accomplished, making the 1882 one of the more available issues of the decade and a popular choice of branch mint type collectors.

The present coin is an impressive MS61 specimen, with well-detailed design elements that show just a touch of the usual softness on the curls above Liberty's ear and the eagle's claws. A vertical spike in front of Liberty's eye and a die line above the A in DOLLARS identify the scarcer Variety 1-A. The vivid orange-gold surfaces radiate vibrant mint luster and show the expected number of minor contact marks for the grade. Population: 45 in 61, 29 finer (9/17). NGC ID# 26BF, PCGS# 8997

1883-CC Liberty Twenty, AU55
Great Color and Eye Appeal

17021 1883-CC AU55 NGC. **Variety 2-A.** Carson City double eagle collectors often turn to the 1883-CC as a readily available Type Three issue. This is a remarkably original near-Mint State example, with sumptuous orange-gold color and reddish-gold accents around the raised devices. While some abrasions are unavoidable on virtually any Carson City twenty, they are small and unobtrusive on this coin. Most of the mint luster remains and the strike is resolute. NGC ID# 26BH, PCGS# 8999

1883-CC Double Eagle, AU55
Smooth Surfaces

17022 1883-CC AU55 PCGS. **CAC. Variety 2-A.** A short tine extending from the dentils above the E in STATES and a couple of small die lumps between stars 8 and 9 on the obverse identify this collectible Carson City variety. The present coin displays sharp detail and partially lustrous fields. Satiny wheat-gold patina is original and shows minimal abrasions for the grade. NGC ID# 26BH, PCGS# 8999

1883-CC Twenty Dollar, AU58
Original Red-Gold Color

17023 1883-CC AU58 PCGS. **Variety 2-A.** There is a small die chip on the inner point of star 9. A trace of friction over well-struck design elements prevents a full Uncirculated assessment for this 1883-CC double eagle. The only area of overt incompleteness occurs at the lower reverse border, where the dentils are indistinct. Each side boasts original reddish-gold color. Bagmarks from transport are plentiful. NGC ID# 26BH, PCGS# 8999

1883-CC Liberty Twenty, AU58

17024 1883-CC AU58 NGC. **CAC. Variety 2-A.** The 1883-CC Liberty double eagle is one of the more available Carson City twenties and a popular type coin. This is an impressive near-Mint specimen with just a trace of wear over the well-detailed design elements. Some evidence of die rust is apparent, with die dots between stars 8 and 9 and to the right of 3 in the date. The lustrous orange-gold surfaces show a moderate number of minor abrasions for the grade. NGC ID# 26BH, PCGS# 8999

1883-CC Double Eagle, MS60
Elusive in Mint State

17025 1883-CC MS60 NGC. **Variety 2-A.** It takes a true specialist to pursue the Liberty Head double eagle series with an eye on mintmark positions, which tend to vary on most branch mint issues. The Carson City twenties are particularly challenging in that regard. This example has the mintmark far to the right, rather than centered between TWENTY and DOLLARS. Abrasions are less-frequent than expected for an 1883-CC. This example has an bit of copper alloy color at star 10 and some natural mint grime and a deep impression from the dies. Census: 35 in 60, 66 finer (9/17). NGC ID# 26BH, PCGS# 8999

1883-CC Twenty Dollar, MS60
Flashy, Semireflective Fields

1883-CC Liberty Double Eagle, MS61
Rare Any Finer

17026 1883-CC MS60 PCGS. Variety 1-B. A centered mintmark and die lines near star 13 and within the shield confirm the attribution. The Carson City Mint limited double eagle output to 59,962 coins in 1883. That total was high compared to the Philadelphia Mint, which only struck proofs that year, but extremely small in relation to San Francisco's 1.2 million-coin mintage. The 1883-CC is typically seen in XF to AU condition. Certified populations at both grading services drop precipitously in Mint State, where the issue becomes very scarce.

This semiprooflike representative enjoys far greater visual appeal than the MS60 grade suggests. Liberty's hair curls, the stars (save for 13), and the feathers are razor-sharp. Elements of green and rose complement orange-gold surfaces with flashy, partly reflective fields. An area of slight coppery color occurs near star 9. Abrasions are peppered throughout, but this Uncirculated Carson City double eagle remains readily appealing. NGC ID# 26BH, PCGS# 8999

17027 1883-CC MS61 PCGS. Variety 2-A. From a mintage of 59,962 pieces, the 1883-CC Liberty double eagle is one of the more available issues of the Carson City series. The 1883-CC was a well-made issue and its relative availability in high grade makes it a popular choice with branch mint type collectors. The present coin is an impressive MS61 example, with a better-than-average strike and pleasing orange-gold surfaces that show the expected number of minor contact marks for the grade. Two small, raised die dots are evident, one to the right of the 3 in the date and the other touching the outer point of star 9. Much original mint luster remains intact and eye appeal is strong for the grade. Population: 72 in 61, 27 finer (9/17). NGC ID# 26BH, PCGS# 8999

**1883-CC Double Eagle, MS62+
Lustrous and Fully Struck**

17028 1883-CC MS62+ PCGS. CAC. **Variety 1-B.** This is a much scarcer variety that is characterized by the mintmark positioned approximately between the Y and D of TWENTY DOLLARS and diagonal die lines in the shield on the reverse, and a prominent die line between star 13 and the rim on the obverse. While this CC twenty is known for soft definition, especially on Liberty's hair, that is not the case with this piece where the hair and star radials are sharply rendered. As one would expect, the mint luster is thick and frosted. This reddish-gold example has a few grade-limiting marks, but the overall eye appeal is significant on this popular Carson City double eagle. Population: 23 in 62 (1 in 62+), 4 finer. CAC: 3 in 62, 1 finer (8/17). NGC ID# 26BH, PCGS# 8999

**1884-CC Double Eagle, AU58
Unusually Attractive Surfaces**

17029 1884-CC AU58 NGC. **Variety 1-A.** A touch of rub is all that separates this outstanding near-Mint State twenty from a considerably finer grade. Nearly full luster glows beneath largely unabraded, vibrant orange-gold coloration. Mint frost remains in abundance, too, adding to the exceptional eye appeal. Here is an ideal Type Three Carson City double eagle waiting for the observant cherrypicker. NGC ID# 26BK, PCGS# 9001

**1884-CC Double Eagle, AU58
Original Patina**

17030 1884-CC AU58 NGC. **Variety 1-A.** Only one die variety is identified for the 1884-CC double eagles, with a recorded mintage of 81,139 coins that suggests a second die pair may yet be discovered. The dark patina on the high points of this lustrous example suggests that the surfaces are fully original. A lovely example that exhibits only a trace of wear as the grade indicates. NGC ID# 26BK, PCGS# 9001

**1884-CC Twenty Dollar, AU58
More Available CC Issue**

17031 1884-CC AU58 PCGS. CAC. **Variety 1-A.** The 1884-CC is one of the best-produced issues in the Carson City series. As such, it is frequently used for type purposes. This high-end AU example retains much original luster, especially notable around the stars on the obverse and various devices on the reverse. Light, even reddish-orange color and sharply struck throughout. NGC ID# 26BK, PCGS# 9001

1884-CC Liberty Double Eagle, MS61
In-Demand Branch Mint Type Coin

1884-CC Twenty Dollar, MS61
Brilliant Uncirculated CC-Mint Example

17032 1884-CC MS61 PCGS. Variety 1-A. The 1884-CC Liberty double eagle claims a mintage of 81,139 pieces, which would seem small in most other series, but is actually fairly generous for a Carson City twenty. The coins were released into circulation and few were saved, as there was little numismatic interest in double eagles in general and branch mint issues in particular. As a result, the 1884-CC is an available issue in circulated grades, and lower Mint State pieces are eagerly sought by branch mint type collectors.

The coin offered here is an impressive MS61 specimen, with well-detailed design elements and lustrous orange-gold surfaces that show the expected number of minor contact marks for the grade. The overall presentation is quite attractive. PCGS has graded 84 numerically finer examples (9/17). NGC ID# 26BK, PCGS# 9001

17033 1884-CC MS61 NGC. Variety 1-A. A pair of European hoards repatriated in the 1990s greatly changed the availability of Mint State 1884-CC double eagles, although they remain challenging in attractive Uncirculated conditions. Most of the pieces were sharply struck with frosted luster when leaving the Carson City Mint, picking up numerous small abrasions during transport and storage in mint bags.

This is an impressive MS61 example with pleasing yellow-gold patina and a strong strike. Abrasions are light and widely separated across the thickly frosted surfaces. We note a minor contact in the dentils beneath the date. Eye appeal is terrific, aided by radiant cartwheel luster and a Mint-fresh look. NGC ID# 26BK, PCGS# 9001

**1884-CC Liberty Twenty, MS62
Condition Rarity Any Finer**

17034 1884-CC MS62 PCGS. CAC. Variety 1-A. According to Mint records, 81,139 Liberty double eagles were struck at the Carson City Mint in 1884, a fairly generous production total in the context of the series. As might be expected, the 1884-CC is one of the more available Type Three issues from this facility and a popular choice of branch mint type collectors. The issue does become very scarce at the MS62 grade level, however, and finer specimens are very rare.

This impressive MS62 specimen exhibits sharply detailed design elements and frosty mint luster throughout. The pleasing orange-gold surfaces show a scattering of minor contact marks and luster grazes on both sides, with highlights of rose patina. The overall presentation is most attractive. Population: 78 in 62, 6 finer. CAC: 11 in 62, 3 finer (9/17). NGC ID# 26BK, PCGS# 9001

**1889-CC Double Eagle, AU53
Smooth and Appealing**

17035 1889-CC AU53 PCGS. Variety 1-A. The Carson City Mint struck only 30,945 double eagles in 1889. About Uncirculated coins are available, but Mint State pieces are scarce and usually come with unsightly abrasions. This olive-gold AU coin offers good detail and partially lustrous bronze-gold surfaces with relatively few abrasions. An appealing example of this popular Carson City date. NGC ID# 26BV, PCGS# 9011

**1889-CC Liberty Twenty, AU58
Popular Branch Mint Type Issue**

17036 1889-CC AU58 PCGS. Variety 1-A. A touch of light rub on Liberty's cheek keeps this powerfully impressed piece from an Uncirculated grade. Butter-yellow patina coats both sides, although the color is partly obscured by small patches of verdigris and toning spots on the reverse. Flashy luster in the fields enhances the eye appeal. One of only 30,945 pieces struck at the fabled Carson City Mint.

Ex: *Summer FUN Signature* (Heritage, 6/2008), lot 2338; *Long Beach Signature* (Heritage, 9/2008), lot 4256. NGC ID# 26BV, PCGS# 9011

1889-CC Double Eagle, MS60
Elusive in Mint Condition

17037 1889-CC MS60 PCGS. Variety 1-A. Coinage production at the Carson City Mint resumed in 1889 after a break in operations dating back to 1885. The facility limited output to 30,945 double eagles and 350,000 Morgan dollars upon resumption. Both issues are in ever-strong demand but are especially elusive in high grades. The 1889-CC twenty is very scarce in mint condition. Examples are almost unseen beyond MS62, and even they push the limits of obtainability. This MS60 offering has numerous scattered marks across rose-gold surfaces. Abundant mint frost shimmers over sharply rendered relief elements. NGC ID# 26BV, PCGS# 9011

1890 Twenty Dollar, MS63
Type Three Condition Rarity

17038 1890 MS63 PCGS. The low mintage of just 75,995 pieces makes the 1890 double eagle a Type Three rarity in the Liberty Head series. Frosted, vibrant surfaces on this medium-gold example feature rose and canary-gold highlights. A razor-sharp strike and plentiful cartwheel luster ensure its Select Uncirculated status. PCGS only grudgingly grants a finer grade. Population: 49 in 63, 6 finer (9/17). NGC ID# 26BX, PCGS# 9013

1890-CC Liberty Twenty, AU55+
CAC Green Label

17039 1890-CC AU55+ NGC. CAC. Variety 1-A. A Plus-graded Choice AU specimen from a mintage of 91,209 pieces, this coin exhibits strongly impressed design elements in most areas, but the reverse shows some incomplete detail in the tail feathers, due to lapping. Just a trace of high-point wear is evident, and the lightly abraded orange-gold surfaces remain lustrous and attractive. NGC ID# 26BY, PCGS# 9014

1890-CC Twenty Dollar, MS60
Remarkably Lustrous Surfaces

17040 1890-CC MS60 PCGS. Variety 1-A. The 1890-CC twenty is typically seen with thick mint luster and numerous abrasions from bag-to-bag transfer in Europe over the past 125 years. This piece shows pleasing reddish-gold patina and the mint luster is bright. Many 1890-CC double eagles are not fully struck, but this one displays bold definition over all the design elements on each side. NGC ID# 26BY, PCGS# 9014

1890-CC Double Eagle, MS61
Late Die State

17041 1890-CC MS61 PCGS. Variety 1-A. The 1890-CC Liberty double eagle claims a substantial mintage of 91,209 pieces. As might be expected, the issue is the most available Type Three double eagle from the Carson City Mint and an overwhelming favorite with branch mint type collectors. This attractive Mint State example exhibits strongly impressed design elements, but the reverse shows some missing detail in the eagle's tail, due to lapping. Earlier die states show strong doubling on the reverse, but the doubling is much less evident on this late die state. The pleasing orange-gold surfaces are appropriately marked for the grade and vibrant mint luster radiates from both sides. PCGS has graded 77 numerically finer examples (9/17). NGC ID# 26BY, PCGS# 9014

1890-CC Liberty Twenty, MS62
Clean, Luminous Fields

17042 1890-CC MS62 PCGS. Variety 1-A. This piece is in an early die state with the eagle's tailfeathers intact and minor doubling visible along the top of TWENTY DOLLARS. The 1890-CC as a whole is a plentiful date among Carson City double eagles, even in Mint State. However, demand for Uncirculated coins with decent eye appeal makes them challenging to acquire. The typical piece grades MS62 or lower and is heavily abraded. This MS62 example is relatively clean for the grade. There is an olive-colored contact point on the cheek, but the fields are devoid of serious distractions. The strike is sharp, and each side displays original straw-gold coloration. Eye appeal far surpasses expectations for the grade. Population: 69 in 62 (4 in 62+), 8 finer (9/17). NGC ID# 26BY, PCGS# 9014

1892-CC Liberty Twenty, AU55

17043 1892-CC AU55 PCGS. Variety 1-A. A small mintage of 27,265 Liberty double eagles was accomplished at the Carson City Mint in 1892, but the issue's availability is relatively high today, thanks to several hoards that have surfaced in recent times. This Choice AU specimen shows just a trace of wear on the sharply detailed design elements, and the lustrous surfaces are lightly abraded throughout. NGC ID# 26C6, PCGS# 9020

1892-CC Liberty Double Eagle, AU55
Popular Branch Mint Issue

17044 1892-CC AU55 NGC. Variety 1-A. The 1892-CC Liberty double eagle claims a small mintage of 27,265 pieces and few examples were saved by contemporary collectors, but the issue is only really elusive in high grade. This attractive Choice AU specimen shows the slightest trace of wear on the well-detailed design elements and the lightly abraded orange-gold surfaces are lustrous and appealing. NGC ID# 26C6, PCGS# 9020

1892-CC Twenty Dollar, AU58
Low Mintage of 27,265 Coins

17045 1892-CC AU58 PCGS. Variety 1-A. Fully prooflike when minted, this lightly circulated near-Mint 1892-CC retains a glimpse of its former mirrored fields around the stars, date, and throughout protected areas of the reverse. Attractive orange-gold color adds to the eye appeal. Scattered light abrasions suggest transport and storage in a mint bag (likely overseas), but little, if any, actual wear exists. Eye appeal is above-average for the assigned grade. NGC ID# 26C6, PCGS# 9020

1892-CC Double Eagle, AU58
Original Color, Sharply Defined

17046 1892-CC AU58 PCGS. CAC. Variety 1-A. Abrasions are light and widely separated by smooth areas of unmarked territory throughout the fields of this attractive, near-Mint State Carson City twenty. Natural orange-gold surfaces display plentiful mint luster, along with a small amount of "mint grime" that confirms the surface originality. The strike is sharp including most of the stars, which are sometimes weak for the issue. This is a CAC-endorsed example and deservedly so. NGC ID# 26C6, PCGS# 9020

1892-CC Twenty, MS61
Bright, Lustrous Surfaces

17047 1892-CC MS61 PCGS. Variety 1-A. Only 27,265 pieces were struck of the 1892-CC, all from a single pair of dies. Survivors tend to be high-quality with numerous MS60-61 examples known. Mike Fuljenz wrote about the collectibility of the 1892-CC: "There are some attractive pieces available from time to time, and their relative affordability make them popular with type collectors who are seeking a single choice CC double eagle for their Type Three set." This is a bright, highly lustrous piece that is very well defined in the centers. Numerous small abrasions explain the grade. NGC ID# 26C6, PCGS# 9020

1892-CC Double Eagle, MS61
Attractive High-Grade Example

17048 1892-CC MS61 PCGS. Variety 1-A. The rather small mintage of the 1892-CC double eagle (27,265 coins) was produced by a single die pair. This late-series Carson City issue is usually regarded as scarce in Mint State, but lower-grade Uncirculated coins like the present can be acquired by patient collectors. A hint of reflectivity in the fields is as seen on many examples of the issue, and is here complemented by original rose-gold and tangerine hues, with sharp definition on the design elements. Scattered light abrasions limit the grade. Higher-grade 1892-CC twenties are scarcer than the certified population figures would suggest, appearing at auction quite infrequently. NGC ID# 26C6, PCGS# 9020

1902 Double Eagle, MS62+ CAC
Low-Mintage Issue

17049 1902 MS62+ PCGS. CAC. With a low mintage of 31,140 pieces, the 1902 double eagle has always been popular with collectors, and while Uncirculated examples are not hard to find, one could search for quite some time before finding an example with eye appeal this exceptional. A few scattered marks on both sides explain the technical grade, but flashy surfaces, good coloration, and a lack of any real problems justify the Plus designation. While readily available in MS62, only four pieces have been deemed MS62+, with 92 graded higher (9/17). NGC ID# 26CU, PCGS# 9041

1905 Liberty Twenty, MS62
Low-Mintage 20th Century Issue

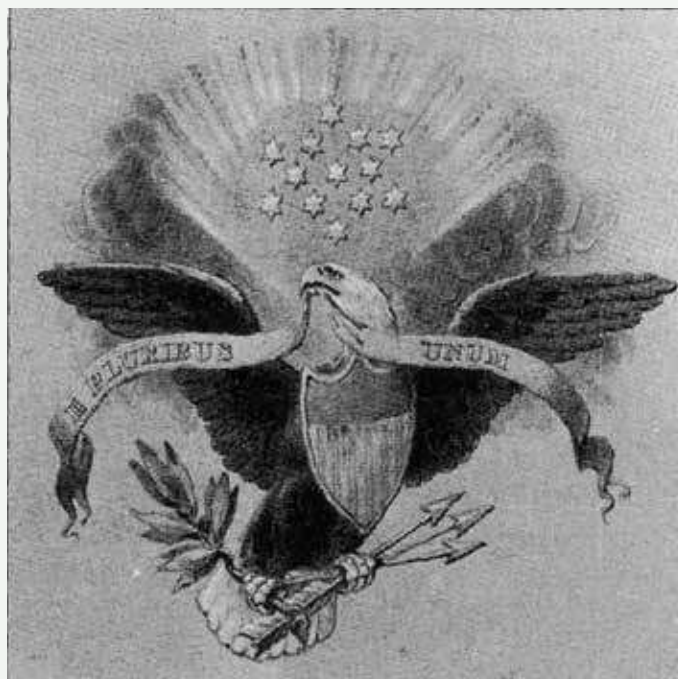

17050 1905 MS62 PCGS. From a mintage of just 58,919 pieces, the 1905 Liberty double eagle is very scarce in grades above the MS62 level. This attractive MS62 example offers well-detailed design elements, with just a touch of softness on the letters in LIBERTY. The pleasing orange-gold surfaces show some scattered, minor contact marks, with vibrant mint luster on both sides. NGC ID# 26D2, PCGS# 9047

1906-S Twenty Dollar, MS64
Rarely Encountered in Higher Grades

17051 1906-S MS64 PCGS. CAC. The 1906 *Mint Director's Report* noted that the catastrophe of April 1906 caused severe damage to San Francisco's gas works, upon which the mint was dependent for its melting and assaying operations. The production of double eagles seems to have been unaffected, however, as a generous mintage of over 2 million coins was accomplished. This near-Gem exhibits vibrant mint frost over peach-gold surfaces. The strike is a bit soft, but marks are minimal. Strong eye appeal. PCGS shows only five numerically finer coins (9/17). NGC ID# 26F6, PCGS# 9051

PROOF LIBERTY DOUBLE EAGLE

1900 Double Eagle, PR66+
124 Pieces Struck, About 50 Survive
Finest Certified Ultra Cameo Example

17052 1900 PR66+ Ultra Cameo NGC. CAC. A fairly generous mintage of 124 proof Liberty double eagles was accomplished in 1900, a large production total in the context of the series, but a small supply in absolute terms. Most of the coins were issued in gold proof sets, but a few individual specimens were produced, as well. The survival rate was slightly below average for gold proofs of this era, as somewhat less than 50% of the mintage can be accounted for today, and a number of coins are known in impaired condition. Still, the number of extant specimens is larger than for most years. Garrett and Guth, writing in their *Encyclopedia of U.S. Gold Coins, 1795-1933* (2006), had the following comments about the issue:

“Although the number of coins known for this date is relatively high for a Proof Liberty Head double eagle, many are impaired or otherwise damaged. There are probably around 50 examples known in all levels of preservation.”

The gold proof sets began appearing at auction at an early date, but proof gold brought only small premiums in the early 20th century. The complete 1900 gold proof set in lot 360 of the David S. Wilson Collection (S.H. Chapman, 3/1907) realized only \$50, to John Zug. This was certainly not a tremendous return on the \$37.50 face value of the coins, plus auction fees, but it was a better result than many others in that era. Some early collectors, or their descendants, simply spent their proof gold coins for face value during hard financial times. Most gold proof sets of this era were broken up long ago, but a few survived intact until recent times. Of course, all U.S. gold became much more valuable after the Gold Recall of 1933, and proof double eagles are among the hottest segments of the market today. The last time the present coin appeared at auction, in lot 1761 of the Mid-Winter ANA Convention Auction (Heritage, 3/2008), it realized a record price of \$143,750.

The coin remains an extremely impressive representative that is unmatched for overall quality at either of the major grading services. As of August 2017, this is the sole example to be certified as PR66+ Ultra Cameo by NGC, with none finer. PCGS has graded no 1900 Deep Cameo proof finer than PR65. The two services combine to certify three PR67 Cameo examples (one at PCGS, two at NGC), but they are not comparable in contrast or mirroring to this stunning coin.

In truth, it would be difficult to overstate the eye appeal of this magnificent Plus-graded Premium Gem. At arm's length it presents a stark gold-on-black appearance, as the intensely reflective fields provide an impressive backdrop for the fully frosted devices. Closer inspection under low magnification reveals that all of the design elements have been reproduced with razor-sharp precision, including the finer details of Liberty's hair and the sometimes incomplete lower details of the eagle. Also noteworthy is the cleanliness of the impeccably preserved surfaces, both on the obverse and the reverse.

This is truly a remarkable coin that seems virtually unimprovable, and would enhance the overall standing of any advanced collection or Registry Set of proof gold coinage. Census: 1 in 66 Ultra Cameo (this coin in 66+), 0 finer. CAC: 1 in 66 (this coin), 0 finer (8/17).

Ex: Phoenix Mid-Winter ANA Signature (Heritage, 3/2008), lot 1761, realized \$143,750. NGC ID# 26EM, PCGS# 99116

SAINT-GAUDENS DOUBLE EAGLES

1908 No Motto Double Eagle, MS67
Ex: Wells Fargo Hoard

17053 1908 No Motto, Wells Fargo Nevada, MS67 NGC. Ex: Wells Fargo Nevada. Some of the finest No Motto Saint-Gaudens double eagles known are pedigreed to the Wells Fargo Hoard, a group of about 19,000 No Motto 1908 coins that laid untouched in a Nevada bank vault since the early 20th century. This Superb Gem example offers frosty, radiant mint luster and well-struck design elements. Unlike most Saint-Gaudens double eagles that spent decades in sealed bags, this piece is devoid of unsightly abrasions. NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142

1910-S Saint-Gaudens Double Eagle, MS65
Condition Rarity in Finer Grades

17054 1910-S MS65 NGC. From a substantial mintage of 2.1 million pieces, the 1910-S Saint-Gaudens double eagle is relatively available in grades up to the MS64 level, but the population drops off in higher grades. This impressive Gem displays well-preserved orange-gold surfaces that radiate vibrant mint luster on both sides, and the design elements are sharply detailed throughout. Census: 75 in 65 (3 in 65+), 10 finer (9/17). NGC ID# 26FH, PCGS# 9156

COMMEMORATIVE SILVER

1928 Hawaiian Half Dollar, MS66+
Key Silver Commemorative

17055 1928 Hawaiian MS66+ PCGS. From a small distribution of 9,958 pieces, the 1928 Hawaiian half dollar is a key issue in the silver commemorative series. This Plus-graded Premium Gem offers sharply detailed design elements and impeccably preserved lustrous surfaces, under attractive shades of sea-green and lavender toning. PCGS has graded four numerically finer examples (9/17). NGC ID# BYGR, PCGS# 9309

1921 Pilgrim Tercentenary Half, MS67+
Lovely Rainbow Toning, Conditionally Scarce

17056 1921 Pilgrim MS67+ PCGS. CAC. The 1921 Pilgrim Tercentenary half dollar is significantly scarcer than its original 1920 counterpart, coming from a distribution of only 20,053 pieces. The date 1921 was added in the left obverse field on the later issue, while the original 1620-1920 dual date was retained on the lower reverse. This high-end Superb Gem is fully struck and beautifully preserved and lustrous. Lovely rainbow toning forms concentric circles around each side, yielding to light champagne centers. Population: 50 in 67 (6 in 67+), 1 finer. CAC: 9 in 67, 0 finer (9/17). NGC ID# BYHS, PCGS# 9360

COMMEMORATIVE GOLD

1915-S Pan-Pac Quarter Eagle, MS66
Frosty and Appealing

17057 1915-S Panama-Pacific Quarter Eagle MS66 NGC. The Panama-Pacific quarter eagle is an available commemorative through MS66, although pieces in this grade command a premium when particularly nice. This piece displays frosty wheat-gold mint luster and bold motifs. No abrasions are discernible on the obverse, and on the reverse only two small ticks in the left field limit the grade. Eye appeal is outstanding. Finer Pan-Pac quarter eagles will be out of reach for a majority of classic commemorative collectors. NGC ID# BYLP, PCGS# 7450

MODERN BULLION COINS

1995-W Silver Eagle, PR70 Ultra Cameo
Low-Mintage Key

17058 1995-W Silver Eagle PR70 Ultra Cameo NGC. From a limited mintage of only 30,125 pieces, the 1995-W Silver Eagle is the acknowledged key to this popular series. The coins were struck for inclusion in the five-piece 10th Anniversary American Eagle proof set, and none were offered individually. The high cost of the set (because of the intrinsic value of the four gold coins) prevented a large distribution, and the 1995-W is understandably elusive today, especially in the ultimate grade of PR70. This fully struck PR70 specimen exhibits technically perfect surfaces, with deeply mirrored fields that contrast profoundly with the frosty design elements. Eye appeal is terrific. NGC ID# CFWX, PCGS# 9887

1995-W Silver Eagle, PR70 Ultra Cameo
Sought-After Key Issue

17059 1995-W Silver Eagle PR70 Ultra Cameo NGC. The 1995-W Silver Eagle has the lowest mintage of the series by a wide margin, at a mere 30,125 pieces. The coins were only offered as part of the five-piece 10th Anniversary American Eagle proof set, which also included a representative of each of the gold denominations issued that year. The \$999 issue price of the set was beyond the means of most collectors, so orders were predictably low, accounting for the limited mintage. The 1995-W is the acknowledged key to the series today.

The present coin is a magnificent, fully struck specimen, with impeccably preserved brilliant surfaces. The richly frosted design elements contrast dramatically with the deeply mirrored fields to produce a stunning cameo effect, and overall eye appeal is terrific. NGC ID# CFWX, PCGS# 9887

**1995-W Silver Eagle, PR70 Deep Cameo
Unusual Low-Mintage Modern Issue**

17060 1995-W Silver Eagle PR70 Deep Cameo PCGS. Among modern bullion issues, low mintages are extremely rare occurrences. Within the entire proof Silver Eagle series, a single issue stands out with a production total of only 30,125 coins: the 1995-W. Struck at West Point for inclusion in special bullion program proof sets, the 1995-W Silver Eagle is without a doubt one of the most sought-after of all modern issues, not just within its native series. Registry Set collectors especially bid generously to acquire top-grade Deep Cameo examples such as this piece. Fully struck design elements exhibit frost-white luster, contrasted against watery mirroring in the fields. The preservation is flawless, and eye appeal is outstanding. NGC ID# CFWX, PCGS# 9887

**Five-Ounce Gold '1876' \$100 Union
Proposed Design Struck 2010
Ultra Cameo Gem Proof**

17061 (2010) "1876" \$100 Gold Union Ultra Cameo Gem Proof NGC. This private issue of the New York Mint was made with five ounces of pure gold, a portion of the revenues earmarked for the Smithsonian Institution. This spectacular piece, based on drawings by Mint engraver George T. Morgan, displays amazing field-to-device contrast. Housed in a custom wood box with associated paperwork.

TERRITORIAL GOLD

C. Bechtler Five Dollar, AU50
128 G, 22 C, K-23, High R.6

17062 (1837-1842) C. Bechtler Five Dollar, RUTHERF. AU50 PCGS. K-23, High R.6. This piece is an attractive, problem-free example with just a few trivial marks on each side. The striking details are excellent, and highpoint wear is minimal. The surfaces have taken on a rich, deep olive-gold color in the fields with contrasting copper-red luster around the devices. Some prooflikeness is observed within the protected areas, making for a pleasing AU example of this scarce Bechtler variety. Listed on page 393 of the 2018 *Guide Book*. Population: 2 in 50, 11 finer (8/17).
Ex: Long Beach Signature (Heritage, 2/2009), lot 3137. NGC ID# 2B9W, PCGS# 10109

1849 Moffat Ten Dollar, AU50
'TEN DOL.' Variant, K-6a

17063 1849 Moffat & Co. Ten Dollar, "Ten Dol." AU50 NGC. K-6a, High R.5. This variety is similar to K-6, but the numerals in the date are larger and, on the reverse, the middle arrow points below the period following GOLD, rather than above it. This piece shows generally good striking quality on the obverse, with typical softness on the reverse eagle. The green-gold surfaces display even high point wear and numerous small hits on each side. Overall, an appealing high-grade example of this rare issue. Listed on page 395 of the 2018 *Guide Book*. Census: 2 in 50, 10 finer (9/17).
Ex: Long Beach Signature (Heritage, 2/2008), lot 2867, where it brought \$7,475. NGC ID# ANJ8, PCGS# 10246

1852 Wass Molitor Ten Dollar, AU58
Large Head, Wide Date, K-4

17064 1852 Wass Molitor Ten Dollar, Large Head, Wide Date AU58 NGC. K-4, R.5. Pointed Bust, Short Neck, Wide Date. Bright greenish-gold surfaces with nearly complete luster and only a trace of wear. The surfaces are lightly abraded, as always on these soft gold coins. This variety is clearly the most plentiful of all the issues of Wass Molitor, and yet perhaps only 50 pieces survive today. Like all examples of this variety, the obverse has a concave appearance while the reverse is weakly defined. In fact, if not for the nearly complete luster on the reverse, it could be argued that that side of the coin only grades Very Fine. This is strictly a result of poor engraving, the obverse die was cut much too deep, and the reverse too shallow. Listed on page 404 of the 2018 *Guide Book*.

Ex: *Great Western Collection of Territorial Gold, Part Two / FUN Signature (Heritage, 1/2006)*, lot 3695, where it brought \$14,950. NGC ID# 33ZM, PCGS# 10348

1854 Kellogg & Co. Twenty, AU55
Short Arrows, K-1a

17065 1854 Kellogg & Co. Twenty Dollar, Short Arrows, K-1a, R.4, AU55 NGC. Kellogg & Co. is centered on the tiara and the reverse arrows are short, identifying the K-1a variety. The Kellogg & Co. twenties were struck to fill local coinage needs at a time when the San Francisco Mint was unable to meet the demand, due to shortages. This attractive Choice AU specimen shows just a trace of wear on the well-detailed design elements and the orange-gold surfaces are lightly abraded, with traces of original mint luster. NGC ID# ANHY, PCGS# 10222

COINS OF HAWAII

1883 Hawaii Ten Cents, MS66
Very Rare Any Finer

17066 1883 Hawaii Ten Cents MS66 PCGS. CAC. From a design by Charles Barber, the San Francisco Mint struck 250,000 ten cent pieces for the Kingdom of Hawaii in 1883. Iridescent shades of ice-blue, lavender, and golden-tan toning blanket the well-preserved surfaces of this impressive Premium Gem. The design elements are well-detailed and eye appeal is outstanding. Population: 14 in 66 (2 in 66+), 2 finer. CAC: 10 in 66, 2 finer (9/17). NGC ID# 2C54, PCGS# 10979

PATTERNS

1859 Half Dollar in Silver, PR66
Judd-245, Pollock-301 (Perfect Ribbon)

17067 1859 Half Dollar, Judd-245, Pollock-301, Low R.6, PR66 NGC. The obverse features the so-called "French Head" of Liberty facing right. In fact, the profile was almost certainly modeled after the Apollo Belvedere statue in Rome. A large eagle with a heraldic shield dominates the reverse. The eagle clutches a ribbon in its beak, and the claws grasp an olive branch and three long arrows. The "Perfect Ribbon" subvariety is characterized by four vertical lines in the shield, seven tail feathers, pointed left (observer's right) wingtip, and full leaf above the A in HALF. Struck in silver with a reeded edge. Irregular patches of deep blue and reddish patina are scattered over each side with moderate reflectivity evident in the fields. NGC ID# 29CS, PCGS# 11988

1865 'With Motto' Seated Dollar in Silver
Judd-434, PR61

17068 1865 Dollar, Judd-434, Pollock-507, Low R.7, PR61 NGC. The obverse die features the standard Seated Liberty motif used on regular-issue dollars from 1865. The reverse die consists of the familiar perched eagle design also used on circulation strikes and proofs from 1865, with the addition of a scroll above the eagle's head with the motto IN GOD WE TRUST. Struck in silver with a reeded edge. Previously said to be a "transitional" issue, this die pairing was undoubtedly struck by the Mint for sale to collectors as part of backdated With Motto coinage that stretched back to 1863. Curiously, two dies were used to strike these dollars in silver. Pieces were also produced in copper and aluminum. The surfaces of this piece shine brightly through the speckled gray-russet toning seen across each side. NGC ID# 26VM, PCGS# 60619

1870 Standard Silver Dime in Aluminum
Judd-865, PR66 Cameo

17069 1870 Standard Silver Dime, Judd-865, Pollock-954, High R.7, PR66 Cameo PCGS. On the obverse, the head of Liberty wears a starless diadem with a plain ribbon encircling her hair. The reverse shows 10 CENTS in the center, surrounded by a thick wreath of oak and laurel. STANDARD SILVER is above at the rim, 1870 below. Struck in aluminum with a reeded edge. Fewer than a half dozen examples are known of this variant. This design was also struck in silver and copper along with the aluminum; all had plain and reeded edge pieces struck. Struck from highly polished dies, the devices show the deep mint frost usually seen on aluminum patterns. Very little is seen in the way of oxidation or other problems inherent in aluminum strikings. PCGS# 800020 Base PCGS# 61109

1873 Trade Dollar Pattern in Copper
Judd-1278, PR66 Red
The Sole Survivor With Intact Red Color

17070 1873 Trade Dollar, Judd-1278, Pollock-1420, R.7, PR66 Red PCGS. The obverse features a distinctive bust of Liberty in profile view to the left, wearing a coronet inscribed LIBERTY. The reverse is almost identical to the Commercial Dollar reverse above, but is inscribed TRADE DOLLAR instead of COMMERCIAL DOLLAR. This is struck in copper with a reeded edge. Struck in silver (plain and reeded edges), copper, aluminum, and white metal. About 10 copper pieces are estimated known today, and this is the only one that has survived with intact mint red luster. The surfaces are just as impressive as one would expect. The color is undimmed by the passage of the years and the red color shows almost no variation in hue. The fields are deeply mirrored and only a few minor specks of carbon can be found. PCGS# 81563

1873 Bailly-Designed Copper Trade Dollar
Judd-1283, PR66 Red and Brown

17071 1873 Trade Dollar, Judd-1283, Pollock-1425, R.7, PR66 Red and Brown PCGS. The obverse, designed by J. A. Bailly, features a coiled hair bust of Liberty facing left. The reverse mimics the 'Amazonian' pattern silver dollar save for a reduction in the size of the eagle and the addition of the motto E PLURIBUS UNUM above and the weight and fineness below. Struck in copper with a reeded edge. Approximately 10 copper strikings are known, all with a reeded edge. There are also silver examples, both reeded and plain edge, and one aluminum piece.

This is a simply phenomenal coin. While the NGC insert states that the coin is Red and Brown, we really do not see any evidence of browning. The fields shimmer with deeply mirrored reflectivity and there is a noticeable amount of mint frost on the devices. It is an essentially flawless coin, sure to be the highlight of any pattern collection or specialized Trade dollar set. Population: 1 in 66 Red and Brown, 1 finer (8/17).

Ex: FUN Signature (Heritage, 1/2003), lot 9932. NGC ID# 2A8D, PCGS# 71568

1878 Goloid Dollar Struck in Goloid
Judd-1557, PR66 Cameo

17072 1878 Goloid Dollar, Judd-1557, Pollock-1749, Low R.6, PR66 Cameo PCGS. Liberty faces left, with cap adorned with wheat ears, cotton leaves and bolls, eponymously inscribed in incuse letters. There are 13 stars ringing the rim, with the Latin motto above and date below. On the reverse the center reads GOLOID / 1—G. / 24—S. / .9 FINE. / 258 GRS. within a circle of 38 stars. UNITED STATES OF AMERICA is above, ONE DOLLAR below. Struck in goloid alloy with a reeded edge. At one time this particular coin was metallurgically tested and the results were: 89% silver, 5% gold, and 5% copper. In other words, this piece is really struck in goloid alloy, not coin silver. Approximately two dozen examples exist, but confusion between goloid composition and coin silver (Judd-1558) has led to confusion about the relative rarity of each. This is the only piece we are aware of that has tested as goloid. It is also the sole PCGS-certified Judd-1557 that has received a Cameo designation. The fields display remarkable depth of mirrored reflectivity with frosted devices. Light golden toning covers the obverse, while the reverse is also golden with light lilac patina intermixed. Virtually flawless surfaces. NGC ID# 2AFA, PCGS# 412466 Base PCGS# 61919

1880 Metric (Goloid) Dollar in Copper
Judd-1649, PR66 Red and Brown

17073 1880 Metric Dollar, Judd-1649, Pollock-1849, R.7, PR66 Red and Brown PCGS. George T. Morgan's Liberty Head design as also on Judd-1622-1625. Liberty's hair is done up in a bun, with a ribbon inscribed LIBERTY in incuse letters, the Latin motto above, stars seven left, six right. The reverse offers a wreath of cotton and wheat, with inner circle of dots enclosing 895.8 S. / 4.2—G. / 100—C. / 25 GRAMS. DEO EST GLORIA ("God is glory / To God be the glory") appears in a cartouche, with UNITED STATES OF AMERICA and ONE DOLLAR at the rim. Struck in copper with a reeded edge. Designed to be a part of goloid compositional test coins, it is not known if any pieces actually exist in that alloy. This, of course, was never intended to even simulate goloid. The copper surfaces are called Red and Brown, but in reality the red luster is only slightly mellowed. This example should please collectors of both Red and Red and Brown copper patterns. No noticeable or mentionable contact marks are seen on either side. NGC ID# 2AJ7, PCGS# 72034

1880 Metric Dollar in Aluminum
Judd-1650, PR65 Cameo

17074 1880 Metric Dollar, Judd-1650, Pollock-1850, Low R.7, PR65 Cameo NGC. Metric dollar pattern designed by George Morgan, featuring a bland, rarely seen head of Liberty. Her hair is brushed back, and fastened in a bun with a wide ribbon at the top of the head. The reverse is the standard Metric dollar design with DEO EST GLORIA featured prominently above the composition in the center. Struck in aluminum with a reeded edge. Examples were struck in silver or goloid, copper, and aluminum. Only a half dozen pieces are known in aluminum today. This is a bright, unoxidized piece that shows dramatic field-device contrast on each side. The surfaces also show numerous cracks that appear to have been created from excessive striking pressure. Among the finest known of this aluminum rarity. NGC ID# 2AJ8, PCGS# 62035

1880 Flowing Hair Stella, Proof AU Details
Judd-1658, Pollock-1858, Gilt Copper
A Little More Than a Dozen Pieces Extant

17075 1880 Judd-1658 Gilt, Pollock-1858, High R.6 — Cleaned — PCGS Proof Genuine. AU Details. The Flowing Hair design by Charles Barber. Struck in copper with a reeded edge. This piece, like several other stellas struck in metals other than gold, has been gilt. Much has been written about the four dollar stella, a lot of it speculative. We know the 1879 Flowing hair variety was distributed to members of congress as a potential international trade coin, but the reasons for striking the 1879 Coiled Hair and both 1880 versions are less clear. It is likely that 1880 Flowing Hair and Coiled Hair stellas were struck in gold simply to have on hand for collectors. Additional patterns in copper and aluminum were possibly distributed as cheap samples for various Treasury officials. *USPatterns.com* reports a little over a dozen examples are known in copper, compared to about 20 gold representatives.

This four dollar stella was possibly carried briefly as a pocket piece; both sides show trace amounts of friction. The gilt surfaces were cleaned at some point, deepening the color and exposing coppery undertones. A few scattered marks in the left obverse field will identify this rarity in future appearances.

1942 Experimental Cent, MS65
Brown Plastic Composition, Judd-2060

17076 1942 Cent, Judd-2060, Pollock-4035, Low R.7, MS65 NGC. Created as a part of the war effort to divert precious metals from coinage to wartime materiel. Compression molded in dark brown plastic with a plain edge. Made by Durez Plastics with slightly textured surfaces. Later strikes show evidence of a partially clogged mold, the lack on this piece indicating this was an earlier striking. The surfaces are deep, even reddish-brown. The reverse is widely rotated relative to the obverse. NGC ID# 2ANA, PCGS# 12215

SO-CALLED DOLLAR

1933 Pedley-Ryan So-Called Dollar, MS64
Type VII, HK-828

17077 1933 Pedley-Ryan Dollar, Type VII, HK-828, R.7, MS64 NGC. Silver, 40 mm. The Pedley-Ryan dollars were struck by the Pedley-Ryan firm of Denver, Colorado in 1933, at the height of the Great Depression. Several varieties are known, all containing one ounce of pure silver. This piece represents the final variety, Type VII, HK-828, which was die-struck and advocated a bimetallic standard with a gold-to-silver ratio of 16-1. Only 50 examples were struck, making the issue very rare today. This attractive Choice specimen is well-detailed and well-preserved, with ample eye appeal. Census: 4 in 64, 3 finer (9/17). NGC ID# 2F8A, PCGS# 643564

INDIAN PEACE MEDAL

1850 Millard Fillmore Indian Peace Medal in Silver
Hand-Engraved to Chief Maungwudaus
Dated 1851

17078 1850 Millard Fillmore Silver Indian Peace Medal. 76 mm.

Julian IP-30. Presented to Chief Maungwudaus of the Chippewa as attested to by the hand-engraving in the left and right obverse fields: PRESENTED TO CHIEF / MAUNGWUDAUS / OCTOBER 10, 1851. Maungwudaus, also known as George Henry, was born around 1811 on the northwest shore of Lake Ontario. We were unable to find a date of death, but the last published mention of him was in 1877 when he participated in a canoe race, finishing second. He was one of eight children born to Sarah Henry and Chief Mesquacosy. Sarah was the first Mississauga woman to be baptized a Methodist. Maungwudaus and several other Indians formed a dance troupe and performed in northeast America, and then traveled to London, Paris, Dublin, Glasgow, and Edinburgh. Several members of the troupe died from smallpox while on this European trip.

The medal is silver and holed at the top for suspension, the oval loop still remains. The medal has numerous scuffs and abrasions, as one would expect for an authentic Peace Medal that was worn. It is also slightly bent. Beginning with Fillmore, Peace Medals changed the reverse from the previous PEACE AND FRIENDSHIP handshake design to the more instructive LABOR VIRTUE HONOR motif. This radical departure featured a settler pointing to an oversized U.S. flag instructing the Native American about the virtues of civilization. As Julian wryly notes: "The raging Indian wars of the past century would seem to show that not all got the message." Engraved by Salathiel Ellis (obverse) and Joseph Willson (reverse). Precise numbers are elusive of the Fillmore medal. Prucha states 119 large (76 mm) and 162 small (62 mm) were produced. Of these, 25 large and 40 small were melted for use in the Franklin Pierce medals.

End of Session Two

SESSION THREE

EARLY HALF DOLLARS

1794 O-101 Flowing Hair Half, Good Details

17079 1794 O-101, T-7, High R.3 — Improperly Cleaned — NCS. **Good Details.** Tompkins Die State 1/2. Already heavily worn, this 1794 half is somewhat bright as well from a past cleaning. The date is only faintly readable and the lower-right stars fade into the border. Likewise, the eagle is a ghostlike from wear on the reverse, although the legend and rim remain well-defined. The surfaces of this O-101 half have recovered with golden-gray patina throughout both sides, although a few light hairlines persist from the old cleaning.

1794 O-105 Half Dollar, VG Details

17080 1794 O-105, T-3, R.5 — Tooled, Improperly Cleaned — NCS. **VG Details.** Tompkins Die State 1/3. An area of smoothing in the upper-right obverse field and a subsequent cleaning support the NCS Details grade. Small pits and light lines exist randomly throughout the otherwise smooth surfaces. Pleasing golden-gray toning deepens at the margins. Slight weakness at the right-hand stars exists, and loss of definition at the upper reverse is the result of die sinking. This is a reasonable example of the scarce 1794 O-105 variety, despite the noted problems.

1795 Two Leaves Flowing Hair Half, O-104 Lightly Toned, XF Sharpness

17081 1795 Two Leaves, O-104, T-24, R.4 — Repaired — PCGS **Genuine.** **XF Details.** Tompkins Die State 3/3. The 7 in the date is repunched at the top-right of the numeral, and the M in AMERICA shows broad repunching. This is a silver-gray example, lightly hairlined with moderate adjustment marks on the reverse. A single area of repair is not readily visible, but fine hair-thin signs of tooling are apparent with magnification. Faint olive-gold toning adds a measure of appeal to the well-struck surfaces.

1795/1795 Flowing Hair Half, VF20 O-111, Sole 3 Leaves Die Pair

17082 1795/1795 3 Leaves, O-111, T-19, High R.4, VF20 NGC. Tompkins Die Stage 1/3. The dramatic, 1795/1795 overdate appears on both the O-111 and O-112 varieties, but only O-111 pairs it with the distinctive and highly desired Three Leaves reverse. Characterized by a bold, curving die break and sinking of the lower-left quadrant of the reverse, the three-leaves feature and adjacent motifs are always higher in grade than the surrounding, more-exposed surfaces. Original, attractive examples such as this coin are seldom available. Each side is original with varying shades of silver-gray patina. Sharply detailed and appealing, the most noticeable marks include a toned-over scrape in the field near Liberty's forehead and some light adjustment marks in the upper obverse fields and margins.

Ex: Houston Signature (Heritage, 12/2014), lot 3578; New York Signature (Heritage, 10/2015), lot 3244. NGC ID# 24E7, PCGS# 39245 Base PCGS# 6053

1795 Half Dollar, VG8 Two Leaves, Small Head, O-126a

17083 1795 2 Leaves, Small Head, O-126a, T-22, High R.4, VG8 NGC. Tompkins Die Stage 1/2. The B in LIBERTY is repunched, star 15 points above the bust tip, and the Two Leaves reverse has berries arranged 9x8. This is a late die state example with a crack through the E in UNITED. T-22 represents the first use of a new master obverse die created by Chief Engraver Robert Scot. This well-worn half dollar has steel-gray surfaces overall with elements of golden patina over the central motifs. The date and legends are clear. NGC ID# 24E7, PCGS# 39248 Base PCGS# 6054

17084 1795 2 Leaves, O-131, T-9, High R.4, Fine 15 NGC. Tompkins Die Stage 1/2. For the specialist, here is a Choice Fine example of the very scarce Overton-131 variety with reverse berries placed seven left by nine right. The leaf touches the M in AMERICA. Each side has attractive, violet-gray patina, with some merging of the finer design elements. Numerous file marks on the reverse are somewhat softened by wear. NGC ID# 24E7, PCGS# 39243 Base PCGS# 6052

**1801 Half Dollar, AU Details
O-102, T-1, Sharp Definition**

17085 1801 O-102, T-1, High R.4 — Repaired — PCGS Genuine. AU Details. Tompkins Die Stage undetermined. Two varieties are known for the 1801 half dollar, Overton-102 being scarcer. The absence of a raised die defect below the N in UNITED confirms the attribution. Steel-gray surfaces show signs of untold repairs, from smoothing in the fields to a possible plug right of (STATE)S. Most glaring is an attempt to repair the right obverse border. Those flaws aside, design detail is much sharper than usual.

17086 1803 Large 3, Large Reverse Stars, O-103, T-3, R.3, VF30 PCGS. CAC. Tompkins Die Stage 2/1. A die crack travels through LIBERTY, and clash marks appear at the ear. This is an evenly circulated Draped Bust half dollar with original battleship-gray patina. Liberty's curls retain good detail, as do the wings, shield, and tailfeathers. NGC ID# 24EF, PCGS# 39273 Base PCGS# 6066

17087 1803 Small 3, Large Reverse Stars, O-104, T-4, R.3, VF30 PCGS. CAC. Tompkins Die State 2/2. The scarce Overton-104 is the only Small 3 Bust die marriage. The present evenly circulated CAC-endorsed representative has cream-gray high points and gunmetal fields. One thin mark is noted near the T in UNITED, yet the surfaces are otherwise largely unabraded. This is a well-defined example for the grade, with only minor weakness at the eagle's head and field stars. NGC ID# 24EF, PCGS# 39274 Base PCGS# 6067

**1803 Draped Bust Half Dollar, AU50
O-104, Small 3 Variant**

17088 1803 Small 3, Large Reverse Stars, O-104, T-4, R.3, AU50 NGC. Tompkins Die State 2/3. This attractive, Small 3 example displays deep cobalt-blue and mauve-gray toning intermixed over each side, with some underlying brightness and iridescence. The coin is virtually free from any relevant abrasions. As the only 1803 Small 3 die marriage, Overton-104 receives its own *Guide Book* listing. There are currently only a handful of Uncirculated examples of the variety, making any About Uncirculated representative a notable bidding opportunity when it crosses the block. NGC ID# 24EF, PCGS# 39274 Base PCGS# 6067

**1805/4 O-102 Half Dollar, VF35
In-Demand *Guide Book* Variety**

17089 1805/4 O-102, T-5, R.3, VF35 PCGS. Tompkins Die State 1/2. The Overton-102 variety is well-liked by collectors for the blatant underlying 4 beneath 5. This is a Choice mid-grade example, with silver-gray toning on the elevated areas and lovely bluish-gray patina throughout the surrounding areas. Traces of mint luster remain. Only minuscule marks exist and they are few in number, giving this nicely defined VF coin irresistible collector appeal. Population (All 1805/4 varieties combined): 32 in 35, 70 finer (9/17). NGC ID# 24EH, PCGS# 39292 Base PCGS# 6070

**1805/4 O-102 Half Dollar, XF40
Bold Underdigit 4**

17090 1805/4 O-102, T-5, R.3, XF40 PCGS. Tompkins Die State 1/3. Deep lavender-gray and golden-brown toning encompasses this moderately circulated and minimally marked half dollar. The underdigit 4 is obvious, since its base, stand, crosslet, and left corner are all partially present. A tiny lamination near the arrows is of mint origin, and a small obverse spot at 5 o'clock provides an identifier. NGC ID# 24EH, PCGS# 39292 Base PCGS# 6070

17091 1805 O-105a, T-12, R.6, Fine 12 PCGS. CAC. Overton-105 is a rare variety overall, but this late die state variant is even rarer. A die crack appears above the ITE in UNITED, and a heavy rim cud tops the ATE in STATES. Both sides are evenly worn with outstanding original coloration and a mild circulation cameo appearance. Some blue and green toning graces the lower-left reverse border, but the remainder of the coin is gray. NGC ID# 24EG, PCGS# 39278 Base PCGS# 6069

17092 1805 O-111, T-3, R.2, XF40 PCGS. The "collar" clash mark and extended stem on the olive branch identify the O-111 variety. This pleasing XF specimen exhibits only light wear on the strongly impressed design elements and the lightly abraded surfaces are blanketed in shades of lavender-gray toning. NGC ID# 24EG, PCGS# 39285 Base PCGS# 6069

17093 1806 Knob 6, Small Stars, O-106, T-4, R.4, VF30 PCGS. CAC. Tompkins Die Stage 1/1. There are 30 known die pairs for the 1806 half dollar. On this one, the 1 is mostly right of the curl, and the leaf tip points between CA in AMERICA. Each side features violet and cream-gray patina with golden accents. Boldly impressed and high-end for the VF30 grade. NGC ID# 24EJ, PCGS# 39306 Base PCGS# 6075

**1806 Half Dollar, AU50
O-109, Pointed 6, No Stem**

17094 1806 Pointed 6, No Stem, O-109, T-15, R.1, AU50 NGC. The Pointed 6 logotype and the absence of a stem through the eagle's claws identify the variety. This AU example is in the early die state before a radial cracks develops from the rim through star 12. Satiny pewter-gray surfaces show a hint of light champagne toning and have little high-point wear. An outstanding Draped Bust type coin. NGC ID# 24EJ, PCGS# 39310 Base PCGS# 6073

**1806 Half Dollar, O-109, AU53
Pointed 6, No Stem, Draped Bust Type Coin**

17095 1806 Pointed 6, No Stem, O-109, T-15, R.1, AU53 PCGS. This Pointed 6, No Stem half dollar enjoys strong remaining detail on the hair curls and wing feathers. Definition is slightly softer on the eagle's head, neck, and tailfeathers. Champagne-gold and steel-gray patina covers relatively smooth, minimally marked surfaces that radiate partial luster from the recesses. A great problem-free Draped Bust type coin. NGC ID# 24EJ, PCGS# 39310 Base PCGS# 6073

17096 1807 Draped Bust, O-102, T-8, R.2, XF45 PCGS. Tompkins Die State 2/2. This Choice XF specimen shows some light wear, but the lines in the drapery remain sharp. Only minor abrasions are evident, with a slight rim bruise at 5 o'clock on the reverse. Both sides display a few traces of original mint luster. NGC ID# 24EM, PCGS# 39339 Base PCGS# 6079

**1807 Draped Bust Half Dollar, AU53
O-102, Luster Remains**

17097 1807 Draped Bust, O-102, T-8, R.2, AU53 NGC. Tompkins Die State 2/2, an early to middle state of the dies. Aquamarine and gold toning at the margins yields to stone-gray patina on the obverse, but the reverse is more comprehensively toned in the same colorful shades. All of the motifs retain sharp definition despite numerous light marks and slight wear from circulation. Overton-102 is a readily available Draped Bust die marriage, and favored among type collectors for that reason. NGC ID# 24EM, PCGS# 39339 Base PCGS# 6079

**1807 Draped Bust Half Dollar, AU53
Extensively Cracked O-109a**

17098 1807 Draped Bust, O-109a, T-2, R.3, AU53 PCGS. Both dies of the 1807 O-109 family are plagued by cracks and other failures. The obverse has breaks running from the date left through the stars, from the rim through most of LIBERTY, and through the date and bust. Both sides have weak centers due to incipient die failure. The reverse die crack distinguishing O-109a from O-109 can just be seen from the tip of the left wing to the first T of STATES. These must be graded by the struck-up detail, which shows this to be a well-preserved AU rather than the worn coin it may at first appear to be. NGC ID# 24EM, PCGS# 39350 Base PCGS# 6079

BUST HALF DOLLARS

17099 1808 O-102a, R.2, AU55 NGC. The later die state of Overton-102, showing a bisecting vertical die crack on the obverse. Peripheral die cracks are also present on the reverse. This partially lustrous Choice AU representative displays original mint-green, yellow-gold, lavender, and blue toning. Slight high-point wear does not affect the visual appeal. NGC ID# 24EP, PCGS# 39363 Base PCGS# 6090

17100 1808 O-103, R.1, AU55 PCGS. The AM in AMERICA are joined at the bases on this plentiful type-coin variety. The Choice AU detail are well-defined, and some satiny luster remains on each side. Lavender and golden-gray toning on each side complements rather smooth surfaces. NGC ID# 24EP, PCGS# 39364 Base PCGS# 6090

17101 1808 O-104, R.2, AU55 PCGS. Substantial mint luster remains in most of the protected areas of this Choice About Uncirculated example, and the strike is sharper than often seen on the central portrait and eagle's head. Marks are minimal on either side. The O-104 variety displays several diagnostic die lines — one above R in LIBERTY, another at Liberty's hair ribbon, and a long, wavy die line from the upper branch stem to a lump below the eagle's claw. This is a sharp and attractive representative of John Reich's design. NGC ID# 24EP, PCGS# 39365 Base PCGS# 6090

17102 1809 Normal Edge, O-103, R.1, AU58 NGC. A small tine off of star 5 and rotation of the M in AMERICA identify this available Overton variety. Luster remains in the protected portions of the fields, and each side has delicate champagne toning. Light high-point friction hardly affects the design sharpness. NGC ID# 24ES, PCGS# 39392 Base PCGS# 6092

17103 1811/10 O-101, R.1, AU53 PCGS. Sea-green and deep lavender-gray toning surrounds the borders on this About Uncirculated overdate half dollar, leaving the interiors with tan-gold color. The left-hand stars are weakly struck, but the central devices show pleasing definition. Some luster remains in the protected regions of the fields. NGC ID# 24EV, PCGS# 39421 Base PCGS# 6099

17104 1811 Large 8, O-104a, R.1, AU58 PCGS. Obverse die cracks make attribution relatively straight-forward. The later state of O-104 is much more available than its earlier, crack-free counterpart. Luster shines through translucent gunmetal-blue and gold patina. The overall impression is good, though large border sections lack dentils and the middle curls are a touch soft. NGC ID# 24EU, PCGS# 39426 Base PCGS# 6096

17105 1812 Large 8, O-105a, R.2, MS61 NGC. This lustrous almond-gold half dollar has a crisp strike despite minor blending on the high points of the curls. Unabraded aside from a few faded marks on Liberty's neck. Double clashed with several spindly obverse die cracks.

Ex: *New York Signature (Heritage, 3/2012)*, lot 3402. NGC ID# 24EW, PCGS# 39450 Base PCGS# 6100

17106 1813 50 C Over UNI, O-101, R.2, AU53 NGC. A trace of an inverted UNI is visible at the denomination, which is diagnostic for this variety. There are also prominent clashmarks on both sides, and several outlines of a retrograde LIBERTY are visible beneath the eagle's right (facing) wing, which indicates that the dies clashed on more than one occasion. Mottled deep gray and brown toning covers both sides of this interesting specimen. The stars on the right are sharply struck, while the left stars are weak, as usual. The same pattern of softness is noted on the eagle's wings, but the rest of the details are well-defined. A couple of marks on each side are masked by the dramatic toning.

Ex: *Long Beach Signature (Heritage, 9/2008)*, lot 2058. NGC ID# 24F2, PCGS# 39473 Base PCGS# 6104

17107 1813 50C Over UNI, O-101a, R.4, AU53 PCGS. A silver-gray example of this popular *Guide Book* variety, struck from a late state of the reverse die with the olive stem weakened and dentils lost to die lapping. Pale-gold toning adds appeal to the softly lustrous silver-gray surfaces, with some deep-gray patina at the right edge of the scroll and at the lower-left reverse. Traces of UNI exist where the engraver (John Reich, his eyesight failing) at first started the first few letters of UNITED at the bottom arrowhead, instead of above the eagle's wing tip. Population: 13 in 53, 52 finer (9/17). NGC ID# 24F2, PCGS# 39474 Base PCGS# 6104

17108 1813 O-106a, R.2, MS61 NGC. The later die state variant, showing a crack through UNITED STATES, heavy clash marks, and moderate metal flowlines at the borders. Most stars and the central devices are well brought up, although the border dentils are weakened by die wear in some places. Partially lustrous surfaces show olive-gray and russet toning. NGC ID# 24EZ, PCGS# 39466 Base PCGS# 6103

17109 1814/3 O-101a, R.2, AU53 PCGS. Both dies had seen better days by the time this example was struck, as each is heavily cracked and clashed, including the "underline" of UNITED that defines O-101a. Quicksilver luster has blue and gold overtones. The reverse is rotated about 45 degrees counterclockwise. NGC ID# 24F4, PCGS# 39488 Base PCGS# 6106

1814/3 Half Dollar, Choice AU O-101a, *Guide Book* Overdate Variety

17110 1814/3 O-101a, R.2, AU55 NGC. The sole 1814/3 die marriage, this popular *Guide Book* variety plainly features the upper crossbar of an underdigit. The left border of the shield is somewhat soft, as is URI in PLURIBUS, but the strike is otherwise sharp. Tan and gunmetal-gray colors accompany generally smooth surfaces. Struck from cracked and prominently clashed dies.

Ex: *FUN Signature (Heritage, 1/2006)*, lot 2653. NGC ID# 24F4, PCGS# 39488 Base PCGS# 6106

1814 Half Dollar, AU58 O-107, Sharp Detail

17111 1814 O-107, R.2, AU58 PCGS. Die lines appear in the field between Liberty's curls and stars 10-11. The N in UNITED is partly filled. Sets of triple clash marks occur on both sides. Liberty's portrait detail, and the eagle's wingtips and talons are needle-sharp. Grade-limiting friction is nearly indiscernible. Still-lustrous and lightly toned with blushes of steel-blue. NGC ID# 24F3, PCGS# 39484 Base PCGS# 6105

17112 1817 O-109, R.2, MS61 ANACS. Overton-109 shows recutting on the O in OF and the C in AMERICA. Virtually every device is fully struck, except for the eagle's talons and the branch stem. This softly lustrous Bust half dollar features occasional light blue patina. Housed in an early generation, small-sized holder. NGC ID# 24F6, PCGS# 39501 Base PCGS# 6109

17113 1818/7 Large 8, O-101, R.1, AU50 PCGS. This early die state example has no evidence of the reverse die crack eventually appearing through 50 C and the olive leaves. Attractive pewter-gray surfaces exhibit light champagne toning at the borders. NGC ID# 24FA, PCGS# 39540 Base PCGS# 6115

17114 1818/7 Large 8, O-101, R.1, AU55 NGC. The remnants of an undertype 7 are visible below the final 8 in the date and there is a gap in the dentils below C in the denomination, identifying the O-101 variety. The golden-gray surfaces of this Choice AU specimen are lightly abraded and only a touch of wear is evident on the devices. NGC ID# 24FA, PCGS# 39540 Base PCGS# 6115

17115 1818/7 Small 8, O-102, R.2, AU50 PCGS. The early die state variant, without the filling in the upper loop of the final 8. This lavender-gray AU coin displays rose and powder-blue peripheries that produce strong eye appeal across the smooth surfaces. Detail is sharp for the grade. A couple of old pinscratches on the lower eagle are seen under a loupe but evade the unaided eye. NGC ID# 24FA, PCGS# 39536 Base PCGS# 6114

1818 Half Dollar, O-107, MS62+ Concentric Multicolor Toning

17116 1818 O-107, R.1, MS62+ PCGS. CAC. Diagonal die lines within the TY of LIBERTY readily identify this variety. This piece displays blended green-gold and ocean-blue peripheral toning around dusky lavender-gray centers, with softly frosted underlying mint luster. The design elements are well-impressed, with the only mentionable surface flaw being an old, thin scratch near Liberty's forehead, which is not immediately obvious. NGC ID# 24F9, PCGS# 39523 Base PCGS# 6113

17117 1822 O-106, R.3, AU58 PCGS. A lightly worn, lightly abraded near-Mint specimen of this popular Bust half dollar, with still-lustrous surfaces under attractive shades of golden-brown and magenta toning. The die crack through the wingtip and UNITED STA that characterizes the later die state of this issue (O-106a) is in its earliest stages here. NGC ID# 24FG, PCGS# 39591 Base PCGS# 6129

17118 1823 O-106, R.3, AU58 PCGS. The 3 in the date does not yet show the tampering that appears in later states, when Mint officials attempted to strengthen the link between the upper and lower portions of the digit. The first vertical in the fifth shield stripe is disconnected from the border. Lustrous, minimally toned centers merge with eye-catching multicolor patina around the margins. Small abrasions do not distract. PCGS# 39609 Base PCGS# 6131

17119 1826 O-116a, R.1, MS63 NGC. The obverse is cracked through the stars and the reverse is cracked through the legend and denomination on this Select Mint State half dollar. Both sides are fully lustrous with satin surfaces beneath splendid gray and iridescent toning. NGC ID# 24FM, PCGS# 39688 Base PCGS# 6143

17120 1827 Square Base 2, O-140, High R.4, AU55 PCGS. CAC. The central line of the third vertical shield stripe extends upward into the horizontals. Blatantly original surfaces exhibit olive-gold patina around the edges and attractive steel-gray centers. Strongly struck with a hint of softness on the clasp and neck feathers. Minimal friction. NGC ID# 4845, PCGS# 39739 Base PCGS# 6144

**1828 Half Dollar, O-113, MS64
Square Base 2, Small 8s, Large Letters**

17121 1828 Square Base 2, Small 8s, Large Letters, O-113, R.3, MS64 PCGS. Struck from a late die state, with the stars drawn to the edge. The diagnostics for Overton-113 are tricky. The main pick-up point is gule 6 of the vertical shield stripes, which shows divergent lines at the top — a characteristic shared by the O-114 and O-123 varieties that have the same reverse. The present O-113 is a Choice Uncirculated example that is tied for second in the Condition Census for the variety. Lustrous reddish-gold toning covers both sides, while orange and blue accents add eye appeal. The strike is sharp overall, with only minor incompleteness in the area of Liberty's clasp. NGC ID# 24FR, PCGS# 39767 Base PCGS# 6151

17122 1829/7 O-101, R.1, AU58 PCGS. The bold overdate and the tine that extends off the apex of the shield confirm the O-101 attribution. Soft, shimmering luster blankets this virtually untuned, minimally marked near-Mint half dollar. The reverse displays a couple of alloy spots and flecks of deep coloration. NGC ID# 24FT, PCGS# 39807 Base PCGS# 6155

17123 1829 Small Letters, O-104a, R.3, MS62 NGC. The upright of the 5 in the denomination is recut, and A1 and A2 on the reverse are filled. This Uncirculated 1829 half dollar is brightly lustrous and virtually untuned. Hints of red-violet patina occur near the obverse border. The devices are well-struck. Scattered wispy marks define the grade. NGC ID# 8YZT, PCGS# 39783 Base PCGS# 6154

**1829 Half Dollar, MS64
O-112a, Small Letters**

17124 1829 Small Letters, O-112a, R.2, MS64 NGC. The die lines below star 13 are effaced by die lapping in this late state. The coin is brilliant and semiprooflike with a sharp strike and minimal abrasions. Both sides show well-defined, complete border dentils. All varieties included, the 1829 half dollar is collectible through MS64 but is scarce finer. This piece is an excellent type coin candidate. NGC ID# 24FS, PCGS# 39796 Base PCGS# 6154

**1831 Half Dollar, O-103, MS64
Fully Struck and Richly Toned**

17125 1831 O-103, R.1, MS64 PCGS. The 5 in the denomination is recut on the outside of the upright, the primary pick-up point for the O-103 variety. This richly toned Choice Uncirculated example displays a full strike and exceptional technical quality. Coppery-gold luster exists beneath gunmetal-gray toning that deepens to grayish-blue at the margins. It sits just outside the Condition Census for the variety according to Donald Parsley and Stephen Herrman references (9/17). NGC ID# 24FV, PCGS# 39839 Base PCGS# 6159

**1831 O-110 Half Dollar, MS64
Lavender and Rose Accents**

17126 1831 O-110, R.2, MS64 PCGS. Attractive lavender and rose toning adds interest to the smooth and lustrous silver-gray surfaces of this Choice O-110. The strike is sharp but not full, lacking some definition on Liberty's cap and drapery folds, as well as at the scroll and AT of STATES, characteristic of the variety. Few marks exist to disturb the near-Gem Uncirculated quality of this original and highly appealing Bust half. NGC ID# 24FV, PCGS# 39846 Base PCGS# 6159

REEDED EDGE HALF DOLLARS

17127 1836 Reeded Edge, GR-1, R.2 — Scratch — PCGS Genuine. XF Details. There are numerous shallow scratches in the obverse fields that prevent a numeric grade, although lavender-gray, sea-green, and gold toning masks them to the unaided eye. The reverse is problem-free with traditional golden toning. Both sides show good detail and little wear.

17128 1838 GR-15, R.3, MS61 NGC. This is a sharply struck Reeded Edge type coin, showing satiny luster with a trace of light golden color atop the silvery-white surfaces. Scattered light abrasions limit the grade, but there are no individually distracting faults. NGC ID# 24G5, PCGS# 531096 Base PCGS# 6177

17129 1839-O GR-4, R.4, XF40 NGC. Ex: Jules Reiver Collection. From an early state of the dies, with the reverse rotated 180 degrees. This lightly abraded XF specimen exhibits some light wear on the design elements, with LIBERTY bold and much interior detail on the hair still intact. NGC ID# 24G7, PCGS# 531109 Base PCGS# 6181

SEATED HALF DOLLARS

17130 1846-O Tall Date, WB-106, Die Pair 26, R.4, VF35 PCGS. Tall Date examples are scarcer than those with a Medium Date. A raised die dot appears left of the foot in S(TATES). Both sides are mostly silver-gray with golden-russet border accents. The devices exhibit typical detail for a circulated New Orleans coin. NGC ID# 24H9, PCGS# 572053 Base PCGS# 6256

17131 1853 Arrows and Rays, WB-101, MS62 NGC. The one-year Arrows and Rays type is collectible in Mint State and always popular with collectors. This brilliant example is in a late state with considerable cracking and clashing throughout, particularly on the reverse. Strike detail is incredibly sharp on that side, and slightly softer at the upper obverse. NGC ID# 24JJ, PCGS# 572085 Base PCGS# 6275

17132 1855-S Arrows, WB-101, Die Pair 1, R.5, Fine 12 PCGS. The existence of several chop-marked 1855-S half dollars suggests that much of the small, 129,950-piece mintage may have been lost to the China trade. Circulated examples of this San Francisco date are scarce in all conditions, and the present example is a seldom-seen survivor. Moderate wear across the obverse defines the grade, where LIBERTY is weak at the central letters, scroll, and shield bottom. Some dark build-up surrounds the portrait and a few of the stars. Population (all varieties combined): 10 in 12, 64 finer (9/17). NGC ID# 24JR, PCGS# 572091 Base PCGS# 6284

17133 1863-S Small Broken S, WB-102, Die Pair 4, R.3, MS62 PCGS. The mintmark is entirely broken at the top, with the right top serif adrift beneath the feather tip. The date is low and further right than any other 1863-S variety. While much of the nation hoarded silver coinage during the height of the Civil War, half dollars continued to circulate in the West. As a result, Mint State 1863-S halves are scarce in any Uncirculated condition. This is a brilliant and frosted survivor, untuned except for a few speckles of deep-gray patina. Struck from a late state of the dies, with blurry dentils at the lower reverse. Population (all varieties combined): 19 in 62, 39 finer (9/17). PCGS# 572157 Base PCGS# 6310

17134 1871-CC Repunched Date, WB-102, Die Pair 4, Fine 15 NGC. Original pewter-gray surfaces show relatively smooth fields and good remaining detail. The L and TY in LIBERTY are clear. Die diagnostics are faint on this moderately worn example, although date and mintmark placement confirm the attribution. The faint repunching on the 71 in the date is no longer visible in this grade. NGC ID# 646C, PCGS# 572197 Base PCGS# 6331

17135 1872-CC WB-101, Die Pair 6, R.4, XF45 PCGS. This variety features a lump on Liberty's right calf and another on the eagle's left leg. The Large CC mintmark slants slightly upward. Bright, untuned surfaces exhibit moderate high-point friction, but the impression remains bold. Ticks are scattered throughout, including a tiny dig above Liberty's left shoulder. NGC ID# 64EJ, PCGS# 572203 Base PCGS# 6334

17136 1873-CC Arrows — Edge Damaged, Cleaned — ANACS. AU Details, net VF35. WB-Unlisted, Die Pair 7, R.4. The damaged edge appears to be a couple of rim bumps that do not distract from this scarce coin's eye appeal. A dimple in the field between Liberty's head and the pole and cap is noteworthy. Both sides are partially lustrous with light golden toning and good detail. Ex: FUN Signature (Heritage, 1/2003), lot 7177. NGC ID# 24L8, PCGS# 6344 Base PCGS# 6344

1876-S WB-102 Half Dollar, MS65 Recut Mintmark

17137 1876-S Open Bud, Very Small S, WB-102, Die Pair 18, R.4, MS65 NGC. Stars 3-4 and 11-13 are recut, a die lump occurs in the shield above Y, the area under Liberty's chin is unfinished, and the Very Small S mintmark is repunched. This incredible, fully struck Gem survivor was one of 4.5 million half dollars struck at the San Francisco Mint in 1876. It enjoys frosty luster and thin daubs tan-gold patina over mostly brilliant surfaces. Scattered grazes are superficial and of little import. Census (all varieties): 8 in 65, 5 finer (9/17). NGC ID# BNVD, PCGS# 572242 Base PCGS# 6354

17138 1877-S Closed Bud, Very Small S, WB-104, Die Pair 24, R.3, MS64 PCGS. The fields are semiprooflike on this near-Gem, and well-struck design elements enjoy excellent preservation from abrasions. Light golden interiors transition to various multicolor hues at the borders, displaying original toning. Some faint horizontal roller marks are visible at the date under magnification. NGC ID# 24KM, PCGS# 572255 Base PCGS# 6357

1879 Half Dollar, Fully Struck Gem Only 4,800 Coins Minted

17139 1879 Closed Bud, WB-102, MS65 PCGS. The return of mass quantities of United States half dollars previously sent abroad reduced demand for new coinage production. Resources were also being diverted toward the production of Morgan dollars. Consequently, only 4,800 pieces were struck in 1879. Rainbow hues color the rims, leaving the centers thickly frosted and untuned. Devices are fully struck throughout and prooflike contrast is readily apparent. NGC ID# 24KS, PCGS# 572260 Base PCGS# 6361

PROOF SEATED HALF DOLLARS

17140 1870 PR64 PCGS. Only 1,000 proof Seated Liberty half dollars were struck in 1870, and Choice specimens are very scarce today. The present is a well-struck specimen, with a little softness showing on the arrows. The fields are brightly reflective under dark green, golden-brown, and cerulean-blue toning. Ex: Central States Signature (Heritage, 4/2011), lot 3703. NGC ID# 27U5, PCGS# 6428

17141 1876 PR64 NGC. This glimmering Choice proof displays uniform olive-green and lavender-gold toning on each side, while the devices showcase sharp definition everywhere except on the eagle's left (facing) talons. A few light marks are consistent with the grade. Census: 46 in 64, 28 finer (9/17). NGC ID# 27UA, PCGS# 6437

17142 1876 PR64 NGC. Type One Reverse. The obverse is dramatically toned, with a golden center that gives way to russet and electric cyan near the rims. Several light hairlines in the right obverse field preclude Gem status.

Ex: Denver Signature (Heritage, 8/2006), lot 3397; Long Beach Signature (Heritage, 2/2007), lot 3525. NGC ID# 27UA, PCGS# 6437

1877 Half Dollar, PR66 Original Cobalt-Blue and Violet Toning

17143 1877 PR66 NGC. This flashy, originally toned Premium Gem derives from a mintage of 510 proof Seated half dollars. That was less than half the number of pieces struck the year prior. In fact, the 1877 has the lowest proof mintage in the series from 1866 to 1891. Cobalt-blue and violet patina appear over each impeccably preserved side. Eye appeal is terrific. Census: 4 in 66, 6 finer, including Cameo and Deep Cameo (9/17). NGC ID# 27UC, PCGS# 6438

17144 1880 PR63 PCGS. CAC. The 1880 is well-known to collectors as a low total-mintage issue with 8,400 circulation strikes and 1,355 proofs. The latter often serve in lieu of the former. Cobalt-blue borders meld with central shades of violet, indicative of the originality of this Select proof. Strong eye appeal. NGC ID# 27UF, PCGS# 6441

17145 1888 PR64 NGC. A hint of light champagne toning graces the glimmering fields and sharp motifs of this near-Gem proof 1888 half dollar. A few faint hairlines are visible only at specific angles, giving this collectible proof excellent eye appeal for the grade. Finer examples may be out of reach for some collectors. NGC ID# 27UP, PCGS# 6449

1890 Seated Half Dollar, PR65 Original Border Toning

17146 1890 PR65 NGC. Housed in an older holder with appreciable, undesignated contrast on each side. The cameo effect is amplified by lavender-gold toning in the fields and a ring of ocean-blue at the peripheries. A few faint hairlines in the fields are well-hidden by the light patina. The 1890 proof half dollar is scarce in Gem condition and increasingly elusive any finer. Census: 32 in 65 (1 in 65+), 27 finer; 10 in 65 Cameo, 14 finer; 3 in 65 Ultra Cameo, 7 finer (9/17). NGC ID# 27US, PCGS# 6451

BARBER HALF DOLLARS

1892 Half Dollar, Toned MS66+ High-End First-Year Type Coin

17147 1892 MS66+ PCGS. CAC. A conditionally scarce but still collectible Premium Gem example of the first-year issue in the Barber half dollar series. The coin is beautifully preserved and frosty, with a particularly clean cheek on Liberty. The strike is also sharp. Both sides display deep multicolor toning that includes lavender, gold, sea-green, olive, and russet. High-end. Population: 50 in 66 (8 in 66+), 14 finer. CAC: 25 in 66, 12 finer (9/17). NGC ID# 24LF, PCGS# 6461 Base PCGS# 6461

17148 1893-O MS64 PCGS. Second-year Barber halves from the New Orleans Mint are very scarce in Choice Uncirculated condition and rare any finer. A thin veneer of gold, blue, and rose patina covers minimally marked surfaces. The impression is characteristic of the Southern facility. Population: 44 in 64 (1 in 64+), 9 finer (9/17). NGC ID# 24LL, PCGS# 6466

17149 1896 MS64 NGC. This Choice Mint State Barber half dollar exhibits subdued silver brilliance with prooflike fields and lustrous, sharply detailed devices. Census: 16 in 64 (1 in 64+), 13 finer (9/17). NGC ID# 39RH, PCGS# 6474

17150 1897-S MS62 NGC. Uncirculated 1897-S half dollars are scarce in all grades. This MS62 coin is collectible and shows fewer abrasions than expected for the grade. The surfaces are brilliant and the fields semiprooflike. A reed mark is noted on Liberty's cheek. On the reverse, the usual strike weakness occurs on the eagle's right (facing) wing junction. Census: 6 in 62, 43 finer (8/17). NGC ID# 24M2, PCGS# 6479

17151 1901-S XF40 PCGS. CAC. The low-mintage 1901-S Barber half dollar is an elusive issue in all grades. This impressive XF specimen shows only light wear, with a bold LIBERTY on the distinct ribbon. The lightly abraded surfaces exhibit pleasing shades of lavender and greenish-gold toning. NGC ID# 5EPB, PCGS# 6491

17152 1903 MS64 PCGS. CAC. The motifs are well-defined with softness limited to the last few obverse stars and right shield-wing juncture. Antique golden-gray and steel-blue patina covers much of this Choice Uncirculated Barber half dollar. Population: 36 in 64 (1 in 64+), 13 finer. CAC: 8 in 64, 7 finer (9/17). NGC ID# 24MJ, PCGS# 6495

17153 1903-O MS63+ PCGS. Although a moderate number of 1903-O Barber half dollars survive in MS63 and MS64, surprisingly few have been offered publicly in recent years. This bright, satiny representative features a pinpoint impression. A set of reeding marks on the neck explains the grade. NGC ID# 24MK, PCGS# 6496

17154 1904-S — Cleaned — PCGS Genuine. AU Details. Just a trace of actual wear shows on the strongly impressed design elements and the lightly abraded surfaces retain much original mint luster on the reverse, despite the noted cleaning. A few hints of lavender-gray and pale gold toning are evident.

17155 1906-D MS64+ PCGS. Iridescent shades of magenta and pale gold toning highlight the well-preserved surfaces of this Plus-graded Choice example, with sharply detailed design elements and vibrant mint luster underneath. Population: 52 in 64 (2 in 64+), 30 finer (9/17). NGC ID# 24MV, PCGS# 6505

17156 1909 MS64 PCGS. CAC. Even common-date Barber half dollars become conditionally rare in Gem and better grades, as few examples of the type were ever saved for numismatic purposes. This CAC-approved near-Gem is an accessible date or type representative and displays nearly as much quality as its higher-priced MS65 counterparts. The strike is nearly full, and no major abrasions are seen. Delicate champagne toning tints the surfaces without impeding the luster. NGC ID# 24N8, PCGS# 6516

17157 1912-D MS65 PCGS. Shades of lavender-gray and amber toning visit the well-preserved surfaces of this impressive Gem, with sharply detailed design elements and satiny mint luster underneath. Population: 65 in 65, 17 finer (9/17). NGC ID# 24NH, PCGS# 6525

1912-S Barber Half Dollar, MS65 Light Natural Toning

17158 1912-S MS65 NGC. Medium champagne-gold toning covers the well-preserved surfaces of this impressive Gem, with vibrant mint luster and sharply detailed design elements underneath. Overall eye appeal is outstanding. From a nominal mintage of 1.3 million pieces. Census: 7 in 65, 8 finer (9/17). NGC ID# 24NJ, PCGS# 6526

PROOF BARBER HALF DOLLARS

17159 1897 PR64 Cameo PCGS. A bright and completely untoned Choice specimen of this popular issue. The highly reflective fields are nicely contrasted against the frosted devices. A few inconsequential hairlines limit the grade. NGC ID# 24NZ, PCGS# 86544

17160 1903 PR64 PCGS. This sharply detailed near-Gem proof displays deep mirroring in the fields and satiny, unmarked design elements. Golden and blue border toning surrounds essentially brilliant interiors, promoting strong eye appeal for the grade. NGC ID# 24P7, PCGS# 6550

17161 1909 PR65 PCGS Secure. This sharp Gem proof displays deep reflectivity in the fields with frosty luster on the devices. Mottled olive-gray, lavender, and gold toning appears on the obverse, while the reverse exhibits soft lavender hues beneath an olive-green patina. Population: 23 in 65, 43 finer (9/17). NGC ID# 24PD, PCGS# 6556

WALKING LIBERTY HALF DOLLARS

17162 1916-S AU55 PCGS. Only 508,000 Walking Liberty half dollars were struck at the S-mint in the series' first year. The semikey 1916-S is elusive in high grades. This strong Choice AU offering retains partial mint frost over bright surfaces. Light friction and a few specks of color are seen. NGC ID# 24PN, PCGS# 6568

1916-S Walking Liberty Half Dollar, MS63 Famous Inaugural-Year Issue

17163 1916-S MS63 PCGS. This bright Select Uncirculated 1916-S half dollar is far finer than the average certified VF30-VF35 representative. It enjoys vibrant mint frost and strong definition, including complete separation on Liberty's branch hand. A few specks of color appear on the obverse. This famed inaugural-year issue was struck to the lowly extent of 508,000 coins. NGC ID# 24PN, PCGS# 6568

17164 1917-D Reverse MS62 PCGS. A well-struck, satiny example with only light handling marks to limit the grade. Deep lavender-gray and light golden toning blankets each side, accentuating the design elements. NGC ID# 24PS, PCGS# 6571

17165 1917-D Reverse MS63 PCGS. This satiny Select example displays an impressively sharp strike and rich mattelike luster. Champagne-tinted interiors cede to deeper orange-gold, lavender, and blue border toning. No major abrasions are seen. NGC ID# 24PS, PCGS# 6571

17166 1917-D Reverse MS64 PCGS. A frosty near-Gem, brilliant, and impressively well-struck. This luminous Reverse Mintmark coin shows only a few small abrasions that limit the grade but has a healthy supply of eye appeal. Finer examples are scarce. NGC ID# 24PS, PCGS# 6571

17167 1917-D Reverse MS64 PCGS. The mintmark was moved to the reverse of the Walking Liberty half dollar part-way through the year in 1917 and more than 1.9 million coins were struck with the new mintmark placement. This impressive Choice example displays well-detailed design elements and well-preserved lustrous surfaces, with highlights of golden-brown toning. NGC ID# 24PS, PCGS# 6571

17168 1917-S Obverse AU55 PCGS. The scarcer Obverse Mintmark variety, this Choice AU 1917-S Walker is satiny and largely untuned with luster remaining in the fields. The strike is sharp, and light wear is apparent only on the high points of the devices. A small reed mark on Liberty's cheek is only a minor distraction under a loupe. NGC ID# 26G7, PCGS# 6572

1917-S Half Dollar, Bright MS62 Obverse Mintmark

17169 1917-S Obverse MS62 PCGS. The typical 1917-S half dollar with the sought-after Obverse Mintmark grades about XF40. Mint State survivors are very scarce and highly desirable. This is a frosty, untuned key date representative with bold devices on each side. The grade suggests numerous marks, but they are well-hidden, small, or otherwise undistracting. NGC ID# 26G7, PCGS# 6572

17170 1917-S Reverse MS63 PCGS. The mintmark appears on the reverse for this variety, which is the ideal choice for date representation in a budget-friendly set. This example is sharply struck and satiny with a hint of light champagne toning. No major abrasions intrude upon the eye appeal. NGC ID# 24PU, PCGS# 6573

17171 1918 MS64 PCGS. Well struck on the design elements, including excellent definition on Liberty's head and left thumb and adjacent oak and laurel branches. Lustrous surfaces are essentially untuned, and possess a pleasing, bright satiny sheen. A few minute marks on Liberty's gown define the grade.
Ex: *FUN Signature (Heritage, 1/2006)*, lot 4013. NGC ID# 24PX, PCGS# 6574

**1918-D Half Dollar, Crisp MS64
Conditionally Scarce**

17172 1918-D MS64 PCGS. A faint tinge of golden color around the borders confirms the originality of this conditionally scarce D-mint half dollar. Satin luster illuminates well-preserved surfaces with a handful of reeding marks and tiny ticks. The branch hand, Liberty's head, and the eagle's feathers are strongly detailed. Rare in higher grades. NGC ID# 24PW, PCGS# 6575

17173 1918-S MS63 PCGS. A satiny, russet and golden Select Mint State example, showing good head definition and partial thumb separation. Scattered light abrasions determine the grade. A pleasing coin, suitable for date and mintmark collections in Mint State. NGC ID# 24PX, PCGS# 6576

17174 1919 AU55 NGC. The 1919 is a better date in high grade. This Choice AU representative displays satiny slate-gray surfaces and some remaining field luster. Wear is light across the high points of the devices. An otherwise Uncirculated Walking Liberty half dollar collection would be complemented by the attractive qualities of the present coin. NGC ID# 24PY, PCGS# 6577

**1919 Walking Liberty Half Dollar, MS64
Sharply Struck, Lightly Toned**

17175 1919 MS63 PCGS. A faint speckling of pale golden-gray patina adds just the right natural color to the otherwise brilliant-silver surfaces of this sharply struck Walker. Liberty's head and branch hand are more sharply defined than normal, while the fields and devices are remarkably smooth and unmarked for the assigned grade. Just 962,000 pieces were struck. NGC ID# 24PY, PCGS# 6577

**1919 Walking Liberty Half Dollar, MS64
One of the Lowest Mintages in the Series**

17176 1919 MS64 PCGS Secure. Partial thumb separation is evident and strong detail appears on Liberty's head. Small scattered marks are mostly well-hidden within the design features. Thickly frosted surfaces remain brilliant at the centers and show blushes of golden color around the edges. The 1919 has one of the few sub-million mintages in the series. Finer coins are seldom seen. NGC ID# 24PY, PCGS# 6577

17177 1920-S MS62 PCGS. The 1920-S Walker is rarely seen well-struck, a characteristic which contributes to its scarcity in the finer Mint State grades where striking sharpness becomes a factor in the third-party grading assessment. The present coin exhibits fewer abrasions than are expected for the MS62 level, but does display some of the usual weakness on the figure of Liberty and the central eagle's feathers. A touch of light golden color accents each side. NGC ID# 24R5, PCGS# 6582

1920-S Half Dollar, Toned MS64

17178 1920-S MS64 PCGS. The 1920-S Walking Liberty half dollar is a better date in high grade, scarcely offered finer than MS64. This near-Gem offers satiny luster and well-preserved surfaces. Deep russet and olive-gold toning on each side masks any minor grade-limiting abrasions. The central devices show the usual weak strike. NGC ID# 24R5, PCGS# 6582

17179 1921 XF40 PCGS. Light golden toning appears over the satiny, partially lustrous surfaces of this lightly circulated example. Wear on the figure of Liberty and the eagle is consistent with the grade. The 1921 is scarce in the XF grade levels and sought-after by date and mintmark series collectors. NGC ID# 24R6, PCGS# 6583

17180 1921-D — Scratch — PCGS Genuine. XF Details. Numerous shallow scratches along the margins on both sides prevent a numeric grade on this lightly circulated 1921-D half dollar, although light golden toning and good detail still produce pleasing appeal to the unaided eye. Central detail is slightly better than seen on many other XF-graded coins.

**1923-S Half Dollar, MS62
Conditionally Scarce**

17181 1923-S MS62 PCGS. The right obverse and reverse display pale golden toning, while 70% of this San Francisco Walker half dollar remains totally brilliant. The branch hand and eagle's trailing leg are soft, as always. Marks on Liberty's outstretched arm and drapery merit mention, but the fields are seemingly cleaner than the grade would suggest. NGC ID# 24R9, PCGS# 6586

1923-S Walker, Highly Lustrous MS63

17182 1923-S MS63 PCGS. This elusive coin alternates areas of silver brilliance with amber-gold toning on each side. The strike on 1923-S halves is especially problematic, and this example shows a weak strike through the centers on each side, but the luster is excellent. A small tick is noted in the toning behind the eagle's neck.
Ex: *Denver Signature (Heritage, 8/2006)*, lot 3492. NGC ID# 24R9, PCGS# 6586

17183 1927-S MS63 PCGS. This attractive Select specimen shows some of the typical softness on the wreath hand and eagle's leg, but the peripheral design elements are sharp. The lightly marked surfaces radiate satiny mint luster, under delicate hints of golden-tan toning. NGC ID# 24RA, PCGS# 6587

**1927-S Half Dollar, MS64
Advanced Die State**

17184 1927-S MS64 PCGS. Available in MS64, the 1927-S half dollar is conditionally scarce any finer. This piece displays light golden toning over minimally marked surfaces. The obverse is semiprooflike due to heavy die polishing lines, and the reverse is similarly eroded, showing die lapping and several die cracks. Liberty's head and branch hand exhibit the usual strike weakness associated with this San Francisco issue. NGC ID# 24RA, PCGS# 6587

**1927-S Half Dollar, MS64
The Only 1927-Dated Walker**

17185 1927-S MS64 PCGS. The Philadelphia, Denver, and San Francisco Mints struck Walking Liberty half dollars intermittently from 1923 to 1933. None were issued at Philadelphia, while the Denver Mint struck examples in 1929 only, and San Francisco coined pieces in 1923, 1927, 1928, 1929, and 1933. This Choice Mint State piece shows typical central weakness. The surfaces are fully lustrous and frosty with delicate peripheral gold toning. NGC ID# 24RA, PCGS# 6587

17186 1928-S MS63 PCGS. CAC. A satiny champagne-toned Mint State example with daubs of olive at the borders. The centers are deficiently struck, as often seen on the 1928-S Walker. The CAC green label is a rare sight on Uncirculated examples of this date. CAC: 10 in 63, 41 finer (9/17). NGC ID# 24RB, PCGS# 6588

17187 1929-D MS64 PCGS. Satiny luster shows minimal abrasions and warm golden toning. The strike is slightly weak on the central high points, as usual, but the eye appeal remains pleasing. Higher-grade 1929-D half dollars are almost twice as elusive as coins in this grade. NGC ID# 24RC, PCGS# 6589

17188 1929-S MS64 PCGS. A brilliant, satiny Choice 1929-S half dollar with faint die polishing lines visible in the fields. Liberty's thigh and the eagle's trailing leg show the usual softness, but partial thumb separation is present. A couple of short, thin pinscratches are discernible on the sun under magnification. NGC ID# 24RD, PCGS# 6590

17189 1933-S MS64 PCGS. Frosty and largely untuned with excellent detail overall. This Choice example has a single abrasion on the upper leg that accounts for the grade. Finer 1933-S half dollars become increasingly elusive and costly.
Ex: *Long Beach Signature (Heritage, 2/2007)*, lot 3983. NGC ID# 24RE, PCGS# 6591

**1933-S Half Dollar, MS66
Always In-Demand, Only Issue for the Year**

17190 1933-S MS66 PCGS. Date pressure is perennially high given that all 1933 half dollars were produced at the San Francisco Mint, and only 1.7 million pieces were coined. Comparable representatives are very scarce. Incompleteness is confined to the branch hand and upper skirt lines on this well-struck Premium Gem. Both sides are untuned with unbridled mint frost. A couple of reeding marks are well-hidden. PCGS reports 15 higher grading events (10/15). NGC ID# 24RE, PCGS# 6591

17191 1934-S MS65 PCGS. This impressive Gem exhibits sharply detailed design elements throughout, and the well-preserved surfaces radiate vibrant mint luster, with a few highlights of greenish-gold and violet-gray toning. NGC ID# 24RH, PCGS# 6594

**1934-S Half Dollar, MS65
Impressively Sharp**

17192 1934-S MS65 PCGS. The hallmark of this Gem 1934-S Walker is a fully rendered strike that is most appreciated on the eagle's trailing leg feathers and Liberty's branch hand and head. A hint of champagne toning graces satiny surfaces, and there are no distracting abrasions. Eye appeal is outstanding. NGC ID# 24RH, PCGS# 6594

**1934-S Walker, Sharp MS66
Old Holder, High Eye Appeal**

17193 1934-S MS66 PCGS. Splashes of pink, mauve, and lilac-gray toning imbue the pearlescent silver surfaces of this Premium Gem 1934-S with outstanding eye appeal. Satiny mint luster glows from every angle. While the issue is occasionally well-struck, the current example far exceeds expectations with sharp definition on Liberty's head. The branch hand displays a distinct thumb and some finger detail. Strong gown lines show only a few minute ticks and no marks of consequence. Likewise, the eagle's leg and feather details are above average. Housed in a first-generation "rattler" holder. PCGS lists only eight numerically finer examples of the issue (9/17). NGC ID# 24RH, PCGS# 6594

17194 1935-D MS65 PCGS. Metal flowlines in the obverse fields indicate a late die state, although they also produce a vibrant cartwheel effect that pleases the unaided eye. The surfaces are brilliant and devoid of major abrasions. Slight strike weakness occurs on Liberty's head and branch hand, as usual. NGC ID# 24RK, PCGS# 6596

17195 1935-D MS65 PCGS. Champagne-toned, satiny mint luster shows tinges of russet in the peripheral recesses, while the high points of Liberty's figure showcase violet and lavender highlights. The central strike is slightly soft, as expected for the issue, but abrasions are trivial. Finer 1935-D Walkers are infrequently seen. NGC ID# 24RK, PCGS# 6596

17196 1935-D MS65 PCGS. A bright, brilliant Gem 1935-D Walking Liberty half dollar, showing clean fields and well-defined motifs. A few trivial grazes on the high points of the devices are all that limit the grade. This issue is available in MS65 but seldom seen finer. NGC ID# 24RK, PCGS# 6596

17197 1935-D MS65 PCGS. From a mintage of 3 million coins, the 1935-D is elusive in Gem condition and very scarce any finer. Brilliant surfaces aglow in satin mint luster show a single spot of color on the sun. The branch hand is well-struck. NGC ID# 24RK, PCGS# 6596

17198 1935-D MS65 PCGS. CAC. Brilliant and flashy frosted surfaces lack any evidence of toning and are free from any distracting marks. As usually seen, this Gem 1935-D is a trifle weak through the head, branch hand, and leg, as well as at the eagle's leg. All other elements are sharply rendered and the eye appeal is terrific. Housed in a previous-generation blue label holder with the barcode on the back. CAC endorsed for its obvious quality. NGC ID# 24RK, PCGS# 6596

17199 1935-S MS65 PCGS. CAC. Original, luminous surfaces are a hallmark of this Gem 1935-S Walking Liberty half dollar, and the outstanding preservation of the surfaces entertains eye appeal typically reserved for finer grades. The CAC endorsement confirms the top-notch quality. Minor strike softness is seen on Liberty's branch hand, but the coin is otherwise well-struck. Lovely champagne toning deepens toward the rims. Housed in a first generation holder. NGC ID# 24RL, PCGS# 6597

17200 1938-D MS65 NGC. A faint speckling of grayish-russet patina confirms the originality of the otherwise brilliant, frosted surfaces of this lovely Gem 1938-D. We note a few light contacts on the obverse including a short reeding mark below T in LIBERTY, but overall the surfaces are sharply struck, smooth, and attractive. A worthy example of the low-mintage key to the late Walker series. NGC ID# 24RV, PCGS# 6605

17201 1938-D MS65 PCGS. This Denver semikey enjoys one of the lowest mintage in the series (only 491,600 coins struck), but there are enough high-grade survivors to satisfy most demand through MS65 and even MS66. The branch hand is indistinct, but most other areas are well-struck. Brilliant with satin luster. NGC ID# 24RV, PCGS# 6605

17202 1938-D MS66 PCGS. This unabraded Premium Gem is boldly struck and satiny, showing deep olive-green, sun-gold, amber, crimson, and russet toning on each side. The semikey-date 1938-D is seldom offered finer than the present coin, with PCGS reported 46 such pieces. This piece is housed in a first generation holder. NGC ID# 24RV, PCGS# 6605

17203 1938-D MS66 PCGS Secure. The 1921 and 1921-D are the only two Walking Liberty halves that claim smaller mintages than the 1938-D (491,600 coins). This issue was widely saved and can be found with little searching through MS66. Strongly struck devices appear on each side, as does vibrant, satiny mint luster. Totally brilliant. NGC ID# 24RV, PCGS# 6605

17204 1946 MS67 PCGS. CAC. The 1946 half dollar is very scarce in MS67 and nearly impossible to upgrade at that level. The obverse is brilliant with two daubs of crimson patina on the flag and near LI. The reverse features rich golden-russet and crimson hues throughout. Fully struck. Population: 72 in 67 (5 in 67+), 0 finer. CAC: 31 in 67, 0 finer (9/17). NGC ID# 24SJ, PCGS# 6627 Base PCGS# 6627

17205 1947 MS67 PCGS. The 1947 Walking Liberty half dollar is very scarce in MS67 condition, and finer coins are virtually unobtainable. This delightful Superb Gem features a bold strike and impeccably preserved surfaces, with vibrant mint luster throughout. Population: 82 in 67 (4 in 67+), 0 finer (9/17). NGC ID# 24SM, PCGS# 6630

17206 1947-D MS67 NGC. A beautifully toned Superb Gem with speckles of crimson, orange, and olive-green toning that gravitate to the borders and protected areas. While not particularly scarce in Choice or even Gem condition, Superb examples of this final year D-mint have proven to be elusive. Census: 57 in 67 (2 in 67+, 4 in 67★), 1 finer (9/17). NGC ID# 5ESK, PCGS# 6631

17207 1941-47 Walking Liberty "Short Set" MS65 PCGS. The 20 coins in this "Short Set" of Walking Liberty half dollars each grade MS65. Every lovely Gem in this set is brilliant and untuned, or exhibits faint champagne toning that most would describe as untuned. The 1944-D is housed in a green-label PCGS holder, and the balance are housed in recent blue-label holders. (Total: 20 coins)

17208 1941-47 Walking Liberty "Short Set" MS65 PCGS. This is the classic 20 piece "Short Set" of Walking Liberty half dollars, each graded MS65 PCGS. The 20 coins are fully brilliant and highly lustrous, mostly untuned, although a few have faint champagne toning. The coins vary from average to above average design definition.

The current generation of collectors may have heard the term "short set" without understanding where that term came about. Back in the old days before slabs, most collectors housed their coins in albums. The leading album manufacturer was Whitman, and they produced albums with two, three, or four pages. Because the complete set of Walkers required more than four pages, they issued two albums: one for 1916 to 1940, and the second for 1941 to 1947. Some collectors only purchased the second album, and this was called the "short set." (Total: 20 coins)

PROOF WALKING LIBERTY HALF DOLLARS

17209 1936 PR64 PCGS. The resumption of proof coinage in 1936 marked a comeback of the extra-brilliant proof finish that found favor with the Mint shortly after the turn of the century. This glittering example is indeed brilliant except for a few bits of russet-brown toning that dot the obverse. A sharp and nicely mirrored near-Gem to represent the inaugural year of Walking Liberty proofs, always in demand. NGC ID# 27V4, PCGS# 6636

17210 1936 PR64 PCGS. This sharp first-year proof Walking Liberty half dollar displays untuned surfaces and deeply reflective fields. The obverse boasts appreciable cameo contrast — a rare sight on this type — although the reverse is more uniformly brilliant. Eye appeal is generous. NGC ID# 27V4, PCGS# 6636

17211 1936 PR64 PCGS. This sharp near-Gem proof is brilliant and shows a suggestion of cameo contrast on each side. The 1936 is the first proof issue in the series and boasts a limited mintage of only 3,901 coins. NGC ID# 27V4, PCGS# 6636

17212 1936 PR64 NGC. CAC. Gleaming mirrored fields and sharp motifs grant this near-Gem proof outstanding eye appeal. No toning is observed, and the preservation is pleasing for type or date purposes. The CAC green label is seen on only a small fraction of coins in this grade. NGC ID# 27V4, PCGS# 6636

1936 Half Dollar, PR66 First-Year Key in Proof Format

17213 1936 PR66 PCGS. CAC. In 1936, Mint officials took up proof production for the first time since 1915. Only 3,901 Walking Liberty half dollars were struck in proof format that year — the lowest total in the series. As one should expect, the design features are fully impressed on this satiny, all-brilliant Premium Gem. A single spot of color occurs between two of the sun's rays. Exceptionally clean and remarkably appealing. NGC ID# 27V4, PCGS# 6636

1940 Half Dollar, PR68 Pastel Colors, None Grade Higher

17214 1940 PR68 PCGS. Proof half dollar output increased by roughly 30% from 1939 to 1940, when 11,279 pieces were struck. Each side of this Superb Gem proof displays a blend of pastel toning with delicate blue, green, violet, and golden-orange hues. A practically flawless Registry candidate. Population: 36 in 68 (2 in 68+), 0 finer (10/17). NGC ID# 27V8, PCGS# 6640

17215 1941 PR67+ PCGS. CAC. Dusky golden toning warms the crisp devices and mirrored fields of this high-end Superb Gem proof, while a CAC green label confirms the lofty grade. Even the most minute design elements are defined. PCGS lists just 26 finer proofs (9/17). NGC ID# 24SP, PCGS# 6641

FRANKLIN HALF DOLLARS

17216 1949-D MS66 Full Bell Lines PCGS. This Premium Gem ranks among the finest 1949-Franklin half dollars at both services. Mostly brilliant, there are a couple of singular toning spots on each side and a arc of peripheral crimson and orange patina at the upper-right obverse. Population: 84 in 66 (8 in 66+) Full Bell Lines, 0 finer (9/17). NGC ID# 5HWE, PCGS# 86654

17217 1949-S MS67 PCGS. Although PCGS reports a handful of Full Bell Lines coins in this grade, the present Superb Gem 1949-S Franklin half dollar is among the finest non-Full Bell Lines pieces known. The frosty surfaces show no distracting abrasions and display a dusting of olive-gold toning with tiny flecks of russet. The bell lines are a trifle weak just left of the crack. Population: 12 in 67, 0 finer (9/17). NGC ID# 24SV, PCGS# 6655

1951-S Franklin Half Dollar, MS66+ ★ Full Bell Lines

17218 1951-S MS66+ ★ Full Bell Lines NGC. This San Francisco half dollar is of nearly unrivaled technical and visual quality. Dappled rainbow iridescence covers the entire obverse and the reverse border, leaving the interiors slightly lighter. A razor-sharp strike features crisp, fully delineated bell lines. Grade limiting marks are virtually unseen, hidden beneath the eye-appealing patina. Census: 21 in 66 Full Bell Lines (1 in 66 ★ Full Bell Lines, 4 in 66+ Full Bell Lines, 1 in 66+ ★ Full Bell Lines), 2 finer (9/17). NGC ID# 24T2, PCGS# 86660 Base PCGS# 86660

17219 1959 MS66 Full Bell Lines PCGS. CAC. The well-preserved surfaces of this impressive Premium Gem are visited by low-intensity shades of golden-tan and lavender toning. The design elements are sharply detailed, with Full Bell Lines definition on the Liberty Bell. Population: 70 in 66 (5 in 66+) Full Bell Lines, 0 finer. CAC: 15 in 66, 0 finer (9/17). NGC ID# 24TJ, PCGS# 86676

17220 1959-D MS66+ Full Bell Lines PCGS. This high-end 1959-D Franklin half dollar is so well-preserved that close study with a loupe is required to discern any minor surface imperfections that prevent a full Superb Gem grade. The strike is sharp, and warm golden-toned surfaces feature glimpses of crimson-gold at the borders. PCGS lists only two finer Full Bell Lines representatives (9/17). NGC ID# 24TK, PCGS# 86677

17221 1960-D MS66 Full Bell Lines PCGS. This deeply toned Premium Gem displays fire-orange, crimson, russet, forest-green, and sun-gold colors over beautifully preserved, frosty surfaces. The strike is sharp. Examples are scarce this fine and almost unknown finer. Population: 41 in 66 (1 in 66+) Full Bell Lines, 1 finer (9/17). NGC ID# 24TM, PCGS# 86679

17222 1963 MS65 Full Bell Lines PCGS. Available through MS65, 1963 Franklin half dollars with Full Bell Lines are genuinely rare any finer. PCGS lists just five finer examples and NGC one (9/17). This brilliant, satiny representative displays a bold strike and cartwheel luster. A few small marks on Franklin's cheek limit the grade. NGC ID# 24TT, PCGS# 86684

PROOF FRANKLIN HALF DOLLARS

17223 1951 PR67 PCGS. CAC. A well-struck Superb Gem proof that is just starting to develop a trace of reddish-gold toning near the obverse edge above LIBERTY and below TRUST. The fields have a slight tinge of blue to them. Only the second year of proof strikings in the Franklin half series, with a mintage of 57,500 pieces. Proof mintages would top 1 million coins in 1957. NGC ID# 27VB, PCGS# 6692

17224 1955 PR69 ★ Cameo NGC. Cameo examples represent a fraction of all Franklin half dollar proofs struck in 1955. A mere handful survive in this outstanding quality. Black-and-white surfaces include deeply reflective, unmarked mirrors set against thickly frosted devices. Census: 23 in 69 Cameo (5 in 69★), 0 finer in this category (9/17). NGC ID# 27VF, PCGS# 86696

17225 1957 PR69 Cameo NGC. No Cameo 1957 proof Franklins are certified as fine as PR69 at PCGS, although both major services list four coins each in PR69 Ultra/Deep Cameo. This top-grade NGC Cameo is conditionally rare and visually flawless. The strike is sharp, and each side displays stark white-on-black contrast with no toning. Census: 40 in 69 Cameo (8 in 69 ★), 0 finer; 4 in 69 Ultra Cameo, 0 finer (9/17). NGC ID# 24TX, PCGS# 86698

17226 1957 PR68 Deep Cameo PCGS. Close study with a loupe confirms the lofty numeric grade of this 1957 proof Franklin half, and the starkly contrasted devices show a hint of light golden toning. Full design definition completes the eye appeal. NGC ID# 24TX, PCGS# 96698

17227 1959 PR68 Cameo PCGS. CAC. The 1959 Franklin half dollar is seldom found so exquisitely preserved with Cameo contrast. Black-and-white surfaces are nearly devoid of contact. Deeply reflective and universally appealing. Population: 62 in 68 Cameo, 1 finer in this category. CAC: 26 in 68, 0 finer (10/17). NGC ID# 27VJ, PCGS# 86700

17228 1960 PR68 Deep Cameo PCGS. Occasionally seen in PR68 Deep Cameo, the 1960 proof is a rarity any finer. This piece is brilliant and starkly contrasted with liquidlike mirroring in the fields. Neither side exhibits mentionable toning. PCGS reports 10 finer representatives (9/17). NGC ID# 24TY, PCGS# 96701

1962 Half Dollar, PR69 Ultra Cameo Unsurpassed Quality

17229 1962 PR69 Ultra Cameo NGC. Ultra Cameo Franklin half dollar proofs from this period can be found with searching, but they are many times rarer than those with little or no contrast. Examples of this quality are unsurpassed. Deeply mirrored fields surround frosted design elements. Virtually flawless in every regard. Census: 34 in 69 Ultra Cameo, 0 finer (8/17). NGC ID# 27VK, PCGS# 96703

KENNEDY HALF DOLLARS

17230 1964-D MS67+ PCGS. The Denver issue of the debut Kennedy half dollar is scarce in Superb Gem condition and nearly unknown finer. This Plus-designated coin displays outstanding multicolor toning over most of each side, leaving only the centers silvery-brilliant. This piece is sharply struck and free of major abrasions. Population: 63 in 67 (3 in 67+), 1 finer (9/17). NGC ID# 24U3, PCGS# 6707

17231 1974 MS67+ PCGS. Tied for the finest 1974 Kennedy half dollar certified, this Plus-graded MS67 is exceptionally well-preserved and displays warm golden toning. Metal flowlines on each side indicate a late die state, although design sharpness is not significantly affected. Population: 16 in 67 (2 in 67+), 0 finer (9/17). NGC ID# 24UG, PCGS# 6722

SMS KENNEDY HALF DOLLARS

17232 1965 SMS MS68 Cameo NGC. Totally brilliant surfaces present mirrored fields and frosty, razor-sharp devices that together deliver the noted Cameo contrast. The Mint issued 2.3 million Special Mint Sets in 1965, but examples are rarely seen this fine. Census: 42 in 68 Cameo (2 in 68★), 1 finer in this category (9/17). NGC ID# 27WJ, PCGS# 86845

17233 1965 SMS MS67 Ultra Cameo NGC. The 1965 Special Mint Set half dollar is scarce in Ultra Cameo grades and rare as such in MS67. This brilliant white-on-black example displays razor-sharp detail and nearly pristine surfaces. Only a few coins are known finer. Census: 35 in 67 Ultra Cameo, 3 finer (9/17). NGC ID# 34CB, PCGS# 96845

1966 SMS Kennedy Half Dollar MS68 Ultra Cameo, None Finer

17234 1966 SMS MS68 Ultra Cameo NGC. This 1966 SMS Kennedy half dollar is a must-have for any serious Registry enthusiast, ranking among the very finest examples at both NGC and PCGS combined. Pristine, all-brilliant surfaces offer reflective fields and pronounced, eye-catching Ultra Cameo contrast. Census: 19 in 68 Ultra Cameo (1 in 68+), 0 finer (9/17). NGC ID# 24WH, PCGS# 96846

PROOF KENNEDY HALF DOLLARS

17235 1964 PR69 Ultra Cameo NGC. The population of first-year Kennedy half dollar proofs at this grade level is surprisingly low, and none have been graded higher by NGC or PCGS (9/17). Deeply reflective mirrors against thickly frosted motifs generate stark Ultra Cameo contrast. Ideal Registry coin. NGC ID# 24WF, PCGS# 96800

17236 1973-S PR70 Deep Cameo PCGS. The 1973-S proof Kennedy half dollar is conditionally rare in PR70 Deep Cameo at PCGS, and it is the earliest clad proof issue known in the top grade at that service. This piece displays a full strike and brilliant, starkly contrasted surfaces. Population: 43 in 70 Deep Cameo (9/17). NGC ID# 27WM, PCGS# 96809

17237 1973-S PR70 Deep Cameo PCGS. A conditionally scarce Deep Cameo proof in this top numeric grade. None are certified so fine at NGC (9/17). This piece features brilliant, well-contrasted surfaces and full detail. The silvery-gray color is visually deepened by the watery reflectivity of the fields. Population: 43 in 70 Deep Cameo (9/17). NGC ID# 27WM, PCGS# 96809

17238 1973-S PR70 Deep Cameo PCGS. The level of contrast on the obverse is exceptional, while the reverse lags behind just slightly. Both sides are brilliant and sharp with untouched mirroring and original nickel-gray color. PCGS lists only 43 coins this fine, and NGC none (9/17). An important Registry Set opportunity. NGC ID# 27WM, PCGS# 96809

EARLY DOLLARS

17239 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2 — Repaired — PCGS Genuine. VG Details. Tool marks are evident in the fields and on the eagle's breast, although a loupe is required to see them. Irregular golden-gray and russet-brown toning on each side complements the boldly outlined devices. The rims are complete without planchet adjustment marks.

17240 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — Obverse Scratched — NGC Details. VG. A well-worn example of this popular type issue with some random scratches on the obverse, near the chin, the bust tip, and the 5 in the date. The major design elements are complete in outline and the date and lettering are all legible. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

17241 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — Cleaning — PCGS Genuine. VG Details. Die State II, as frequently seen. An old cleaning leaves the surfaces with a glossy texture, although both sides have retoned. The obverse displays stark contrast between deep olive-gray fields and lighter relief elements, while the reverse is more evenly colored golden-gray. A few adjustment marks are visible along the reverse border, and Liberty's portrait shows a few light abrasions. A pleasing and collectible Flowing Hair type coin.

17242 1795 Draped Bust, Centered, B-15, BB-52, R.2 — Plugged — PCGS Genuine. Fine Details. Bowers Die State IV. The bust is centered on the obverse. There is no immediately obvious evidence of a plug, although a circular discoloration at 10 o'clock on the reverse and blurred reengraving of stars 1 and 2 on the obverse suggest a probably location for the plug. A few tool marks are also visible under Liberty's chin. This gunmetal-gray type coin is faintly granular under a loupe but shows bold detail and complete border dentils.

1796 Small Date Dollar, XF Details
B-4, BB-61, Large Letters Reverse

17243 1796 Small Date, Large Letters, B-4, BB-61, R.3 — Repaired — PCGS Genuine. XF Details. Bowers Die State I. The dies are in their early, unlapped state with a complete top curl and three arcs on the forecurl. This example was buffed or whizzed to minimize some hair-thin pinscratches in the left obverse field and across the mid-portrait area. The stone-gray surfaces are finely porous with slightly blurry devices from the handwork. The BB-61 variety is one of the most available die marriages for 1796, yet it becomes scarce in finer circulated grades.

17244 1797 9x7 Stars, Large Letters, B-1, BB-73, R.3, VG8 PCGS. Solidly detailed for a VG example, particularly on the hair and the eagle. Warm blue-green and violet-gray shadings drape the luminous surfaces, and several deep striations are noted on the portrait. Housed in a green label holder. NGC ID# 24X4, PCGS# 40003 Base PCGS# 6863

1797 9x7 Stars Dollar, VG10
Large Letters, B-1, BB-73

17245 1797 9x7 Stars, Large Letters, B-1, BB-73, R.3, VG10 PCGS. Bowers Die State III. Well-centered and struck from a middle die stage, this problem-free 9x7 Stars dollar with the Large Letters reverse is attractive for the assigned grade. Moderate wear exists, yet the rims are full with dentils visible all around both sides. All of the motifs are complete. A convergence of die cracks at Liberty's ribbon joins a merging of dentils outside of star 5. Attractive stone-gray toning is ideal for this smoothly worn early dollar — not too dark, not overly light — with a few deeper accents near Liberty's forehead. NGC ID# 24X4, PCGS# 40003 Base PCGS# 6863

17246 1798 Large Eagle, Pointed 9, Wide Date, B-22, BB-104, R.4, Fine 12 NGC. Bowers Die State "VI," with a heavy die crack through the E in STATES. This coin is evenly struck with complete dentils around each side. Smooth olive-gray surfaces show warm tan undertones and strong eye appeal for the grade. Moderate detail remains in Liberty's hair curls and the eagle's wings. NGC ID# 24X6, PCGS# 40021 Base PCGS# 40018

17247 1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3, Fine 12 PCGS. Bowers Die State III, both dies lapped. A smooth, problem-free circulation cameo, showing rich olive-gray fields and lighter tan-gray relief elements. The border dentils are complete and without adjustment marks. Wear is even. The visual appeal is exceptional for a Draped Bust dollar in this grade, and the coloration is blatantly original. NGC ID# 24X6, PCGS# 40022 Base PCGS# 40018

17248 1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3 — Damage — PCGS Genuine. XF Details. Bowers Die State III. The pleasing steel-blue surfaces of this attractive early dollar are lightly abraded, aside from a circular puncture near the hair ribbon that does not go all the way through the planchet. Only light wear is evident, with most interior detail in the hair and drapery still intact.

17249 1798 Large Eagle, Pointed 9, 10 Arrows, B-21, BB-107, R.5, Fine 15 PCGS. Bowers Die State II, as always, with a “tadpole” die break above the 79 in the date. This piece is well-struck and just shows honest wear. The bright silver-gray surfaces are smooth and show only the faintest remnants of adjustment marks along the left obverse border. The obverse die is a trifle out of alignment toward 8 o’clock. NGC ID# 24X6, PCGS# 40024 Base PCGS# 40018

17250 1798 Large Eagle, Pointed 9, 10 Arrows, B-13, BB-108, R.2, Fine 12 NGC. Bowers Die State II. A heavy die crack extends downward from the rim near the L in LIBERTY. This Heraldic Eagle type coin is evenly struck, but the reverse die is slightly out of alignment toward 4 o’clock. Remnants of deep adjustment marks are visible on the Liberty portrait. Both sides display pleasing gunmetal-gray patina and smooth fields. NGC ID# 24X6, PCGS# 40025 Base PCGS# 40018

17251 1798 Large Eagle, Pointed 9, 10 Arrows, B-13, BB-108, R.2, VF30 PCGS. Bowers Die State II, cracked near the L in LIBERTY. Die lapping is visible on the lowest hair curls. This lavender-gray Draped Bust dollar displays olive-gold accents and mostly smooth surfaces. Remnants of adjustment marks are visible within Liberty’s hair curls but are absent at the borders. Detail is strong for the grade. NGC ID# 24X6, PCGS# 40025 Base PCGS# 40018

**1798 Draped Bust Dollar, Choice VF
B-27, BB-113, Pointed 9, Close Date**

17252 1798 Large Eagle, Pointed 9, Close Date, B-27, BB-113, R.2, VF35 PCGS. Bowers Die State I. The 8 leans right and the star adjacent to the eagle’s beak points to the B in PLURIBUS. B-27 is one of the more available 1798 dollar varieties. Light gray surfaces retain strong detail on the portrait, curls, shield, and wing feathers. Most dentils are complete. Smooth without major abrasions. NGC ID# 24X6, PCGS# 40030 Base PCGS# 40018

**1798 B-29, BB-119 Dollar, XF45
Large Eagle, Pointed 9, Close Date**

17253 1798 Large Eagle, Pointed 9, Close Date, B-29, BB-119, R.4, XF45 NGC. Bowers Die State I. Advanced die cracks through the date, but none through STATES. Bowers’ updated *Silver Dollar Encyclopedia* remarks: “1798 BB-119 is scarce. Probably about 200 to 350 exist, most of which are in lower grades through VF. EF coins are quite rare...” In fact, XF45 qualifies for Bowers’ Condition Census, when multiples are taken into consideration. The devices are strongly detailed, especially the eagle and shield. Steel-gray patina covers most of each side with added russet elements intermixed. Fantastic example for the specialist. NGC ID# 24X6, PCGS# 40036 Base PCGS# 40018

17254 1798 Large Eagle, Pointed 9, Wide Date, B-12, BB-120, R.4 — Cleaned — PCGS Genuine. XF Details. Bowers Die State V. The date is low and wide, and a die crack extends vertically from the rim between the 79. This well-detailed coin is struck minutely off-center toward 9 o’clock, producing thin dentils along the left-hand peripheries and uncommonly wide dentils at the opposite border. Strike weakness above the eagle should not be mistaken for wear, as this piece has surprisingly strong detail for the XF level. An old cleaning is long toned-over with pewter-gray hues.

**1798 Dollar, B-14, BB-122, XF40
Large Eagle, Pointed 9**

17255 1798 Large Eagle, Pointed 9, B-14, BB-122, R.3, XF40 NGC. Bowers Die State V. Cracks run through stars 2 to 6, and the leaf under the C in AMERICA is partly lapped. According to Dave Bowers, “The variety is very rare above EF and virtually unknown in Mint State.” Most examples survive in VF condition or lower. This early dollar is evenly struck with moderate friction from light circulation. Battleship-gray patina covers most of each side with complementary accents of gold and blue interspersed. Void of major marks. NGC ID# 24X6, PCGS# 40039 Base PCGS# 40018

17256 1798 Large Eagle, Pointed 9, B-14, BB-122, R.3, XF40 ANACS. Bowers Die State V. This is a relatively well-detailed 18th century Large Eagle type coin with deep olive-gray patina. No obvious adjustment marks are seen, although die cracks appear in the left obverse field and the reverse is lapped. A few flecks of deep russet appear on each side in the protected regions. NGC ID# 24X6, PCGS# 40039 Base PCGS# 40018

17257 1798 Large Eagle, Pointed 9, Four Berries, B-8, BB-125, R.2, Fine 12 PCGS. Bowers Die State II. Outstanding olive-gray color in the fields contrasts against lighter tan-gray relief elements, giving this midgrade circulated Large Eagle type coin excellent eye appeal. A few light marks accompany the surface wear. The reverse dentils are weak, but a defined border remains. A slight die bulge is visible under the eagle’s left (facing) wing. NGC ID# 24X6, PCGS# 40042 Base PCGS# 40018

**1798 Dollar, B-8, BB-125, XF40
Pointed 9, Four Berries *Guide Book Variety***

17258 1798 Large Eagle, Pointed 9, Four Berries, B-8, BB-125, R.2, XF40 ANACS. Bowers Die State I. The date is placed high and the digits are spaced closed together. The eagle's olive branch has four berries. Varying shades of lavender-gray patina color this moderately circulated Draped Bust dollar. Problem-free surfaces maintain a wealth of design detail. Collectible *Guide Book Variety*. Certified in a small-sized holder. NGC ID# 24X6, PCGS# 40042 Base PCGS# 40018

17259 1799/8 13 Stars Reverse, B-1, BB-142, R.4, Fine 12 PCGS. Bowers Die State III, as usual, showing heavy die crumbling near the RI in AMERICA. This evenly worn collector-grade piece displays complete border dentils and defined central devices. Olive-green border toning complements golden-gray interiors, and the surfaces are problem-free. NGC ID# 24X8, PCGS# 40065 Base PCGS# 6884

17260 1799 7x6 Stars, B-16, BB-158, R.2 — Cleaned — PCGS Genuine. XF Details. Bowers Die State I. Lightly cleaned but retuned attractive gunmetal-gray hues that set off the sharp detail of the devices. A few surface marks do not detract. This well-centered and impressively sharp Draped Bust type coin will appeal to many collectors despite the lack of a numeric grade.

17261 1799 7x6 Stars, B-12, BB-160, R.3, VF20 PCGS. Bowers Die State III, cracked at the date. This is a problem-free midgrade type coin, showing a bold, even strike and no adjustment marks. The champagne-tinted olive-gray surfaces deepen toward the borders and are free of distracting abrasions. Eye appeal is excellent. NGC ID# 24X7, PCGS# 40051 Base PCGS# 6878

**1799 B-12, BB-160 Dollar, Choice VF
7x6 Stars, No Berries, Some Luster Remains**

17262 1799 7x6 Stars, B-12, BB-160, R.3, VF35 PCGS. Bowers Die State III. Traces of golden mint luster remain at the margins of this Choice VF early dollar. Regrinding of the reverse die by the Mint removed all of the berries on the olive branch, leaving a solitary berryless stem among the leaves. Attractive bluish-brown toning lightens to pale silver-gray at exposed high points of the devices, which are quite sharp for the assigned grade. The eye appeal is exceptional. NGC ID# 24X7, PCGS# 40051 Base PCGS# 6878

17263 1799 7x6 Stars, B-11, BB-161, R.3, VF30 NGC. Die State IV, unlisted, showing a die break beneath the eagle's beak. This olive-gray BB-161 dollar is impressively well-detailed for the VF grade level, and the original patina is similarly appealing. A few minor rim bumps and an old mark on Liberty's forward cheek are mentioned for accuracy. NGC ID# 24X7, PCGS# 40052 Base PCGS# 6878

**1799 7x6 Stars Dollar, XF40
Condition Census Quality, B-22, BB-168**

17264 1799 7x6 Stars, B-22, BB-168, R.4, XF40 PCGS. Bowers Die State III. A horizontal die crack bisects the reverse, traveling from the rim through the E in UNITED across the eagle and between AM(ERICA). The stars are arranged 7x6 on the obverse. The second T in STATES is positioned over the left edge of the cloud. According to Dave Bowers, most BB-168 dollars "are in lower grades through VF. EF coins are very rare." This charcoal-gray dollar is remarkably sharp on the stars, lower curls, and shield. Smooth overall with a few obverse adjustment marks. NGC ID# 24X7, PCGS# 40059 Base PCGS# 6878

17265 1800 B-8, BB-188, R.4, Fine 12 PCGS. Bowers Die State IV. Complete border dentils and surprisingly smooth surfaces are only about half of this coin's eye appeal; deep gunmetal-gray fields and lighter tan-gray relief elements provide an attractive circulation-cameo appearance. An ideal coin for the collector who appreciates old-time patina. NGC ID# 24X9, PCGS# 40074 Base PCGS# 6887

**1800 Dollar, XF40
Wide Date, Low 8, B-10, BB-190**

17266 1800 Wide Date, Low 8, B-10, BB-190, R.3, XF40 PCGS. Bowers Die State VI. Several prominent cracks through the reverse legend, namely the C in AMERICA, confirm the late die state. This obverse die was also used to strike the famous AMERICA! dollars. Both sides exhibit pinpoint detail and excellent centering with normal friction over the highest points of Liberty's portrait and the eagle. Light patina graces the border areas. Housed in a green label holder. NGC ID# 24X9, PCGS# 40076 Base PCGS# 6888

17267 1800 Wide Date, Low 8, B-10, BB-190, R.3 — Repaired — PCGS Genuine. XF Details. Bowers Die State VI. Granular surfaces show evidence of careful tooling in the fields and cleaning overall that smooth out some of the scattered abrasions. The coin is bright with some olive-gold toning near the borders. Sharp detail and an even, well-centered strike are the hallmarks.

1800 B-13, BB-193 Dollar, XF40
Strong Strike, Attractive Violet-Gray Patina

17268 1800 B-13, BB-193, R.3, XF40 PCGS. Bowers Die State III. The reverse features prominent clash marks and a die crack above AMERICA. This late die state of B-13 was formerly believed to be a distinct variety, Bolender-18. Today, specialists recognize it for what it is. Examples are among the most plentiful for the year. This delightful example exhibits a strong strike softened only by a brief stay in circulation. Smooth surfaces display violet-gray patina with steel-blue and gold accents. NGC ID# 24X9, PCGS# 40077 Base PCGS# 6887

17269 1800 Dotted Date, B-14, BB-194, R.3, VF20 PCGS. Bowers Die State V. The pleasing slate-gray surfaces of this impressive VF specimen are lightly abraded, with no trace of adjustment marks, but a few obverse rim dents are evident between 5 and 7 o'clock. The central design elements retain much interior detail intact. NGC ID# 24X9, PCGS# 40078 Base PCGS# 6889

17270 1800 Dotted Date, B-14, BB-194, R.3 — Cleaned — PCGS Genuine. VF Details. Bowers Die State IV. The "Dotted Date" variety, showing small die lumps in and around the first 0, with a prominent "dot" below the numeral. This well-centered, boldly struck example displays dusky slate-gray surfaces and good detail. No adjustment marks are observed.

17271 1800 Dotted Date, B-14, BB-194, R.3, VF25 PCGS. Bowers Die State IV. The so-called "Dotted Date" variety, showing several die lumps around the first 0. This well-detailed VF example shows uniform battleship-gray coloration and problem-free surfaces. The obverse border dentils are a trifle weak at 2 o'clock, indicating a minutely uneven strike. NGC ID# 24X9, PCGS# 40078 Base PCGS# 6889

17272 1802/1 Wide Date, B-3, BB-234, R.3 — Cleaned — PCGS Genuine. Fine Details. Bowers Die State II. This 1802/1 Wide Date dollar variety has the first star relatively close to the lowest curls and a die lump below star 8. Five overdate varieties are known among 1802 dollars; BB-234 is one of the two most collectible. This silver-gray dollar has bold outlines and partial interior detail. A cleaning has rendered the surfaces unnaturally bright.

17273 1803 Small 3, B-5, BB-252, R.3, Fine 15 PCGS. Deep gunmetal-gray and golden-brown toning encompasses both sides. An unobtrusive shallow strike-through (as made) is noted near the final two obverse stars, and a few faded field marks near the forehead emerge beneath a loupe.
Ex: Long Beach Signature (Heritage, 6/2015), lot 4729. NGC ID# 24XD, PCGS# 40097 Base PCGS# 6900

17274 1803 Small 3, B-5, BB-252, R.3, VF25 PCGS. The date is closely spaced, and the Small 3 is high next to the bust. This well-detailed gunmetal-gray and tan-gold Large Eagle type coin has no prominent adjustment marks and features complete border dentils. The surfaces show only light, unobtrusive marks consistent with the amount of wear. The patina is original. NGC ID# 24XD, PCGS# 40097 Base PCGS# 6900

1803 Dollar, XF40
B-4, BB-254, Small 3

17275 1803 Small 3, B-4, BB-254, R.3, XF40 PCGS. A Small 3 variety with star 1 close to Liberty's hair curl. This is a boldly struck coin with no visible adjustment marks or other impairments. Olive and gold intrude upon mainly gunmetal-gray surfaces, complementing boldly detailed design elements. An excellent Large Eagle type coin with original coloration. NGC ID# 24XD, PCGS# 40099 Base PCGS# 6900

17276 1803 Large 3, B-6, BB-255, R.2 — Plugged — PCGS Genuine. XF Details. Bowers Die State II. The 3 in the date is recut on this variety. The present example displays sharp detail and an even, well-centered strike. Only light high-point wear is discernible. The obverse is deeply toned in gold and aquamarine hues, while the reverse displays lighter champagne color. A carefully plugged hole is evident at the BE in LIBERTY and next to the U in UNITED.

SEATED DOLLARS

1840 Dollar, AU58
First Year of Type

17277 1840 AU58 NGC. Mottled gunmetal-gray toning is pervasive on both sides of this near-Mint State example of the first year of issue of this design. While popular now, these were largely unheralded on their release, with truly Uncirculated examples being rare. Even the Gardner Collection could go no higher than MS63. This is a striking example of a difficult issue. Census: 44 in 58, 53 finer (9/17). NGC ID# 24YA, PCGS# 6926

1842 Seated Dollar, MS63
Ex: Jack Lee, Seldom Seen This Fine

17278 1842 MS63 PCGS. OC-2, R.1. The date is far right and slightly repunched. Three die lines occur in the upper-left reverse shield. When collectors and numismatists discuss rarities in the Seated Liberty Dollar series, the 1842 issue is seldom mentioned. It should be, however, for examples are seldom seen in Mint State grades, especially approaching Choice quality. This lovely representative is moderately toned in golden-gray shades that lessen the appearance of scattered abrasions. Actually, there are few distracting blemishes to begin with, and the strike, if incomplete, is uncommonly sharp for the type. Population: 24 in 63, 20 finer (9/17).

Ex: *November Signature* (Heritage, 11/2003), lot 8263; *Jack Lee Collection, Part III / Dallas Signature* (Heritage, 11/2005), lot 5112. NGC ID# 24YC, PCGS# 6928

17279 1843 AU55 NGC. OC-1. The obverse has slight repunching on the bottom edge of the crossbar of the 4, and the reverse has parallel die lines left of the first shield stripe. This reverse die was used in 1842 and 1843. An attractive Choice AU representative, this dollar exhibits light gray luster and splashes of gold toning. NGC ID# 24YD, PCGS# 6929

1844 Dollar, Choice AU
Attractive Original Patina

17280 1844 AU55 PCGS. CAC. OC-1, R.2. Seated dollar experts Dick Osburn and Brian Cushing explain that the "1844 is a desirable date in the Liberty Seated Dollar series, not only because of its relatively low mintage but also because of its interesting obverse die, which is doubled and displays a misplaced 18 in the gown." Each side is attractively and originally toned in violet and gray patina. A touch of friction occurs on the knee and wingtips. About 5% of the 20,000 coin-mintage is believed extant. NGC ID# 24YE, PCGS# 6930

17281 1845 AU55 NGC. CAC. OC-1, R.2. From a mintage of 24,500 pieces, the 1845 Seated Liberty dollar is an elusive issue in Mint State. This Choice AU specimen is lightly worn and lightly abraded, with pleasing dove-gray surfaces and traces of mint luster under the patina. NGC ID# 24YF, PCGS# 6931

1846 Seated Dollar, MS62
Excellent No Motto Type Coin

17282 1846 MS62 PCGS. OC-1, R.1. The top of the 1 is repunched, and a die lump connects the upper berry to the eagle's leg. The 1846 is one of the more accessible Seated dollar issues, and this Mint State example would fit well in a high-grade type set. Incompleteness on the star centers and wing tips is characteristic. The other motifs are well-detailed. Semireflective surfaces show multicolor patina across the obverse and minimal toning on the reverse. NGC ID# 24YH, PCGS# 6932

17283 1847 AU58 NGC. OC-2, R.1. The 1 directly under the shield point and die lines within the leftmost shield recess attribute the variety. Slight softness on the hair and stars is typical for this popularly collected No Motto issue. This example is mostly well-struck with brilliant surfaces and broad, square rims. NGC ID# 24YJ, PCGS# 6934

17284 1849 AU58 PCGS. OC-1, R.1. The availability of the 1849 Seated dollar suggests most coins were placed into domestic circulation rather than exported. This strongly struck, partly reflective near-Mint dollar barely saw circulation. Friction is practically undetectable. Specks of toning appear around the borders. NGC ID# 24YL, PCGS# 6936

17285 1850 XF45 NGC. OC-1, R.3. Only one die pair is documented for circulation-strike 1850 Seated dollars, which shows a heavy diagonal die line in the upper-right reverse shield. From a mintage of only 7,500 coins, this Choice XF example displays well-detailed design elements and bright silver surfaces save for a hint of gold that emerges from the borders. An unimportant rim bump is noted at 10:30 on the obverse. NGC ID# 24YM, PCGS# 6937

1850-O Dollar, XF45
Scarce New Orleans Issue

17286 1850-O XF45 PCGS. With a mintage of only 40,000 pieces, the 1850-O is the scarcest Seated Liberty dollar issued from the New Orleans mint. This is a very satisfying circulated example, boasting consistent gray toning with blue and rose undertones. The strike is above average, as can be seen at Liberty's head and the eagle's talons. A small scrape is noted above the left wing, but the piece is generally problem-free. Population: 33 in 45, 79 finer (9/17). NGC ID# 24YN, PCGS# 6938

17287 1859-S XF45 PCGS. CAC. OC-1, R.2. The date is left, and the first two digits are repunched. OC-1 represents about 80% of the 800 surviving 1859-S Seated dollars. This lightly circulated Choice XF example features mixed olive and golden-gray patina that speaks to its originality. Minor grade-consistent marks on each side. NGC ID# 24YZ, PCGS# 6948

17288 1860-O MS61 NGC. OC-4, Low R.3. Much of the reverse shield recesses are not finished on this variety. Mintmark and date placement confirm the attribution. Among Seated dollars, the 1860-O is plentiful, and Mint State examples are highly popular type coins. This piece is uncommonly well-struck and prooflike. Light golden toning warms each side. NGC ID# 24Z3, PCGS# 6950

**1860-O Dollar, MS62
Vibrant Luster, All-Brilliant**

17289 1860-O MS62 NGC. OC-1, R.1. According to Bowers' *Silver Dollar Encyclopedia*: "The 1860-O dollar was probably intended primarily for the export trade, which at the time was active through New Orleans (among other ports)." While that is a distinct possibility, we also know that thousands of Mint State examples were never released from Treasury until the early 1960s, accounting for the relative collectibility of high-grade representatives. This example is bright and flashy with untuned surfaces that are moderately bagmarked but still attractive, on account of the coin's exceptional luster.

Ex: Long Beach Signature (Heritage, 5/2008), lot 921. NGC ID# 24Z3, PCGS# 6950

17290 1863 — Cleaned — PCGS Genuine. XF Details. OC-1, Low R.3. Only one die pair is known for circulation-strike 1863 Seated dollars, producing the small 27,200-coin mintage. This well-detailed coin is bright silver-white with hairlined surfaces that indicate an old cleaning. No heavy abrasions are seen.

**1869 Seated Dollar, MS61 Prooflike
Frosty Motifs, Underrated Issue**

17291 1869 MS61 Prooflike NGC. OC-2, R.2. Osburn-Cushing Die State b/b. Osburn and Cushing write that although this issue claims a relatively high mintage of 423,700 coins, "the date is much scarcer than its high mintage would indicate. In most price guides it prices barely above the 1871 and 1872, the two highest mintage dates in the series. It should be considered as under-rated in all grades." This variety shows repunching on the 1 and doubling on the motto. Each side is well-defined and brilliant with thick frost over the devices. The obverse die was also used to strike proofs, although a light die crack between T and E in UNITED suggests that this is a prooflike business strike. Lightly marked fields show profound reflectivity, and the eye appeal is especially impressive for the grade. Census 1 in 61 Prooflike, 0 finer (8/17). NGC ID# 24ZC, PCGS# 6962

**1870-CC Dollar, Choice VF
First Carson City Issue**

17292 1870-CC VF35 PCGS. OC-3, High R.5. The 7 is directly over a dentil, the mintmark is closely spaced, and there is no die line extending from the lower tip of the fletching. The 1870-CC has a reported mintage of 12,462 coins and is the most collectible of the four Carson City Seated dollar issues. This Choice VF example features smooth surfaces with violet-gray patina and accents of gold and blue. LIBERTY is readable and most feathers are strong. The head, knee, and wingtips show expected merging. Four arching marks occur near D S. NGC ID# 24ZE, PCGS# 6964

**1870-CC Silver Dollar, XF45
Well-Detailed and Problem-Free**

17293 1870-CC XF45 PCGS. OC-1, Low R.4. A tiny tine off of Liberty's brow and the date and mintmark placements identify this variety. The 1870-CC is the most collectible Carson City issue in the Seated dollar series, ideal for the type collector seeking a single coin from this mint. The present example is boldly detailed and problem-free. Each side has deep gunmetal-blue and gray toning. NGC ID# 24ZE, PCGS# 6964

**1871 Seated Dollar, MS62
Bright, Lustrous Surfaces**

17294 1871 MS62 PCGS. OC-10, R.2. The 1871 is the most frequently encountered With Motto date in the series, and as such is often used for type purposes. This is a remarkably bright example with strong semiprooflike fields. The strike is generally strong throughout, and the surfaces are brilliant except for a slight accent of pale golden patina on the obverse. NGC ID# 5DNV, PCGS# 6966

1871 Dollar, MS63
Richly Toned Original Surfaces

17295 1871 MS63 PCGS. A bold Select Uncirculated Seated Liberty dollar, with complex gray and rose toning with undertones of gold and blue that boasts of its originality. The obverse has a few nicks here and there, commensurate with the grade. A reverse die break over the tops of UNITE draws attention, but no post-striking marks jump out at the naked eye. While 1871 dollars are not particularly rare, they become much harder to find with truly original surfaces like these. Population: 47 in 63, 57 finer (9/17). NGC ID# 5DNV, PCGS# 6966

1872 Seated Dollar, MS62
Softly Frosted With Golden Accents

17296 1872 MS62 PCGS. OC-5, Low R.3. Obverse 2 shows misplaced digits on the base above 1 and 2, and Reverse B exhibits a die line between TR in TRUST. The availability of the 1872 corresponds to its series-high mintage of 1.1 million coins. Golden-orange accents appear over softly lustrous, lightly abraded surfaces. The reverse is boldly detailed, while the obverse features minor softness on the stars and Liberty's head. NGC ID# 24ZJ, PCGS# 6968

1872-CC Dollar, VG10
Circulated Cameo Effect

17297 1872-CC VG10 PCGS. OC-1, High R.3. The Osburn-Cushing reference Seateddollarvarieties.com puts forth a survival estimate of 250 coins from an original mintage of 3,150 1872-CC dollars. The low mintage and CC-mintmark combination easily explain the appeal this issue holds for collectors. Well-worn, light-gray motifs stand out against deep-gray fields, creating an appealing circulated cameo effect. The finer points of the design are largely blended together, but outlines remain bold.
Ex: Public Auction (Stack's, 9/2001), lot 486, flip included.

17298 1872-S — Cleaned — ANACS. AU50 Details. OC-1, Low R.3. This AU-level coin is boldly detailed but with unnaturally bright silver surfaces from a light cleaning. The 1872-S is the only collectible San Francisco issue in the series, coming from a mintage of 9,000 pieces. The 1870-S is among the rarest of all United States coinage issues, and the 1873-S — with a reported mintage of 700 pieces in the *Guide Book* — is unknown in any collection.

PROOF SEATED DOLLARS

1861 Seated Liberty Dollar, PR63
Sharply Detailed

17299 1861 PR63 NGC. OC-P1, High R.3. A fairly generous mintage of 1,000 proof Seated Liberty dollars was accomplished in 1861, on the brink of the Civil War, but how many were actually distributed remains an open question. Perhaps no more than 350 examples found their way to collectors. Two proof die varieties are known and this coin represents the more available OC-P1 variety, with some unfinished areas around the leaves on the reverse. The design elements are sharply detailed and the lightly marked surfaces are blanketed in shades of lavender-gray and pale gold toning. NGC ID# 252F, PCGS# 7004

17300 1863 PR61 PCGS. OC-P2, R.4. This modestly contrasted proof is needle-sharp and deeply reflective. A hint of champagne toning graces each side. Although hairlines in the fields limit the grade, the coin remains quite pleasing to the unaided eye. NGC ID# 23BS, PCGS# 7006

17301 1865 — Repaired — PCGS Proof Genuine. Unc Details. OC-P2, R.3. Some swirling tool marks in the right obverse field prevent a numeric grade on this sharp, glimmering proof, while other light marks and hairlines are consistent with the majority of lower-end proof Seated dollars. A hint of light golden toning warms each side. From a mintage of only 500 pieces.

1865 Seated Dollar, PR61
Brilliant and Boldly Contrasted

17302 1865 PR61 NGC. OC-P2, R.3. The 1865 Seated dollar is a challenging issue in either circulation-strike or proof format. Merely 46,500 coins were produced for commercial use, and 500 more were specially manufactured for sale to collectors. High-grade circulation strikes are often out of reach, placing added date pressure on proofs like this. Each side is totally brilliant. Frosted motifs contrast boldly against reflective, moderately hairlined fields. Impressive for the grade. NGC ID# 252K, PCGS# 7008

**1867 Seated Liberty Dollar, PR63 Cameo
Only 625 Examples Struck**

17303 1867 PR63 Cameo PCGS. OC-P1, R.3. Osburn-Cushing Die State a/a. A small mintage of 625 proof Seated Liberty dollars was accomplished in 1867, with a single die pair identified by Brian Cushing and Dick Osburn. This impressive Select example exhibits sharply detailed design elements with enough mint frost to create bold cameo contrast with the deeply mirrored fields, despite some delicate greenish-gold and powder-blue toning on both sides. Population: 13 in 63 Cameo, 28 finer (9/17). NGC ID# 252N, PCGS# 87015

17304 1870 PR58 PCGS. OC-P2, High R.4. Extremely minor reverse die doubling is visible under magnification on WE, differentiating this from the other two proof die varieties that share the same obverse. Deeply reflective fields and sharp motifs exhibit handling marks a slight high-point friction, confirming the AU58 grade. The coin is brilliant aside from a few toning spots around the date. NGC ID# 252S, PCGS# 7018

17305 1870 PR62 PCGS. OC-P1, Low R.3. Roughly 450 proofs were struck from this reverse, featuring minor die doubling. In all, the 1870 claims a proof mintage of 1,000 pieces. This reflective specimen has delicate shades of rose and powder-blue over surfaces with wispy field marks. NGC ID# 252S, PCGS# 7018

**1873 Seated Dollar, PR64 Cameo
Final Year, 600 Proofs Struck**

17306 1873 PR64 Cameo PCGS. OC-P1, R.3. A thin layer of dusky patina covers the fields on each side, but it fails to inhibit the reflectivity and Cameo contrast seen throughout this 1873 Seated dollar proof. Minor contact marks explain the grade. A total of 600 proofs were struck during the final year of the series. About 360 specimens are believed extant, according to Osburn and Cushing. Population: 25 in 64 (1 in 64+) Cameo, 23 finer, including Deep Cameo (9/17). NGC ID# 252V, PCGS# 87021

TRADE DOLLARS

**1874-CC Trade Dollar, MS61
Scarce in Mint State**

17307 1874-CC MS61 NGC. Ex: Jules Reiver Collection. Micro CC. Period after FINE. The reverse die is distinguished by a bold die scratch through the upper portion of the D in DOLLAR. This sharply struck example shows the obverse lightly toned in peripheral gold and lilac colors. The mint luster is vibrant, and the marks are minor and inoffensive. A more challenging issue in Mint State, and always subject to strong demand from Carson City collectors. Ex: *Jules Reiver Collection (Heritage, 1/2006)*, lot 21575. NGC ID# 2532, PCGS# 7035

17308 1875-S Type One Reverse MS64 NGC. Large S. Peach-gold and dove-gray shades alternate across this coruscating and minimally marked near-Gem. The strike is good, although Liberty's curls and the eagle's right (facing) leg lack a full impression. Numerous spindly die cracks across the margins provide additional interest. NGC ID# 2536, PCGS# 510101 Base PCGS# 7039

17309 1875-S Type One Reverse MS64 PCGS. Large S mintmark. This is a brilliant-white and richly frosted near-Gem Trade dollar, with exceptionally vibrant cartwheel luster. The huge mintage of 4,487,000 pieces — although it pales in comparison to the 1877-S mintage of more than 9.5 million pieces — yields a fair number of near-Gem examples, but few are as sharply struck and lightly marked as this Choice coin. A solitary reeding mark near star 3 is the sole abrasion of note. PCGS reports just 42 numerically finer examples (9/17). NGC ID# 2536, PCGS# 510101 Base PCGS# 7039

**1876 Trade Dollar, MS64
Type One Obverse and Reverse**

17310 1876 Type One Obverse, Type One Reverse, MS64 PCGS. A study conducted by Heritage Cataloger and Senior Numismatist Mark Borckardt revealed that circulation-strike 1876 Trade dollars with a Type One Obverse and Reverse are about twice as scarce as those with a Type One Obverse and Type Two Reverse. Distinguishing marks include the scroll tip pointing left, three fingers on the branch hand, and a berry under the eagle's claw. Lively mint luster shines through golden patina that minimizes small marks. Strongly defined despite a hint of softness on the head. NGC ID# 2539, PCGS# 40110 Base PCGS# 7041

**1876-S Trade Dollar, MS64+
Very Rarely Found Finer**

17311 1876-S Type One Obverse, Type One Reverse, MS64+ PCGS Secure. Large S. The usual variety features the scroll end pointing left and a berry under the eagle's talon. This high-end near-Gem Trade dollar enjoys strong strike characteristics and mostly brilliant surfaces with glints of golden color around the margins. PCGS reports seven finer grading events (9/17). NGC ID# 4EMM, PCGS# 40114 Base PCGS# 7043

17312 1877-CC AU55 PCGS. Hints of pale lavender and gold border toning surround slate-gray interiors on this Choice AU Carson City Trade dollar. The strike is sharp and wear is light. A few scattered abrasions are normal for the grade and issue. NGC ID# 253D, PCGS# 7045

17313 1877-CC — Stained — NGC Details. Unc. This sharply struck, Uncirculated Carson City Trade dollar is softly frosted and shows remarkably few abrasions. Dusky olive-gold toning blankets each side, but an area of deeper amber coloration along the upper-left obverse border draws the viewer's eye.

PROOF TRADE DOLLARS

**1874 Trade Dollar, Colorful PR64+
CAC-Approved, Original and Eye-Appealing**

17314 1874 PR64+ PCGS. CAC. Although a handful of 1874 Trade dollar proofs survive in higher grades, including those with Cameo or Deep Cameo contrast, this high-end near-Gem certainly matches many of them in terms of its originality and aesthetic quality. Dramatic violet, blue, rose, and gold patina drapes each side. Underlying surfaces are flashy with minimal contact. Strike detail is complete. From a mintage of 700 proofs. NGC ID# 27YK, PCGS# 7054

**1874 Trade Dollar, Lightly Toned PR64 Cameo
A Surprisingly Scarce Proof Issue**

17315 1874 PR64 Cameo PCGS. A hint of light golden toning shows brief areas of warm-gray patina at the base of the portrait. The obverse strike is needle-sharp on Liberty's head as well as each and every star. The smooth, mirrored fields are undisturbed except for some shallow slide marks in the left obverse field and a small dig below 18 in the date. The reverse is likewise sharp with the exception of the right (facing) talon. Frosted raised motifs provide nice Cameo contrast. Population: 28 in 64 (1 in 64+) Cameo, 5 finer (9/17). NGC ID# 27YK, PCGS# 87054

**1875 Trade Dollar, PR62
Colorful Border Toning**

17316 1875 PR62 PCGS. Untoned interiors merge with rings of multicolor border toning that includes shades of golden-orange, cobalt-blue, and magenta. The bright centers exhibit reflective fields that contrast somewhat against the razor-sharp motifs. Undeniably appealing despite myriad wispy marks. Housed in an old green label holder. NGC ID# 27YL, PCGS# 7055

17317 1878 PR61 ANACS. This is one of 900 proof-only Trade dollars struck at the Philadelphia Mint in the series' final year of regular production. The surfaces are bright silver with lightly hairlined fields. Contrast is minimal, but strike detail is predictably sharp. Housed in a small-sized holder. NGC ID# 27YP, PCGS# 7058

17318 1880 PR61 PCGS. This essentially brilliant proof is fully struck and modestly contrasted. Scattered hairlines and contact marks limit the grade, although the eye appeal surpasses that of many other PR61 coins that we have seen in this type. NGC ID# 27YS, PCGS# 7060

17319 1882 — Altered Surfaces — PCGS Proof Genuine. Unc Details. While the fields are still reflective, the general impression is that they were very lightly brushed, thus producing the Unc Details grade from PCGS on this otherwise attractive proof type coin. Golden toning blankets each side, and the strike is sharp.

MORGAN DOLLARS

17320 1878 8TF Diagonal In 8, VAM-17, MS65 NGC. A diagonal die chip in the bottom loop of the first 8 identifies the popular VAM variety. This attractive Gem exhibits sharply detailed design elements and vibrant mint luster throughout, with no mentionable distractions. NGC ID# 253H, PCGS# 133818 Base PCGS# 7072

17321 1878 8TF Broken R & B, VAM-21, MS65 PCGS. A delightful Gem from the first year of the Morgan design, this well-detailed specimen exhibits an extensive network of peripheral die cracks on both sides. The well-preserved brilliant surfaces radiate vibrant mint luster throughout. NGC ID# 253H, PCGS# 133822 Base PCGS# 7072

17322 1878 7/8TF 7/4 Strong, VAM-37, MS65 PCGS. The visible underlying tailfeathers are strong on VAM-37, while die lines and other markers confirm the variety. This Gem 7/8 tailfeathers Morgan displays lovely concentric toning in shades of lemon-gold, sea-green, blue, lavender, and peach orange. The strike is sharp and there are no distracting abrasions. NGC ID# 2TXZ, PCGS# 134034 Base PCGS# 7078

17323 1878 7/8TF 7/4 Strong, VAM-37, MS65 PCGS. The overlapping tailfeathers are prominent on this 7/4 variety. Gem-quality surfaces yield frosty mint luster with a hint of light golden toning. The strike is bold, and neither side exhibits significant abrasions. NGC ID# 2TXZ, PCGS# 134034 Base PCGS# 7078

17324 1878 7TF Reverse of 1879 MS65+ NGC. CAC. Obverse toning transitions from light gold over the upper portion to rose, violet, and blue toward the lower border. Frosty luster shines throughout. The reverse remains brilliant. Sharply struck with clean fields and elegant eye appeal. NGC shows 16 finer submissions (9/17). NGC ID# 253L, PCGS# 7076

17325 1878-CC MS65 PCGS. A delightful Gem representative from the first year of the Morgan design, this coin exhibits sharply detailed design elements and well-preserved, brilliant surfaces, with vibrant mint luster throughout. Eye appeal is terrific. NGC ID# 253M, PCGS# 7080

17326 1878-CC MS65+ PCGS. VAM-9. A lustrous first-year Carson City Gem — brilliant and sharply struck with a few mint-made roller marks on the chin. VAM-9 is interesting for its lengthy die scratches (as coined) on the lower reverse. NGC ID# 253M, PCGS# 7080

17327 1878-CC MS65 PCGS. CAC. Coruscating mint frost issues from all-brilliant surfaces, delivering tremendous visual appeal. The hair over Liberty's ear and the eagle's breast feathers are razor-sharp. A few ticks on the cheek are seen. An excellent example from the first year of CC Morgan dollar production. NGC ID# 253M, PCGS# 7080

17328 1878-CC MS65 PCGS. CAC. The Morgan dollar design was introduced in 1878 and coins were struck at all three active mints. This attractive Carson City Gem exhibits sharply detailed design elements and well-preserved, lustrous surfaces throughout. NGC ID# 253M, PCGS# 7080

17329 1878-CC MS65 PCGS. CAC. The hair above Liberty's ear is intricately defined, as are the eagle's breast feathers, although the talons are poorly rendered. Vibrant, frosty mint luster reveals only the most insignificant surfaces grazes as it travels around the near-brilliant surfaces of this Gem first-year Carson City Morgan. A hint of gold toning appears the outer peripheries. Housed in an old "rattler" holder. NGC ID# 253M, PCGS# 7080

17330 1879 MS66 PCGS. Semiprooflike fields amplify the visual appeal of this Premium Gem 1879 silver dollar. A few faint grazes on the cheek limit the grade, but these vanish at certain angles, leaving the coin seemingly pristine. The reverse periphery shows rich lavender and gold toning. Slight strike weakness is seen on the eagle's breast feathers. PCGS has seen five Superb Gems finer (9/17). NGC ID# 253S, PCGS# 7084

17331 1879 MS66 PCGS. The radiance throughout this brilliant Premium Gem dollar is incredible. Thickly frosted surfaces are completely devoid of color and are nearly mark-free. Fully struck over Liberty's head and the eagle's breast. PCGS reports only five finer submissions (9/17). NGC ID# 253S, PCGS# 7084

17332 1879 MS66 PCGS. The creamy surfaces of this delightful Premium Gem are well-preserved and lustrous, with delicate hints of lavender-gray toning. The design elements are well-detailed, with just a hint of blending on the hair above the ear. PCGS has graded five numerically finer examples (9/17). NGC ID# 253S, PCGS# 7084

17333 1879 MS64 Deep Mirror Prooflike PCGS. CAC. The lightly marked surfaces of this spectacular Choice example include deeply reflective fields that contrast profoundly with the sharply detailed, frosty design elements. Overall eye appeal is terrific. NGC ID# 56ZE, PCGS# 97085

17334 1879-CC — Cleaned — PCGS Genuine. AU Details. This is a well-struck, untuned AU coin with good detail and satiny fields. A reed mark on Liberty's cheek is the only notable distraction. Scattered hairlines indicate a light cleaning and prevent a numeric grade from PCGS.

17335 1879-CC — Stained — PCGS Genuine. Unc Details. Normal Mintmark. Both sides are unnaturally muted, hence the Details assessment, but strike definition remains good. Minimal marks occur on each side, though a tick on the eagle's breast acts as an identification marker. Challenging Carson City issue.

1879-O Silver Dollar, MS65 Blazing Mint Luster

17336 1879-O MS65 PCGS. The venerable New Orleans facility was reinstated as a mint in 1879 largely to fulfill the requirements of the Bland-Allison Act of 1878. It responded with a mintage of nearly 2.9 million silver dollars, despite a lack of silver bullion that limited production. The 1879-O is a workmanlike issue with few Gem coins and very few examples any finer. This brilliant and frosted Gem is brightly lustrous and razor-sharp. PCGS has certified a mere 26 coins in finer grades (9/17). NGC ID# 253X, PCGS# 7090

17337 1879-S Reverse of 1878, VAM-9, Top 100, MS64+ NGC. A Top 100 Variety. This sharply struck Reverse of 1878 coin displays brilliant, radiant cartwheel luster. A few light grazes on Liberty's cheek limit the grade but are not overly distracting. Eye appeal is excellent. Finer Reverse of 1878 examples are scarce. NGC ID# 253W, PCGS# 133858 Base PCGS# 7094

Brilliant 1879-S Morgan Silver Dollar MS66 Deep Mirror Prooflike

17338 1879-S MS66 Deep Mirror Prooflike PCGS. CAC. An amazing example of this popular issue that is ideal for advanced Morgan dollar collectors and type collectors alike. This Premium Gem has impressive field-to-device contrast with brilliant, untuned silver surfaces. PCGS has certified just 61 like this one, with only eight finer Deep Mirror Prooflike coins (10/17). NGC ID# 45PS, PCGS# 97093

17339 1880-CC Reverse of 1878, VAM-4, MS65+ PCGS. A Top 100 Variety. This Reverse of 1878 overdate shows the underlying 79 clearly within the loops of the primary 80. The current high-end Gem is sharp and frosty with traces of light champagne toning. Only a few light grazes on Liberty's cheek limit the grade. NGC ID# 2542, PCGS# 7108

- 17340 1880-CC 8 Over High 7, VAM-5, MS65 Prooflike PCGS.** A Top 100 Variety. The overdate feature is clear despite a weak strike that affects the lower half of the reverse. Some faint roller marks are not fully struck out of the planchet near the lower reverse border. The coin is brilliant, frosty, and well-contrasted with no major abrasions. NGC ID# 2542, PCGS# 41133 Base PCGS# 7103
- 17341 1880-CC 8 Over High 7, VAM-5, MS65+ Prooflike NGC.** A Top 100 Variety. Although not a true Cameo, this high-end Gem is unquestionably prooflike with contrasting frosted design elements. The strike is bold, and no major abrasions are seen. A crescent of orange-gold border toning along the right obverse periphery complements silvery brilliance elsewhere. NGC ID# 2542, PCGS# 41133 Base PCGS# 7103
- 17342 1880-CC 8 Over Low 7, VAM-6, MS66 PCGS.** A Top 100 Variety. The underlying 7 is low within the loops of the second 8. This coin is well-struck and frosty with original mint luster and light contact marks on the obverse. Vibrant cartwheel luster is untuned aside from a blush of rainbow color over the upper-left reverse margin. NGC ID# 2542, PCGS# 133878 Base PCGS# 7104
- 17343 1880-CC MS66 PCGS.** From a modest mintage of 591,000 pieces, the 1880-CC Morgan dollar is generally available in MS66 condition, but finer coins are rare. This sharply detailed Premium Gem offers well-preserved surfaces and vibrant mint luster throughout. PCGS has graded 36 numerically finer examples (9/17). NGC ID# 2542, PCGS# 7100
- 17344 1880-CC MS66 PCGS.** A clear divide is seen across Liberty's cheek, separating the mostly untuned portrait from surrounding shades of gold, blue, green, and violet. The reverse is totally brilliant. The 1880-CC is rare in higher grades. NGC ID# 2542, PCGS# 7100
- 17345 1880-CC MS66 PCGS.** The 1880-CC Morgan dollar is always popular because of its low mintage and the charismatic CC mintmark. This well-detailed Premium Gem offers well-preserved, lustrous surfaces, with a few subtle hints of lavender toning. PCGS has graded 36 numerically finer examples (9/17). NGC ID# 2542, PCGS# 7100
- 17346 1880-CC MS66 PCGS. CAC.** An impressive Carson City Morgan dollar, this Premium Gem is fully brilliant and untuned with frosty devices and satiny fields that exhibit slight contrast, especially on the obverse. NGC ID# 2542, PCGS# 7100
- 17347 1880-CC Reverse of 1879, 8/7 Dash, VAM-8, MS66 PCGS.** A die line through the M in AMERICA and tiny die chips within the C's of the mintmark identify this variety, which also has a dash below the second 8 in the date. The present coin is thickly frosted, luminous, and original. The untuned surfaces show a clean cheek and only a few faint grazes in the field. A bold strike complements the other visual characteristics. NGC ID# 2542, PCGS# 41142 Base PCGS# 7100
- 17348 1880-O MS64 PCGS.** This impressive Choice example exhibits a sharp strike for a New Orleans Mint issue, and the well-preserved surfaces radiate vibrant, frosty mint luster throughout. PCGS has graded 43 numerically finer examples (9/17). NGC ID# 2543, PCGS# 7114
- 17349 1880-O MS64 PCGS.** The 1880-O is available in MS64, but PCGS has seen only 43 finer submissions (9/17). This piece displays a bold strike and satiny luster. Light golden border toning emerges from the peripheries around brilliant interiors. Grade-limiting abrasions are surprisingly light and unobtrusive. NGC ID# 2543, PCGS# 7114
- 17350 1880-O MS64 PCGS. CAC.** Original sea-green, gold, and salmon-pink toning blankets both sides of this Choice 1880-O Morgan dollar, intermingling across the frosty luster without fully blending. A few light marks on the cheek limit the grade, and slight strike weakness is seen as usual on the central high points. PCGS reports only 43 numerically finer coins (9/17). NGC ID# 2543, PCGS# 7114
- 17351 1880/79-O Crossbar, VAM-4, Top 100, MS64 PCGS. CAC.** A Top 100 Variety. The remnants of an undertype 7 are visible inside the top loop of the second 8 in the date. This impressive Choice specimen is sharply detailed and well-preserved, with ample mint luster and eye appeal. Population: 32 in 64 (8 in 64+), 2 finer. CAC: 13 in 64, 1 finer (9/17). NGC ID# 2543, PCGS# 133880 Base PCGS# 7116
- 17352 1880-O Checkmark, VAM-21, Hot 50, MS64 PCGS.** A Hot 50 Variety. A thin vertical die line on Liberty's eye gives the appearance of an "alligator eye." This near-Gem VAM-21 coin is well-struck and brilliant, showing only a few light abrasions on Liberty's cheek. Vibrant cartwheel luster adorns each side. NGC ID# 2543, PCGS# 133987 Base PCGS# 7114
- 17353 1880-S MS67+ PCGS. CAC.** This Plus-graded Superb Gem Morgan dollar would make an exceptional type coin. The design elements are razor sharp and the impeccably preserved surfaces display radiant mint luster, with subtle hints of pale gold toning. NGC ID# 2544, PCGS# 7118
- 17354 1880-S MS66 Deep Mirror Prooflike NGC.** A spectacular Premium Gem, with well-preserved brilliant surfaces that include deeply reflective prooflike fields and frosty devices on both sides. The design elements are sharply detailed and eye appeal is outstanding. NGC ID# 2544, PCGS# 97119
- 17355 1880-S Checkmark, VAM-12, MS67 Prooflike PCGS.** A Hit List 40 Variety. A magnificent Superb Gem, with sharply detailed, frosty design elements and deeply reflective fields. The well-preserved surfaces show a thin arcing toning streak at the second U in PLURIBUS. NGC ID# 482U, PCGS# 41325 Base PCGS# 7119
- 17356 1881 MS66 PCGS. CAC.** Attractive ocean-blue, plum-red, and butter-gold toning graces both sides. This crisply struck and lustrous silver dollar has smooth fields and a clean cheek. Much rarer in the present grade than its popular and low-mintage Carson City cousin. PCGS reports five numerically finer examples (9/17). *Ex: Dallas Signature (Heritage, 3/2013), lot 3773; Rosemont Signature (Heritage, 8/2013), lot 4343.* NGC ID# 2546, PCGS# 7124
- 17357 1881-CC MS66 PCGS.** From a Carson City mintage of 296,000 pieces, this delightful Premium Gem exhibits well-detailed design elements, with just a trace of the usual softness on the hair above the ear. The impeccably preserved surfaces are brilliant and lustrous, with just a hint of pale gold highlights. NGC ID# 2549, PCGS# 7126
- 17358 1881-CC MS66 PCGS.** This spectacular Premium Gem exhibits sharp definition on all design elements, and the virtually pristine surfaces emit blazing cartwheel mint luster, with a few hints of pale gold toning. Tremendous eye appeal. NGC ID# 2549, PCGS# 7126
- 17359 1881-CC MS66 PCGS.** Only 296,000 Morgan dollars were struck at the Carson City Mint in 1881, but many high-quality examples were preserved in Mint storage. This delightful Premium Gem exhibits sharply detailed design elements and immaculately preserved, lustrous surfaces. NGC ID# 2549, PCGS# 7126
- 17360 1881-CC MS66 PCGS.** A spectacular Premium Gem representative of this popular CC-mint issue, with well-detailed design elements and vibrant mint luster on both sides. The well-preserved surfaces show a few hints of golden-tan and lavender toning. NGC ID# 2549, PCGS# 7126
- 17361 1881-CC MS66 NGC.** This brilliant, immensely lustrous 1881-CC Morgan glistens with rolling mint luster that cascades over mostly unabraded surfaces with strong appeal. The strike is appreciably sharp. Finer 1881-CC dollars are significantly more elusive and command similarly strong prices. NGC ID# 2549, PCGS# 7126
- 17362 1881-CC MS66+ PCGS.** Incredibly frosty, brilliant-white luster gives this high-end 1881-CC Morgan exemplary visual appeal. Sharp design elements and a lack of obtrusive abrasions further heighten the aesthetics. Finer 1881-CC dollars are elusive. NGC ID# 2549, PCGS# 7126

- 17363 1881-CC MS66+ PCGS. VAM-2.** This frosty and highly lustrous Premium Gem exhibits untuned brilliance and sharp details. A late die state, the reverse exhibits extensive peripheral die cracks. NGC ID# 2549, PCGS# 7126
- 17364 1881-CC MS66+ PCGS. CAC.** The 1881-CC Morgan dollar boasts a low mintage of 296,000 pieces, though the GSA holdings ensure its high-grade availability. On this subtly frosted MS66+ example, the obverse is richly toned gold with arcs of peach and blue at the top, while the reverse is nearly brilliant with a hint of faint, isolated color.
Ex: Long Beach Signature (Heritage, 2/2011), lot 3897; Central States Signature (Heritage, 4/2011), lot 5647. NGC ID# 2549, PCGS# 7126
- 17365 1881-CC MS65 Prooflike PCGS. VAM-2.** The 88 in the date are doubled on this variety. Prooflike 1881-CC dollars are scarce in Gem or better condition, and Deep Mirror Prooflike pieces are similarly elusive. This Gem Prooflike example displays a bold strike and attractive cameo contrast. Hints of light golden toning grace otherwise brilliant, original surfaces. NGC ID# 2547, PCGS# 7127
- 17366 1881-CC MS65 Prooflike PCGS.** This deeply prooflike Gem displays frosty, sharp design elements and almost untuned surfaces. Appreciable cameo contrast is seen on each side, and Liberty's cheek is clean. Housed in a first generation holder. NGC ID# 2547, PCGS# 7127
- 17367 1881-S MS67+ PCGS. CAC.** This mass-produced S-mint issue is always a popular option for type representation. High-grade survivors like this are readily available. Nearly flawless surfaces are totally brilliant with swirling cartwheel luster. A full strike adds to the allure. NGC ID# 2549, PCGS# 7130
- 17368 1881-S MS67+ PCGS. CAC.** This Superb Gem has undeniable semiprooflike qualities with frosted, fully struck motifs and strong reflectivity in the fields. The cheek and other exposed areas are impressively unmarked. A completely brilliant type coin with great eye appeal. NGC ID# 2549, PCGS# 7130
- 17369 1882 MS66 PCGS.** This sharp Premium Gem is essentially brilliant, showing frosty mint luster and lacking any obtrusive abrasions. The 1882 is occasionally available in this grade but rare finer, with only 10 such pieces certified by PCGS (9/17). NGC ID# 254A, PCGS# 7132
- 17370 1882 MS66 PCGS. CAC.** Vivid shades of sea-green toning blanket the obverse of this delightful Premium Gem, while the reverse remains mostly brilliant. The design elements are well-detailed and both sides radiate vibrant mint luster. PCGS has graded 10 numerically finer examples (9/17). NGC ID# 254A, PCGS# 7132
- 17371 1882 MS66+ PCGS. CAC.** Vivid shades of sea-green and lavender toning blanket the well-preserved surfaces of this Plus-graded Premium Gem, with vibrant mint luster underneath. The design elements are sharply detailed and eye appeal is terrific. NGC ID# 254A, PCGS# 7132
- 17372 1882-CC MS66+ NGC.** The 1882-CC Morgan dollar is still an available issue in MS66, but finer examples are very scarce. This Plus-graded Premium Gem is sharply detailed throughout, with well-preserved, brilliant surfaces and vibrant mint luster on both sides. NGC ID# 254S, PCGS# 7134
- 17373 1882-CC MS66+ PCGS.** Collectors can thank the GSA release of the 1970s for this issue's widespread availability. This gorgeous Premium Gem displays thickly frosted, all-brilliant surfaces practically devoid of post-Mint imperfections. Needle-sharp strike characteristics. NGC ID# 254S, PCGS# 7134
- 17374 1882-CC MS65 Deep Mirror Prooflike PCGS.** This spectacular Gem Morgan dollar displays deeply reflective fields that contrast profoundly with the sharply detailed, richly frosted design elements. The brilliant surfaces are well-preserved, with outstanding visual appeal. NGC ID# 254B, PCGS# 97135

1882-O Morgan Dollar, MS66 Low Population This Fine

- 17375 1882-O MS66 PCGS.** Although plentiful in lower grades, the 1882-O Morgan is scarce in MS66 and a major rarity any finer. This Premium Gem displays softly frosted cartwheel luster with no obvious abrasions. The strike is above average for the issue, and no mentionable toning is present. Population: 69 in 66 (4 in 66+), 10 finer (including four Prooflike and Deep Mirror Prooflike coins in MS66) (9/17). NGC ID# 254C, PCGS# 7136

- 17376 1882-O MS65 Prooflike PCGS.** The design elements of this spectacular Gem are sharply detailed for a New Orleans issue, with just a touch of the usual softness on the hair above the ear. The lightly marked surfaces include prooflike reflective fields. NGC ID# 254C, PCGS# 7137

- 17377 1882-O/S Recessed, VAM-4, MS64 PCGS.** A Top 100 Variety. The "Recessed" variety of the popular O/S Morgan dollar, this impressive Choice example displays lightly marked, creamy surfaces, with vibrant mint luster. The design elements are well-detailed, showing some diagonal polishing lines inside the ear. NGC ID# 254D, PCGS# 133891 Base PCGS# 7138

- 17378 1883-CC MS66+ PCGS. CAC.** Blazing cartwheel luster casts this high-end Premium Gem in brilliant-white color, with no obtrusive abrasions in the fields or on the cheek. The strike is sharp, and eye appeal is outstanding. A strong Carson City type coin or date candidate. NGC ID# 254J, PCGS# 7144

1883-CC Dollar, MS67 Uncollectible in Better Condition

- 17379 1883-CC MS67 PCGS. VAM-5.** The 1883-CC had the second-largest distribution during the GSA sales of the 1970s after the 1884-CC. Superb Gems are scarce but accessible, while anything finer is decidedly uncollectible. Each side of this Carson City Morgan dollar features cartwheel luster over surfaces that appear as brilliant and unmarked as the day this piece was struck. PCGS reports five finer submissions in MS68 (9/17). NGC ID# 254J, PCGS# 7144

- 17380 1883-S MS61 PCGS.** This Mint State 1883-S dollar yields traces of light golden toning over the lightly abraded surfaces. Sharp design elements offer pleasing eye appeal. The 1883-S is a semikey date in Uncirculated condition, and low-grade Mint State coins are seldom offered with the visual merit of the present coin. NGC ID# 254K, PCGS# 7148

17381 1883-S MS63 PCGS. The 1883-S is a conditionally scarce semikey, though examples are far more accessible than the S-mint issue that follows. This example features a bold impression at the extreme centers and on the talons. The obverse shows scattered marks in the left field and on the cheek, while the reverse is comparatively clean. NGC ID# 254K, PCGS# 7148

17382 1884 MS65 Deep Mirror Prooflike PCGS. Prooflike examples of the 1884 Morgan dollar are, in the words of Dave Bowers, "in the distinct minority." Deep Mirror Prooflike dollars become truly rare at the Gem grade level. This is an all-brilliant representative with profound depth in the fields and a blanket of frost over needle-sharp devices. The effect is eye-catching. NGC ID# 254L, PCGS# 97151

17383 1884-CC MS66 Prooflike PCGS. Prooflike 1884-CC dollars are scarce in MS66 and extremely rare numerically finer. This piece is brilliant and sharp. Reflectivity in the fields promotes modest cameo contrast. Light, unobtrusive contact marks are visible under a loupe but do not affect the Premium Gem grade. PCGS has seen a single numerically finer Prooflike coin, plus three numerically finer Deep Mirror Prooflike examples and a number of other DML coins in this same grade (9/17). NGC ID# 254M, PCGS# 7153

17384 1884-CC MS65 Deep Mirror Prooflike PCGS. A delightful Gem Morgan dollar from the famous Carson City Mint, this coin offers sharply detailed, frosty design elements and deeply reflective fields that show a few minor signs of contact. The field/device contrast is dramatic. NGC ID# 254M, PCGS# 97153

17385 1884-CC MS65 Deep Mirror Prooflike PCGS. The well-preserved, brilliant surfaces of this impressive Gem include deeply reflective fields that contrast intensely with the well-detailed, frosty design elements. Overall visual appeal is outstanding. NGC ID# 254M, PCGS# 97153

17386 1884-CC MS65 Deep Mirror Prooflike PCGS. A beautiful, dramatically contrasted white-on-black cameo fully worthy of the Deep Mirror Prooflike designation. A few small abrasions are easily dismissed in the midst of the watery depth of the fields. The strike is sharp. Finer Deep Mirror Prooflike coins are scarce. NGC ID# 254M, PCGS# 97153

17387 1884-O MS67 PCGS. Vast quantities of 1884-O dollars are available in MS62 through MS66, but Superb Gems like the one here-offered are very scarce and essentially impossible to improve upon. This bright example showcases radiant mint luster and complete brilliance with strongly struck motifs. A single coin is reported finer at PCGS (9/17). NGC ID# 254N, PCGS# 7154

17388 1884-S AU58 PCGS. Satiny cartwheel luster illuminates the fields, and only a trace of high-point friction is discernible on the central devices. Golden-russet border toning surrounds brilliant interiors. Light, scattered abrasions accompany the grade. NGC ID# 254P, PCGS# 7156

17389 1884-S AU58 PCGS. A brilliant, satiny near-Mint example with untoned surfaces and relatively few handling marks. The strike is sharp, and only a brush of high-point friction on the central devices prevents an Uncirculated designation. The 1884-S is a better date in high grade. NGC ID# 254P, PCGS# 7156

17390 1884-S AU58 NGC. Virtually Mint State, this lovely 1884-S Morgan dollar has brilliant silver surfaces with reflective fields inside a frame of peripheral gold toning on the obverse. The reverse is lustrous and untoned. NGC ID# 254P, PCGS# 7156

17391 1884-S AU58 PCGS. A touch of reflectivity in the fields of this near-Mint example adds to the visual appeal. The strike is sharp, and only slight high-point wear is evident on the eagle's breast and Liberty's cheek and hair. Brilliant surfaces show minor handling marks but no major abrasions. NGC ID# 254P, PCGS# 7156

17392 1884-S AU58 NGC. This impressive near-Mint specimen shows just a trace of wear on the well-detailed design elements and the lightly abraded surfaces radiate ample mint luster from both sides. The overall presentation is most attractive. NGC ID# 254P, PCGS# 7156

17393 1885 MS67 NGC. A blazing Gem with unstoppable satiny luster and a near-total absence of toning and surface imperfections. The strike very nearly defines and separates the hair above Liberty's ear. Higher-grade coins are rare. Ex: *FUN Signature (Heritage, 1/2008)*, lot 5395. NGC ID# 254R, PCGS# 7158

17394 1885 MS66+ Prooflike PCGS. CAC. A ring of fire-orange patina hugs the borders on each side, framing bright, flawlessly preserved surfaces. Well-struck with dramatic prooflike reflectivity and seemingly unimprovable eye appeal. Population: 79 in 66 (13 in 66+) Prooflike, 4 finer. CAC: 33 in 66, 2 finer (9/17). NGC ID# BYWR, PCGS# 7159

17395 1885-CC MS66 PCGS. From a Carson City mintage of 228,000 pieces, this delightful Premium Gem exhibits sharply detailed design elements and impeccably preserved brilliant surfaces, with vibrant cartwheel mint luster on both sides. NGC ID# 254S, PCGS# 7160

17396 1885-CC MS66+ PCGS. A crescent of sea-green and lavender toning enhances the obverse of this impeccably preserved Plus-graded Premium Gem, while the reverse remains essentially brilliant. The design elements are sharply detailed and ample mint luster radiates from both sides. NGC ID# 254S, PCGS# 7160

1885-CC Dollar, MS66+ Frosty and Brilliant

17397 1885-CC MS66+ PCGS. CAC. The availability of the 1885-CC Morgan dollar is similar to that of the 1881-CC. Fewer coins were released during the 1970s than those of intervening years (1882-1884). Both sides of this thickly frosted example are utterly brilliant. The cheek and fields are noticeably well-preserved for the grade. Boldly rendered with the slightest hint of softness over the extreme centers. NGC ID# 254S, PCGS# 7160

17398 1885-CC MS64 Deep Mirror Prooflike NGC. A spectacular Choice Morgan dollar from the famous Carson City Mint, this coin exhibits sharply detailed, frosty design elements and deeply reflective fields. The lightly marked surfaces show hints of sea-green and violet toning. NGC ID# 254S, PCGS# 97161

17399 1885-CC VAM-2 MS66 PCGS. Dash under second 8. This is the last of the widely distributed Carson City issues, with 130,823 examples released from Treasury vaults during the 1970s. Translucent rainbow tones gently grace the obverse of this Premium Gem dollar. The mostly brilliant reverse exhibits traces of multicolor patina near the lower margins. Strongly struck with great eye appeal. PCGS# 42592 Base PCGS# 7160

17400 1885-CC VAM-3, Eye Die Scratches, MS65 Deep Mirror Prooflike NGC. CAC. Vibrant peach-gold toning fills the borders. The frosty motifs contrast starkly against flashy fields. Initial strikes for VAM-3 show die fill within the Cs of the mintmark. Later, the dies were lapped, which removed the die fill within the mintmark, and created mirrored fields as seen on the present coin. Certified in a prior generation holder. CAC Population: 30 in 65 Deep Prooflike, 15 finer (9/17). PCGS# 42597 Base PCGS# 97161

17401 1886-O MS61 PCGS. The 1886-O is a better date in Uncirculated condition, although still collectible in the current entry-level grade. This lightly abraded coin displays satiny mint luster with hints of rose-gold border toning. The strike is above-average for the issue but not quite full on the hair above Liberty's ear. NGC ID# 254W, PCGS# 7168

17402 1886-O MS62 NGC. Delicate gold toning at the borders frames the brilliant silver surfaces of this delightful Mint State example. Trivial marks limit the grade of this piece that looks finer at first glance. This piece would look right at home in a collection of otherwise MS63 or MS64 Morgan dollars. NGC ID# 254W, PCGS# 7168

1886-O Dollar, Attractive MS63

17403 1886-O MS63 PCGS. A Select Uncirculated example with attractive luster and light golden toning. The obverse exhibits the usual abrasions one expects at this grade level. The reverse is very well-preserved, with smoother, cleaner fields and undisturbed luster. Though having a mintage of more than 10 million pieces, the 1886-O was mostly distributed into circulation, unlike some dates that remained Uncirculated in bags until well into the 20th century. NGC ID# 254W, PCGS# 7168

17404 1886-O MS63 ANACS. The design elements of this impressive Select specimen are sharply detailed and the lightly marked surfaces radiate vibrant mint luster, under attractive shades of golden-brown and lavender toning. NGC ID# 254W, PCGS# 7168

17405 1886-S MS65 PCGS. The 1886-S Morgan dollar is an elusive issue above the MS65 grade level. This well-detailed Gem exhibits well-preserved, lustrous surfaces, under shades of magenta and pale gold toning. Most of the color is on the obverse. Housed in a green label holder. NGC ID# 254X, PCGS# 7170

17406 1886-S/S VAM-2, Top 100, MS65 PCGS. A Top 100 Variety. The remnants of an undertype S are visible beneath the primary mintmark, identifying the popular VAM-2. This well-preserved Gem offers well-detailed design elements and vibrant mint luster throughout. NGC ID# 254X, PCGS# 133906 Base PCGS# 7170

17407 1887 MS67 PCGS. This spectacular Superb Gem exhibits sharply detailed design elements in all areas, with brilliant surfaces that radiate vibrant mint luster and show no mentionable distractions. PCGS has graded only one numerically finer example (8/17). NGC ID# 27Y3, PCGS# 7172

17408 1887/6-O VAM-3 MS63 PCGS. A Top 100 Variety. The lower loop of a 6 appears below the 7. This variety was discovered in 1973 and is now widely collected because of its inclusion in the *Guide Book*. Light chatter in the fields and on the cheek explain the grade for this brilliant, typically struck Select Uncirculated dollar. NGC ID# 2552, PCGS# 133912 Base PCGS# 7178

1887/6-O Morgan Dollar Near-Gem VAM-3 Overdate

17409 1887/6-O VAM-3 MS64 PCGS. A Top 100 Variety. An intense freckling of cobalt blue, charcoal, forest-green, and aqua allows silver luster to shine through the variegated patina on the obverse. The reverse is more traditionally toned in smooth, frosted shades of copper-gold and aquamarine. While the overdate feature is well-hidden amid the toning, it is visible with a steady hand and strong lens. The New Orleans strike lacks definition over the ear. PCGS has still certified just a single numerically finer example of this variety, a situation that has not changed in recent years (9/17). NGC ID# 2552, PCGS# 133912 Base PCGS# 7178

17410 1887-S MS65 PCGS. Exquisite sea-green, caramel-gold, and powder-blue toning encompasses this lustrous and boldly struck Gem. Well preserved despite minor field contact near the M in UNUM. The better-date 1887-S is highly elusive in the present quality and decidedly rare any finer. NGC ID# 2554, PCGS# 7180

17411 1887-S/S VAM-2A MS65 NGC. A Top 100 Variety. The mintmark is obviously repunched. This Gem displays a sharp strike and dazzling mint luster with a hint of reflectivity in the fields. Brilliant interiors cede to lovely lavender-gold and teal border toning on both sides. A few trivial luster grazes define the grade but pose little distraction. NGC ID# 2554, PCGS# 133915 Base PCGS# 7180

17412 1888 MS66+ PCGS. CAC. A window of brilliance at the upper-right obverse transitions toward shades of peach-gold, slate-blue, and red-violet. The reverse features pale border toning around softly frosted centers. Marvelously preserved and strongly defined. Aesthetic quality is terrific. NGC ID# 26KF, PCGS# 7182

17413 1888 Doubled Reverse, VAM-15, MS66 PCGS. A Top 100 Variety. The reverse is die doubled, most plainly on the wreath, arrows, and the eagle's tailfeathers. This Premium Gem is among the finest non-Prooflike 1888 silver dollars at PCGS (9/17). The strike is sharp, and the frosty, brilliant surfaces are devoid of obtrusive abrasions. PCGS# 134010 Base PCGS# 7184

17414 1888-S MS64 Prooflike PCGS. CAC. The 1888-S Morgan dollar is an elusive issue with the Prooflike designation. This attractive Choice specimen offers well-preserved surfaces that exhibit prooflike reflectivity at selected angles, and well-detailed design elements, with only minor signs of contact. NGC ID# 349N, PCGS# 7187

17415 1889-CC — Cleaning — PCGS Genuine. XF Details. The 1889-CC Morgan never fails to be in demand in all grades. This XF-level coin displays good detail but with obvious cleaning under dusky tan-gray toning. This is a coin that will be pleasing as a key date representative for a complete circulated date and mintmark Morgan dollar collection.

17416 1889-CC — Cleaned — PCGS Genuine. XF Details. The golden-gray surfaces are extensively hairlined, but the naked eye does not experience any significant objections. Detail is sharp for the designated XF sharpness level. A still-pleasing example of this key Carson City issue.

**1889-CC Dollar, XF45
Problem-Free Key Date**

17417 1889-CC XF45 PCGS. A great example of one of the key-date Morgan dollars for the collector on a modest budget. This problem-free Choice XF piece has light, normal wear to the high points, and good overall coloration. A tiny nick in front of the forehead is the only blemish that is easily found. With a business strike mintage of only 350,000 pieces, the 1889-CC Morgan will continue to be a desirable issue for as long as there are collectors. NGC ID# 2559, PCGS# 7190

17418 1889-CC XF45 ANACS. Traces of prooflike surface remain around the obverse stars and more extensively around the reverse devices of this golden-gray 1889-CC. Sporadic pale-blue, violet, and deep-gray accents appear on both sides. Marks and abrasions are generally small and of minor concern. Housed in an early generation, small ANACS holder. NGC ID# 2559, PCGS# 7190

**1889-CC Dollar, Choice XF
Frontier-Era Key Date**

17419 1889-CC XF45 NGC. This untoned example displays moderately glowing fields and devices that are only lightly rubbed over the higher points of the design. Scattered small to moderate abrasions are typical for a frontier-era silver dollar that saw circulation, but we can find no singularly mentionable blemishes. Only 350,000 Morgan dollars emerged from the Carson City Mint in 1889, and the issue has long been considered a key date.

Ex: Long Beach Signature (Heritage, 9/2005), lot 5882. NGC ID# 2559, PCGS# 7190

17420 1889-CC — Environmental Damage — PCGS Genuine. AU Details. A well-detailed example of this key Carson City issue, showing lavender-gray, gold, and pewter toning. Areas of green verdigris at the upper obverse and lower reverse prevent a numeric grade. Scattered marks are present, as expected.

17421 1889-S MS65 PCGS. A delightful Gem Morgan dollar, with well-detailed design elements that show a touch of the usual softness on the hair above the ear and the eagle's breast. The well-preserved surfaces radiate vibrant mint luster, with outstanding eye appeal. NGC ID# 255B, PCGS# 7194

17422 1890 MS65 Prooflike PCGS. Silver dollar production among the four mints peaked in 1890 under the Sherman Silver Purchase Act with more than 38 million pieces produced. The Philadelphia Mint alone contributed over 16.8 million pieces to the total. Unwanted for circulation and unneeded for Treasury Bond redemptions (gold was preferred), most 1890 dollars were stored and eventually melted. Few survived with Gem prooflike surfaces such as this brilliant example. A few minor contact marks and a bit of field haze do not diminish the appeal. Population: 14 in 65 Prooflike, 1 finer, plus 10 in 65 Deep Mirror Prooflike, 0 finer (9/17). NGC ID# 255C, PCGS# 7197

17423 1890 MS65 Prooflike PCGS. This Gem Prooflike 1890 dollar is conditionally rare. Brilliant, reflective surfaces offer slight contrast and show no major abrasions. Good strike sharpness on the central devices completes the visual appeal. Population: 13 in 65 Prooflike, 1 finer; 10 in 65 Deep Mirror Prooflike, 0 finer (9/17). NGC ID# 255C, PCGS# 7197

17424 1890-CC MS64 PCGS. VAM-6. The peak of the 1 in the date is repunched. A lightly toned and highly lustrous better-date Carson City dollar. Marks are uncommon and inconsequential, and the conservatively assessed grade presumably reflects the scattered pinpoint flecks across the left obverse. NGC ID# 255D, PCGS# 7198

17425 1890-CC MS64 PCGS. Although the 1890-CC claims the highest mintage among Carson City Morgan dollars, it is scarcer in mint condition than its earlier counterparts. Most pieces were released into circulation. This bright, untuned near-Gem is well-struck at the centers. Minor chatter occurs in the fields, and numerous spidery cracks appear throughout. NGC ID# 255D, PCGS# 7198

17426 1890-CC MS64 NGC. A satiny, mostly brilliant near-Gem with hints of golden border toning that add warmth to each side. The strike is surprisingly sharp for the issue, and only a few light cheek grazes are discernible. Higher-grade representatives will be elusive and costly. NGC ID# 255D, PCGS# 7198

17427 1890-CC MS64 PCGS. The obverse of this Choice Mint State 1890-CC Morgan dollar is brilliant and untuned with frosty mint luster. The reverse is also highly lustrous with several small splashes of gold toning. NGC ID# 255D, PCGS# 7198

17428 1890-CC MS64 PCGS. Traces of gold toning grace the borders of this Choice Mint State 1890-CC Morgan dollar that is otherwise brilliant white with frosty silver luster and excellent eye appeal. NGC ID# 255D, PCGS# 7198

**1890-CC Dollar, Brilliant Gem
Virtually Unobtainable in Higher Grades**

17429 1890-CC MS65 PCGS. Only a handful of collectors will ever get the chance to compete for one of the few Premium Gem 1890-CC dollars available in today's market. Most advanced specialists must turn instead to an appealing Gem like this needle-sharp example. Each side remains wholly brilliant with eye-catching mint frost. The reverse displays numerous spidery die cracks. PCGS lists 16 higher grading events (8/17). NGC ID# 255D, PCGS# 7198

**1890-CC Silver Dollar, MS65
Carson City Condition Rarity**

17430 1890-CC MS65 PCGS. The generous mintage of 2.3 million pieces makes this an available Carson City date in lower grades, but true Gem examples are rare, and the issue is virtually unobtainable in Premium Gem or finer. This tastefully toned Gem is attractive and lustrous, with a azure-blue at the rims and orange a vignette of orange shades over both sides of the coin. The strike is a bit soft at the very centers, but bold elsewhere. Silver luster shines through the light, colorful toning for nice eye appeal. Just 16 pieces are numerically finer at PCGS (9/17).

Ex: Long Beach Signature (Heritage, 9/2014), lot 3273. NGC ID# 255D, PCGS# 7198

17431 1890-CC Tail Bar, VAM-4, Top 100, MS62 NGC. A Top 100 Variety. A large vertical die gouge connects the fletchings to the wreath on the reverse. Softly lustrous golden-gray surfaces reveal a hint of incompleteness over the centers, but the impression is otherwise crisp. Each side is lightly marked. NGC ID# 255D, PCGS# 133934 Base PCGS# 87198

17432 1890-CC Tail Bar, VAM-4, Top 100, MS62+ PCGS. A Top 100 Variety. A large die gouge connects the fletchings to the wreath leaves below. This high-end MS62 Carson City dollar presents vibrant mint frost over bright surfaces with accents of gold around the edges. Each side is well-struck with scattered bagmarks. NGC ID# 255D, PCGS# 133934 Base PCGS# 87198

**1890-CC Morgan, Brilliant and Frosted MS63
VAM-4, Tail Bar**

17433 1890-CC Tail Bar, VAM-4, Top 100, MS63 PCGS. CAC. A Top 100 Variety. The brilliant, smooth, and frosted surfaces of this Select Uncirculated Tailbar dollar have the visual appeal of an even higher grade. A few minor scuffs exist but no distracting marks. The lustrous, frost-white surfaces radiate cartwheel luster and the Tailbar die gouge extends from the tailfeathers of the heavily frosted eagle. CAC endorsed with undeniable eye appeal and technical quality. NGC ID# 255D, PCGS# 133934 Base PCGS# 87198

17434 1890-O MS65 PCGS. An impressive Gem Morgan dollar from the New Orleans Mint, this coin offers well-detailed design elements, with a touch of softness on the hair above the ear and the eagle's breast. The well-preserved brilliant surfaces radiate vibrant mint luster. PCGS has graded 29 numerically finer examples (9/17). NGC ID# 255E, PCGS# 7200

17435 1890-O MS65 PCGS. A delightful Gem from the New Orleans Mint, with sharply detailed design elements and vibrant mint luster throughout. The brilliant surfaces show no mentionable distractions. PCGS has graded 29 numerically finer examples (9/17). NGC ID# 255E, PCGS# 7200

17436 1890-S MS66 PCGS. This spectacular Premium Gem exhibits razor-sharp definition on all design elements and the impeccably preserved, brilliant surfaces radiate vibrant mint luster, with terrific eye appeal. PCGS has graded eight numerically finer examples (9/17). NGC ID# 255F, PCGS# 7202

17437 1890-S MS66 PCGS. The brilliant surfaces of this delightful Premium Gem are impeccably preserved and both sides radiate vibrant mint luster. The design elements are sharply detailed throughout, with outstanding eye appeal. PCGS has graded eight numerically finer examples (9/17). NGC ID# 255F, PCGS# 7202

17438 1890-S MS65 Prooflike PCGS. The curls over Liberty's ear are fully defined, as are the eagle's breast feathers and talons. This brilliant Prooflike Gem offers clean, reflective fields and a thin layer of frost over the motifs. Outstanding visual appeal. Population: 18 in 65 (1 in 65+) Prooflike, 4 finer in this category (9/17). NGC ID# 255E, PCGS# 7203

17439 1891 MS65 PCGS. The 1891 Morgan dollar is very rare in grades above the MS65 level. This attractive Gem exhibits sharply detailed design elements and well-preserved surfaces with vibrant, frosty mint luster. PCGS has graded only three numerically finer examples (9/17). NGC ID# 255G, PCGS# 7204

17440 1891 MS64 Prooflike PCGS. This Choice 1891 dollar ranks among the finest Prooflike examples certified by either PCGS or NGC. Brilliant, reflective fields are minimally abraded and display a mere whisper of gold patina at the lower reverse. A clean cheek on Liberty joins a sharp strike on the frosted motifs. Population: 22 in 64 Prooflike, 0 finer (9/17). NGC ID# 255G, PCGS# 7205

17441 1891-CC MS64+ PCGS. Frosty, blazing cartwheel luster on this high-end near-Gem displays a blush of light golden toning on the obverse but is brilliant on the reverse. A touch of the usual strike weakness occurs on the hair above Liberty's ear. No distracting abrasions are seen, and Liberty's cheek is particularly clean. NGC ID# 255H, PCGS# 7206

17442 1891-CC MS64+ PCGS. The design elements of this Plus-graded Choice specimen are well-detailed and the lustrous, brilliant surfaces show only a few minor signs of contact. The 1891-CC is always popular because of the charismatic CC mintmark. NGC ID# 255H, PCGS# 7206

17443 1891-CC MS64 PCGS. CAC. A well-struck, frosty near-Gem with brilliant surfaces and no major abrasions. The CAC green label confirms the high quality of the coin. The 1891-CC is a slightly better Carson City issue in high grade, and examples are seldom offered this appealing below the Gem level. NGC ID# 255H, PCGS# 7206

17444 1891-CC MS64+ PCGS. CAC. This vibrantly lustrous, high-end Choice 1891-CC dollar displays a bold strike and has only a few unobtrusive abrasions. Blue, violet, amber, and orange-gold border toning surrounds light champagne interiors. Eye appeal is outstanding. NGC ID# 255H, PCGS# 7206

**1891-CC Dollar, Frosty MS65
Exceedingly Rare Any Finer**

17445 1891-CC MS65 PCGS. The Treasury vaults contained merely 510 Uncirculated 1891-CC dollars at the time of the 1970s GSA release, but thousands more had been distributed from the late 19th through the mid-20th century. This Carson City issue can be found through MS65 but is scarce at that level and is exceedingly rare in higher grades. Each side lacks the faintest trace of color. A strong strike shows softness limited to the curls over Liberty's ear. A few small marks on the cheek and bust truncation prevent an event higher grade. NGC ID# 255H, PCGS# 7206

17446 1891-CC Spitting Eagle, VAM-3, Top 100, MS64+ PCGS. A Top 100 Variety. A small die gouge in front of the eagle's beak earns this variety the "Spitting Eagle" moniker. The present coin is well-struck and frosty with original gold, sea-green, and lavender toning spread evenly over each side. Eye appeal is outstanding. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206

17447 1891-S MS65 PCGS. CAC. The 1891-S Morgan dollar becomes scarce in grades above MS65. This attractive Gem exhibits sharply detailed design elements and well-preserved, creamy surfaces, with vibrant mint luster on both sides. NGC ID# 255K, PCGS# 7210

**1891-S Morgan Dollar, MS66
Frosted Obverse / Semiprooflike Reverse**

17448 1891-S MS66 PCGS. Undoubtedly many of the lower-grade Uncirculated 1891-S dollars we have today came from the holdings of LaVere Redfield. But one has to wonder about the few high-grade pieces and where they originated. This is a lovely Premium Gem that is almost brilliant, except for the ring of golden patina around the obverse rim. The reverse is at least semiprooflike and perhaps fully prooflike, but that mirroring is not matched by the finish on the obverse. NGC ID# 255K, PCGS# 7210

17449 1892 MS64 PCGS. CAC. The well-preserved surfaces of this attractive Choice specimen show subtle highlights of lavender-gray toning, with darker emerald green at the peripheries, and vibrant mint luster throughout. The well-detailed design elements exhibit just a touch of softness on the hair above the ear. Housed in a green label holder. NGC ID# 255L, PCGS# 7212

**1892 Dollar, MS65
Well-Struck and Lustrous**

17450 1892 MS65 PCGS. An unusually well-preserved example of an issue that is generally encountered with a weak strike. This piece exhibits intense cartwheel luster and has strong detail even over Liberty's ear. The eagle's chest, while not quite bold, is more firmly struck than usual, and is unblemished. Indeed, the reverse of this dollar is really exceptional. The obverse retains most of its original charm as well, with only a few light marks on and in front of the neck being noted. Only six pieces have been graded higher by PCGS (9/17). NGC ID# 255L, PCGS# 7212

**1892 Dollar, An Exceptional MS65
Above-Average Strike and Luster**

17451 1892 MS65 PCGS. The Gem level of preservation is the finest 1892 Morgan dollar that most collectors are likely to encounter. PCGS has seen a mere six numerically finer submissions and NGC has graded one higher (9/17). This issue is notorious for its poor strikes. The present MS65 example is a refreshing exception. Strong detail is apparent in the hair over Liberty's ear, and even the eagle's breast feathers display a good amount of detail. Hints of light brown color cling to the margins of the lustrous surfaces. A few light grazes on Liberty's cheek and in the left obverse field are within the parameters of the grade designation. NGC ID# 255L, PCGS# 7212

17452 1892-CC MS61 PCGS. A well-struck representative with brilliant, frosty cartwheel luster and good eye appeal for the grade. The obverse has moderate abrasions as indicated by PCGS, while the reverse is distinctly better-preserved. Housed in an old green label holder with a plastic collar from late 1989. NGC ID# 255M, PCGS# 7214

17453 1892-CC MS62 PCGS. VAM-8A, Clashed N. Both dies show prominent clash marks. This late die state variety is distinctive for the filled 2 in the date. The strike is sharp, and frosty, brilliant luster cartwheels freely around each side. Light, scattered abrasions determine the grade. A popular late Carson City issue. NGC ID# 255M, PCGS# 7214

17454 1892-CC MS62 PCGS. VAM-10. Only one of the 1.3 million 1892-CC dollars struck remained on hand during the Treasury release of the 1970s. This issue has an average certified grade just shy of AU55. The present Mint State dollar is well-struck and mostly brilliant with vibrant luster. Triple-clashed with an errant 9 or 2 in the dentils below the date. NGC ID# 255M, PCGS# 7214

17455 1892-CC MS62 PCGS. This brilliant Mint State example is a couple trivial toning spots away from fully white surfaces. There are only trivial, grade-consistent marks of no consequence on each side. The strike is typical for the issue with slight merging of the hair strands over Liberty's ear. NGC ID# 255M, PCGS# 7214

17456 1892-CC MS63 NGC. This is a well-struck example with satiny mint luster and mostly brilliant surfaces. Lavender and blue toning appears along the upper obverse border. Only minimal abrasions are present for the grade. NGC ID# 255M, PCGS# 7214

17457 1892-CC MS63 PCGS. An impressive Select example of this popular Carson City issue, with well-detailed design elements that show a touch of the usual softness on the hair above the ear. The creamy surfaces are lightly marked and lustrous. NGC ID# 255M, PCGS# 7214

17458 1892-CC MS63 PCGS. CAC. A charming Select Morgan dollar, from the famous Carson City Mint, this coin offers well-detailed design elements and lightly marked surfaces with ample mint luster throughout. A few highlights of emerald-green and violet toning visit the peripheries. NGC ID# 255M, PCGS# 7214

**1892-O Silver Dollar, MS65
Extremely Rare Any Finer**

17459 1892-O MS65 PCGS. The availability of the 1892-O Morgan dollar has a hard cut-off point at MS65, above which acquisition of this date is virtually impossible for the average collector. Prooflike and Deep Mirror Prooflike coins are rare regardless of grade, heightening the importance of the current Gem offering. Frosty surfaces are brilliant across each side save for a glow of light golden border toning. Strike weakness on the hair above Liberty's ear and the eagle's breast is typical of this New Orleans issue. PCGS lists six numerically finer representatives (9/17). NGC ID# 255N, PCGS# 7216

17460 1892-S AU50 PCGS. This is an extremely popular grade level for the 1892-S Morgan dollar, as higher AU levels increase substantially in price. A pleasing example with its light gray surfaces, this dollar exhibits considerable luster and only slight wear on the high points. NGC ID# 255P, PCGS# 7218

17461 1892-S AU50 PCGS. A pleasing light gray representative, this elusive Morgan dollar exhibits silver luster in the protected areas around the devices and inside the borders on both sides. Delicate gold toning enhances the appearance of this important piece. NGC ID# 255P, PCGS# 7218

17462 1892-S AU53 PCGS. The 1892-S Morgan dollar is usually available in circulated grades, but it is conditionally rare in the higher levels of Mint State. This attractive AU53 example is lightly worn and lightly abraded, with highlights of golden-tan and violet toning. NGC ID# 255P, PCGS# 7218

17463 1893 MS63 PCGS. A challenging Philadelphia issue, the 1893 Morgan dollar boasts a mintage of only 378,000 coins. The present Select example is lustrous and lightly toned with a delicate champagne hue. Only a few small marks on Liberty's cheek limit the grade. Housed in a green label holder. NGC ID# 255R, PCGS# 7220

17464 1893 MS63 PCGS. All four mints reduced Morgan dollar production in the wake of the Panic of 1893. Only 378,000 coins were struck in Philadelphia. This Select dollar exhibits near-complete brilliance with the exception of golden patina around the obverse border. Softly frosted surfaces are well-defined and lightly bagmarked. NGC ID# 255R, PCGS# 7220

17465 1893 MS63 PCGS. An attractive Select representative of this low-mintage Philadelphia issue, this coin offers well-detailed design elements and lightly marked lustrous surfaces. Housed in a green label holder. NGC ID# 255R, PCGS# 7220

17466 1893 MS64 PCGS. An attractive Choice specimen, from a mintage of 378,000 pieces, this coin exhibits sharply detailed design elements and lightly marked surfaces, with vibrant mint luster throughout. Overall eye appeal is quite strong. NGC ID# 255R, PCGS# 7220

17467 1893 MS64 PCGS. The "one-a-year" collector will recognize the 1893 Philadelphia Morgan dollar as the most affordable issue for the date. This Choice Mint State piece has brilliant and untuned silver surfaces that exhibit frosty mint luster and sharp design motifs. A trace of gold toning is noted at the borders. NGC ID# 255R, PCGS# 7220

**1893 Dollar, Attractive Gem
Only Six Pieces Finer at PCGS**

17468 1893 MS65 PCGS. The extreme rarity of higher-graded 1893 dollars puts tremendous pressure on attractive, original Gems like the one offered here. Ivory centers meld with dappled reddish-violet patina around the borders, the effect being slightly more pronounced on the obverse. Softly lustrous and sharply struck with slight central softness. Only six finer submissions at PCGS (10/17). NGC ID# 255R, PCGS# 7220

17469 1893-CC XF45 NGC. Problem-free examples of the 1893-CC dollar (677,000 pieces struck) are highly sought-after. This bright Choice XF key retains strong detail, though it clearly spent time in Western circulation. Myriad tiny marks appear over each side, and hints of luster remain. NGC ID# 255S, PCGS# 7222

17470 1893-CC — Filed Rims — PCGS Genuine. AU Details. Faint file marks circumnavigate the rims, although they are unseen by the naked eye. This AU-level 1893-CC Morgan displays pleasing detail and generally smooth slate-gray surfaces. Some luster remains in the fields.

17471 1893-O AU58 PCGS. A small deep orange toning spots appears in Liberty's hair on this otherwise fully brilliant white 1893-O Morgan dollar. A trace of high-point wear is evident on each side. The obverse has frosty luster and the reverse retains prooflike surface. An attractive near-Mint example. NGC ID# 255T, PCGS# 7224

**1893-O Morgan Dollar, MS61
Elusive New Orleans Issue**

17472 1893-O MS61 NGC. The low mintage figures for silver dollars during this period, primarily from 1893 to 1895, was the result of the Sherman Silver Purchase Act that was passed in 1890 and repealed in 1893. The price of silver dropped from \$1.16 per ounce in 1890, to 60 cents per ounce in 1894. This Mint State example from the New Orleans Mint has scattered marks and faint hairlines on its light silver surfaces, with peripheral gold and iridescent toning inside the borders that also outlines the central design motifs. NGC ID# 255T, PCGS# 7224

**1893-O Dollar, MS61
Mostly Brilliant and Lustrous**

17473 1893-O MS61 NGC. The 1893-O Morgan dollar can be a frustrating target for the collector, not only because its mintage of 300,000 pieces is low, but because they seem to have been roughly handled from the start. The present piece has much to recommend it, with more luster than one might expect from an MS61 and fewer bagmarks than often seen. Lightly toned at the peripheries, with mostly brilliant surfaces. NGC ID# 255T, PCGS# 7224

17474 1893-S Good 4 PCGS. Although the rims are worn flat in some areas, the date and all lettering remains legible on this low-mintage key. The major design elements are complete in outline, but just a few interior details remain intact. NGC ID# 255U, PCGS# 7226

17475 1893-S — Obverse Graffiti — NCS. VG Details. The lavender-gray surfaces of this low-mintage key are lightly abraded, aside from some barely perceptible pin scratches in the left obverse field. The design elements are well-worn, but retain much interior detail intact. NGC ID# 255U, PCGS# 7226

17476 1893-S — Repaired — PCGS Genuine. Fine Details. We are always pleased to offer one or more 1893-S dollars in our sales, since this issue appears on more want lists than any other circulation strike Morgan silver dollar. Those want lists represent examples in every grade, from AG to Mint State. This piece has natural light to medium gray surfaces with smoothing on Liberty's cheek. The characteristic obverse die line of genuine examples is faint but visible.

**1893-S Morgan Dollar, Fine 15
Nice Balance of Quality and Value**

17477 1893-S Fine 15 PCGS. This midgrade 1893-S Morgan has smooth surfaces with varying shades of light gray and gold toning. The coin is well-detailed for the Fine grade level. Collectors seeking to fill this key hole in their date and mintmark set will appreciate the balance of detail and price that this coin represents. From a series-low mintage of 100,000 pieces. NGC ID# 255U, PCGS# 7226

**1893-S Dollar, VF Details
Unrivalled Series Key**

17478 1893-S — Improperly Cleaned — NGC Details. VF. The cleaning, while indisputable, is light and does not exhibit extensive hairlines or other distractions. Light, silver-gray color remains across the smoothly worn surfaces with only a few tiny, light abrasions to report. Moderate wear joins the usual softness over the ear, yet this still-appealing example of the fabled 1893-S is sure to satisfy many collectors.

17479 1894 AU55 PCGS. An attractive Choice AU specimen of this popular Philadelphia issue, with the second-lowest mintage of the series at 110,000 pieces. Only a touch of wear shows on the well-detailed design elements and the lightly abraded surfaces are lustrous and lightly toned. NGC ID# 255V, PCGS# 7228

17480 1894 AU58 PCGS. Only 110,000 Morgan dollars were produced for circulation at the Philadelphia Mint in 1894, explaining the issue's status as an in-demand semikey. This is a bright, partly lustrous near-Mint example that would fit in well with an otherwise Uncirculated set. Well above-average for the date. NGC ID# 255V, PCGS# 7228

**1894 Morgan Dollar, MS62
Satin and Brilliant**

- 17481 1894 MS62 PCGS.** An attractive, virtually untuned coin for the MS62 grade level, showing no singular abrasions but rather just light field chatter on the obverse and handling marks on Liberty's cheek. While low-end Mint State Morgans typically show unsightly abrasions and are inferior visually to AU coins, the opposite is true of this piece. NGC ID# 255V, PCGS# 7228

**1894 Dollar, MS62
Peripheral Golden Toning**

- 17482 1894 MS62 PCGS.** The famous 1893-S is the only issue that can claim a smaller mintage than the 1894, struck to the meager extent of 110,000 coins. Blushes of golden toning color the margins, leaving the interior areas on each side of this Mint State semikey brilliant and frosty. The centers are well-struck. Wispy marks on the cheek and in the fields define the grade. NGC ID# 255V, PCGS# 7228

**1894 Morgan Dollar, MS62
Key Philadelphia Circulation Strike**

- 17483 1894 MS62 PCGS. CAC.** Although the 1895, a proof-only issue, is called the King of Morgan dollars, it is the 1894 that is important to a complete set of circulation strike dollars from the Philadelphia Mint. Just 110,000 examples were minted, and relatively few survive in Mint State grades. This lustrous example is brilliant with white-silver surfaces that exhibit a solitary splash of gold toning at the upper right obverse border. NGC ID# 255V, PCGS# 7228

- 17484 1894-O MS61+ NGC.** An outstanding example for the grade, this piece exhibits a few trivial marks on each side. The surfaces are brilliant with frosty silver luster and a hint of peripheral gold toning at the borders. NGC ID# 255W, PCGS# 7230

- 17485 1894-O MS62 PCGS.** The 1894-O is a better date in Uncirculated condition. This piece is brilliant and satiny with cartwheel luster. Scattered abrasions limit the grade, mostly clustered on Liberty's cheek. The strike is weak at the centers as usual for this mid-1890s New Orleans issue. NGC ID# 255W, PCGS# 7230

- 17486 1894-S MS63 PCGS.** This impressive Select specimen exhibits well-detailed design elements, with just a trace of the usual softness on the hair above Liberty's ear. The lustrous surfaces are lightly marked and lightly toned. NGC ID# 255X, PCGS# 7232

- 17487 1894-S MS63 PCGS.** Just the slightest touch of blending shows in the hair strands above Liberty's ear, otherwise, the design elements of this attractive Select specimen are sharply rendered throughout. The surfaces are lightly marked, with light peripheral toning, and vibrant mint luster on both sides. NGC ID# 255X, PCGS# 7232

- 17488 1894-S MS64 NGC.** The 1894-S is a challenging acquisition in MS64 and is genuinely scarce any finer. This piece is mostly brilliant but with a hint of light golden toning near the borders. Abrasions are minimal. The chief visual attributes are noticeably semiprooflike fields on both sides and a solid central strike. NGC ID# 255X, PCGS# 7232

- 17489 1894-S MS64 PCGS.** Faint traces of champagne toning appear on each side of this Choice Mint State 1894-S dollar. The strike is typical, with weakness over Liberty's ear. The obverse is frosty and the reverse is reflective. NGC ID# 255X, PCGS# 7232

**1894-S Dollar, MS64+
Lower-Mintage Issue**

- 17490 1894-S MS64+ PCGS. CAC.** A ring of orange-gold toning visits the border of the obverse, yet otherwise this Plus-designated Choice Uncirculated 1894-S is brilliant and frosty. The strike is crisp throughout. The 1894-S is a better date in the series with a lower mintage of just over 1.2 million pieces. It is generally not considered a hoard coin. The Mint-fresh eye appeal confirms that assessment for this near-Gem example. A few light field abrasions on the obverse join only minor high point grazes. NGC ID# 255X, PCGS# 7232

- 17491 1895-O AU55 PCGS.** From a paltry mintage of 450,000 pieces, the 1895-O Morgan dollar is a scarce issue in high grade. This impressive Choice AU specimen shows some light wear on the well-detailed design elements and the still-lustrous surfaces are lightly abraded. NGC ID# 255Y, PCGS# 7236

1895-O Silver Dollar, AU58
Conditionally Elusive

17492 1895-O AU58 PCGS. A trace of wear is evident on the high points of this near-Mint 1895-O Morgan dollar, displaying minuscule lines and marks on each side. The surfaces are brilliant and untuned, retaining nearly full mint luster. This is an important piece due to the rarity of full Mint State examples, and would fit nicely in an otherwise Mint State set of these cartwheels. NGC ID# 255Y, PCGS# 7236

17493 1895-S AU53 NGC. Slight high-point friction appears on the central devices, although the fields retain luster and semiprooflike reflectivity. A mostly untuned coin with only light handling marks on Liberty's cheek. NGC ID# 255Z, PCGS# 7238

1895-S Dollar, AU58
Lustrous Near-Mint Example

17494 1895-S AU58 PCGS. The most readily available of the 1895-dated Morgan dollars, the San Francisco issues have been popular with date collectors for many years. This near-Mint piece retains much of its original luster, while notable marks are kept to a minimum. Hints of peripheral gold toning to the reverse add to its charm. NGC ID# 255Z, PCGS# 7238

17495 1896 MS67 PCGS. The 1896 Morgan dollar is extremely rare in grades above the MS67 level. This spectacular Superb Gem exhibits sharply defined design elements and virtually pristine lustrous surfaces, with highlights of emerald-green and lavender toning. PCGS has graded two numerically finer examples (9/17). NGC ID# 2562, PCGS# 7240

17496 1896 MS67 NGC. From a mintage approaching 10 million pieces, the 1896 Morgan can be located through Gem, and to some degree even Premium Gem, with little trouble. MS67s are challenging, and higher-grade coins are virtually unobtainable. Intense luster emanates from the impeccably preserved silver-white surfaces that exhibit sharply struck motifs. NGC has graded five numerically finer examples (9/17). NGC ID# 2562, PCGS# 7240

17497 1896-O MS61 PCGS. Uncirculated examples of this mid-1890s New Orleans issue are sought-after and elusive in pleasing Uncirculated condition. This coin displays satiny luster with a light golden hue and has minimal abrasions for the grade. The central high points exhibit the moderate strike softness typically associated with O-mint dollars of this period. NGC ID# 27ZU, PCGS# 7242

17498 1896-O MS62 PCGS. This New Orleans issue sees a significant decrease in the number of coins certified above MS62. Both sides showcase smooth fields and minimal grazes on the cheek. Singular ticks occur on the eagle's midsection and above the arrowheads. Satiny and brilliant with hints of ivory-gray color. Softness is confined to the centers. NGC ID# 27ZU, PCGS# 7242

1896-S Silver Dollar, MS62
Lovely Peripheral Toning

17499 1896-S MS62 PCGS. A few scattered marks including a noticeable mark on Liberty's cheek account for the MS62 grade; however, this coin is gorgeous. The obverse is prooflike and brilliant at the center within a ring of vibrant gold and iridescent toning. The brilliant reverse is frosty and fully lustrous with delicate peripheral gold toning. NGC ID# 2564, PCGS# 7244

1896-S Silver Dollar, MS63
An Unhoarded Issue

17500 1896-S MS63 PCGS. CAC. A splendid example of the elusive 1896-S, this Select Mint State piece offers strong design definition, brilliant and untuned silver surfaces, and satin luster, while exhibiting minuscule marks and exceptional eye appeal. This is another issue that was unavailable during the flood of silver dollars released from the Treasury in the 1960s. NGC ID# 2564, PCGS# 7244

17501 1897 MS65 Deep Mirror Prooflike PCGS. Morgan dollars coined during the final years of the 19th century are well-known for their excellent production quality, as evidenced by this fully struck Gem with Deep Mirror Prooflike contrast. The absence of color on each side enhances the visual effect. NGC ID# 2567, PCGS# 97247

17502 1897 Pitted Reverse, VAM-6A, MS66 PCGS. Ex: California. A Top 100 Variety. Heavy die rust on the lower reverse is the pick-up point for this popular VAM variety. The present coin is sharply struck and brilliant with satiny mint luster. Liberty's cheek is largely clean. NGC ID# 2565, PCGS# 133946 Base PCGS# 7246

17503 1897-O MS61 PCGS. The 1897-O is a better date in Uncirculated grades. This piece offers satiny luster and original golden toning with green and violet accents around the peripheries. The strike is sharp. Some marks on Liberty's cheek limit the grade. NGC ID# 2565, PCGS# 7248

17504 1897-O MS62 PCGS. From a mintage of just over 4 million pieces, the 1897-O Morgan dollar becomes scarce in higher levels of Mint State. This attractive MS62 specimen offers sharply detailed design elements and lustrous surfaces with highlights of greenish-gold and lavender toning. Scattered, minor contact marks explain the grade. NGC ID# 2565, PCGS# 7248

17505 1897-O MS62 PCGS. Well-struck, untuned, and vibrantly lustrous. This Mint State 1897-O Morgan displays scattered abrasions but remains appealing for the grade. This New Orleans issue is elusive in better condition. NGC ID# 2565, PCGS# 7248

17506 1897-O MS62 PCGS. Few 1897-O Morgan dollars were released from the Treasury half a century ago. Unlike several other New Orleans issues, this one has remained scarce in Mint State grades. This piece has satiny silver luster with peripheral gold toning, primarily on the obverse. NGC ID# 2565, PCGS# 7248

1897-O Dollar, Satiny MS63

17507 1897-O MS63 PCGS. Although the New Orleans Mint struck more than 4 million Morgan dollars in 1897, most examples were put into circulation or otherwise handled. The issue becomes conditionally scarce in MS63 and rare any finer. Satiny surfaces remain broadly untuned, save for slight golden accents near the rims. The centers are typically struck. Minimally marked fields. NGC ID# 2565, PCGS# 7248

17508 1897-S MS66 PCGS. Although available in this grade, the 1897-S Morgan is a rarity finer. This Premium Gem offers brilliant, frosty luster and clean surfaces. The visual appeal is considerable. NGC ID# 2567, PCGS# 7250

17509 1897-S MS66 PCGS Secure. CAC. A well struck and highly lustrous Gem that has pronounced blushes of apricot and pale blue patina. The fields are essentially pristine, and the eye appeal is nearly unimprovable. NGC ID# 2567, PCGS# 7250

17510 1897-S MS66+ NGC. CAC. A Plus-graded Premium Gem example, with well-detailed design elements that show just a trace of blending on the hair above the ear. Shades of lavender-gray, violet, and sea-green toning visit the well-preserved, lustrous surfaces. NGC has graded 12 numerically finer examples (9/17). NGC ID# 2567, PCGS# 7250

17511 1898-O MS67 PCGS. The 1898-O Morgan dollar is only somewhat scarce in MS67 condition, but finer examples are virtually unobtainable. This spectacular Superb Gem offers well-detailed design elements and impeccably preserved surfaces, with vibrant mint luster throughout. PCGS has not graded a numerically finer example (9/17). NGC ID# 2569, PCGS# 7254

17512 1898-O MS67 PCGS. The 1898-O Morgan dollar can only be called scarce in MS67 condition, but finer coins are extremely rare. This delightful Superb Gem exhibits razor-sharp definition on all design elements and the flawless surfaces radiate vibrant mint luster, with a few highlights of sea-green toning. NGC ID# 2569, PCGS# 7254

17513 1898-O MS67 NGC. A delightful Superb Gem Morgan dollar, this coin exhibits well-detailed design elements, with just a touch of softness on the eagle's breast, and virtually pristine surfaces with vibrant mint luster on both sides. NGC has graded one numerically finer example (9/17). NGC ID# 2569, PCGS# 7254

1898-O Dollar, MS67 Prooflike Among the Finest Certified

17514 1898-O MS67 Prooflike PCGS. An exceptional Morgan dollar, one of only a very few prooflike examples known at this grade level. While prooflike 1898-O Morgans can readily be found in lower Uncirculated grades, a dedicated collector could look for years for a Superb Gem of this quality. Very light champagne toning provides this generally brilliant piece with just enough color to assure its originality, while immaculate surfaces and very sharp details provide extraordinary eye appeal. A mark above the eagle's right leg is noted for accuracy, but barely detracts. Population: 4 in 67 Prooflike, 0 finer (9/17). NGC ID# 2569, PCGS# 7255

1898-S Silver Dollar, MS66 Scarce in This Grade, Rare Finer

17515 1898-S MS66 PCGS. The 1898-S is a conditionally challenging issue in MS66 and is extremely rare any finer. This brilliant piece displays a bold strike and satiny cartwheel luster. A few light grazes in the left obverse field limit the grade. Eye appeal is pleasing. No Prooflike or Deep Mirror Prooflike coins are certified this fine at PCGS. Population: 94 in 66 (12 in 66+), 3 finer (9/17). NGC ID# 256A, PCGS# 7256

17516 1898-S MS64 Deep Mirror Prooflike PCGS. The 1898-S Morgan dollar is not as rare as many of the other issues in the series, but DMPL examples are seldom seen. The present lightly toned near-Gem has impressively flashy fields, and the reverse is beautifully preserved. The few minor obverse marks cannot deny the eye appeal. NGC ID# 256A, PCGS# 97257

17517 1899 MS65+ PCGS. CAC. This Plus-graded Gem Morgan dollar exhibits sharply detailed design elements and well-preserved surfaces, with vibrant mint luster on both sides. From a small Philadelphia mintage of 330,000 pieces. NGC ID# 256C, PCGS# 7258

17518 1899 MS66 PCGS. The 1899 is regarded as a somewhat better date in the Morgan dollar series because of its low mintage. Only 330,000 coins were struck for circulation. This strong Premium Gem features brilliant, softly frosted surfaces and crisp central devices. Example are very rare in better condition. NGC ID# 256C, PCGS# 7258

17519 1899 MS66 PCGS. CAC. The 1899 comes from a famously low mintage of 330,000 pieces, although Mint State examples are collectible through MS66. This CAC-approved Premium Gem displays a bold strike and original, softly frosted mint luster with hints of rose-gold border toning. PCGS lists only 23 finer non-Prooflike representatives, plus 23 Prooflike and Deep Mirror Prooflike pieces in this same grade (9/17). NGC ID# 256C, PCGS# 7258

**1899 Dollar, MS66 Prooflike
Terrific Eye Appeal**

17520 1899 MS66 Prooflike PCGS. CAC. The 1899 is usually more accessible than its low mintage would indicate, but it is genuinely rare in this remarkable state of preservation, and especially with overt prooflike contrast and reflectivity. The obverse is untuned and splashes of pale patina provide a hint of color to the reverse. A terrific example in every regard. Population: 11 in 66 Prooflike, 0 finer. CAC: 4 in 66, 0 finer (10/17). NGC ID# 256B, PCGS# 7259

1899-O Dollar, Fully Struck MS67

17521 1899-O MS67 PCGS. CAC. This Superb Gem 1899-O Morgan dollar exhibits a bold strike, much sharper than usual for a New Orleans dollar. Only slight merging of the hair strands over Liberty's ear is detected, and the eagle's breast feathers are sharp. Both sides have frosty silver luster with no toning on the brilliant white surfaces. PCGS has only certified one numerically finer example. CAC: 49 in 67, 0 finer (9/17). NGC ID# 256C, PCGS# 7260

17522 1899-S MS65 PCGS. The design elements of this turn-of-the-century Gem are well-detailed and the brilliant surfaces are virtually pristine, aside from a single long scratch in the right reverse field, near the wreath. Both sides radiate vibrant mint luster and eye appeal is terrific. NGC ID# 256D, PCGS# 7262

17523 1899-S MS65 NGC. This attractive Gem Morgan dollar exhibits well-preserved, lustrous surfaces with subtle hints of lavender and pale gold toning. The design elements are well-detailed and eye appeal is quite strong. NGC ID# 256D, PCGS# 7262

**1900 Dollar, Top-Notch MS67
Blazing Cartwheel Luster**

17524 1900 MS67 PCGS. Thousands of Mint State 1900 Morgan dollars were released during the middle part of the 20th century, accounting for the widespread availability of examples in grades as high as MS66. Only in Superb Gem condition does the 1900 pose a serious challenge. Blazing untuned surfaces radiate cartwheel frost over each side. The fields and cheek are practically mark-free. Well-struck. Population: 56 in 67 (5 in 67+), 0 finer (9/17). NGC ID# 256F, PCGS# 7264

17525 1900-O MS66 Prooflike PCGS. This spectacular Premium Gem Morgan dollar exhibits an especially sharp strike for a New Orleans issue, and the well-preserved surfaces show prooflike reflectivity in the fields, with a few hints of sea-green toning. NGC ID# 256F, PCGS# 7267

17526 1900-O/CC VAM-11 MS65 PCGS. A Top 100 Variety. The underlying CC beneath the O mintmark is clear. This satiny Gem shows a hint of light champagne toning and is well-struck for the issue. No distracting abrasions appear in the prime focal areas. NGC ID# 256J, PCGS# 133963 Base PCGS# 7268

17527 1900-O/CC VAM-11 MS65+ PCGS. CAC. A Top 100 Variety. Remnants of the underlying CC mintmark are clear. Glints of marginal fire-orange color accent otherwise brilliant surfaces awash in satiny mint luster. Well-struck despite trivial incompleteness on the eagle's breast. NGC ID# 256J, PCGS# 133963 Base PCGS# 7268

17528 1900-S MS64 Prooflike PCGS. CAC. Were it not for the S mintmark, this near-Gem Morgan dollar could easily be mistaken for a proof. Its brilliant surfaces display considerable field reflectivity and bold strike detail. Minimal signs of contact are evident. NGC ID# 6MTV, PCGS# 7271

17529 1901 AU58 PCGS. The 1901 Morgan dollar is a condition rarity in high grade. Just the slightest trace of wear is evident on the high points of this attractive near-Mint representative, and the lightly abraded surfaces retain much of their original mint luster. NGC ID# 256J, PCGS# 7272

17530 1901 AU58 PCGS. CAC. Despite the adequate mintage of 6.9 million pieces, the 1901 Morgan dollar is difficult to locate in high grade. This attractive near-Mint specimen exhibits just a trace of wear and the lightly marked surfaces are still lustrous, with a few hints of sea-green and lavender toning. NGC ID# 256J, PCGS# 7272

1901 Morgan Dollar, MS62
Well-Known Rarity in High Grades

17531 1901 MS62 NGC. This well-known condition rarity was struck to the unassuming extent of nearly 7 million coins, yet examples are very scarcely seen in grades higher than MS62. Both sides are completely brilliant with softly frosted luster. Small marks are mostly undistracting. Well-struck with slight central softness. NGC ID# 256J, PCGS# 7272

17532 1901-O MS66 Prooflike PCGS. The huge mintage of more than 13 million 1901-O silver dollars yields a surprising number of prooflike and deep mirror prooflike examples, but none are certified finer than the Premium Gem level at either service. This mostly brilliant coin displays a diaphanous glimpse of golden-gray patina, with a sharp strike except at the immediate hair strands over the ear, and modest contrast between the frosted devices and reflective fields. Population: 26 in 66 (1 in 66+) Prooflike, 0 finer (9/17). NGC ID# 256K, PCGS# 7275

17533 1901-S MS64 PCGS. The well-preserved surfaces of this impressive Choice specimen show a few highlights of golden-tan and sea-green toning, with vibrant mint luster throughout. The design elements are well-detailed and the overall presentation is most attractive. NGC ID# 256L, PCGS# 7276

17534 1901-S MS64 PCGS. Choice Uncirculated condition is the last grade level for which the 1901-S Morgan dollar can still be considered collectible. This near-Gem has golden-russet tones over the obverse and a few daubs of similar patina across the otherwise brilliant reverse. Faint roller marks appear over the ear, where a touch of softness occurs. NGC ID# 256L, PCGS# 7276

17535 1901-S MS64+ PCGS. The well-detailed design elements of this Plus-graded Choice specimen show just a touch of the typical softness on the hair above the ear. The well-preserved, lustrous surfaces show a few hints of russet toning at the peripheries. NGC ID# 256L, PCGS# 7276

17536 1901-S MS64 PCGS. CAC. The 1901-S is relatively available at the Choice Mint State grade level, but challenging in higher grades. This fully brilliant, untoned example has frosty silver luster and trivial marks with good design definition. NGC ID# 256L, PCGS# 7276

17537 1901-S MS65 PCGS. Shades of lavender-gray and sea-green toning visit the well-preserved surfaces of this impressive Gem, with most of the color on the obverse. The design elements are well-detailed and vibrant mint luster is evident, under the patina. NGC ID# 256L, PCGS# 7276

17538 1904 MS65 PCGS. This well-struck, satiny Gem displays warm golden toning on the obverse, surrounded by lavender and aquamarine peripheral color. The reverse is deep ocean-blue and sea-green. The 1904 is usually available in this grade, but PCGS lists only 38 numerically finer representatives (9/17). NGC ID# 256U, PCGS# 7290

1904-O Dollar, MS67
Tied for Finest at Both Services

17539 1904-O MS67 PCGS. The final New Orleans issue in the Morgan dollar series is readily available through Premium Gem grades. The surviving population sees a massive decline in MS67, and no coins are graded higher at either of the leading certification services. This top-quality Superb Gem has a ring of golden-russet patina around brilliant centers. Splashes of marginal blue, violet, and crimson heighten the appeal. Relatively well-struck over the ear and eagle's breast with razor-sharp talons. Population: 49 in 67, 0 finer (8/17). NGC ID# 256V, PCGS# 7292

1904-O Dollar, MS67 Prooflike
Exceptional Quality, None Finer

17540 1904-O MS67 Prooflike NGC. This O-mint Morgan dollar issue survives in great numbers through MS66. The population declines dramatically in MS67. Prooflike examples are elusive in any grade and typically found no higher than MS65. This MS67 Prooflike example is exceptional in its technical quality and eye appeal. Noticeable field-device contrast characterizes each totally brilliant side, and strike definition is pinpoint-sharp. Census: 5 in 67 Prooflike, 0 finer (8/17). NGC ID# 256V, PCGS# 7293

1904-S Silver Dollar, MS63
Frosty and Brilliant

17541 1904-S MS63 PCGS. Brilliant, frosty luster shows only minimal abrasions on this Select 1904-S Morgan dollar. Minor strike weakness occurs on the eagle's breast and the hair above Liberty's ear as normal. The 1904-S is a better date in Uncirculated condition and is almost never seen with reflective fields. This frosty Select example displays the traditional look of the issue. NGC ID# 256W, PCGS# 7294

1904-S Dollar, MS63
Faintly Dappled Toning

17542 1904-S MS63 PCGS. CAC. The 1904-S Morgan dollar was considered rare in mint condition in the early 1940s, subsequent to which one or more bags surfaced through Los Angeles banks in the early 1950s. This date is now available through MS63, and even near-Gems can be located with a degree of searching. Pale dappled olive-brown patina runs over both sides of this Select specimen. Generally well-struck, with partial detail in the hair over Liberty's ear. Minute marks determine the grade.
Ex: *Long Beach Signature* (Heritage, 6/2014), lot 4711. NGC ID# 256W, PCGS# 7294

1921-S Morgan Dollar, MS66
Unseen Finer at PCGS

17543 1921-S MS66 PCGS. This final-year issue proves deceptively scarce in Premium Gem condition. Its 21.6 million-coin mintage could easily lead one to believe examples are widely available across all grade levels. In fact, a single MS67 coin is known (certified by NGC, 9/17). This S-mint Morgan dollar is totally brilliant and boldly struck. Thick mint frost covers impeccably preserved surfaces. NGC ID# 256Z, PCGS# 7300

17544 1921-S MS66 PCGS. Ex: Newman. Although the 1921-S Morgan dollar claims a huge mintage of nearly 21.7 million pieces, the issue is scarce in MS65 condition and rare in finer grades. The lustrous surfaces of the present Premium Gem yield soft yellow-gold and steel-gray patination and are well-struck. PCGS has graded no numerically finer examples (9/17).
Ex: *Summer FUN Signature* (Heritage, 7/2014), lot 3864. NGC ID# 256Z, PCGS# 7300

17545 1921-S MS66 PCGS. The 1921-S Morgan dollar is quite scarce in Premium Gem condition, and no finer examples are reported by PCGS (9/17). This frosty, brilliant coin displays unabraded surfaces and rich luster. The strike is predictably weak on the eagle's breast and the most elevated wreath leaves. NGC ID# 256Z, PCGS# 7300

PROOF MORGAN DOLLARS

1880 Dollar, PR64
Iridescent Blue Toning

17546 1880 PR64 PCGS. A Choice example of this significant proof issue, with electric blue toning on both sides highlighted with streaks of red. A couple of very small contact marks on the obverse are all that keep this near-Gem piece from a higher grade. While the 1880 Morgan dollar has the highest proof mintage of the series, more attractive examples are few and far between. Population: 93 in 64, 94 finer (9/17). NGC ID# 27Z4, PCGS# 7315

1882 Morgan Dollar, PR63
Elusive Cameo Example

17547 1882 PR63 Cameo PCGS. CAC. Ex: Teich Family Collection. An impressive Select Cameo proof, this piece has wonderful field-to-device contrast. Both sides show moderate, grade-limiting hairlines with minuscule contact marks. Subtle highlights of pale gold toning add to the outstanding visual appeal. From a proof mintage of 1,100 pieces. NGC ID# 27Z6, PCGS# 87317

1886 Morgan Dollar, PR64 Cameo
Brilliant With Stark Contrast

17548 1886 PR64 Cameo PCGS. CAC. The Mint produced 886 proof Morgan dollars in 1886 to go along with a large circulation-strike production of 19.1 million coins. This near-Gem proof remains brilliant, allowing for maximum contrast between the deeply mirrored fields and frosted, pinpoint-sharp motifs. Minor contact marks are few and far between. NGC ID# 27ZF, PCGS# 87321

1887 Morgan Dollar, Nicely Toned PR64

17549 1887 PR64 PCGS. The mintage of proof 1887 dollars was a modest 710 pieces, when compared to the enormous output of 19.9 million strikes for circulation. This is a deeply reflective proof that has light golden toning over each side. Fully struck in the centers, as usually seen. Minimal contact marks are well-concealed by the toning. NGC ID# 272G, PCGS# 7322

**1890 Silver Dollar, PR63 Cameo
Delicate Gold Toning**

17550 1890 PR63 Cameo PCGS. CAC. This Select Cameo proof 1890 Morgan dollar is a survivor from the mintage of 590 proofs that year. Close examination reveals faint hairlines that prevent a higher grade. This piece has nice field-to-device contrast with delicate peripheral gold toning on both sides. NGC ID# 27ZK, PCGS# 87325

17551 1891 PR61 ANACS. From a small proof mintage of 650 pieces, this impressive PR61 specimen shows the minimum number of minor hair lines and contact marks for the grade, with a few highlights of green and violet toning. NGC ID# 27ZL, PCGS# 7326

**1891 Morgan Dollar, PR63
First Generation Holder**

17552 1891 PR63 PCGS. Housed in a first generation PCGS holder, this Select proof Morgan dollar exhibits splendid blue, violet, gold, and green toning around a center of silver brilliance. Grade-limiting hairlines are nearly invisible beneath the toning on this pleasing piece that should garner a Cameo designation. NGC ID# 27ZL, PCGS# 7326

**1892 Dollar, PR64
Black-And-White Contrast**

17553 1892 PR64 NGC. More proof Morgan dollars were struck in 1892 than virtually any other year in the series. The Mint anticipated strong demand for the new Barber coins in proof format, which were included in the same sets as these Morgan dollar specimens. In all, 1,245 examples were manufactured for sale to collectors. This example has black-and-white contrast that goes unmentioned by NGC. The fields are reflective, and only a few scattered wisps are noted. NGC ID# 27ZM, PCGS# 7327

1894 Morgan Dollar, Toned PR62

17554 1894 PR62 NGC. This is a fully struck, lower-end proof type coin with deep olive-green, russet, gold, and rose-pink toning. Hairlines in the left obverse field limit the grade, but no other distractions are noted. Modest cameo contrast may have earned a Cameo designation were it not for the rich patina. The 1894 proof Morgan is collectible in this grade, although such pieces seldom come with good eye appeal. NGC ID# 2577, PCGS# 7329

**1902 Morgan Dollar, PR63
Gold and Blue Tones**

17555 1902 PR63 PCGS. This was the first year the Mint switched to an all-brilliant finish for its proof products. Cameo examples are extremely rare and essentially unobtainable. Gold and blue tones cover the few grade-limiting contact marks throughout this Select proof Morgan dollar — one of 777 pieces struck in 1902. The rims are broad and squared-off, and the fields are reflective beneath the toning. NGC ID# 2822, PCGS# 7337

1902 Morgan Dollar, PR63
Glimmering Mirrored Fields

17556 1902 PR63 PCGS. This is a deeply mirrored proof with a hint of champagne toning over otherwise brilliant surfaces. Hairlines are surprisingly minimal for the grade, and eye appeal is strong. Sharp central detail is appreciated under a loupe. The method of proof die manufacture in 1902 was such that coins were seldom struck with cameo qualities. This attractive coin is an example. NGC ID# 2822, PCGS# 7337

1902 Morgan Dollar, PR63
Excellent Mirroring and Eye Appeal

17557 1902 PR63 PCGS. CAC. This glimmering Select proof offers better visual appeal than typical for the grade. There is mottled autumn-gold toning on each side, but the aesthetic merits draw mainly from the high quality of the mirrored fields and the glistening of the devices — characteristic of a coin that has not been dipped like so many others in this grade have. The eagle's breast feathers show slightly indistinct detail. CAC: 1 in 63, 30 finer (9/17). NGC ID# 2822, PCGS# 7337

1903 Morgan Dollar, PR64
Only 755 Pieces Struck

17558 1903 PR64 PCGS. CAC. Only 755 proof Morgan dollars were struck in 1903 and the dies were polished to present an all-brilliant finish rather than the popular cameo effect of earlier years. This impressive Choice specimen exhibits sharply detailed design elements and deeply reflective surfaces that show only minor hairlines and contact marks. A few hints of golden-tan toning are evident on both sides. NGC ID# 2823, PCGS# 7338

17559 1904 PR62 PCGS. The Mint struck 650 proofs in 1904, its third year employing an all-brilliant finish and what turned out to be the last year of Morgan dollar production until 1921. Each side is completely untuned. Scattered, wispy marks explain the grade. The fields are reflective, though no contrast is apparent. NGC ID# 2824, PCGS# 7339

1904 Dollar, PR64
Among 650 Proofs Struck

17560 1904 PR64 PCGS. Mixed golden-brown and violet patina blankets the surfaces of this proof Morgan dollar. Intermittent accents of powder-blue color appear throughout. The rich toning subdues field-device contrast, but also serves to minimize the few signs of contact. Only 650 Morgan dollar proofs were manufactured in 1904. NGC ID# 2824, PCGS# 7339

PEACE DOLLARS

17561 1921 MS63 PCGS. Accompanied by a copy of a Breen letter where he "unhesitatingly declare(s) it an authentic satin finish proof." He goes on to point out evidence of double striking and irregular curved striations through LIBERTY and the right reverse fields near the borders. The coin is indeed strongly struck, the strongest we have seen in several years. The surfaces are bright and satiny with a few contact marks scattered about that explain the grade. NGC ID# 2U4E, PCGS# 7356

17562 1921 MS65 PCGS. A frosty Gem Peace dollar with original golden toning that deepens toward the borders. The extreme centers show the usual strike weakness, although the overall definition is excellent for the never-sharp High Relief issue. A few trivial grazes do not detract. Some minor strike doubling is visible on select reverse design elements. NGC ID# 2U4E, PCGS# 7356

17563 1921 MS65 PCGS. A satiny, champagne-tinted Gem with an impressively bold central strike and clean surfaces. Generous portions of eye appeal permeate each side. An outstanding High Relief type coin or date representative. Finer 1921 Peace dollars are scarce. NGC ID# 2U4E, PCGS# 7356

17564 1921 MS65 NGC. The 1921 High Relief Peace dollar is a popular issue in any grade. Gem condition represents the highest readily collectible grade level, balancing quality and affordability. This frosty, lightly toned example has razor-sharp detail with minimal softness confined to the extreme centers. NGC ID# 2U4E, PCGS# 7356

17565 1921 MS65 NGC. The central obverse and reverse exhibit typical design weakness that was the result of the high relief design that was modify the following year to ensure better details. This highly lustrous and satiny Gem has delicate gold and iridescent toning. NGC ID# 2U4E, PCGS# 7356

17566 1921 MS65 PCGS. CAC. An above-average strike joins frosty original luster on this Gem 1921 High Relief Peace dollar. Mottled russet-gold and olive toning blankets each side, but no distracting abrasions are observed beneath the patina. No silver dollar collection is complete without the only circulating High Relief issue. NGC ID# 2U4E, PCGS# 7356

17567 1921 MS65 PCGS. CAC. Brilliant and satiny with a remarkably sharp strike for the type. A single small tick beneath Liberty's eye prevents an even finer grade. The CAC endorsement is seldom offered on Gem High Relief Peace dollars. NGC ID# 2U4E, PCGS# 7356

**1921 Peace Dollar, MS66
High Relief Design**

17568 1921 MS66 NGC. After the challenges that the High Relief Saint-Gaudens double eagles posed 14 years earlier, it is perhaps surprising that the Mint would again attempt production of a high relief design. Like all circulation strike 1921 Peace dollars, this Premium Gem shows design weakness at the centers. However, the presentation is medalllic, and the preservation is exceptional. Both sides have satiny silver luster with delicate gold toning. NGC has only certified six numerically finer examples (9/17). NGC ID# 2U4E, PCGS# 7356

17569 1922-D MS66 PCGS. The 1922-D Peace dollar can be located in MS66 condition with a little patience, but finer coins are very rare. This well-detailed Premium Gem is well-preserved and lightly toned, with vibrant mint luster throughout. PCGS has graded three numerically finer examples (9/17). NGC ID# 257D, PCGS# 7358

17570 1922-D MS66 PCGS. CAC. This is a well-struck, frosty coin with blazing cartwheel luster and excellent preservation. The 1922-D Peace dollar is only marginally scarce in this grade, but only two finer coins are reported at PCGS (9/17). NGC ID# 257D, PCGS# 7358

17571 1922-S MS65 PCGS. Autumn-brown toning adorns the left obverse, but the rest of this lustrous Gem is brilliant. The strike is good and the fields are well-preserved. The portrait displays minor contact. Despite a considerable mintage, the 1922-S becomes rare any finer. NGC ID# 257E, PCGS# 7359

17572 1923-S MS65 PCGS. The well-preserved surfaces of this impressive Gem are visited by shades of delicate gold toning, with vibrant mint luster underneath. PCGS has certified only three numerically finer pieces (9/17). NGC ID# 257H, PCGS# 7362

17573 1923-S MS65 NGC. A scarce Gem example of this challenging San Francisco issue, showing frosty mint luster and mottled toning in shades of russet, orange-gold, and cobalt blue. The strike is solid, and no distracting abrasions are observed. Census: 81 in 65 (1 in 65+), 1 finer (9/17). NGC ID# 257H, PCGS# 7362

17574 1925-S MS64+ PCGS. This satiny near-Gem has delicate gold and iridescent toning on the obverse, with a brilliant and untuned reverse. Trivial grade-consistent marks prevent a higher numerical assessment. NGC ID# 257M, PCGS# 7366

17575 1926 MS66 PCGS. Vibrant, frosty luster with the barest traces of champagne toning pervades each side of this Premium Gem 1926 Peace dollar. The strike is sharp, and Liberty's cheek is clean. This is among the finest coins certified by PCGS (9/17). NGC ID# 257N, PCGS# 7367

17576 1926-D MS66 PCGS. This Premium Gem is boldly struck with radiant satin luster. The surfaces appear even cleaner than the grade suggests. A quick glance at the certification totals reveals how steeply the population of 1926-D dollars declines from MS66 to MS67. There are only eight higher grading events at PCGS (9/17). NGC ID# 257P, PCGS# 7368

**1926-D Peace Dollar, MS66
Sharply Struck**

17577 1926-D MS66 PCGS. CAC. The centers display a sharpness of strike seldom encountered among coins from this series. Both sides are virtually brilliant, save for the faintest blushes of tan-gold color that confirm the originality of this impeccably preserved Premium Gem Peace dollar. More than 2.3 pieces were struck at the Denver Mint in 1926, yet PCGS reports only eight higher grading events (9/17). NGC ID# 257P, PCGS# 7368

17578 1927 MS65 PCGS. From a low mintage of 848,000 pieces, this attractive Gem exhibits well-detailed design elements and well-preserved, lustrous surfaces, under pleasing shades of golden-brown and lavender-gray toning. PCGS has graded 16 numerically finer examples (9/17). NGC ID# 257S, PCGS# 7370

17579 1927 MS65 PCGS. This well-struck, frosty 1927 Peace dollar displays a hint of champagne toning over original surfaces. A small reed mark on the eagle's tailfeathers is the only mentionable abrasion. The 1927, with a minimal mintage of 848,000 pieces, is a challenging acquisition in high grade. PCGS has seen only 16 submissions finer than the Gem level (8/17). NGC ID# 257S, PCGS# 7370

17580 1927-D MS64 PCGS. CAC. The well-preserved surfaces of this impressive Choice specimen are blanketed in shades of golden-tan and lavender-gray toning, with satiny mint luster underneath. The design elements are well-detailed, with a touch of the usual softness on the eagle's shoulder. NGC ID# 257T, PCGS# 7371

**1928 Peace Dollar, MS65
Cornerstone Issue**

17581 1928 MS65 PCGS. An overlay of almond-gold patina blankets the obverse, allowing underlying mint luster to shine through. The reverse maintains its brilliance. UNITED and ONE are a trifle soft, but the other legends and central motifs are well-detailed. Only 360,000 Peace dollars were struck at the Mint in 1928. The issue is known to collectors within this series and without as cornerstone date. There are 18 finer submissions at PCGS (10/17). NGC ID# 257V, PCGS# 7373

17582 1934 MS66 PCGS. CAC. Unlike the 1934-S, this late-date Peace dollar issue can be found through MS66. Finer examples, however, are extremely rare. This boldly detailed Premium Gem radiates soft mint luster over well-preserved, silvery surfaces. PCGS lists three higher grading events (9/17). NGC ID# 257Y, PCGS# 7375

17583 1934 MS66 PCGS. CAC. A scarce CAC-approved Premium Gem, second to only three numerically finer coins at PCGS (9/17). This brilliant, satiny silver dollar displays good strike sharpness and has mostly undisturbed surfaces. The 1934 is a popular issue with a mintage of just less than 1 million pieces. NGC ID# 257Y, PCGS# 7375

17584 1935 MS66 PCGS. The 1935 Peace dollar is available through MS65, moderately elusive in MS66, and almost uncollectible any finer. This Premium Gem is among the finest at PCGS (9/17). The strike is sharp, and frosty mint luster displays a hint of light champagne toning. NGC ID# 2582, PCGS# 7378

1935-S Silver Dollar, MS66 Few Known Finer

17585 1935-S MS66 PCGS. 30th Anniversary Green Label Holder. This Premium Gem 1935-S Peace dollar is sharply detailed and shows frosty original mint luster. Tinges of deep russet border toning surround delicate champagne interiors. The 1935-S is scarce but collectible in MS66, while PCGS and NGC each report only three finer examples of the date (9/17). NGC ID# 2583, PCGS# 7379

COMMEMORATIVE SILVER

17586 1893 Isabella Quarter MS65 PCGS. CAC. The central devices are intricately defined, and each side displays original satin luster with no mentionable abrasions. Gold, russet, mint-green, and champagne-gray toning enriches the eye appeal. NGC ID# BYJ9, PCGS# 9220

17587 1900 Lafayette Dollar MS63 PCGS. CAC. Ex: Teich Family Collection. Apple-green, walnut-brown, and cherry-red fill the borders but the fields and motifs remain brilliant. Marks are inconsequential, and the coin is high-end despite a faint fingerprint on the lower obverse.

Ex: *New York Signature (Heritage, 2/2014), lot 4378; ANA Signature (Heritage, 3/2016), lot 4626.* NGC ID# BYKW, PCGS# 9222

17588 1900 Lafayette Dollar MS64 PCGS. DuVall 1-B. The leaf tip points between 19. This well-struck near-Gem commemorative dollar shows shimmering luster and delicate toning that includes mixed shades of blue-green, violet, and crimson. Original surfaces display minimal marks. NGC ID# BYKW, PCGS# 9222

17589 1900 Lafayette Dollar MS64 PCGS. DuVall 1-B. The lowest right leaf points between the 1 and 9 in the date. This impressive Choice specimen exhibits lightly marked, lustrous surfaces, under pleasing shades of golden-tan and lavender toning. The design elements are well-detailed and the overall presentation is most attractive. NGC ID# BYKW, PCGS# 9222

17590 1900 Lafayette Dollar MS64 PCGS. CAC. DuVall 2-C. A well-struck, satiny near-Gem with both sides deeply toned in complementary olive-green, gold, sun-orange, and russet hues. No distracting abrasions are observed. An outstanding type coin for the classic commemorative collector who appreciates old-time toning. NGC ID# BYKW, PCGS# 9222

17591 1921 Alabama MS65+ PCGS. CAC. A satiny Gem with golden interiors surrounded by lavender, amber, and aquamarine border toning. Some central strike weakness is apparent on the eagle, but a lack of abrasions heightens the eye appeal. NGC ID# BYF2, PCGS# 9224

17592 1921 Alabama MS66 PCGS. Sharply detailed in most areas, this impressive Premium Gem shows a touch of softness on the eagle's claws. The well-preserved, lustrous surfaces radiate vibrant mint luster under shades of champagne-gold and lavender-gray toning. PCGS has graded five numerically finer examples (9/17). NGC ID# BYF2, PCGS# 9224

17593 1921 Alabama 2x2 MS66 PCGS. CAC. Only 6,000 Alabama half dollars with 2x2 in the right obverse field were distributed to collectors, making this one of the key varieties among classic commemoratives. Brilliant surfaces radiate soft mint luster over pinpoint-sharp design elements. A couple of tiny grazes are minimal even for this high grade. Eight finer submissions at PCGS (10/17). Population: 136 in 66 (9 in 66+), 8 finer. CAC: 46 in 66, 2 finer (10/17). NGC ID# BYEZ, PCGS# 9225

1937 Antietam Half, MS67+ Pale Iridescent Toning

17594 1937 Antietam MS67+ PCGS. CAC. Struck to commemorate the 75th anniversary of the Battle of Antietam, the single bloodiest day in American history. The surfaces on each side are light in color with vibrant, lightly frosted mint luster. Pale lilac-rose and lime green toning is seen on both obverse and reverse with just slightly deeper margins. An exceptionally attractive example of this popular commemorative half dollar. NGC ID# BYF4, PCGS# 9229

17595 1935 Arkansas MS67 NGC. This impressive Superb Gem exhibits dappled blue and gold toning on its satiny and highly lustrous silver surfaces. Examples are rarely seen this fine, and only a single numerically finer representative is reported. Census: 9 in 67, 1 finer (9/17). NGC ID# BYF5, PCGS# 9233

17596 1937-S Arkansas MS66+ PCGS. Silvery-gray interiors cede to lemon-gold and amber-brown toning around the borders. This high-end Premium Gem is sharply struck and displays well-preserved, satiny mint luster. Population: 85 in 66 (9 in 66+), 8 finer (9/17). NGC ID# BYFD, PCGS# 9243

17597 1935/34-D Boone MS67 PCGS. CAC. This is the key issue among Boone half dollars with a distribution of 2,000 coins. Each side is satiny and brilliant without mentionable flaws or imperfections. NGC ID# BYFU, PCGS# 9263

17598 1935/34-D Boone MS67+ PCGS. CAC. Daubs of crimson, russet, and forest-green patina cling to borders. The centers are entirely brilliant with satiny mint luster. Strong magnification reveals a cluster of microscopic ticks near the chin, preventing a higher MS68 assessment, but this Superb Gem appears flawless to the unaided eye. NGC ID# BYFU, PCGS# 9263

17599 1938-D Boone MS67+ PCGS. Blushes of pale gold, lavender, and powder-blue adorn this near-perfectly preserved Boone half dollar from the final year of the series. Only 2,100 pieces were distributed, and five examples are reported finer at PCGS (9/17). NGC ID# BYG7, PCGS# 9275

17600 1936 Bridgeport MS67 PCGS. CAC. The ivory-gray obverse turns to deeper shades of tan-gold on the reverse. Glistening luster flows over each side, showing fully struck devices and an almost complete lack of abrasions. Tied for finest at PCGS. Population: 97 in 67 (7 in 67+), 0 finer. CAC: 29 in 67, 0 finer (9/17). NGC ID# BYG9, PCGS# 9279

17601 1925-S California MS67 PCGS Secure. CAC. The California Diamond Jubilee commemorative half dollar is conditionally scarce in Superb Gem condition and is rare finer than MS67. This satiny example displays sharp detail and unabraded surfaces. Champagne-tinted interiors cede to deeper sea-green and lavender hues at the border. PCGS reports just six numerically finer representatives (8/17). NGC ID# BYGA, PCGS# 9281

17602 1936-D Cincinnati MS67 NGC. The 1936-D Cincinnati half dollar claims a low distribution of 5,005 pieces. This impressive Superb Gem offers well-detailed design elements and impeccably preserved surfaces with vibrant mint luster throughout. It is scarce in this grade and finer examples are rare. Census: 39 in 67 (4 in 67+, 5 in 67 ★), 3 finer (9/17). NGC ID# BYCK, PCGS# 9284

17603 1936 Cleveland MS67 PCGS. This spectacular Superb Gem exhibits well-detailed design elements and virtually pristine lustrous surfaces under shades of greenish-gold, lavender, and amber toning. Finer examples of the issue are extremely rare. Population: 84 in 67 (13 in 67+), 1 finer (9/17). NGC ID# BYGB, PCGS# 9288

17604 1936 Cleveland MS67 NGC. CAC. A sharply detailed Superb Gem with well-preserved surfaces and satiny mint luster under high-intensity champagne-gold, crimson, umber, and olive toning. Certified in a former generation holder. Census: 66 in 67 (3 in 67+, 6 in 67 ★, 2 in 67+★), 6 finer. CAC: 49 in 67, 0 finer (9/17). Ex: *New York Signature (Heritage, 11/2013), lot 4832.* NGC ID# BYBG, PCGS# 9288

1936-D Columbia Half, MS67 ★ Original Tab Toning

17605 1936-D Columbia MS67 ★ NGC. CAC. The tab-toned obverse shows vibrant apple-green, rose-red, and orange-gold toning at the margin and bull's-eye where the coin was exposed while housed in an original holder (not included). The reverse displays similar attractive shades. Ex: *Long Beach Signature (Heritage, 2/1013), lot 4548.* NGC ID# BYGD, PCGS# 9292

17606 1936 PDS Columbia Set MS67 PCGS. A uniformly high-grade and original set. Included are: **1936 P-mint Columbia MS67**, even, light gray patina with satiny underlying mint luster; **1936-D Columbia MS67**, again with light, even steely-gray patina, the obverse is surrounded by light golden peripheral color; and a **1936-S Columbia MS67+**, similarly toned to the coins above, but here the mint luster is brighter and more vibrant. (Total: 3 coins) NGC ID# BYGE, PCGS# 9294

17607 1893 Columbian MS67 NGC. Vivid ocean-blue, violet, and amber-gold border toning surrounds champagne-tinted interiors on this satiny Superb Gem type coin. The strike is bold, and no distracting abrasions are seen. The 1893 Columbian half dollar is very scarce this fine and extremely rare any finer. Census: 37 in 67 (1 in 67+, 6 in 67 ★), 2 finer (9/17). NGC ID# BYGG, PCGS# 9297

17608 1936 Gettysburg MS66 PCGS. CAC. The conjoined portraits of unidentified Union and Confederate soldiers face to the right on the obverse, while forward-facing Union and Confederate shields separated by fasces grace the reverse of this Battle of Gettysburg anniversary half dollar. Slightly more than half of the 50,000 pieces struck were distributed, but few survive any finer than this lustrous, lightly toned Premium Gem with CAC endorsement. Housed in a previous generation green label holder. NGC ID# BYGM, PCGS# 9305

17609 1936 Gettysburg MS66 NGC. CAC. Housed in a previous generation NGC holder with the exposed hologram on the back, this 1936 Gettysburg commemorative half is particularly well-struck. Satiny silver surfaces display golden-gray toning punctuated by bits of deep-russet patina. Remarkably few signs of contact exist on this well-preserved Premium Gem. NGC ID# BYGM, PCGS# 9305

17610 1936 Gettysburg MS66 PCGS. CAC. Pine-green and ruby-red toning enlivens the margins, while the remainder of each side offers mottled olive-gold color. The strike is sharp, and this Battle of Gettysburg Anniversary half dollar is beautifully preserved. Finer representatives are elusive. NGC ID# BYGM, PCGS# 9305

17611 1936 Gettysburg MS66+ NGC. CAC. Simply outstanding surface quality is accentuated by glowing satin luster beneath iridescent mint-gold toning. The design elements are boldly rendered, and the high level of preservation endures even close scrutiny with a loupe. Seldom encountered finer. NGC ID# BYGM, PCGS# 9305

1922 Grant No Stars Half Dollar Unimprovable MS67

17612 1922 Grant No Star MS67 PCGS. Grant No Stars half dollars are available in the absolute sense, but they become conditionally rare at this impressive grade level. The strike is sharp as can be on each side. Brilliant surfaces exude eye-catching mint frost that enhances the appeal. Marks are practically unseen. Population: 67 in 67 (3 in 67+), 0 finer (10/17). NGC ID# BYGP, PCGS# 9306

1922 Grant Memorial Half Dollar, MS67 Vibrant No Star Type Coin

17613 1922 Grant No Star MS67 PCGS. The No Star is by far the more available of the two Grant Memorial half dollar varieties, but the collector can still expect a challenge when it comes to locating a Superb Gem. This boldly struck example showcases exceptionally well-preserved surfaces with unhindered mint luster. The central regions radiate soft champagne hues with deeper russet, amber, and midnight-blue shadings around the peripheries. Population: 66 in 67 (3 in 67+), 0 finer (9/17). Ex: *Long Beach Signature (Heritage, 6/2015), lot 5549.* NGC ID# BYGP, PCGS# 9306

**1922 Grant No Star Half Dollar, MS67
Frosty Top-Grade PCGS Example**

17614 1922 Grant No Star MS67 PCGS. CAC. The No Star Grant Memorial half dollar is much more collectible in Superb Gem condition than its With Star counterpart, although such pieces are still scarce. This CAC-approved coin displays truly beautiful, frosty mint luster graced by delicate pastel toning. The strike is good and eye appeal is generous. Population: 67 in 67 (3 in 67+), 0 finer. CAC: 21 in 67, 0 finer (10/17). NGC ID# BYGP, PCGS# 9306

17615 1922 Grant With Star MS64 PCGS. Subtle hints of sea-green and lavender toning enhance the well-preserved surfaces of this attractive Choice example. Well-detailed design elements are complemented by vibrant mint luster throughout. NGC ID# BYPP, PCGS# 9307

17616 1928 Hawaiian AU58 PCGS. A pleasing near-Mint specimen of this key silver commemorative, this coin shows just the slightest trace of wear on the well-detailed design elements, and the lightly abraded surfaces retain most of their original mint luster. NGC ID# BYGR, PCGS# 9309

17617 1928 Hawaiian — Improperly Cleaned — NGC Details. Unc. A hint of champagne color accents satiny, partially lustrous surfaces on this well-struck Hawaiian half dollar commemorative. A few trivial abrasions are not bothersome, and neither is an old cleaning.

17618 1928 Hawaiian — Cleaned — PCGS Genuine. Unc Details. No actual wear shows on this extremely popular silver commemorative, and the only minor signs of contact are evident, but the surfaces have an unnatural sheen, due to the noted cleaning. The design elements are sharply detailed throughout.

17619 1928 Hawaiian MS64+ PCGS. A Plus-graded Choice example of this sought-after key issue, with sharply detailed design elements and vibrant mint luster throughout. The lightly marked surfaces show attractive highlights of golden-brown toning. Eye appeal is outstanding. NGC ID# BYGR, PCGS# 9309

**1928 Hawaiian Half, MS65
Lightly Toned Example**

17620 1928 Hawaiian MS65 PCGS. Hints of iridescence complement the light gold toning that covers three-quarters of the obverse, while the reverse presents a blush of rose-gold color behind the chieftain. The strike is sharp on Captain Cook's portrait and the chief's regalia. A challenging issue in Gem condition, this lightly toned example will fill an empty slot in an advanced collection of classic commemoratives.

Ex: Beverly Hills Signature (Heritage, 11/2014), lot 4851; Long Beach Signature (6/2015), lot 5556. NGC ID# BYGR, PCGS# 9309

**1928 Hawaiian Half Dollar, MS65
Lightly Toned With Bright, Lustrous Surfaces**

17621 1928 Hawaiian MS65 PCGS. CAC. Struck to commemorate the "discovery" of the Hawaiian Islands by Captain James Cook in 1778, only 9,958 pieces were struck of this well-designed and popular half dollar. Many pieces are found with dull surfaces, but this is an especially bright and vibrant example. The interiors show just the slightest hint of color, with rich golden and blue peripheral toning around the obverse. Attractive and unquestionably high-end. NGC ID# BYGR, PCGS# 9309

17622 1935 Hudson MS64 PCGS. CAC. A satiny near-Gem with outstanding preservation for the grade, as the CAC green label confirms. Lavender-champagne interiors cede to umber, crimson, forest-green, and russet border toning. Eye appeal is exceptional. NGC ID# BYGS, PCGS# 9312

17623 1918 Lincoln-Illinois MS67 NGC. The availability of this issue in Superb Gem condition is low, and it is exceedingly so any finer. The present coin displays a sharp strike and radiant satin luster. Beautiful, original multicolor border toning surrounds brilliant interiors. Neither side exhibits detracting abrasions. Census: 77 in 67 (1 in 67+, 7 in 67 ★, 2 in 67+★), 6 finer (9/17). NGC ID# BYGU, PCGS# 9320

17624 1936 Long Island MS67 PCGS. The 1936 Long Island half dollar is very scarce at the MS67 grade level. This delightful Superb Gem displays well-detailed design elements and lustrous, impeccably preserved surfaces with highlights of sea-green and amber toning. Population: 90 in 67 (9 in 67+), 0 finer (9/17). NGC ID# BYGX, PCGS# 9322

17625 1936 Long Island MS67 NGC. A deeply toned Superb Gem with mottled tan, gold, magenta, and violet throughout the periphery. The central devices have a vivid mix of silver-gray and medium-brown coloration. Splendid luster radiates beneath the patina and complements the powerfully struck design elements. A few wispy abrasions keep this attractive piece from being absolutely flawless. Census: 82 in 67 (8 in 67+, 19 in 67 ★, 2 in 67+★), 6 finer (9/17).

Ex: Los Angeles Signature (Heritage, 8/2009), lot 2133; FUN Signature (Heritage, 1/2015), lot 6443; Central States Signature (Heritage, 4/2015), lot 6683; New York Signature (Heritage, 10/2015), lot 4393. NGC ID# BYGX, PCGS# 9322

17626 1936 Lynchburg MS67 PCGS. The reverse of this impressive Superb Gem is deeply toned in mingled shades of plum, peach, and lilac, while the obverse (portrait side) is mostly brilliant in the center with rings of pale jade and lavender. The design elements are sharply detailed and vibrant mint luster shines beneath the patina. PCGS lists a single numerically finer example (9/17).

Ex: Long Beach Signature (Heritage, 9/2013), lot 4424. NGC ID# BYDJ, PCGS# 9324

17627 1920 Maine MS67 PCGS. Jade-green and lavender toning visits the upper obverse and lower reverse, but a majority of this lustrous Superb Gem shows only light wheat-gold patina. The strike is sharp, and both sides display only incidental contact. Population: 52 in 67 (7 in 67+), 0 finer (9/17). NGC ID# BYGY, PCGS# 9326

17628 1934 Maryland MS67 NGC. CAC. Ex: J&L Collection. Mottled russet, amber, and olive-gold toning blankets the near-pristine surfaces of this CAC-endorsed Superb Gem. The strike is sharp, and eye appeal is outstanding. The Maryland Tercentenary half dollar is scarce this fine and extremely rare finer. Census: 97 in 67 (4 in 67+, 7 in 67 ★), 4 finer. CAC: 45 in 67, 0 finer (9/17). NGC ID# BYGZ, PCGS# 9328

17629 1921 Missouri MS65 PCGS. Gem Missouri Centennial half dollars represent the finest examples of this classic commemorative that most collectors seek to acquire, as finer coins are scarce and pricey. This piece displays a bold strike and original, frosty luster. Champagne-tinted surfaces feature areas of deep russet, olive, and gunmetal-blue toning in the peripheral fields. NGC ID# BYH2, PCGS# 9330

17630 1921 Missouri 2x4 MS65+ PCGS. CAC. This high-end, CAC-approved Gem displays a bold strike and satiny, unabraded mint luster. Olive and russet border toning accents rich golden interiors, delivering strong eye appeal and originality. Finer examples are scarce. NGC ID# 2FE9, PCGS# 9331

17631 1923-S Monroe MS66 PCGS. A lustrous Premium Gem piece, toned golden-pink over John Quincy Adams' portrait, with iridescent blue intermingled with darker hues toward the edges. The reverse is similarly toned, highlighting the two female figures arranged in a semblance of the Americas. This example is rather bold for the notoriously poorly struck issue that it represents. PCGS lists seven Superb Gems finer (9/17). NGC ID# BYH4, PCGS# 9333

17632 1938 New Rochelle MS67 NGC. The New Rochelle 250th Anniversary half dollar is elusive in Superb Gem condition and decidedly rare above MS67. This piece displays a sharp strike and satiny mint luster. Deep amber and olive-gold toning blankets each side. Housed in a prior generation holder. NGC lists only 20 finer representatives (9/17). NGC ID# BYDX, PCGS# 9335

1936 Norfolk Half Dollar, MS68 Tab-Toned Original Surfaces

17633 1936 Norfolk MS68 PCGS. CAC. The Norfolk half dollar was struck in 1936 to commemorate not the founding of the city in 1682, but establishment of the borough status of the town in 1736. This is an all-original coin that obviously spent decades in a cardboard holder of issue, as seen by the deep "tab" toning around the obverse margin. The reverse is equally deep in color from uniform contact of that side with the cardboard holder. The surfaces are defect-free and each side displays vibrant mint luster. NGC ID# BYH5, PCGS# 9337

17634 1925 Norse, Thin Planchet, MS65 PCGS. CAC. Only 6,000 pieces minted. This Gem CAC-approved example displays sharp detail and smooth, satiny surfaces. Silvery interiors cede to gold, aquamarine, sea-green, lavender, and russet border toning. No distracting abrasions are seen. NGC ID# 2WHM, PCGS# 9451

1925 Norse-American Medal, MS66 Thin Planchet, Only 6,000 Pieces Struck

17635 1925 Norse, Thin Planchet, MS66 PCGS. CAC. In 1925, Minnesota Congressman Ole J. Kvale and South Dakota Senator Peter Norbeck sponsored legislation for the production of a medal to commemorate the landing of the Norwegian ship *Restauration* at New York in 1825. James Earle Fraser was chosen to design the medal. Two variants were struck, including one with a Thin Planchet (6,000 coins) and another with a Thick Planchet (33,750 pieces). This MS66 example of the scarcer variety features pale almond-gold and lilac patina over frosty surfaces. A single tick occurs above the head of the last Viking rower. Population: 15 in 66, 0 finer. CAC: 10 in 66, 0 finer (9/17). NGC ID# 2WHM, PCGS# 9451

17636 1915-S Panama-Pacific MS65 PCGS. CAC. This CAC-endorsed Panama-Pacific half dollar is well-preserved with nearly brilliant, highly lustrous silver surfaces. A few widely scattered, minuscule marks and an occasional microscopic toning fleck accompany the sharply struck surfaces, but they provide no distraction from the overall Gem quality. Housed in a previous generation green label holder. NGC ID# BYHP, PCGS# 9357

17637 1915-S Panama-Pacific MS66 PCGS. Glimpses of peach patina visit the margins of this Panama-Pacific half dollar, the first commemorative of the familiar size struck in the 20th century. The luster is largely silver elsewhere with a hint of pastel-yellow, softly swirling save for a touch of flash at the right reverse. Ex: *Summer FUN Signature* (Heritage, 7/2012), lot 4551. NGC ID# BYHP, PCGS# 9357

17638 1915-S/S Panama-Pacific, FS-502, MS64 PCGS. CAC. Ex: Bingham Collection. Delightful rainbow toning nearly encompasses the obverse and clings to the borders on the reverse. The central reverse is light golden. This near-Gem is well-struck and devoid of major abrasions. NGC ID# BYHP, PCGS# 511601 Base PCGS# 9357

17639 1915-S/S Panama-Pacific, FS-502, MS65+ NGC. Light silver interiors have strong luster, while the margins are gold-orange, violet, and blue. Generally well-struck, though a degree of softness is noted on Columbia's hair. Ex: *ANA Signature* (Heritage, 2/2014), lot 5739. NGC ID# BYHP, PCGS# 511601 Base PCGS# 9357

**1915 Pan-Pac Half Dollar, MS66+
Repunched Mintmark**

17640 1915-S/S Panama-Pacific, FS-502, MS66+ PCGS. The upper serif of an errant mintmark is visible above the primary S. This high-end Premium Gem Pan-Pac type coin exhibits the usual satin luster with an unusually high degree of preservation. Light champagne toning warms each side, and the design elements are well-struck. This is the most readily available of the five Panama-Pacific commemoratives in high grade. NGC ID# BYHP, PCGS# 511601 Base PCGS# 9357

17641 1921 Pilgrim MS67 PCGS. A delightful Superb Gem representative, with impeccably preserved surfaces that radiate vibrant mint luster, under attractive shades of lavender and greenish-gold toning. The design elements are sharply detailed and eye appeal is terrific. Population: 50 in 67 (6 in 67+), 1 finer (9/17). NGC ID# BYHS, PCGS# 9360

17642 1921 Pilgrim MS67 PCGS. This is a boldly rendered and vividly lustrous Superb Gem representative of the Pilgrim Tercentenary half dollar, conditionally rare as such. Beautifully preserved surfaces yield warm champagne toning overall, with deeper olive, russet, and amber overtones also evident in the peripheries and lightly speckled over the central reverse. Population: 50 in 67 (6 in 67+), 1 finer (9/17). NGC ID# BYHS, PCGS# 9360

17643 1936 Rhode Island MS66 Prooflike NGC. CAC. A delightful Premium Gem from a distribution of 20,013 pieces, this coin offers sharply detailed design elements and impeccably preserved surfaces, with reflective prooflike fields. Eye appeal is terrific. NGC ID# BYHT, PCGS# 9363

17644 1936 Rhode Island MS66 Prooflike NGC. CAC. Ex: Bagne Collection. This is certainly an appealing Rhode Island commemorative. The fields are brightly reflective, and there is no contrast between fields and devices, much the same as regular-issue proofs stuck in the early years of the 20th century. The centers are brilliant and surrounded by dusky russet hues at the margins. The surfaces are essentially mark-free, as one would expect from the MS66 designation. NGC has certified 10 other P-mint Rhode Islands in this lofty grade and none are finer (9/17).
Ex: Houston Signature (Heritage, 12/2009), lot 1275. NGC ID# BYHT, PCGS# 89363

17645 1926 Sesquicentennial MS65 NGC. CAC. George Washington and his less heralded Jazz Age successor are paired in jugate fashion on the obverse. The reverse features the Liberty Bell. A beautiful Gem with vibrant luster, mark-free fields, and delicate straw-gold toning. The borders display freckles of tan and green patina. CAC-endorsed in a prior generation holder. NGC ID# BYJ4, PCGS# 9374

17646 1935 Spanish Trail MS65 PCGS. CAC. Butter-gold toning visits the rims, but this coruscating Gem is predominantly pearl-gray. Faint obverse field grazes are of little import. Well struck and of a low-mintage type. Encapsulated in an old green label holder.
Ex: Pittsburgh Signature (Heritage, 10/2011), lot 4435; Central States Signature (Heritage, 4/2015), lot 6740. NGC ID# BYJ5, PCGS# 9376

17647 1935 Spanish Trail MS66 PCGS. Traces of ice-blue tint the silvery interiors of this Premium Gem Spanish Trail half dollar, while the peripheries exhibit gold and russet toning. No major abrasions are seen, and the strike is sharp. Finer examples of this popular classic commemorative are scarce.

17648 1935 Spanish Trail MS66 PCGS. A spectacular Premium Gem representative of this popular silver commemorative, with sharply detailed design elements and lustrous, well-preserved surfaces, under shades of golden-brown toning. NGC ID# BYJ5, PCGS# 9376

17649 1935 Spanish Trail MS67 PCGS. This Superb Gem Spanish Trail half dollar is well-struck and devoid of any objectionable abrasions. Amber-gray and steel-gold toning uniformly blankets each side, and the eye appeal is excellent. PCGS lists only three MS68 coins finer (9/17). NGC ID# BYJ5, PCGS# 9376

17650 1935 Texas PDS Set MS67, MS67+, MS67 PCGS. A three piece denominational set of Texas commemorative half dollars, with the P and S coins grading MS67 and the Denver specimen grading MS67+. The coins are all well-detailed and impeccably preserved, and all are richly toned in iridescent shades of golden-brown and magenta toning. (Total: 3 coins) NGC ID# BYJA, PCGS# 9385

17651 1925 Vancouver MS67 PCGS. From a distribution of 14,994 pieces, this delightful Superb Gem exhibits well-detailed design elements and well-preserved, lustrous surfaces, under delicate shades of jade-gold and lavender toning. Population: 67 in 67 (10 in 67+), 3 finer (9/17). NGC ID# BYJP, PCGS# 9399

17652 1927 Vermont MS66+ PCGS Secure. CAC. This piece is boldly struck and satiny with exceptional preservation. Russet, crimson, forest-green, and orange-gold toning appears on each side but is most prominent on the obverse. PCGS lists only 58 finer representatives of this conditionally challenging classic commemorative (9/17). NGC ID# BYJR, PCGS# 9401

17653 1946-S Booker T. Washington MS67 PCGS. CAC. Medium intensity multicolored toning bathes the lustrous surfaces of this Superb Gem commemorative. Both sides are impeccably preserved and well-struck. PCGS lists three finer examples (9/17).
Ex: Los Angeles Signature (Heritage, 8/2009), lot 2165. NGC ID# BYJU, PCGS# 9406

**1947-D Booker T. Washington Half, MS67
A Top-Grade Condition Rarity**

17654 1947-D Booker T. Washington MS67 NGC. The 1947-D Booker T. Washington half dollar is decidedly rare in this grade and unknown numerically finer. This piece displays glowing, luminous surfaces with original frosty mint luster and attractive yellow-gold toning. There are no distracting abrasions. Census: 14 in 67 (2 in 67+, 2 in 67 ★), 0 finer (9/17). NGC ID# BYJW, PCGS# 9409

17655 1947-S Booker T. Washington MS67 PCGS. CAC. This delightful Superb Gem offers sharply detailed design elements and impeccably preserved surfaces, with highlights of pale gold toning and especially vibrant mint luster. Population: 35 in 67, 0 finer. CAC: 22 in 67, 0 finer (9/17). NGC ID# BYJX, PCGS# 9410

**1948 Booker T. Washington Half Dollar
Among the Finest Examples, MS67**

17656 1948 Booker T. Washington MS67 PCGS. CAC. Commemorative half dollar enthusiasts building Registry Sets should strongly consider this Superb Gem 1948 Booker T. Washington piece, among the finest examples at PCGS, NGC, and CAC combined. Bright and softly frosted, each side displays dappled russet hues around the borders. The portrait and legends are fully struck. A single tick occurs on the lip. Population: 10 in 67, 0 finer. CAC: 7 in 67, 0 finer (10/17). NGC ID# BYJY, PCGS# 9412

17657 1951 Booker T. Washington MS67 PCGS. Russet and olive toning is dusted over softly frosted surfaces on this high-end Booker T. Washington half dollar. The strike is bold, and neither side exhibits detracting contact marks. The 1951 is rare this fine and almost unknown in better condition. Population: 24 in 67 (4 in 67+), 0 finer (9/17). NGC ID# BYK9, PCGS# 9424

17658 1951-D Booker T. Washington MS67+ NGC. CAC. The 1951-D Booker T. Washington half dollar comes from a low distribution of just 7,004 pieces. The lustrous surfaces of this high-end Superb Gem are covered with soft grayish-tan patina and exhibit well-struck devices. Impeccable preservation heightens the coin's eye appeal, affirming the CAC sticker. Census: 44 in 67 (4 in 67+, 1 in 67 ★), 0 finer. CAC: 37 in 67, 0 finer (9/17). NGC ID# BYKA, PCGS# 9425

17659 1952-D Washington-Carver MS66 PCGS. CAC. Cast in a blush of light champagne toning, this Premium Gem offers bold detail and satiny, well-preserved surfaces. No finer 1952-D representatives are listed at PCGS. Population: 55 in 66 (2 in 66+), 0 finer. CAC: 13 in 66, 0 finer (10/17). NGC ID# BYL4, PCGS# 9435

17660 1952-S Washington-Carver MS67 NGC. CAC. Even while available in lower grades, the 1952-S Washington-Carver half dollar is a significant condition rarity in Superb Gem condition. This piece is well-struck and free of distractions. A pale golden-gray hue encompasses much of each side, with deeper orange-gold splashes of color near the margins. Census: 16 in 67 (2 in 67+, 3 in 67 ★), 1 finer. CAC: 16 in 67, 0 finer (9/17). NGC ID# BYL5, PCGS# 9436

**1953-S Washington-Carver Half Dollar, MS67
Registry-Grade Example**

17661 1953-S Washington-Carver MS67 PCGS. Although available in lower grades, the 1953-S Washington-Carver half dollar is conditionally rare in MS67. This Registry-grade example displays a bold strike and frosty mint luster. The obverse shows a lavender-gray interior surrounded by sun-orange peripheral toning, while the reverse displays varying degrees of the latter color. Population: 15 in 67 (1 in 67+), 0 finer (9/17). NGC ID# 332B, PCGS# 9440

17662 1936 Wisconsin MS68 NGC. Sun-gold, rose-red, and blue-green endow the borders while the centers are almond-gold and stone-gray. Lustrous and immaculate with remarkable eye appeal. Among the finest Wisconsin Territorial Centennial half dollars certified. Census: 41 in 68 (7 in 68 ★, 1 in 68+★), 0 finer (9/17). Ex: Santa Clara Signature (Heritage, 11/2002), lot 8322; Beverly Hills Signature (Heritage, 11/2014), lot 4921. NGC ID# BYKU, PCGS# 9447

17663 1936 York MS68 NGC. Frosty and magnificent with largely untuned interiors but a range of shadings — pale canary-yellow, richer gold, deep reddish-orange — along the margins. The York County, Maine, Tercentenary half dollar is scarce this fine and prohibitively rare any finer. NGC and PCGS each list a single numerically finer example (9/17). NGC ID# BYKV, PCGS# 9449

COMMEMORATIVE GOLD

17664 1903 Louisiana Purchase, Jefferson Gold Dollar MS66 PCGS. The well-preserved orange-gold surfaces of this impressive Premium Gem radiate vibrant mint luster on both sides and the design elements are sharply detailed throughout. A single amber alloy spot is evident by the L in Louisiana. NGC ID# BYLD, PCGS# 7443

17665 1903 Louisiana Purchase, Jefferson Gold Dollar MS66 ★ NGC. A spectacular Premium Gem from a distribution of 17,500 pieces, this coin exhibits sharply detailed design elements and well-preserved orange-gold surfaces with vibrant mint luster throughout. The outstanding eye appeal is attested by the Star designation. NGC ID# BYLD, PCGS# 7443

17666 1903 Louisiana Purchase, Jefferson Gold Dollar MS66 PCGS. CAC. An attractive Premium Gem representative of this popular gold commemorative, with sharply detailed design elements and well-preserved, lustrous surfaces. Housed in a green label holder. NGC ID# BYLD, PCGS# 7443

17667 1903 Louisiana Purchase, McKinley Gold Dollar MS66 NGC. A delightful Premium Gem representative of this popular gold commemorative, with sharply detailed design elements and impeccably preserved lemon-yellow surfaces that radiate vibrant mint luster. Eye appeal is quite strong. NGC ID# BYLE, PCGS# 7444

17668 1904 Lewis and Clark Gold Dollar MS64 PCGS. A sharply struck, semiprooflike near-Gem with the field roughness that is often seen on this issue. A few faint hairlines determine the grade but have little effect on the general visual appeal. A pleasing Lewis and Clark gold dollar type coin. NGC ID# BYLF, PCGS# 7447

17669 1905 Lewis and Clark Gold Dollar MS64 PCGS. The 1905 is the rarer of the two Lewis and Clark gold dollar issues in high grades, though the 1904 and 1905 claim identical distributions of 10,000 coins. This yellow-gold near-Gem has strong peripheral elements and typically struck centers with slight evidence of die fatigue around the margins. NGC ID# BYLG, PCGS# 7448

17670 1915-S Panama-Pacific Gold Dollar MS66 PCGS. A sharp tangerine-gold Premium Gem with hints of rose and mint-green on both sides. The surfaces are devoid of bothersome abrasions, and eye appeal is generous. Finer Pan-Pac gold dollars are scarce. NGC ID# BYLH, PCGS# 7449

17671 1915-S Panama-Pacific Gold Dollar MS66 PCGS. A sharp, satiny Premium Gem that exhibits seemingly pristine surfaces and rich orange-gold luster. A few small, coppery discolorations appear under a loupe, attesting to the originality of the surfaces. The Pan-Pac gold dollar is available in this grade but seldom offered finer. NGC ID# BYLH, PCGS# 7449

17672 1915-S Panama-Pacific Quarter Eagle MS62 PCGS. Original, satiny mint luster illuminates well-struck design elements on this Uncirculated Pan-Pac quarter eagle. Light handling marks limit the grade, making this piece ideal for the casual classic commemorative type collector. NGC ID# BYLP, PCGS# 7450

**1915-S Panama-Pacific Quarter Eagle
Only 6,749 Coins Distributed, MS64**

17673 1915-S Panama-Pacific Quarter Eagle MS64 PCGS. This is the first gold quarter eagle issue in the classic commemorative series. It claims a small distribution of 6,749 coins. Luminous luster emanates from rich yellow-gold surfaces, generating a strong degree of visual appeal. There are a couple of tiny marks on the head of the hippocampus, while the fields are well-preserved. NGC ID# BYLP, PCGS# 7450

17674 1922 Grant Gold Dollar, With Star, MS64 PCGS Secure. CAC. This sharply defined Choice Mint State Grant gold dollar with its incuse star in the obverse field exhibits satiny mint luster throughout. The pleasing greenish-gold surfaces are well-preserved, with a few hints of lilac. NGC ID# BYPS, PCGS# 7459

17675 1922 Grant Gold Dollar, With Star, MS65 NGC. A lovely Gem, sharply struck in brilliant yellow-gold with satiny surfaces. The half dollars and gold dollars both had Star and No Star varieties. Unlike the half dollar with an extremely low mintage for the With Star variety, the gold dollars had equal mintages for both varieties. NGC ID# BYPS, PCGS# 7459

17676 1922 Grant Gold Dollar, With Star, MS65 PCGS Secure. Subtly green-gold with strong and swirling luster. Well-preserved, as befits the grade, though the strike is soft as usual on the back of Grant's head. The overall presentation is most attractive. NGC ID# BYPS, PCGS# 7459

17677 1926 Sesquicentennial Quarter Eagle MS65 PCGS. A lovely, frosty Gem example of the final gold issue in the classic commemorative series. This luminous Sesquicentennial quarter eagle, struck to commemorate the 150th anniversary of the signing of the Declaration of Independence, shows no major abrasions and has strong eye appeal. A few tiny coppery discolorations appear on each side under a loupe. NGC ID# 2FE9, PCGS# 7466

17678 1926 Sesquicentennial Quarter Eagle MS65+ PCGS. Coruscating frost shimmers over light yellow-gold surfaces. This high-end Gem is uniformly strong and well-preserved with a couple of minute ticks in the reverse field. Coppery alloy spots appear on each side, a common occurrence among 1926 Sesquicentennial quarter eagles. NGC ID# 2FE9, PCGS# 7466

MODERN BULLION COINS

17679 1986 Silver Eagle MS70 PCGS. A flawlessly preserved, frosty example of the debut Silver Eagle, showing brilliant surfaces and a full strike. Eye appeal is outstanding. PCGS-certified MS70 examples of this date are elusive. NGC ID# 26J4, PCGS# 9801

17680 1988 Half-Ounce Gold Eagle MS69 NGC. This satiny 1988 half-ounce Gold Eagle is nearly flawless, showing medium yellow-gold luster with hints of deeper peach-orange in portions of the fields. Some faint interruptions in the satin finish on the high points of Liberty's figure appear to be from a slightly incomplete strike and not post-mint abrasions. NGC ID# 26N9, PCGS# 9822

17681 1988 One-Ounce Gold Eagle MS69 NGC. Although a large number of the 1988 American Gold Eagle one-ounce pieces have achieved the MS69 grade, only 74 finer pieces have reached the grading pinnacle (10/17). This virtually perfect representative has pristine, satiny yellow surfaces and sharp design motifs. NGC ID# 26PC, PCGS# 9824

17682 1989 Half-Ounce Gold Eagle MS69 NGC. From a mintage of 44,798 pieces, this spectacular half-ounce Gold Eagle is just one tick away from perfection, with fully struck design elements and orange-gold surfaces that radiate vibrant mint luster. NGC ID# 26NA, PCGS# 9832

**1991 Half-Ounce Gold Eagle, MS69
Final Roman Numeral Date Issue**

17683 1991 Half-Ounce Gold Eagle MS69 NGC. The 1991 half-ounce Gold Eagle is the final issue in the series with a Roman numeral date, reminiscent of the original 1907 High Relief double eagle from which the obverse design was derived. This nearly flawless example is fully struck with satiny yellow-gold mint luster. Finer pieces are scarce. NGC ID# 26NC, PCGS# 9852

**1993 Silver Eagle, MS70
Key Date in This Ultimate Grade**

17684 1993 Silver Eagle MS70 NGC. This pristine MS70 representative offers a full strike, satiny mint luster, and complete brilliance throughout. Both sides are utterly void of imperfections. The 1993 Silver Eagle has one of the lowest populations in this ultimate grade. Expect strong demand from Registry Set builders. NGC ID# 26JJ, PCGS# 9866

**1995-W Silver Eagle, PR69 Ultra Cameo
Most Popular Issue in the Series**

17685 1995-W Silver Eagle PR69 Ultra Cameo NGC. This profoundly contrasted Silver Eagle exhibits deeply reflective, jet-black fields set against thickly frosted and fully defined relief elements. Not a single mark is readily apparent to the unaided eye. A small mintage of 30,125 proofs and its status as the first West Point Silver Eagle make the 1995-W the most popular issue in the entire series. NGC ID# CFWX, PCGS# 9887

**1995 Half-Ounce Gold Eagle, MS70
Semiprooflike Fields**

17686 1995 Half-Ounce Gold Eagle MS70 NGC. It is difficult to decide which is more appealing about this coin — its pristine surfaces and semiprooflike fields or the scarcity of this issue in the top MS70 grade. Sharp motifs and perfect surfaces entertain generous aesthetic quality combined with bright mint-fresh luster. NGC lists fewer than 100 examples this fine, which is a low population among modern bullion issues (10/17). NGC ID# 26NG, PCGS# 9892

17687 1999 Quarter-Ounce Gold Eagle MS70 NGC. One of the few perfect Mint State examples to survive the rigors of manufacturing and handling, this lovely Superb Gem exhibits exceptional eye appeal with satiny yellow-gold surfaces. NGC ID# 26MG, PCGS# 9941

17688 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, MS69 NGC. A modern mint blunder, the 1999-W gold coins were supposed to have been struck only in proof format. These eagles were struck from unfinished proof dies, showing a hybrid appearance. This piece is a couple of tiny field ticks away from perfection. NGC ID# 26MG, PCGS# 99942

17689 2008-W Quarter-Ounce Gold Buffalo, .9999 Fine, First Strike, MS70 PCGS. A one-year issue of the quarter-ounce Gold Buffalo, this piece representing the Burnished variety as opposed to the usual proof. First Strike representatives in MS70 PCGS are scarce. This piece is fully struck and pristine. Only 9,949 pieces were struck. NGC ID# 26XZ, PCGS# 399929 Base PCGS# 399928

17690 2008-W One-Ounce Gold Buffalo, .9999 Fine, MS70 NGC. The scarcer West Point issue, which comes from a mintage of only 9,074 pieces. This flawlessly preserved example displays a sharp strike and luminous yellow-gold mint luster. Highly sought-after in this top grade. NGC ID# 26RS, PCGS# 400037

17691 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS. This glimmering yellow-gold Prooflike example is fully struck and flawlessly preserved, showing deep reflectivity in the fields. The 2009 one-ounce gold Ultra High Relief is a popular modern bullion issue, elusive in MS70 Prooflike PCGS holders. NGC ID# 26S4, PCGS# 506602

17692 2009 One-Ounce Gold Ultra High Relief Twenty Dollar, David Hall, MS69 PCGS. Fully struck and Prooflike in a David Hall signature holder. PCGS reports only 35 non-First Strike Prooflike coins in the David Hall signature holders, including six in MS69 and 29 in MS70 (9/17). This piece is fully struck and thoroughly eye-appealing. PCGS# 596216 Base PCGS# 407404

S.S.C.A. RELIC GOLD MEDAL

17693 “1852” 2.5 Ounce 2009 Humbert Gold Restrike, PR65 Ultra Cameo NGC. Struck from “Pure California Gold” with the reverse inscription HUMBERT GOLD INGOT / COMMEMORATIVE 2009 / PURE CALIFORNIA GOLD / 2.5 OZ TROY 999.9 FINE. The design recalls that of the famous Kagitang “slug.” Profoundly contrasted and fully struck with deep orange-gold coloration. PCGS# 532930 Base PCGS# 10361

COINS OF HAWAII

17694 1847 Hawaii Cent MS63 Brown NGC. Medcalf 2CC-5. Plain 4. A plentiful variety, ideal for the type purposes. The I in AUPUNI and the W in HAWAII are recut. This Select Mint State example displays a sharp strike and satiny walnut-brown patina. Scattered light handling marks define the grade. NGC ID# 2C52, PCGS# 10965

17695 1847 Hawaii Cent MS62 Red and Brown PCGS. Medcalf 2CC-2. Crosslet 4, 15 Berries. The usual variety. This Uncirculated Hawaiian cent features copious original red color intermingled with steel-blue tones and scattered carbon spots. A number of abrasions are noted, including one above the left (facing) shoulder and another in the field below HANERI. NGC ID# 2C52, PCGS# 10966

**1847 Hawaii Cent, MS63 Red and Brown
Medcalf 2CC-2, Crosslet 4**

17696 1847 Hawaii Cent MS63 Red and Brown PCGS. CAC. Medcalf 2CC-2. The usually encountered variety features a Crosslet 4 and reverse berries arranged 7 x 8. The surfaces are mostly red with scattered daubs of steel-blue and violet coloration that enhance the eye appeal. Luminous luster issues from each side. The CAC sticker is entirely deserved. NGC ID# 2C52, PCGS# 10966

17697 1883 Hawaii Half Dollar MS63 PCGS. This well-struck Select example is brilliant and attractive with a pleasing cartwheel effect. Light abrasions define the grade but pose little distraction. Although 700,000 Hawaii half dollars were struck, many were later withdrawn and destroyed when Hawaii became a U.S. Territory. NGC ID# 2C5B, PCGS# 10991

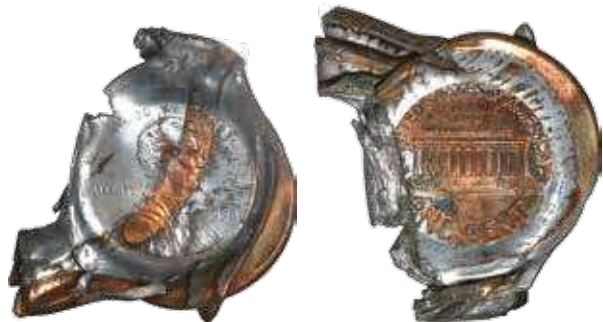

ERRORS

**1943 Cent, AU55
Struck on a Dime Planchet**

17698 1943 Cent — Struck on a Dime Planchet — AU55 PCGS. Struck on a dime planchet, smaller in diameter than a cent planchet, which results in a broadening of the details and loss of high-point definition. Grading must be done by the degree of remaining mint luster. The silver-gray surfaces show darker, russet accents surrounding the devices on each side. Of special interest to error specialists because of the increased interest in all 1943 cents struck in off-metal compositions.

**1998 Cent, MS65 Red
Struck on Bonded Planchets**

17699 1998 — Struck on Bonded Planchets — MS65 Red NGC. 5.5 gm. Two cent planchets were fed together between a die pair. The force of the strike bonded both coins together and squeezed metal out where the various die collars allowed (the press likely had multiple sets of die pairs). A spectacular error.

**1913 Type One Buffalo Nickel, MS63
Rotated Double Strike in Collar**

17700 1913 Type One Nickel — Rotated Double Strike in Collar — MS63 PCGS. Rotated 15-20 degrees between the first and second strikes. Much of the first strike was obliterated by the second strike, leaving mostly just a shadow of the first strike. Created when the coin was not ejected after the first strike, instead it rotated slightly before being struck a second time. Original gray patina. Sharply defined.

1919-S Nickel, Struck 10% Off Center, MS63

17701 1919-S Nickel — Struck 10% Off-Center — MS63 NGC. Satiny silver-gray luster shows hints of rose and champagne color throughout. The surfaces are devoid of major abrasions, and the central strike sharpness is relatively good for the 1919-S Buffalo nickel. This piece was struck from lightly worn dies, although heavy metal flowlines around the borders are mostly due to incomplete filling of the dies caused by the off-center strike. The 1919-S is a slightly better date in Mint State even without this intriguing Mint error.

**1961-D Half Dollar on a Cent Planchet
Uncirculated Details**

17702 1961-D Franklin Half Struck on a Cent Planchet — Damaged — NGC Details. Unc. 3.1 gm. A seldom-seen off-metal combination. Both the date and mintmark are fortuitously present, and the eagle and TRUST are also complete. Appropriately, the denomination is absent. The chocolate-brown surfaces are unworn but four small parallel marks are noted near the date and the reverse has a horizontal scratch on the right end of the bell post.
Ex: Long Beach Signature (Heritage, 5-6/2012), lot 4629, where it brought \$2,990.

**1978 Eisenhower Dollar, MS67
Struck 10% Off Center**

17703 1978 Eisenhower Dollar — Struck 10% Off Center — MS67 NGC. Error Eisenhower dollars are seldom seen and always of interest. This piece was struck off center with extra flan showing on the lower obverse / upper reverse. Additionally, the surfaces are exceptionally well-preserved with no distracting blemishes. Sharply struck throughout with softly frosted mint luster. Only four other (non-error) 1978 dollars have been certified this high by NGC, while PCGS has graded six as MS67 and none are finer at either service (9/17).

**2007 John Adams Plain Edge Dollar, MS66
Struck Seven Times, 40% Off Center**

17704 2007 Adams Dollar, Plain Edge — Struck Seven Times, Strikes 3 Through 7 40% Off Center — MS66 PCGS. The first error was the lack of edge lettering, making the coin worth a premium by itself. But this pales in comparison to the more significant and visible errors on this piece. Struck once, struck 40% off center six more times with almost no rotation between the first and seventh strikes. The bright golden manganese composition is mellowed and reddish in appearance on the last six strikes.

GSA DOLLARS

- 17705 1878-CC GSA MS65 NGC.** Bright cartwheel luster covers both sides of this Gem first-year dollar. The strike is complete, as always, and there are only the tiniest abrasions present. In the original black plastic holder and encased in a NGC banded slab. NGC ID# 253M, PCGS# 518845 Base PCGS# 7080
- 17706 1878-CC GSA MS64 Prooflike PCGS.** This impressive Choice example represents the first year of the Morgan design, with sharply detailed design elements and well-preserved brilliant surfaces and brightly reflective prooflike fields. The coin and its original black holder are encapsulated and certified by NGC. Population: 9 in 64 (1 in 64+) Prooflike, 1 finer (9/17). NGC ID# 253M, PCGS# 518846 Base PCGS# 7081
- 17707 1878-CC GSA MS64 Prooflike NGC.** A brilliant Carson City dollar that is fully struck with flashy, mirrored fields. The obverse field is well-preserved, and the reverse lacks mentionable marks. Accompanied by the original box of issue and card. NGC ID# 253M, PCGS# 518846 Base PCGS# 7081
- 17708 1880-CC GSA MS64+ Prooflike NGC. CAC.** Prooflike 1880-CC GSA dollars are scarce in MS64 and finer, and Deep Prooflike coins in these grades are extremely rare. This Plus-designated near-Gem Prooflike example displays a bold strike and frosty original luster on the devices. The fields are reflective and brilliant save for a band of rainbow toning that stretches along the left obverse border. There is a shallow strike-through on Liberty's forehead that should not be mistaken for an abrasion — abrasions are light and unobtrusive, barely preventing a Gem grade. Includes original box and COA. Census: 60 in 64 (3 in 64+) Prooflike, 23 finer (9/17). PCGS# 518852 Base PCGS# 7101
- 17709 1881-CC GSA MS66 NGC. VAM-3** is attributed by a "long interrupted horizontal die gouge" near the bow knot, as described by VAMworld.com. The present high grade GSA silver dollar is thoroughly lustrous and shows only a whisper of golden toning. Well struck and pleasing. The original black plastic GSA case has the NGC band around it. NGC ID# 2547, PCGS# 518863 Base PCGS# 7126
- 17710 1881-CC GSA MS66 ★ NGC.** During its 90 years of Treasury storage, this Carson City Morgan dollar had its reverse in contact with the canvas bag, and that side of the coin developed the gorgeous gold, blue, and iridescent toning that remains today. The obverse, without contacting the chemicals in the cloth bag, remained brilliant and untuned. This piece exhibits pristine surfaces, a bold strike, and frosty mint luster. NGC has only certified eight examples in MS66 ★, one in MS66+ ★, and just 35 numerically finer. NGC ID# 2547, PCGS# 518863 Base PCGS# 7126
- 17711 1881-CC GSA MS64 Prooflike NGC. VAM-2.** A few scattered marks appear on the untuned silver surfaces of this pleasing Choice Prooflike Mint State dollar that shows good field-to-device contrast. As usual, the reverse appears to be a couple points finer than the obverse. NGC ID# 2547, PCGS# 518864 Base PCGS# 7127
- 17712 1883-CC GSA MS66+ NGC. CAC.** The date is repunched, most noticeably within the upper loop of the first 8. This lustrous Carson City has a brilliant reverse, while the obverse displays autumn-gold, lime-green, and pearl-gray toning. The fields are uncommonly void of contact. In the original black plastic GSA holder and banded by NGC. NGC ID# 254S, PCGS# 518869 Base PCGS# 7144
- 17713 1883-CC GSA MS65 Deep Mirror Prooflike NGC.** This deeply mirrored, brilliant Gem GSA dollar displays stark white-on-black contrast and only a few light grazes to limit the grade. Although slightly weak in strike on the hair above Liberty's ear, this piece is otherwise well-defined. Eye appeal is pleasing. NGC ID# 254H, PCGS# 518871 Base PCGS# 97145

- 17714 1884-CC GSA MS66 Prooflike NGC.** This high-end GSA dollar displays deeply reflective fields and frosty, well-struck design elements. A few very light surface grazes appear on the obverse but are masked by amber, gold, and sea-green toning that covers much of that side. The reverse exhibits a blush of light golden color. NGC ID# 254M, PCGS# 518873 Base PCGS# 7153
- 17715 1885-CC GSA MS66 NGC.** High-grade 1885-CC dollars in original GSA holders are in high demand. NGC reports only 18 GSA coins numerically finer than the present, none of which are Prooflike or Deep Prooflike (9/17). This Premium Gem displays a bold strike and brilliant, frosty mint luster. No major abrasions are observed. NGC ID# 254M, PCGS# 518875 Base PCGS# 7160
- 17716 1885-CC GSA MS64 Deep Prooflike NGC.** Deep Prooflike 1885-CC dollars are seldom offered in original GSA holders, regardless of grade. This near-Gem example displays brilliant surfaces with considerable field-motif contrast. A few light abrasions determine the grade but are not overly distracting. The strike is sharp. Census: 42 in 64 (1 in 64 ★, 3 in 64+, 1 in 64+★) Deep Prooflike, 20 finer (9/17). NGC ID# 254M, PCGS# 518877 Base PCGS# 97161

LINCOLNIANA

- 17717 Lincoln Trial Impression in Lead. Uncertified.** A trial impression from a medal or embossing die, featuring a bust of Lincoln superimposed on an American shield with stars and stripes. Struck on a lead slab, approximately 1 and 7/8 inches square. The devices are well-detailed, with some light wear on the high points. Exonumia specialist Paul Cunningham notes this extremely rare (possibly unique) piece is unlisted in his series reference, *Lincoln's Metallic Imagery*.

U.S. MINT MEDAL

- 17718 1836 First Steam Coinage, Mar. 23 Over Feb. 22, Thin Planchet, Bronzed Copper, Julian-MT-21, MS66 NGC.** There are, in effect, two "original" strikings of the First Steam Coinage Mint Medal. The first striking was made to commemorate the historic event scheduled for Feb. 22, 1836. Identified as Julian-MT-20, it is so-dated for the February event. A mechanical problem delayed the first steam coinage until Mar. 23, 1836. The dies were subsequently modified to show the correct date, with traces of the former date visible beneath — especially visible at the R in MAR., which was struck over B. Remnants of a 2 beneath 3 in 23 are also evident. The present Premium Gem medal was struck from the original modified dies. It is a radiant and prooflike with exceptional chestnut-brown color and essentially flawless preservation. An obverse rim cud at 6 to 7 o'clock further confirms the originality. This original Mar. 23 over FEB. 22 medal is not to be confused with one of the 20th Century restrikes, which show no evidence of the underdate or obverse rim cud. PCGS# 514737

20TH CENTURY TOKENS AND MEDALS

- 17719 1976 Gold Bicentennial Medal MS67 Ultra Cameo NGC.** 33 mm. A scarce gold U.S. Mint medal, struck to commemorate the U.S. Bicentennial with an alloy of .900 fine gold. The obverse and reverse were designed by Chief Engraver Frank Gasparro and staff engraver Edgar Zell Steever, respectively. This variety of the medal had a distribution of 5,383 pieces and weighs 1.42 ounces.
- 17720 1776-Dated Libertas Americana, Gold, 2004 Restrike, 43g. PR67 Ultra Cameo NGC.** 40 mm. These restrikes were produced at the Paris Mint in 2004, and 1,776 pieces were manufactured. This is number 56 of 1,776. The famous Libertas Americana design is fully brought-up and struck in .999 fine gold. Each side features dramatic contrast resulting in jet-black fields and frosty devices. PCGS# 515264

INGOTS

1956-Dated Round Hallmark Silver Ingot San Francisco Mint, 18.45 Ounces

17721 1956 Round Hallmark San Francisco Silver Ingot. 18.45 Ounces. This ingot has a strong, even hallmark impression. The hallmark is centered at the top of the ingot, followed by ingot number 546 / 18.45 OZS / 999.75 FINE. The lot number 249 is found on the upper edge, one of the two lot numbers (the other being 164) that 1956 Round Dated ingots are found in. These were produced during the transition of the Type Two Oval Hallmark to the Round Dated Hallmark, as the ingot number range is included in both types. A well laid-out ingot and also original with medium gray patina over all sides. The ingot measures 57 x 90 mm.

Sheared Plate San Francisco Mint Silver Ingot 27.39 Ounces

17722 Undated (1955) Sheared Plate Silver Ingot, San Francisco Mint. 27.39 Ounces. Sheared plate ingots are among the scarcest of all silver ingots from the San Francisco mint. Produced for only a brief time in the early to mid-1950s, only 2,000 or so were ever made. These unusual ingots were cut from a larger plate of silver into the final size. They were intended for silver storage and exchange at their intrinsic value. As a result, most were melted. Most were hallmarked on both front and back sides, but this one only has the imprint on the front. This is a nicely laid out ingot with the hallmark centered at the top, followed by the ingot number 1700 / 27.39 OZS / 999.75 FINE. Medium gray patina with considerable underlying oil-slick iridescence. The piece measures 72 x 96 mm.

PROOF SET

17723 1941 Five-Piece Proof Set, PR64-66, Uncertified. Housed in a screw-type Capital holder, this five-piece 1941 proof set is well-matched with brilliant and lightly toned, deeply mirrored examples. Included are: **cent PR64**, peach-red color with fire-orange accents cover both sides; **nickel PR64**, a few delicate lines are visible with a glass as well as a tiny specks of carbon on the forehead; **dime PR65**, mostly brilliant; **quarter PR66**, all-brilliant and deeply reflective; and a **half dollar PR64**, nicely mirrored and just the faintest trace of toning is apparent. (Total: 5 coins)

End of Session Three

SESSION FOUR

GOLD DOLLARS

17724 1849 Open Wreath, D-4, Close Stars, MS64 PCGS. Frosty yellow-gold luster characterizes the eye appeal of this near-Gem 1849 Open Wreath gold dollar. The strike is weak on the lower left stars but sharp elsewhere. No major abrasions are seen. NGC ID# 25B9, PCGS# 521671 Base PCGS# 7502

17725 1849 Closed Wreath, D-5, Close Stars, MS63 PCGS. An attractive Select example from the first year of the denomination, this coin exhibits sharply detailed design elements and vivid orange-gold surfaces that show only minor signs of contact. Satiny mint luster adds to the considerable eye appeal. NGC ID# 25BA, PCGS# 521672 Base PCGS# 7503

17726 1850 MS64 PCGS. A popular second-year issue in the series, the 1850 claims a healthy mintage of 481,953 coins. The still-novel coins were clearly saved, and examples can be acquired through MS64. Coruscating luster flows over clean lemon-gold surfaces. All design elements are strongly rendered. Population: 41 in 64 (5 in 64+), 23 finer (8/17). NGC ID# 25BF, PCGS# 7509

1853 Gold Dollar, MS66
Exceptional Luster and Color

17727 1853 MS66 PCGS. Frosty orange-gold mint luster gives this glittering Premium Gem gold dollar magnificent eye appeal. The strike is full, and neither side exhibits distracting abrasions. A few tiny die cracks are seen at the obverse periphery. The 1853 is a popular type coin but is elusive in MS66 and rarely seen finer. Population: 63 in 66 (8 in 66+), 12 finer (9/17). NGC ID# 25BU, PCGS# 7521

1853 Gold Dollar, MS66
High-End Type Coin

17728 1853 MS66 NGC. Coming from a mintage of more than 4 million pieces, the 1853 gold dollar is a popular type coin. Nonetheless, it is conditionally scarce in MS66 and rare in MS67. This frosty Premium Gem displays needle-sharp detail and original orange-gold luster. A luminous cartwheel effect reveals no distractions. Census: 41 in 66 (1 in 66+), 9 finer (9/17). NGC ID# 25BU, PCGS# 7521

17729 1854 Type Two MS61 NGC. There is a touch of strike weakness on the highest hair curls, but the reverse is well-defined. Both sides are satiny and bright with yellow-gold luster. The fields show a blend of die polishing lines (mint-made) and handling marks, the latter limiting the grade. A collectible Type Two gold dollar. NGC ID# 25C3, PCGS# 7531

17730 1855-O AU53 PCGS. Variety 2. The usual lapped die state with familiar weakness on the 8 in the date even while the remaining numerals are bold. This About Uncirculated 1855-O gold dollar represents the only Type Two issue from this mint. A mintage of 55,000 pieces was accomplished. This piece is well-detailed and partially lustrous with original orange- and olive-gold coloration. NGC ID# 25C7, PCGS# 7535

17731 1856 Slanted 5 MS64+ PCGS. CAC. The year 1856 represents the inaugural issue of the Type Three design. This variety is more accessible than its Upright 5 cousin. Each side presents strong devices and frosted mint luster over delightful yellow-gold surfaces. NGC ID# 25CB, PCGS# 7540

17732 1856 Slanted 5 MS65 PCGS. The 1856 gold dollar with a Slanted 5 in the date is seen more often than its Upright 5 counterpart, but the issue is rare at the MS65 grade level. This well-detailed Gem exhibits some dramatic clash marks on the reverse, but the lustrous, orange-gold surfaces are well-preserved throughout. Population: 22 in 65 (2 in 65+), 15 finer (9/17). NGC ID# 25CB, PCGS# 7540

1868 Gold Dollar, Prooflike MS64
Conditionally Rare

17733 1868 MS64 PCGS. CAC. The 1868 comes from a Reconstruction-era mintage of only 10,500 pieces, from which Mint State survivors are generally scarce and are rare above MS63. This CAC-approved near-Gem is well-struck and prooflike, displaying stark cameo contrast on the obverse. Warm honey-gold coloration adds to the eye appeal. Population: 15 in 64, 17 finer. CAC: 5 in 64, 6 finer (10/17).

17734 1870 MS64 PCGS. The 1870 gold dollar is a better date in Uncirculated condition, but it is collectible in MS64. This near-Gem is satiny and well-struck with some die lapping visible on the reverse. A few light abrasions define the grade. Population: 28 in 64 (2 in 64+), 26 finer (9/17). NGC ID# 25D6, PCGS# 7569

17735 1873 Closed 3 MS61 NGC. The Closed 3 variety is significantly rarer than the Open 3 issue, scarce in all Mint State grades. This piece is well-struck and satiny with apricot-gold luster. Light handling marks limit the grade, but none are individually obtrusive. Census: 27 in 61, 45 finer (9/17). NGC ID# 25DA, PCGS# 7574

**1881 Gold Dollar, MS67
Shimmering Peach-Gold Example**

17736 1881 MS67 PCGS. With a tiny mintage of 7,620 coins and a high survival rate, the 1881 gold dollar has the distinction of being both highly collectible and relatively affordable in the upper levels of Mint State. Strike detail is complete on the headdress, curls, and wreath elements. Shimmering luster over near-flawless peach-gold surfaces accounts for this Superb Gem's excellent eye appeal. NGC ID# 25DK, PCGS# 7582

17737 1882 MS64 PCGS. CAC. Both sides of this lovely near-Gem exhibit warm red-gold coloration and complete strike detail. A hint of semiprooflikeness is typical for the low-mintage 1882 gold dollar (5,000 coins struck). The surfaces are undeniably clean for the grade. NGC ID# 25DL, PCGS# 7583

17738 1887 MS66 PCGS. A sensational Premium Gem, this late-issue gold dollar has brilliant yellow-gold surfaces with a hint of delicate rose toning. Finer examples of this date are conditionally scarce. Population: 73 in 66 (2 in 66+), 31 finer (9/17).
Ex: *Long Beach Signature (Heritage, 6/2015)*, lot 5165. NGC ID# 25DS, PCGS# 7588

17739 1887 MS64 Prooflike NGC. CAC. A fully struck near-Gem from a fresh die pair, showing deeply reflective fields and frosty motifs. Orange-gold and pale yellow hues include tinges of delicate rose on each side. No distracting abrasions are seen. Census: 8 in 64 Prooflike, 12 finer; 1 in 64 Deep Prooflike, 2 finer (9/17). NGC ID# 25DS, PCGS# 77588

CLASSIC QUARTER EAGLES

17740 1834 AU53 PCGS. CAC. Variety 3. This is the scarcest of four known die varieties of 1834 Classic Head quarter eagles. The obverse has the Large Head that Breen called the "Booby Head" for unknown reasons. The reverse has AM closely spaced with the M perfectly formed. A short die crack connects the left (facing) wing to the border. A pleasing example, this quarter eagle exhibits partially lustrous green-gold surfaces with trivial handling marks. NGC ID# 25FS, PCGS# 7692

17741 1834 AU58 PCGS. Breen-6140, Variety 3, R.4. This is a bright yellow-gold example with little discernible wear. Some minor strike weakness occurs on the highest hair curls and the central shield. The fields show prooflike mirroring where not muted by light friction, which accounts for the AU58 grade. Scattered light marks do not detract. NGC ID# 25FS, PCGS# 7692

17742 1836 Block 8 AU55 PCGS. Breen-6144, Variety 15, R.2. Some luster remains in the fields amid warm orange-gold patina, giving this Choice AU Classic Head type coin pleasing eye appeal. Other than a faint graze in the field near Liberty's forehead, the surfaces are problem-free. Some minor strike weakness occurs at the centers, as usual. NGC ID# 25FU, PCGS# 97694

**1838 Quarter Eagle, AU58
Vibrant Near-Mint Piece**

17743 1838 AU58 NGC. Breen-6146, Variety 19, R.2. The 1838 quarter eagles feature a slightly modified design with a more attractive layout than earlier issues of the Classic Head type. All were struck by a single die pair. Scattered abrasions and just a hint of rub over the high points are all that keep this from the Uncirculated category. The coin's bright surfaces are mellowed slightly by orange-gold toning that bespeaks originality. Census: 49 in 58, 65 finer (9/17). NGC ID# 25FY, PCGS# 7696

17744 1838-C — Ex-Jewelry — PCGS Genuine. XF Detail. Variety 20. Only slight evidence of the ex-jewelry history is visible on the surfaces of this , although we note associated cleaning and a bit of granularity as a result. Pleasing greenish-gold color remains, as does sharp definition on the devices. A small indentation on the cheekbone is noted, one of the unusual characteristics of the 1838-C. As always, the mintmark is boldly repunched.
Ex: *The Pevehouse & Davis Collections (ANR, 10/2004)*, lot 702.

17745 1839-C — Cleaning — PCGS Genuine. XF Details. Breen-6150, Winter-2, Variety 22, R.4. The 39 in the date are boldly recut on this variety. The orange-gold surfaces are unnaturally bright from an old cleaning, although the surfaces are otherwise normal for the issue, showing scattered abrasions and light high-point wear. Some strike weakness is seen on the stars and the left shield corner.

LIBERTY QUARTER EAGLES

17746 1843-C Small Date, Crosslet 4, Variety 1 — Tooled — PCGS Genuine. AU Details. Regarded as the rarest Charlotte quarter eagle issue, the 1843-C Small Date has a reported mintage of just 2,988 pieces. This well-defined and moderately hairlined honey-gold example shows coarse tooling near the denomination, fletchings, and left (facing) wing.

17747 1843-O Large Date, Plain 4 AU55 NGC. Variety 1. There is only one die variety known for the Large Date coins, and the variety is quickly identified from the Plain 4 in the date that lacks serifs on its crossbar. In comparison, the more plentiful Small Date variety has a Crosslet 4, with seven die varieties identified. This Choice AU piece shows some evidence of strike weakness. The light yellow surfaces exhibit a few trivial marks, with considerable remaining mint luster. Census: 22 in 55, 58 finer (9/17). NGC ID# 25GS, PCGS# 7732

17748 1844-C — Harshly Cleaned — NGC Details. AU. Variety 1. Olive-green and apricot-gold surfaces are hairlined but lack any mentionable marks. The strike is typical for the Charlotte facility. A challenging Southern gold issue, since only 11,622 pieces were issued.

17749 1846-D VF30 PCGS. Variety 8-M. Of the five varieties known for the 1846-D, Variety 8-M is the rarest. This is an evenly worn example with verdigris around the devices. Rich reddish-gold color and relatively clean surfaces. NGC ID# 25H3, PCGS# 7742

**1846-D/D Quarter Eagle, AU55
Widely Repunched Mintmark**

- 17750 1846-D/D AU55 NGC. Variety 7-L.** The mintmark is widely repunched on this variety, although in the late die state of the present coin, only the lower serif of the secondary D is still visible, above the 1 in 1/2. Little wear is present and the strike is bold. Semiprooflike fields complement bright yellow-gold coloration. Only minor abrasions are present on each side. NGC ID# 25H3, PCGS# 97742

**1847-C Two and a Half, AU55
Original Olive-Gold Patina**

- 17751 1847-C AU55 NGC. Variety 1.** The 1847-C quarter eagle is generally considered available in the context of Charlotte quarter eagles, although high-grade examples with original patina are decidedly scarce and highly sought-after specialists. This Choice AU representative displays original olive-gold patina and limited surface abrasions. Slight strike weakness is seen on the central eagle, as usual. NGC ID# 25H6, PCGS# 7745

- 17752 1848 AU53 PCGS.** Based on 130 grading events at PCGS and NGC, an approximate survival estimate for the 1848 quarter eagle would be 150 pieces or roughly 2% to 3% of the 6,500 coins struck. The devices are well-detailed with slight merging over the high points. Lightly abraded yellow-gold surfaces. Population: 8 in 53, 28 finer (9/17). NGC ID# 25H9, PCGS# 7748

- 17753 1849-C XF40 NGC. CAC. Variety 1.** A mintage of 10,220 coins helps explain the issue's scarcity across all grade levels. Winter estimates 125 to 150 pieces survive. This XF40 representative maintains strong detail for the facility and gorgeous reddish-gold surfaces. An original example within reach of most specialists. NGC ID# 7HRT, PCGS# 7753

- 17754 1853 MS64 PCGS.** Shimmering, original wheat-gold mint luster gives this near-Gem type coin outstanding eye appeal. Neither side exhibits distracting abrasions, although the eagle's left (facing) leg shows the usual strike weakness for that area. Finer 1853 quarter eagles are rarely offered. Population: 83 in 64 (3 in 64+), 10 finer (10/17). NGC ID# 25HV, PCGS# 7767

- 17755 1853 MS64+ PCGS. CAC.** The 1853 is a popular type coin, available through MS63 and only marginally scarce in MS64. Nonetheless, it is conditionally rare in better grades. This Plus-designated CAC coin offers shimmering yellow-gold luster and well-preserved surfaces. Some strike weakness is seen on the eagle's left (facing) leg. Population: 83 in 64 (3 in 64+), 10 finer. CAC: 18 in 64, 5 finer (10/17). NGC ID# 25HV, PCGS# 7767

- 17756 1855 MS63 PCGS.** The obverse design elements of this attractive Select specimen are sharply detailed, but a touch of the usual softness is evident on the eagle's leg and claws. The lightly marked orange-gold surfaces exhibit vibrant satiny mint luster throughout. Population: 29 in 63, 24 finer (9/17). NGC ID# 25J4, PCGS# 7774

- 17757 1856 MS63 PCGS.** The obverse design elements of this impressive Select example are sharply detailed, but a touch of the usual softness shows on the central reverse. The lightly marked orange-gold surfaces retain significant amounts of satiny mint luster. Population: 41 in 63 (1 in 63+), 36 finer (9/17). NGC ID# 25J7, PCGS# 7777

- 17758 1856-S AU55 NGC.** A fairly substantial mintage for the period of 72,120 coins fails to translate into availability for the 1856-S quarter eagle. This date is scarce in AU grades and rare at the Mint State level. Each side displays bold design elements with slight high-point wear. The orange-gold surfaces reveal partial luster remaining in the protected areas. NGC ID# 25KL, PCGS# 7781

**1859-S Quarter Eagle, AU58
A Rarity in High Grades**

- 17759 1859-S AU58 NGC.** The mintage for the 1859-S is considerably lower than its two S-mint predecessors. Only 15,200 pieces were struck, and the issue circulated extensively. Mint or nearly Uncirculated survivors are truly rare. All devices are strongly rendered with trivial friction. Light marks are scattered over bright yellow-gold surfaces with much frosty luster that remains. Census: 27 in 58 (1 in 58+), 8 finer (9/17). NGC ID# 25JN, PCGS# 7790

**1860 Quarter Eagle, AU58
Rare Old Reverse Type**

- 17760 1860 Old Reverse, Type One, AU58 NGC.** The large arrowheads and oval O in OF distinguish the scarcer Old Reverse type from its more often seen New Reverse cousin. NGC and PCGS report 33 grading events apiece with possibly as few as 50 Type One examples extant. Luster remains on each side, featuring bright peach-gold color and a scattering of field marks. The overall impression is crisp, and there is minimal rub preventing a full Mint State grade. NGC ID# 25JR, PCGS# 97791

- 17761 1860-C — Surfaces Smoothed — PCGS Genuine. XF Details. Variety 1.** The 1860-C is the final quarter eagle from the Charlotte Mint. Examples are scarce in all grades with fewer than 205 pieces believed known, per Doug Winter. This lightly circulated coin displays unusually well-defined details but with bright yellow-gold patina that indicates a light cleaning.

17762 1860-S AU58 PCGS. This well-struck near-Mint example displays original olive-gold patina with hints of luster in the fields. The surfaces are surprisingly smooth with no obtrusive abrasions. Only slight high-point friction is observed. The 1860-S quarter eagle is a rarity in the upper AU and Mint State grades. Population: 12 in 58, 13 finer (10/17). NGC ID# 7FRV, PCGS# 7793

17763 1862 AU55 NGC. As a Philadelphia issue, the 1862 quarter eagle is somewhat overlooked with regards to its high-grade scarcity. This Choice AU coin is at a collectible grade level with some luster remaining in the fields. Satiny bronze-gold surfaces offer pleasing design definition and exhibit few abrasions. NGC ID# 25JZ, PCGS# 7796

17764 1862 AU58 NGC. The design elements of this attractive near-Mint specimen are sharply struck and the lustrous yellow and orange-gold surfaces are only lightly abraded. A scarce lower mintage issue. Census: 62 in 58, 60 finer (9/17). NGC ID# 25JZ, PCGS# 7796

17765 1862 AU58 PCGS. Lightly abraded across the obverse but with nearly intact luster. This elusive Civil War date is seldom found as fine as this yellow-gold near-Mint survivor. Population: 28 in 58 (1 in 58+), 40 finer (9/17).
Ex: *FUN Signature (Heritage, 1/2010), lot 9155; Long Beach Signature (Heritage, 6/2010), lot 1527.* NGC ID# 25JZ, PCGS# 7796

17766 1867-S AU55 NGC. A low mintage of only 28,000 pieces assures the continued popularity of the 1867-S quarter eagle. Also, few examples are known finer than Choice AU. This is a pleasing piece with the usual softness in the centers. Minimally abraded. Census: 24 in 55, 33 finer (9/17). NGC ID# 7JRX, PCGS# 7806

1869-S Quarter Eagle, MS61 Very Rare in Uncirculated Condition

17767 1869-S MS61 PCGS. Of the 225 estimated 1869-S quarter eagles extant (29,500 coins struck), perhaps 10 to 20 distinct examples survive in mint condition. This is one of them. The stars, date, wing feathers, and olive leaves are fully defined, while the middle curls, fletchings, and talons are moderately soft. A mix of warm yellow-gold and deeper reddish tinged hues combine over the lustrous, lightly abraded surfaces. One linear mark left of the nose is mentioned for accuracy. Population: 10 in 61, 9 finer (9/17). NGC ID# 25KE, PCGS# 7810

17768 1874 MS61 NGC. Deep reddish-gold hues color each side of this Uncirculated 1874 quarter eagle — one of only 3,920 examples produced. As expected for such a low-mintage issue, the surfaces display a hint of semiprooflikeness and pinpoint detail. Census: 19 in 61, 5 finer (9/17). NGC ID# 7JS4, PCGS# 7821

17769 1876 AU58 PCGS. The well-detailed design elements of this attractive near-Mint specimen show just a trace of wear on the high points, and the lightly abraded, lemon-yellow surfaces retain much of their original mint luster. Population: 10 in 58, 16 finer (9/17). NGC ID# 7JS6, PCGS# 7824

17770 1876-S AU58 NGC. CAC. The 1876-S claims the second-lowest mintage among S-mint quarter eagles after the ultra-rare 1854-S. This pleasing near-Mint example delivers great eye appeal with luminous frost over peach-gold surfaces. The upper stars and wing feathers are sharp. Census: 47 in 58 (1 in 58+), 23 finer. CAC: 4 in 58, 3 finer (8/17). NGC ID# 7JS6, PCGS# 7825

17771 1879-S MS61 NGC. The S-mint struck 43,500 quarter eagles in 1879, but most of them circulated. Mint State survivors are rare. This bright MS61 representative is fully struck and surprisingly appealing for the grade. Underrated this fine. Census: 10 in 61, 7 finer (9/17). NGC ID# 25L3, PCGS# 7831

1880 Quarter Eagle, MS62 Prooflike Only 2,960 Pieces Struck

17772 1880 MS62 Prooflike NGC. Only 2,960 circulation strikes were produced of the 1880 quarter eagle. That mintage is so small that it is probable that the initial die polish never diminished, even on the final coin struck. This is a brightly reflective example that also has even reddish-gold color and fully struck devices. Census: 1 in 62 Prooflike, 1 finer (9/17). NGC ID# 25L4, PCGS# 77832

1894 Two and a Half, MS64 Elusive Any Finer

17773 1894 MS64 PCGS. This satiny wheat-gold example displays bold design elements and mostly unmarked surfaces. The coloration is original. Philadelphia quarter eagles of 1894 are usually available through MS64, although they are scarce in this near-Gem grade; finer coins are rare. Population: 29 in 64 (4 in 64+), 22 finer (9/17). NGC ID# 25LJ, PCGS# 7846

17774 1897 MS65 PCGS. A sensational Gem with frosty light yellow luster, lovely pinkish-orange toning, and bold design features on both sides. Relatively plentiful as a date, despite a mintage of only 29,700 coins, this is an excellent candidate for a type collector who prefers low-mintage issues at little or no premium. NGC ID# 25LM, PCGS# 7849

17775 1897 MS65 NGC. CAC. Smooth peach-gold surfaces are minimally marked and display frost luster. Sharply struck throughout. Original and eye-appealing. CAC: 23 in 65, 19 finer (10/17). NGC ID# 25LM, PCGS# 7849

17776 1902 MS66 PCGS. This frosty Liberty Head type coin displays a sharp strike and original wheat-gold luster with no distracting abrasions. The 1902 is a plentiful issue through MS66 but is scarce in finer grades. This piece will appeal to collectors seeking exceptional quality for the grade. NGC ID# 25LT, PCGS# 7854

1902 Quarter Eagle, MS67
Only One Coin Finer at PCGS

17777 1902 MS67 PCGS. This frosty Superb Gem displays sharp design elements and unabraded surfaces. The coloration is predominantly wheat-gold — a delicate blend of prairie-gold and subtle greenish hues reminiscent of harvest-ready wheat. Eye appeal is outstanding. The 1902 quarter eagle is scarce in this grade and genuinely rare any finer. Population: 53 in 67 (4 in 67+), 1 finer (10/17). NGC ID# 25LT, PCGS# 7854

17778 1903 MS67 PCGS. An extraordinary Superb Gem, with razor-sharp definition on all design elements and virtually pristine orange-gold surfaces. Vibrant mint luster adds to the tremendous eye appeal. Population: 88 in 67 (5 in 67+), 1 finer (9/17). NGC ID# 2688, PCGS# 7855

17779 1905 MS66 PCGS. The 1905 Liberty quarter eagle is an available date in lower Mint State grades, but examples in MS66 condition are somewhat scarce. The present coin is an attractive Premium Gem with razor-sharp details on all design elements. The surfaces are delightful yellow-gold with rose highlights and vibrant mint luster. This coin possesses outstanding visual appeal. NGC ID# 267S, PCGS# 7857

17780 1906 MS66 PCGS. Sharply struck with remarkably clean yellow-gold surfaces and soft mint luster. A couple of shallow nicks near the center of the obverse are only discernible with the aid of a loupe. Ex: *Houston Signature* (Heritage, 12/2014), lot 4506. NGC ID# 7JW8, PCGS# 7858

INDIAN QUARTER EAGLES

17781 1908 MS65 NGC. Lime and peach tones interchange throughout this original and impressively preserved first-year Gem. Only a couple of inconsequential ticks on the portrait preclude a finer designation. The strike is exquisite aside from the customary minor incompleteness on the lowest headdress feathers. NGC ID# 288Y, PCGS# 7939

17782 1908 MS65 PCGS. From a first-year mintage of 564,800 pieces, the 1908 Indian quarter eagle is an available issue in MS65 condition, but finer coins are scarce. This attractive Gem displays well-preserved orange-gold surfaces, with satiny mint luster and well-detailed design elements. NGC ID# 288Y, PCGS# 7939

17783 1909 MS64 PCGS. This well-detailed Choice specimen shows just a touch of the usual softness on the eagle's shoulder, but the headdress feathers are especially sharp. The pleasing yellow and greenish-gold surfaces are lustrous and lightly marked. NGC ID# 288Z, PCGS# 7940

17784 1909 MS64 NGC. This Choice Indian quarter eagle is sharply defined throughout, with well-preserved lemon-yellow surfaces and vibrant mint luster on both sides. Overall visual appeal is outstanding. From a mintage of 441,700 pieces. NGC ID# 288Z, PCGS# 7940

17785 1909 MS64+ PCGS. This is a sharply struck Indian quarter eagle, showing original wheat-gold luster and frosty surfaces. A few field grazes are not distracting. The availability of the 1909 in MS64 makes it a popular choice for type purposes, and this example has the added appeal of a Plus designation. NGC ID# 288Z, PCGS# 7940

17786 1911 MS64 NGC. This is a Choice, flaxen-gold 1911 example with smooth, minimally marked fields and sharply impressed incuse devices. Sharp feather detail exists on both sides — the headdress on the obverse, and the eagle's shoulder plumage on the reverse. Relatively few pieces are any finer. NGC ID# 7KR6, PCGS# 7942

17787 1911 MS64+ PCGS. CAC. A moderately well-struck Philadelphia type coin with frosty straw-gold luster and minimal abrasions. The 1911 quarter eagle is available in this grade but becomes more challenging in better grades, where the population thins. The Plus designation and CAC green label of the present example are an attractive combination. NGC ID# 7KR6, PCGS# 7942

17788 1911 MS64+ PCGS. CAC. Were it not for a few faint grazes in the left obverse field, this high-end Choice 1911 quarter eagle might have received a full MS65 grade from PCGS. As it stands, this CAC-approved, Plus-graded coin is among the finest near-Gems we have handled. The strike is solid, and the satiny yellow-gold surfaces present pleasing visual appeal. NGC ID# 7KR6, PCGS# 7942

17789 1911-D — Damage — PCGS Genuine. XF Details. Designated a Strong D coin by PCGS with a bold mintmark. This piece shows light repair work on the headdress feathers with hairlines overall from a cleaning. Brass-gold patina shows no other detractions, and the design elements are well-defined.

17790 1911-D — Mount Removed — NGC Details. AU. Once mounted with evidence remaining on the obverse at 11 o'clock, the opposing reverse at 7 o'clock, and on the edge between. As usual for former jewelry pieces, this wheat-gold example has light evidence of cleaning on both sides. The mintmark is weak but completely visible.

1911-D Quarter Eagle, AU55
Bold Mintmark

17791 1911-D Strong D AU55 PCGS. The 1911-D Indian quarter eagle is the key to the entire series, with a low mintage of only 55,680 pieces. This Choice About Uncirculated example has just a bit of wear on the top of the cheek, with marks that are not worthy of mention. The coloration is exactly what one wants to see: a deep yellow with hints of orange underneath. The all-important D mintmark is distinct. An attractive choice. NGC ID# 7KR7, PCGS# 7943

17792 1912 MS64 PCGS. The 1912 Indian quarter eagle is usually available in MS64 condition, but finer examples are very scarce. This attractive Choice example offers sharply detailed design elements and lustrous, lightly marked orange-gold surfaces. NGC ID# 7KR8, PCGS# 7944

17793 1913 MS64 NGC. Appealing and original straw-gold toning displays bright mint luster, and the absence of any significant marks argues for an even finer grade. As it is, the Choice surfaces are sharply struck with hints of olive overtones that add aesthetic charm. While not rare, the 1913 is seldom seen any finer than this outstanding example. NGC ID# 7KR9, PCGS# 7945

1913 Quarter Eagle, Pinpoint Gem

17794 1913 MS65 PCGS. The 1913 is a top-tier condition rarity in MS65 condition or finer. Most examples are exceedingly sharp with medium orange or deep yellow-gold coloration. That description perfectly matches this Gem representative. The headdress and eagle's feathers are pinpoint-sharp, and frosty luster issues from each side. The cheek and fields are clean. PCGS reports only nine finer submissions (8/17). NGC ID# 7KR9, PCGS# 7945

17795 1914 MS63 PCGS. This Select Mint State 1914 Indian quarter eagle is housed in a green-label PCGS holder. The pleasing surfaces exhibit full light yellow luster with splashes of orange and blue overtones on each side. A few small marks on the Indian's cheek prevent a higher grade. NGC ID# 7KRA, PCGS# 7946

17796 1914-D MS64 PCGS. Satiny orange-gold luster gives this original near-Gem excellent visual appeal, revealing only a few light field marks under a loupe. Slight strike weakness occurs on the lower headdress feathers, but the design is otherwise well brought up. Finer examples are scarce. NGC ID# 2899, PCGS# 7947

17797 1914-D MS64 PCGS. The 1914-D Indian quarter eagle is an elusive issue in higher grades. This attractive Choice specimen displays well-preserved canary yellow surfaces, with vibrant mint luster and well-detailed design elements. PCGS has graded 51 numerically finer examples (9/17). NGC ID# 2899, PCGS# 7947

17798 1914-D MS64 NGC. In Gem grade the 1914-D is the key to the Indian Head series, although the 1911-D is the key overall in any grade. This near-Gem 1914-D boasts lovely golden-yellow color and lacks mentionable marks. An inner rim runs through portions of the reverse, a common trait among Indian Head mintmarked coins of this era. Seldom offered in better condition. NGC ID# 2899, PCGS# 7947

17799 1914-D MS64 NGC. The 1914-D Indian quarter eagle is very scarce in grades above MS64. This impressive Choice specimen offers sharply detailed design elements and lustrous reddish-gold surfaces, with a few minor contact marks on both sides. NGC has graded 47 numerically finer examples (9/17). NGC ID# 2899, PCGS# 7947

1914-D Quarter Eagle, MS64+ A High-End Example

17800 1914-D MS64+ PCGS. CAC. A well-struck, boldly detailed near-Gem with a Plus designation and CAC green label. The mintmark is clear, although its definition is hindered by minor die fatigue at the borders. No major abrasions serve to distract from the outstanding visual appeal. Higher-grade 1914-D quarter eagles are major series rarities. NGC ID# 2899, PCGS# 7947

17801 1915 MS64+ PCGS. CAC. This high-end near-Gem is sharply struck and lustrous with original wheat-gold surfaces. A few light field marks limit the grade, but the obverse especially is highly appealing. The 1915 is a suitable type coin, although it is elusive in Gem and finer grades. NGC ID# 7KRC, PCGS# 7948

1929 Quarter Eagle, MS65 Frosty Final-Year Example

17802 1929 MS65 PCGS. CAC. Allan Schein notes: "Last year of the Indian Quarter Eagle production, and scarcest of the short set in Gem MS-65 or better." The 1929 comes strongly struck, and this example is no exception. The eagle's shoulder and talons are notably sharp. Exposed orange-gold surfaces display remarkably few field marks. PCGS reports five finer submissions. CAC: 13 in 65, 0 finer (9/17). NGC ID# 289F, PCGS# 7953

THREE DOLLAR GOLD PIECES

17803 1854 AU58 NGC. The large mintage ensured that the 1854 three dollar would be available to collectors throughout the life of the series. This is a near-Mint example that displays generous portions of remaining mint luster, especially surrounding the devices. One mark between STATES OF merits attention. NGC ID# 25M3, PCGS# 7969

1854 Three Dollar, MS63 Strong Introductory-Year Example

17804 1854 MS63 PCGS. Demand for this first-year issue is always strong. Thankfully, a mintage of 138,618 coins allows most collectors to obtain an example of the 1854 if they so desire. This Select three dollar gold piece showcases full strike definition on the curls, headdress, and wreath, including the ribbon bow. Warm, shimmering luster glows from rich yellow-gold surfaces. Small ticks and wispy marks are far less distracting than expected. NGC ID# 25M3, PCGS# 7969

1854-O Three Dollar, AU50
Only New Orleans Issue of the Denomination

- 17805 1854-O AU50 PCGS. Variety 2.** The only New Orleans issue of the three dollar gold series. While the strike may appear weak, it is actually quite bold, but from cracked dies that have been heavily lapped. The yellow-gold color is pleasing and, while some reverse marks are noted, the coin lacks any significant problems. PCGS has graded only two pieces in Mint State, making About Uncirculated examples an attractive option (9/17). NGC ID# 25M5, PCGS# 7971

1854-O Three Dollar Gold, AU50
Single New Orleans Issue

- 17806 1854-O AU50 NGC. Variety 2, lapped reverse.** The 1854-O is popular as the only New Orleans issue in the series, although it is also a better date overall with a mintage of only 24,000 pieces, which circulated extensively. This AU example shows medium green-gold surfaces with light high-point wear. The fields are mostly smooth and appealing. NGC ID# 25M5, PCGS# 7971

1854-O Gold Three Dollar Piece, AU53
Popular Southern Branch Mint Issue

- 17807 1854-O AU53 NGC. Variety 2.** The reverse is lapped, and a die crack appears along the lower wreath and through the mintmark. This brass-gold AU example displays excellent detail with the usual lightly marked surfaces. Some deep violet toning appears on the highest points of the Liberty portrait in harmony with localized minor wear. NGC ID# 25M5, PCGS# 7971

- 17808 1857-S XF45 PCGS.** One of the few branch mint issues in the three dollar gold series. This Choice XF 1857-S displays medium yellow-gold surfaces and bold detail. Light handling marks and high-point wear are not obtrusive. Population: 34 in 45, 60 finer (9/17). NGC ID# 7K5H, PCGS# 7977

- 17809 1859 AU58 NGC.** A production of 15,558 might suggest the 1859 is far more available than its late-date, low-mintage counterparts, but such is not the case. Bright yellow-gold surfaces maintain bold detail. Small marks are mainly confined to the centers. NGC ID# 7K5K, PCGS# 7979

1860 Three Dollar Gold, AU58
Smooth and Appealing Surfaces

- 17810 1860 AU58 PCGS.** Satiny orange-gold surfaces display smooth, lustrous patina and sharp detail. Under a loupe, slight high-point friction is seen over the most elevated hair curls and wreath leaves, accompanied in those places by a hint of olive toning, attesting to the originality of the surfaces. No abrasions distract. The 1860 is a scarce date in Uncirculated condition, being highly popular in the upper AU levels for affordability's sake. NGC ID# 25ME, PCGS# 7980

- 17811 1861 VF20 PCGS.** A collectible, low-mintage Civil War date in a seldom seen sub-XF grade level. Moderate wear appears on each side, but the medium straw-gold surfaces and coloration are original. Each side is smooth and problem-free. Only 5,959 pieces were struck. NGC ID# 7K5N, PCGS# 7982

- 17812 1861 XF40 PCGS.** The 1861 three dollar gold piece claims a mintage of just 5,959 pieces, making the date scarce in all grades. This lightly worn XF specimen retains a surprising amount of mint luster. Bold design elements reside amid lightly marked yellow-gold surfaces. NGC ID# 7K5N, PCGS# 7982

- 17813 1862 — Cleaning — PCGS Genuine. AU Details.** The 1862 three dollar gold piece comes from a mintage of only 5,750 coins, although this pre-Civil War issue was not saved in the large quantities as those from the 1880s. The present example displays good detail and bright yellow-gold color. Prominent hairlines on each side confirm the cleaning noted by PCGS.

1862 Gold Three Dollar, AU53
Pleasing for the Grade

- 17814 1862 AU53 PCGS.** The 1862 three dollar gold piece is a better date in high grade, coming from a mintage of only 5,750 coins. The present AU example is well-struck from dies that show mint-made striations in the fields. Original straw-gold luster remains in the protected regions. A few marks near Liberty's chin are the only abrasions of note. NGC ID# 7K5P, PCGS# 7983

17815 1865 — Filed Rims — PCGS Genuine. AU Detail. The low mintage of only 1,140 pieces is a consistent draw for the 1865 three dollar. Just the slightest friction is evident; otherwise clean, reddish-gold surfaces. The rim filing is apparent only when closely examined.

17816 1866 AU53 PCGS. An attractive AU53 specimen, from a mintage of 4,000 pieces, this coin exhibits only light wear on the well-detailed design elements, and the lightly abraded orange-gold surfaces retain a few traces of original mint luster. NGC ID# 25MM, PCGS# 7987

17817 1870 — Cleaning — PCGS Genuine. AU Details. This bright, medium-gold 1870 is a later strike from a mintage of just 3,500 pieces. A bulge at the wreath apex confirms the relatively late impression. A sharp strike remains on the smooth, partially reflective surfaces, now lightly hairlined from an old cleaning.

17818 1871 AU50 NGC. A paltry total of 1,300 coins made up the entire production of three dollar gold coins in 1871. This lightly circulated orange-gold piece shows wispy abrasions and strong strike detail, including the central reverse and wreath elements. NGC ID# 25MU, PCGS# 7993

17819 1874 AU58 NGC. Hints of frosty orange-gold luster emerge from the protected regions of the fields on this near-Mint type coin, complementing medium olive-gold patina over the lightly worn areas. The strike is above average, and there are no significant abrasions. NGC ID# 7KDE, PCGS# 7998

17820 1878 AU58 NGC. Just a bit of friction is apparent on each side, but much of the original mint luster still remains. Light reddish-gold color is apparent with no obvious or detracting abrasions. NGC ID# 25MZ, PCGS# 8000

17821 1878 MS62 PCGS. Minted in a large quantity of more than 82,000 pieces to serve as reserves for the anticipated exchange of paper money for gold, the mere authorization by law for such an exchange was enough to satisfy the public, which preferred to use the paper currency. The 1878 three dollar gold pieces languished in treasury vaults. This MS62 example is brightly lustrous with partially reflective fields and attractive, medium-gold color. Light abrasions account for the grade. A sharp strike weakens at the lower hair curls and at the bowknot. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar, MS63
Lustrous and Bold**

17822 1878 MS63 NGC. The 1878 three dollar gold piece has the second highest mintage of the series, as it was coined in anticipation of the public being allowed once again to exchange paper money for gold beginning on New Year's Day, 1879. The coins remained in bags, however, as most people decided that just knowing that they *could* exchange their bills was enough. This MS63 example retains its velvety surfaces and has tremendous eye appeal, with only a handful of abrasions, most obviously to the right of the obverse headdress. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar, MS64
Great Color and Vibrant Mint Frost**

17823 1878 MS64 PCGS. Three dollar gold production jumped to 82,304 coins in 1878 with the expectation that demand for gold coinage would increase as paper money reached parity with the yellow metal. Rose-gold dominates this frosty Choice Uncirculated offering. Accents of green and a few coppery alloy spots provide additional color. Softness is limited to the cotton bolls and wreath. A lovely, minimally marked type coin. NGC ID# 25MZ, PCGS# 8000

17824 1888 — Altered Surfaces — PCGS Genuine. Unc Details. This unmarked straw-gold example exhibits nearly complete definition, but the luster is diminished by a chemical cleaning. UNITED is die doubled, usual for business strikes. One of only 5,000 pieces struck.

17825 1888 MS62 NGC. The three dollar series was nearly at its end in 1888, when the Mint struck 5,000 pieces. This Uncirculated orange-gold representative is well-defined with scintillating frost. Expectedly marked for the grade. NGC ID# 25NB, PCGS# 8010

17826 1889 AU55 PCGS. Just a trace of wear shows on the strongly impressed design elements of this Choice AU specimen, and the lightly abraded orange-gold surfaces retain traces of original mint luster. From a mintage of just 2,300 pieces. NGC ID# 7KDU, PCGS# 8011

EARLY HALF EAGLE

17827 1804 Small 8, BD-3, R.5 — Repaired — PCGS Genuine. VF Details. Bass-Dannreuther Die State d/i. Terminal die state for this rare variety. The 4 is recut. About 50 BD-3 examples are believed extant. Both sides display deep olive and red-gold surfaces that appear to have been puttied. Strong detail remains on the devices despite obvious high-point wear. A rare offering for the variety specialist.

LIBERTY HALF EAGLES

**1843-D Half Eagle, AU50
Medium D, Great D-Mint Type**

17828 1843-D Medium D AU50 NGC. Variety 10-G. Half eagle output at the Georgia facility reached 98,452 pieces in 1843. The issue's survival rate of 450 to 550 coins makes the 1843-D one of the most collectible issues from this branch mint. About Uncirculated examples, however, are somewhat more elusive with roughly 90 to 125 pieces extant. This baggy offering presents orange-gold color and relatively good design detail. A rim nick occurs between stars 7 and 8. NGC ID# 25T4, PCGS# 8215

17829 1843-O Small Letters XF45 PCGS. CAC. Variety 1. Small O mintmark with the 4 in the date centered over a dentil. Winter estimates a total Small Letters survivorship of roughly 80 to 90 coins. Although typically detailed and lightly abraded, this Choice XF New Orleans half eagle boasts original orange-gold color. Population: 13 in 45, 20 finer. CAC: 2 in 45, 2 finer (9/17). NGC ID# 25T5, PCGS# 8217

**1854 Half Eagle, MS61
FS-101, 'Earring' Variety**

17830 1854 Doubled Die Obverse, FS-101, MS61 NGC. The so-called "Earring" variety features broad doubling on Liberty's ear and the hair curl just above it. Examples command a small premium from those who collect by *Cherrypickers' Guide* varieties. This brightly lustrous yellow-gold No Motto half eagle exhibits a pinpoint strike with softness limited to the fletchings and claws. Scattered marks are more minor in nature than on most survivors. Census: 3 in 61, 1 finer (8/17). NGC ID# 25UG, PCGS# 145713 Base PCGS# 8256

17831 1854-C Weak C VF25 NGC. Variety 2. The 1854 Charlotte five exists with either a Bold C mintmark or a Weak C — this example is clearly the latter, and it is one of the scarcest Charlotte half eagles from the 1850s (along with the 1856-C). Smooth wear exists on the high points, surrounded by lightly marked surfaces, strong rims, and full dentils. Pleasing orange-gold toning shows a bit of old build-up in the recesses. Housed in a previous generation, pre-barcode NGC holder with intact hologram. This coin is the only VF25 certified at either service. Census: 1 in 25, 39 finer (9/17). NGC ID# 25UJ, PCGS# 98257 Base PCGS# 8257

**1854-C Half Eagle, AU53
Overlooked Charlotte Five**

17832 1854-C Weak C AU53 PCGS. Variety 2. Weak C Mintmark. Doug Winter estimates the surviving population of 1854-C half eagles at 140 to 170 coins — not many for this underrated branch mint issue, which ranks seventh among the 24 Charlotte fives in overall rarity. A dappling of golden-gray toning adds eye appeal to this About Uncirculated piece. The star centers and central hair detail is above-average, with only slight weakness at the eagle's neck and head. Marks include light field chatter but no heavy abrasions. Population: 10 in 53, 26 finer (9/17). NGC ID# 25UJ, PCGS# 98257 Base PCGS# 8257

17833 1857-C XF40 PCGS. CAC. Variety 1. The 1857-C is an available issue in the context of the series, with a mintage of 31,360 pieces. This attractive XF specimen shows some light wear on the well-struck design elements and the orange-gold surfaces are minimally abraded for the grade. NGC ID# 25V3, PCGS# 8272

17834 1861 MS61 PCGS. Uncirculated examples of this collectible No Motto issue are popular among type collectors. This piece is well-struck and shows original yellow-gold mint luster. Scattered abrasions determine the grade. NGC ID# 25VK, PCGS# 8288

**1872-S Half Eagle, AU55
Scarce San Francisco Issue**

17835 1872-S AU55 NGC. The 1872-S five is one of the underappreciated branch mint issues in the challenging Liberty Head half eagle series. The mintage of 36,400 pieces seems generous compared to many of its low-mintage counterparts, but the issue circulated heavily and most pieces were lost to attrition. Perhaps as few as 125 to 150 pieces survive. Vibrant orange-gold color retains most of its luster on this Choice About Uncirculated example. Sharply defined and only lightly abraded, the coin has outstanding eye appeal. Just four Mint State examples are certified by PCGS and NGC combined. Census: 17 in 55, 9 finer (9/17). NGC ID# 25WH, PCGS# 8327

17836 1878 MS63 ★ NGC. The design elements of this delightful Select example are sharply detailed throughout, and the fields show surprising prooflike reflectivity on both sides. The pleasing lemon-yellow surfaces are lightly marked, and eye appeal is outstanding, as attested by the Star designation. Census: 19 in 63 (1 in 63★), 20 finer (9/17). NGC ID# 25X4, PCGS# 8345

17837 1880-CC VF30 PCGS. Variety 1-A. The design elements of this VF30 specimen show significant wear, but LIBERTY remains bold and the major lines in the hair are intact. The pleasing orange-gold surfaces are lightly abraded, with some faint traces of original mint luster. NGC ID# 25XB, PCGS# 8352

17838 1880-CC XF45 PCGS. Variety 1-B. Metal flowlines near the edges of the fields on each side are a sign of die fatigue, although this Choice XF 1880-CC half eagle shows a bold strike with only light high-point wear. The surfaces are bright but mostly smooth and appealing. Faint hair lines become visible at certain angles beneath a loupe. NGC ID# 25XB, PCGS# 8352

17839 1881/0 FS-301 MS62 PCGS. CAC. The underdigits are clear. Profound reddish-gold coloration paints each side of this wholly original 1881/0 overdate half eagle. The obverse is slightly better-struck than the reverse. Population: 26 in 62 (1 in 62+), 21 finer. CAC: 9 in 62, 3 finer (10/17). NGC ID# 25XD, PCGS# 145714 Base PCGS# 8355

17840 1881-CC VF30 PCGS. Variety 1-A. This lightly circulated Carson City half eagle displays relatively smooth surfaces and medium yellow-gold color. The obverse appears almost too sharp for the VF30 level, although the eagle's neck is more worn. Eye appeal impresses for the grade. Population: 14 in 30, 79 finer (10/17). NGC ID# 25XE, PCGS# 8356

17841 1883-S MS63+ PCGS. The 1883-S is usually seen in MS62 and MS63, but its population drops to a handful of coins in MS64. This frosty, straw-gold half eagle is exceedingly bold with scattered abrasions throughout. Population: 55 in 63 (4 in 63+), 4 finer (10/17). NGC ID# 25XM, PCGS# 8363

17842 1890 AU55 PCGS. From a minuscule mintage of 4,240 pieces, the 1890 Liberty half eagle is a scarce issue in all grades. This well-detailed Choice AU specimen displays vivid orange-gold surfaces that are minimally abraded for the grade. Traces of prooflike reflectivity are evident in protected areas. Population: 21 in 55, 31 finer (10/17). NGC ID# 25Y2, PCGS# 8375

17843 1890-CC AU58 NGC. Variety 1-A. The sole die pair employed to strike 53,800 half eagles at the Carson City Mint in 1890. Profound red-gold coloration and partial luster within the protected regions occur over each side. The impression is stronger around the borders than over the immediate centers. NGC ID# C5XF, PCGS# 8376

17844 1890-CC MS61 NGC. CAC. Variety 1-A. This CC half eagle is scarcer in Mint State than the issue that would immediately follow in 1891, understandable given the significantly lower mintage (53,800 pieces). This CAC-approved MS61 features strong stars, claws, fletchings, and olive leaves. Frosty with minimally abraded surfaces. NGC ID# C5XF, PCGS# 8376

17845 1891-CC AU58 NGC. Variety 2-A. The second 1 in the date is repunched at the top. The Carson City Mint was responsible for the production of 208,000 half eagles in 1891. That was more than three times the number coined at the Philadelphia Mint. This still-lustrous type coin is sharp with lightly marked surfaces. NGC ID# 25Y5, PCGS# 8378

17846 1891-CC AU58 NGC. Variety 2-A. This near-Mint coin shows full detail and bright, satiny yellow-gold luster with hints of coppery color in the protected regions. Light field chatter is present, although close study with a loupe is required to discern any mentionable wear. Housed in a prior generation holder.
Ex: Premier Sale (Superior, 1/1995), lot 1545. NGC ID# 25Y5, PCGS# 8378

1891-CC Five Dollar, Strong MS62

17847 1891-CC MS62 NGC. Variety 2-A, with repunching on the second 1 in the date. Depleted Treasury reserves and increasing export requirements explain the high mintage of 208,000 half eagles produced at the CC-mint in 1891. Uncirculated examples are among the most collectible coins from the facility. This lustrous five dollar boasts strong detail and rich reddish-gold color. Abrasions pose little distraction. NGC ID# 25Y5, PCGS# 8378

17848 1892-CC AU55 PCGS. Enough 1892-CC half eagles survive to satisfy collectors, although it is rare it is scarce-to-rare in Uncirculated conditions. This example is Choice for the About Uncirculated level and with softly lustrous, straw-gold color with good eye appeal. Abrasions are limited to a few tiny ticks across the frosted surfaces.
Ex: Mail Bid Sale (Coin Galleries, 4/1995), lot 2381. NGC ID# 25Y7, PCGS# 8380

17849 1892-CC AU58 NGC. Variety 1-A. Razor-sharp strike detail occurs on each side. The slightest trace of near-indiscernible cabinet friction is the only thing that prevents a higher grade. Luminous frost rolls over light yellow-gold surfaces with peppered marks. A very scarce CC issue in Mint State. NGC ID# 25Y7, PCGS# 8380

17850 1893-CC AU55 NGC. Variety 1-A. Final year of issue for the Carson City mint, and as a result pieces from this year have taken on a popularity as type coins across all denominations. This is a bright yellow-red example with traces of mint luster still seen around the devices. Well, but not fully struck. NGC ID# 25YB, PCGS# 8384

1893-CC Five Dollar, MS61 Last Emission From the CC-Mint

17851 1893-CC MS61 NGC. Variety 2-A. The 1 centered over a dentil acts as a simple attribution marker. An estimated 1.5% of the original 60,000 coin-mintage survives, making this one of the more accessible issues from the facility. Comparable Uncirculated examples are still scarce. This is a bright orange-gold half eagle with peripheral luster and scattered marks. The reverse is noticeably stronger than the obverse. NGC ID# 25YB, PCGS# 8384

1893-S Half Eagle, MS64+ Marvelous Overall Quality

17852 1893-S MS64+ PCGS. CAC. All four mints engaged in half eagle production in 1893. San Francisco coins are far more available than their O- or CC-mint cousins in high grades, but much scarcer than P-mint coins grade-for-grade. In fact, the 1893-S is rare in near-Gem condition, and finer coins can reach into the five-figure range. Attractive honey-gold color graces this frosty half eagle. The stars and eagle are notably strong. Well-preserved. Population: 34 in 64 (6 in 64+), 4 finer. CAC: 8 in 64, 2 finer (9/17). NGC ID# 25YD, PCGS# 8386

17853 1895-S MS61 NGC. Lovely orange and green-gold shadings swirl over each side of this unworn S-mint half eagle. The strike is crisp, and the coin is attractive despite a number of wispy abrasions. Census: 19 in 61, 6 finer (9/17). NGC ID# 25YJ, PCGS# 8391

17854 1895-S MS61 PCGS. The low mintage 1895-S, from a production total of only 112,000 coins, is an important condition rarity in the Liberty half eagle series. A lustrous orange-gold example, this piece exhibits minor planchet lamination at the right side of the obverse. Population: 10 in 61, 19 finer (9/17). NGC ID# 25YJ, PCGS# 8391

17855 1897 MS65 NGC. This smooth, thickly frosted Gem half eagle displays appealing peach-gold color. Most design elements are completely brought-up. Census: 76 in 65 (1 in 65+, 1 in 65★), 9 finer (9/17). NGC ID# 25YM, PCGS# 8394

17856 1898-S MS64 PCGS. This impressive Choice specimen features sharply detailed design elements and well-preserved orange-gold surfaces with radiant mint luster throughout. Population: 41 in 64 (3 in 64+), 14 finer (9/17). NGC ID# 25YR, PCGS# 8397

17857 1903-S MS65 PCGS. The high mintage exceeding 1.8 million pieces makes the 1903-S a type coin collector's favorite. This Gem is nonetheless the highest grade readily obtainable, as PCGS has seen only 23 submissions numerically finer (1/17). This frosty khaki-gold example displays a full strike and no mentionable abrasions, a top-notch piece. NGC ID# 25Z3, PCGS# 8408

INDIAN HALF EAGLES

17858 1908 MS64 NGC. The 1908 often comes softly struck, but this near-Gem presents needle-sharp design definition on each side. Slight die buckling occurs around the rims. Softly frosted yellow-gold surfaces are minimally marked. A single linear abrasion travels through WE TRUST. NGC ID# 28DE, PCGS# 8510

17859 1908 MS64 NGC. An impressive Choice example from the first year of the Indian design, this coin offers sharply detailed design elements and well-preserved orange-gold surfaces, with vibrant satiny mint luster. NGC ID# 28DE, PCGS# 8510

17860 1908-D MS63+ PCGS. CAC. The vivid orange-gold surfaces of this Plus-graded Select specimen radiate vibrant mint luster and show a few scattered, minor contact marks. The design elements are sharply detailed and eye appeal is outstanding. NGC ID# 93KW, PCGS# 8511

17861 1908-D MS64 PCGS. The strike is a trifle weak on the lower headdress feathers but is well-executed on the eagle's wing. Bright straw-gold luster adorns each side. Scattered light abrasions in the fields prevent a Gem designation. PCGS lists only 12 numerically finer 1908-D half eagles (9/17). NGC ID# 93KW, PCGS# 8511

17862 1909-D MS64+ PCGS. The high-mintage 1909-D Indian half eagle is an outstanding candidate for a type collection, and this near-Gem specimen has satiny bright yellow luster with excellent eye appeal. NGC ID# 28DJ, PCGS# 8514

17863 1909-D MS64+ NGC. CAC. Many collectors choose the 1909-D to represent the Pratt half eagle in their type sets. High-end examples are among the most available in the series. This vibrant near-Gem is fully struck with pleasing yellow-gold color. Clean for the grade. NGC ID# 28DJ, PCGS# 8514

1909-O Half Eagle, XF40 Details Clear Mintmark

17864 1909-O — Ex-Jewelry, Damaged, Cleaned — ANACS. XF40 Details. An entry-level example of this key New Orleans issue, showing a good amount of detail. The coloration is deep olive-gold with greenish tinges, accompanied by moderate surface abrasions and evidence of harsh cleaning, as expected for a jewelry piece. Despite all this, the mintmark is clear, making this piece suitable for date representation. NGC ID# 25ZK, PCGS# 8515

17865 1910 MS64 PCGS. One of the more available five dollar Indians, and a date that occasionally can be located in near-Gem condition. This is a lovely example that is almost completely struck up. The surfaces are bright and satiny, and there are no obvious or detracting abrasions on either side. NGC ID# 28DK, PCGS# 8517

17866 1910-D MS63 NGC. An attractive Select specimen of this popular branch mint issue, from a smallish mintage of 193,600 pieces, this coin offers well-detailed design elements and lustrous orange-gold surfaces, with scattered minor contact marks on both sides. NGC has graded 34 numerically finer examples (9/17). NGC ID# 28DL, PCGS# 8518

17867 1910-D MS63 PCGS. The 1910-D Indian half eagle becomes very scarce in grades above the MS63 level. This sharply detailed Select specimen exhibits vivid orange-gold surfaces, with vibrant mint luster and only minor signs of contact. NGC ID# 28DL, PCGS# 8518

17868 1910-S MS62 NGC. Despite its substantial mintage of 770,200 pieces, the 1910-S Indian half eagle is seldom encountered in grades above MS62. This sharply detailed MS62 specimen offers lustrous orange-gold surfaces with a scattering of minor contact marks on both sides. NGC ID# 28DN, PCGS# 8519

1911 Half Eagle, Strong MS64+ Verging on an Even Higher Grade

17869 1911 MS64+ PCGS. CAC. This Choice Uncirculated half eagle is inarguably on the precipice of an even higher grade. Light, even reddish-gold surfaces are frosted and minimally marked, with just a bit of chatter above the eagle's head. The 1911 typically comes with an average strike. This piece is far better than usual with crisp headdress, feather, and talon definition. Scarcely seen in better condition. NGC ID# 28DP, PCGS# 8520

1911 Half Eagle, MS64+ Exceptionally Sharp for the Issue

17870 1911 MS64+ PCGS. CAC. The availability of the 1911 in MS64 and the issue's rarity in MS65 make this MS64+ example with CAC approval an excellent coin, especially when paired with the balance of quality, conditional rarity, and affordability seen here. For a date that often comes softly struck and lackluster, this near-Gem is a glowing exception — well-struck over the centers with frosty luster. A great 1911 five dollar with minor marks above the eagle's wing and a nick at the tip of the olive leaves. NGC ID# 28DP, PCGS# 8520

17871 1911-D AU53 NGC. Only 72,500 1911-D half eagles were struck. This is one of the well-known series key dates in high grades. Each side features reddish-gold coloration. Minimal friction occurs over the exposed areas. Scattered marks are seen throughout. NGC ID# 28DR, PCGS# 8521

**1911-S Five Dollar, MS63
Original Luster**

17872 1911-S MS63 PCGS. Straw-gold luster displays olive overtones on this Select 1911-S half eagle, along with a few light abrasions that determine the grade. Strike sharpness is pleasing. The 1911-S is a semikey date in high grade, occasionally seen in MS63 but seldom finer. PCGS lists 35 examples in higher grades than the present (9/17). NGC ID# 25ZM, PCGS# 8522

17873 1912 MS64 PCGS. According to Akers: "Almost without exception, the 1912 is very sharply struck with very good to excellent lustre, usually the latter." This near-Gem corresponds to that assessment. Light peach-gold surfaces display top-notch preservation. Lovely eye appeal. NGC ID# 28DS, PCGS# 8523

17874 1912 MS64 NGC. The accessibility of the 1912 becomes restricted in grades higher than MS63. Choice representatives are scarce, and Gems prove rare. This near-Gem is exceedingly strong with peach-gold color and frosty mint luster. Small grazes and a tick behind the eagle's head define the grade. NGC ID# 28DS, PCGS# 8523

17875 1912 MS64 PCGS. The design elements of this pleasing Choice example are well-detailed and the orange-gold surfaces are lustrous and well-preserved. The 1912 Indian half eagle is seldom seen in higher grades. PCGS has graded 67 numerically finer examples (9/17). NGC ID# 28DS, PCGS# 8523

17876 1913 MS64 PCGS. The 1913 Indian half eagle becomes scarce in grades above MS64. This attractive Choice specimen offers well-detailed design elements and lightly marked orange-gold surfaces with vibrant mint luster throughout. PCGS has graded 55 numerically finer examples (9/17). NGC ID# 28DT, PCGS# 8525

17877 1913 MS64 PCGS. With a mintage of 916,000 coins, this issue is one of the highest production Indian half eagles in the series from 1908 to 1929. In fact, only the 1909-D and 1911-S issues had higher mintages. But mintage is not the only important factor — this date is plentiful in MS64 grade, but it is a rarity any finer, with just 55 better coins certified by PCGS (9/17). The near-Gem example offered here is frosty and lustrous with brilliant yellow-gold surfaces. It is sharply struck and aesthetically desirable.
Ex: Long Beach Signature (Heritage, 5-6/2007), lot 2423. NGC ID# 28DT, PCGS# 8525

17878 1913 MS64 PCGS. An obtainable issue with good production characteristics, the 1913 half eagle is well-suited for type purposes. This piece offers a good strike and handsome luster over predominantly khaki-gold surfaces. The certified populations thin out considerably at the next grade level.
Ex: Long Beach Signature (Heritage, 5-6/2007), lot 2425. NGC ID# 28DT, PCGS# 8525

17879 1913 MS64 PCGS. This lovely near-Gem half eagle displays the usually seen sharply struck design elements, including good definition on the eagle's shoulder and on most of the headdress feathers. Both sides give off great luster, another attribute of the issue. Peach-gold surfaces are relatively well preserved, revealing no significant marks. NGC ID# 28DT, PCGS# 8525

17880 1913 MS64 PCGS. Vibrant mint luster and well-preserved orange-gold surfaces are the calling cards of this attractive Choice Indian half eagle. The design elements are sharply detailed throughout and overall eye appeal is outstanding. NGC ID# 28DT, PCGS# 8525

17881 1914 MS63 PCGS. The popular 1914 Indian half eagle was produced on the very brink of the First World War. This impressive Select specimen displays sharply detailed design elements and lustrous orange-gold surfaces with a few scattered, minor signs of contact. NGC ID# 28DU, PCGS# 8527

17882 1914 MS64 NGC. As usual, this near-Gem 1914 half eagle is strongly struck throughout. Light grazes appear over yellow-gold surfaces, but none are overly distracting. Only 19 finer grading events at NGC (10/17). NGC ID# 28DU, PCGS# 8527

17883 1915 MS64 PCGS. A lovely five-dollar Indian and perfect as a Philadelphia type coin. The striking details are well brought up in all areas. The mint luster is frosted, and both sides display deep reddish color with significant portions of lilac interspersed. A high-end MS64 that is close to a full Gem classification. NGC ID# 28DX, PCGS# 8530

**1916-S Half Eagle, MS63
Final San Francisco Issue**

17884 1916-S MS63 PCGS. A solitary coinage of 240,000 half eagles was accomplished in 1916, at the San Francisco Mint. In the West, where gold still circulated, many of these were distributed into commercial channels and received various degrees of wear. Mint State coins are usually available for a price, but the quality varies greatly. This Select example is well-struck and satiny with original olive-gold coloration. Only light handling marks are evident beneath a loupe. NGC ID# 28DY, PCGS# 8532

LIBERTY EAGLES

17885 1842 Small Date AU55 NGC. Struck in both Small Date and Large Date formats, the 1842 eagle had a total mintage of more than 80,000 pieces, although just 18,623 pieces were of the Small Date variety. This Choice About Uncirculated example is lightly abraded with even, yellow-gold color and a sharp strike throughout. There are no heavy marks. NGC ID# 262M, PCGS# 8585

**1843 Ten Dollar, Choice AU
Underrated Rarity**

17886 1843 AU55 PCGS. PCGS CoinFacts estimates a survivorship of 175 coins for the 1843 ten dollar gold piece, only three among them in Uncirculated condition. Choice AU representatives are rarities in their own right. Light wheat-gold color and partial remaining mint luster grace each side of this well-detailed eagle. The central devices are notably strong, and scattered abrasions are unsurprising. Population: 5 in 55, 3 finer (9/17). NGC ID# 262P, PCGS# 8588

17887 1844 — Salt Water Damage — PCGS Genuine. AU Details. This yellow-gold example shows finely granular surfaces from its seawater conservation. Three or four shallow abrasions in the obverse fields are noted, while the strike is sharp throughout with only minimal wear. The 1844 ranks #8 on Doug Winter's list of the ten rarest Liberty Head eagles, with a total population of under 50 to 60 coins.

17888 1847-O AU55 NGC. Variety 2. Repunching on the base of 1 in the date is the key pick-up point for the die marriage. Struck from a late die state, with a heavy die crack from the dentils through 7 to the neck truncation. Numerous radial cracks are visible from the lower edge of the reverse to the olive leaves, eagle claws, and arrow fletchings. Moderate wear combines with some central weakness of strike on this softly lustrous, orange-gold Choice About Uncirculated example. NGC ID# 2632, PCGS# 8598

17889 1849 AU55 NGC. Breen-6888. The entire date is doubled southwest, most visible on the 8 and 9 in the date. A bold die crack pierces the right crossbar of 4. This smooth and still-lustrous Choice About Uncirculated example is sharp except at the reverse arrow fletchings. Light field marks and high point wear confirm the assigned grade. NGC ID# 2635, PCGS# 8601

17890 1850 Large Date AU55 PCGS. Soft greenish-gold patina imbues this Choice AU ten dollar that displays traces of luster in the recessed areas. Well-defined design features further enhance the coin's desirability. The Large Date is more available than its Small Date Counterpart. Population: 17 in 55, 21 finer (9/17). NGC ID# 2637, PCGS# 8603

1852 Ten Dollar, MS61 Seldom Offered in Mint State

17891 1852 MS61 NGC. About Uncirculated examples of the 1852 eagle are plentiful, but Mint State coins are seldom offered. Examples grading finer than this MS61 coin are decidedly rare. This piece displays sharp detail and satiny orange-gold luster. Scattered abrasions limit the grade but none are individually obtrusive. Census: 25 in 61, 5 finer (9/17). NGC ID# 263C, PCGS# 8608

17892 1853-O XF45 PCGS. CAC. Variety 3. The reverse has a "shield ring" at the top of the second vertical stripe that hangs down from the bottom crossbar. This feature is encountered on a few reverse dies from the early 1850s, and a similar ring may be found on a few Seated quarter reverse dies from the same time period. This pleasing XF example retains hints of luster on its smooth green-gold surfaces. NGC ID# 263F, PCGS# 8612

17893 1853-O AU53 NGC. Variety 4. The mintmark is low relative to the feather tip. Attractive olive-gold color gives this 1853-O ten dollar an air of originality that is seldom seen. Glints of luster emanate from the recesses. Winter proposes a survival estimate of 250 to 300 coins from a mintage of 51,000 pieces. NGC ID# 263F, PCGS# 8612

17894 1854-S XF45 NGC. Only a few hundred examples of the 1854-S eagle survive. They are always in-demand as first-year representatives from the San Francisco Mint. This is a lightly circulated reddish-gold eagle with incomplete detail and peppered abrasions. However, its numismatic significance is unquestionable. NGC ID# 263K, PCGS# 8615

17895 1854-S AU53 NGC. This attractive AU53 specimen represents the first year of coinage operations at the San Francisco Mint. The still-lustrous orange-gold surfaces are lightly abraded and only a trace of actual wear is evident on the well-detailed design elements. NGC ID# 263K, PCGS# 8615

17896 1856 AU55 NGC. Although both sides exhibit scattered grade-consistent marks, this Choice AU No Motto eagle has remaining luster over red-gold surfaces. A few dull coppery-orange spots are evident on the obverse. NGC ID# 263P, PCGS# 8619

1860-O Liberty Ten, XF45 Attractive, Natural Color

17897 1860-O XF45 PCGS. Although the ten dollar gold series is rich in rarities and notoriously challenging when it comes to branch mint issues, the 1860-O is moderately available given its low mintage of only 11,100 pieces. Somewhere in the vicinity of 115 to 135 pieces are known to exist. That said, the issue is not nearly as available with original surfaces and attractive, natural color. This Choice XF example fulfills those much-desired characteristics. Medium to deep orange-gold coloration conveys a reddish tinge at the borders. Traces of prooflike surface join mint luster in sheltered areas. The strike is strong and abrasions, although frequent, are universally minor. A Choice coin for the eagle connoisseur. Population: 35 in 45, 66 finer (9/17).

Ex: *Public Auction Sale (Stack's, 6/1990)*, lot 1007. NGC ID# 2645, PCGS# 98631

17898 1860-O — Improperly Cleaned — NGC Details. AU. Variety 1. This scarce New Orleans issue comes from a mintage of only 11,100 pieces and is rarely offered in Mint State. The present AU-level coin is bright yellow-gold from an vigorous cleaning, but it has sharp central devices. Scattered abrasions are joined by several mint-made planchet depressions on the obverse. The fields are moderately reflective.

17899 1861 XF45 PCGS. Bulging Bun subtype. A bright, yellow-gold example of this No Motto ten. The 1861 is a popular type coin, struck during the initial year of the Civil War yet readily available through About Uncirculated conditions. This example is lightly abraded but well-struck. NGC ID# 2647, PCGS# 8633

17900 1861 AU55 PCGS. In circulated condition, the 1861 eagle stands among the most accessible No Motto tens. This Choice AU orange-gold offering features strongly struck centers and a hint of softness on the stars and other high points. Luster glows from the design recesses. Small abrasions on each side. NGC ID# 2647, PCGS# 8633

**1861 Liberty Ten, AU58
Scarce Any Finer**

17901 1861 AU58 PCGS. CAC. Rounded Hair Bun Hub. A pumpkin-gold example of this popular issue. A band of luminous luster fills the borders on both sides. A number of small marks are noted in the fields, though none of them merit individual mention. Population: 41 in 58, 42 finer. CAC: 14 in 58, 9 finer (8/17).
Ex: Central States Signature (Heritage, 4/2006), lot 3955, which realized \$2,300; Houston Money Show Signature (Heritage, 12/2015), lot 4645, where it brought \$3,995. NGC ID# 2647, PCGS# 8633

17902 1862-S Fine 15 PCGS. The 1862-S comes from a small mintage of 12,500 coins and heavy attrition. Only 60-80 pieces are believed known today, and almost none are Mint State. This well-circulated piece is accessible for most collectors of Liberty Head eagles, and it shows original bronze-gold patina with smooth surfaces. Eye appeal is quite pleasing for the grade. Population: 4 in 15, 44 finer (9/17). NGC ID# 55H4, PCGS# 8636

**1868 Ten Dollar, AU55
Better Date in High Grade**

17903 1868 AU55 NGC. The mintage of the 1868 eagle was stunted at 10,630 pieces, making the issue scarce today in most grades. About Uncirculated examples are particularly scarce in the 55 and 58 numeric levels, and MS60 or better coins are major rarities. This Choice AU piece displays partial luster and satiny honey-gold surfaces. Detail is sharp amid scattered abrasions. Census: 26 in 55 (1 in 55+★), 39 finer (9/17). NGC ID# 264N, PCGS# 8653

17904 1874-CC VG10 PCGS. Variety 1-A. The design elements retain definition despite moderate-to-heavy wear across the brassy-gold surfaces of this popular Carson City eagle. Numerous small ticks and shallow marks are softened by a long period in circulation throughout the Old West. The 1874-CC seldom exceeds the VF level from a mintage of 16,767 pieces.
Ex: The Stetson University Collection (Bowers and Merena, 5/1993), lot 696. NGC ID# 54UF, PCGS# 8670

17905 1882 MS64 PCGS. The 1882 Liberty eagle is very rare in grades above MS64. This attractive Choice specimen displays well-detailed design elements and lightly marked orange-gold surfaces with ample mint luster. Population: 51 in 64 (2 in 64+), 1 finer (9/17). NGC ID# 2662, PCGS# 8695

17906 1882-O AU50 NGC. Variety 1. The only known dies, used for a production of 10,820 eagles at New Orleans in 1882. Exhibiting light wear and trivial marks, this lovely yellow-gold example has reflective fields and the eye appeal of a higher grade. Slight peripheral weakness is evident with sharp central details. NGC ID# 55GJ, PCGS# 8697

17907 1883 MS63 NGC. The 1883 eagle transitions from very scarce in MS63 to extremely rare and virtually unobtainable in near-Gem condition. Red-gold surfaces display swirling luster and good strike characteristics. Field chatter and scattered bagmarks are expected. NGC has seen three finer examples (10/17). NGC ID# 2666, PCGS# 8699

17908 1884-CC VF35 NGC. Variety 1-A. Heavy die lines on the portrait are diagnostic of this issue. The 1884-CC eagle is a major rarity in Mint State and only marginally available in circulated grades. This Choice VF example displays excellent detail and original olive-gold patina. The expected scattering of abrasions is consistent with the grade. Housed in a prior generation holder. NGC ID# 266B, PCGS# 8704

17909 1888-O AU58 PCGS. Variety 1. Die lines appear through ERT, and the second 8 is positioned directly over a dentil. The 1888-O is by far the scarcest ten dollar issue of the year with a small mintage of 21,335 coins. This near-Mint eagle is well-struck for a New Orleans issue. Orange-gold surfaces retain abundant luster and show myriad marks. NGC ID# 266L, PCGS# 8713

**1889 Ten Dollar, Very Scarce MS61
Vibrant Yellow-Gold Series Rarity**

17910 1889 MS61 NGC. The mintage of gold eagles took a precipitous drop at the Philadelphia Mint in 1889, with just 4,440 pieces struck. As one might expect, it quickly was recognized as an unexpected rarity in the series by eagle specialists and it remains so to this day. This bright, yellow-gold example has its share of pinprick abrasions but no heavy marks. Much prooflike reflectivity survives the bagmarks and the strike is comprehensively sharp. NGC ID# 266N, PCGS# 8715

17911 1890-CC AU53 PCGS. Variety 1-A. As one of the more available Carson City eagles, the 1890-CC is comparatively attainable in all About Uncirculated grades. Many of the coins are heavily abraded, yet this sharply struck example shows only a few small obverse marks and lines. Mint luster remains bright beneath attractive, brassy-gold color with rose-gold accents. NGC ID# 266S, PCGS# 8718

17912 1891-CC AU55 PCGS. Variety 1-A. A six-figure mintage of 103,732 pieces makes the 1891-CC the most available of all CC-Mint eagles by a wide margin. This Choice About Uncirculated example is ideal both for type and Carson City specialists. Abrasions are slight for an issue known for its heavily marked surfaces. There are no copper alloy marks that often plague the 1891-CC. Mint luster remains across sharp, medium-gold surfaces that feature pale-orange and olive accents in sheltered areas. A shallow scrape near star 12 is the only mark of note. NGC ID# 266U, PCGS# 8720

17913 1891-CC AU58 PCGS. Variety 1-A. Only a trace of wear shows on the well-detailed design elements of this attractive near-Mint specimen, with lightly abraded orange-gold surfaces that retain much of their original mint luster. The arrow feather points to the second C in the mintmark, identifying the variety. NGC ID# 266U, PCGS# 8720

17914 1891-CC MS61 PCGS. Variety 1-A. The substantial mintage makes the 1891-CC a logical choice for a Carson City type coin. Significant initial die polish remained on the dies and imparted a semiprooflike sheen to the fields on each side. Even, deep reddish patina covers the surfaces, and the strike detail is strong, especially on the reverse. NGC ID# 266U, PCGS# 8720

1891-CC Ten Dollar, MS62
Lustrous Carson City Type Coin

17915 1891-CC MS62 NGC. Variety 2-B. The fletching points to the first C in the wide CC mintmark. A die line within the upper loop of the R in LIBERTY further confirms the attribution. Carson City Mint officials struck an unprecedented quantity of eagles in 1891 to replenish dwindling Treasury reserves. A total of 103,732 1891-CC ten dollar gold pieces were manufactured, and a good number survive in Mint State. This glittering, well-struck example boasts swirling luster over lightly marked surfaces. The lower portion of the eagle is notably sharp. NGC ID# 266U, PCGS# 8720

17916 1891-CC/CC FS-501, Variety 3-C — Cleaned — PCGS Genuine. AU Details. Some light wear shows on the well-detailed design elements of this popular repunched mintmark variety, easily recognized by a small spike below Liberty's chin and the die crack through the first five stars. The lightly abraded surfaces have an unnatural sheen, due to the noted cleaning.

17917 1892-CC AU53 PCGS. Variety 2-A. The 1892-CC eagles are increasingly challenging in About Uncirculated conditions, especially with excellent orange-gold surfaces such as the present coin. Light rub on the curls and a tiny reeding mark on the jawline deserve passing mention, but there are no real distractions and other abrasions are few. Luster remains strong at the margins. Struck from the rare obverse variety with the date low and left. NGC ID# 266W, PCGS# 8722

17918 1892-CC Tripled Die Reverse, FS-801, AU55 PCGS. Variety 1-A. IN GOD WE TRUST is die tripled. STATES also shows a spread toward the rim. All 1892-CC tens are FS-801, not too surprising given the low mintage of 40,000 pieces. This partly lustrous orange-gold Carson City example is well-struck and free from any distracting abrasions. NGC ID# 266W, PCGS# 511600 Base PCGS# 8722

17919 1892-S MS63 NGC. Mint State examples of the 1892-S are typically found in MS61 to MS62. Comparable Select representatives are scarce, with finer coins out of reach. Softness is limited to the middle curls and olive leaf tips on this frosty, honey-gold eagle. Census: 26 in 63, 1 finer (9/17). NGC ID# 266Y, PCGS# 8724

17920 1893 MS61 Deep Prooflike NGC. While the prodigious mintage of more than 1.8 million pieces offers a great many high-grade examples, few 1893 eagles have earned the Deep Prooflike designation. Vibrant sun-gold color radiates from deeply reflective surfaces, limited only by numerous light surface abrasions. The sharply struck motifs show noticeable contrast. This is one of just 15 Deep Prooflike 1893 eagles certified by NGC. Census: 4 in 61 Deep Prooflike, 11 finer (9/17). NGC ID# 266Z, PCGS# 8725

17921 1893-S MS63 PCGS. While the 1893-P ten dollar is readily available in MS63, its San Francisco counterpart is very scarce in this grade and extremely rare any finer. Peach and green-gold color covers each side, the frosted surfaces showing notably few marks on the obverse. Well-struck despite incompleteness on the stars and olive leaves. Population: 72 in 63 (1 in 63+), 4 finer (9/17). NGC ID# 2674, PCGS# 8728

17922 1894 MS64+ PCGS. CAC. Usually available in MS64, the 1894 Liberty eagle is a great rarity in Gem condition. This Plus-graded Choice example strikes a balance between affordability and quality. The strike is sharp, and both sides display original orange-gold luster with lavender and peach hues. Only a few tiny abrasions are noted. NGC ID# 2675, PCGS# 8729

17923 1897-S MS62 PCGS. Despite the innocuous mintage of 234,750 coins, the 1897-S eagle is surprisingly scarce in MS62 and clearly underrated. A handful of examples are known finer. Scintillating peach-gold surfaces display myriad small marks and a series of dark alloy spots along the left reverse border. Population: 35 in 62, 23 finer (9/17). NGC ID# 267F, PCGS# 8739

17924 1899 MS65 PCGS. CAC. This spectacular Gem exhibits sharply detailed design elements throughout and the well-preserved orange-gold surfaces are lustrous and appealing. Population: 60 in 65 (7 in 65+), 6 finer. CAC: 15 in 65, 4 finer (10/17). NGC ID# 267J, PCGS# 8742

17925 1900 MS64 NGC. This sharp near-Gem type coin displays frosty wheat-gold luster and mostly unabraded surfaces. The 1900 eagle is plentiful through MS64 but becomes scarce in finer grades. The present example has strong eye appeal for the MS64 level. NGC ID# 7LD2, PCGS# 8745

17926 1901-S MS65+ NGC. This readily collectible S-mint ten dollar issue is favorite among type specialists. High-end Gems are slightly more elusive. Glowing yellow-gold surfaces radiate frosty luster and exhibit remarkably few abrasions. Exceedingly sharp. NGC ID# 267S, PCGS# 8749

17927 1903-S MS64 PCGS. There is no shortage of high-grade 1903-S tens in the market, allowing bidders the luxury to concentrate on eye appeal and surface quality. This near-Gem example scores well in both categories, with sun-gold surfaces and a needle-sharp strike. Only a few tiny ticks interrupt the smoothly frosted, lustrous fields. NGC ID# 267X, PCGS# 8754

17928 1904 MS63 PCGS. Moderately available in MS63, the 1904 Liberty eagle is scarce any finer. This piece displays bright, satiny luster and semiprooflike fields. A few light handling marks are all that limit the grade in the absence of heavy abrasions. PCGS lists 57 finer submissions (9/17). NGC ID# 267Y, PCGS# 8755

17929 1905 MS64 PCGS. The design elements of this impressive Choice specimen are sharply detailed, aside from a touch of softness on star 13. The lustrous orange-gold surfaces show only random, minor contact marks. Population: 98 in 64 (2 in 64+), 32 finer (9/17). NGC ID# 7LD3, PCGS# 8757

17930 1906-D MS64 PCGS. While the surfaces are remarkably unabraded and only a handful of small marks exist anywhere on this near-Gem eagle, it is the sumptuous honey-gold color and frosted mint luster that make it a standout coin. The issue is only moderately scarce in MS64, yet the sharp bidder will note just 34 1906-D tens are graded numerically finer by PCGS (9/17). NGC ID# 7JHG, PCGS# 8760

17931 1907 MS64+ PCGS. CAC. A Plus-graded Choice example from the last year of the Liberty design, this coin offers well-detailed design elements, with just a touch of softness on some star centers. The well-preserved peach-gold surfaces radiate vibrant mint luster. NGC ID# 2688, PCGS# 8763

INDIAN EAGLES

17932 1907 No Motto MS61 PCGS. From the first year of the Indian design, which did not include the motto IN GOD WE TRUST, this impressive Mint State specimen offers well-detailed design elements and lustrous orange-gold surfaces that are lightly marked for the grade. NGC ID# 28GF, PCGS# 8852

17933 1907 No Motto MS62 PCGS. A notable first-year specimen of the Indian design, before the motto IN GOD WE TRUST was added, this coin is well-detailed and lightly marked for the grade, with ample mint luster and eye appeal. NGC ID# 28GF, PCGS# 8852

17934 1907 No Motto MS62 PCGS. A pleasing MS62 representative of the short-lived No Motto design, with well-detailed design elements and lightly marked orange-gold surfaces. Frosty mint luster adds to the considerable eye appeal. NGC ID# 28GF, PCGS# 8852

17935 1907 No Motto MS63 NGC. Strike definition tends to plague the first-year No Motto eagle, designed by acclaimed sculptor Augustus Saint-Gaudens. This Select orange and khaki-gold representative is typically struck. Softly frosted mint luster and small abrasions are apparent on each side. NGC ID# 28GF, PCGS# 8852

17936 1908 No Motto MS62 NGC. Modestly abraded, with the only notable distraction being a solitary milling mark well hidden in the bonnet. The reverse rims show a few contact marks. The coin is moderately lustrous on both sides. NGC ID# 28GG, PCGS# 8853

17937 1908 Motto MS63 PCGS. Undeniably original luster gives this Select Uncirculated 1908 With Motto eagle distinctive brass-yellow color. The strike is sharply rendered, and grade-limiting abrasions are light and uniformly scattered. NGC ID# 28GJ, PCGS# 8859

17938 1908-S AU58 PCGS. The low mintage of only 59,850 pieces has ensured the popularity of the 1908-S ten at all grade and price points. This is an attractive example that shows very little friction from handling and significant remaining luster. Even reddish patina covers each side. NGC ID# 28GL, PCGS# 8861

17939 1909 MS63 PCGS. Lustrous with green and wheat-gold color, this Select Uncirculated eagle boasts excellent eye appeal and few overt distractions aside from superficial grazes. Two marks occur on the cheek. The strike is trivially soft on the forecurls and shoulder. NGC ID# 28GM, PCGS# 8862

17940 1909-D MS62 PCGS. The 1909-D Indian eagle is somewhat scarce in grades above MS62. This attractive specimen offers well-detailed design elements and lustrous orange-gold surfaces with some scattered minor contact marks on both sides. NGC ID# 28GN, PCGS# 8863

17941 1909-D MS62 PCGS. Sharply detailed in most areas, this attractive MS62 specimen shows just a touch of softness on the leading edge of the eagle's wing. The pleasing green and orange-gold surfaces are brightly lustrous, with a scattering of minor grade-consistent contact marks. NGC ID# 28GN, PCGS# 8863

**1909-D Ten Dollar, MS63
Glowing, Original Coin**

17942 1909-D MS63 PCGS. For the 1909-D, this Mint State coin is remarkably appealing. The central motifs are well-defined, while minor die erosion in the fields produces a matte-like texture and glowing satin luster. Each side exhibits wheat-gold hues, with light chatter on Liberty's cheek limiting the grade. Very scarcely seen in better condition.
Ex: New York Signature (Heritage, 10/2015), lot 3568. NGC ID# 28GN, PCGS# 8863

17943 1910-S MS61 PCGS. An Uncirculated example of this slightly better date, showing original straw-gold luster and well-defined motifs. Scattered abrasions limit the grade but none are individually detracting. The San Francisco Mint struck 811,000 eagles in 1910, although Mint State survivors are surprisingly scarce. NGC ID# 268D, PCGS# 8867

17944 1910-S MS62 NGC. Following suit with most other San Francisco issues from this period, the 1910-S Indian ten is collectible in MS60 to MS62 but is scarce any finer. This piece is well-struck and possesses satiny straw-gold luster. No individually significant abrasions are present. NGC ID# 268D, PCGS# 8867

17945 1911 MS64 NGC. This satiny near-Gem boasts lovely rose accents throughout otherwise straw-gold luster. No major abrasions are seen, and the strike is solid. The 1911 Indian eagle is available in this grade but quickly climbs out of reach in higher grades, at least for collectors considering a budget. NGC ID# 28GT, PCGS# 8868

17946 1911-D XF40 NGC. The strongly impressed design elements of this impressive XF specimen show some light wear, and the pleasing orange-gold surfaces are lightly abraded. From a tiny mintage of 30,100 pieces. NGC ID# 28GU, PCGS# 8869

17947 1911-D AU50 PCGS. Only light wear shows on the well-detailed design elements of this attractive AU specimen, from a tiny mintage of 30,100 pieces. The vivid orange-gold surfaces retain much original mint luster. Housed in a green label holder. NGC ID# 28GU, PCGS# 8869

17948 1911-S AU55 PCGS. CAC. A few light marks visit the finely granular surfaces of this Choice About Uncirculated 1911-S. The strike is sharp across the medium-gold surfaces enriched with orange and lilac overtones. Soft mint luster exists in generous portions on both sides. NGC ID# 28GV, PCGS# 8870

17949 1912 MS64 NGC. The 1912 is a scarcer P-mint is seldom located in finer grades. This piece displays rich reddish patina with strong underlying mint frost. Sharply defined throughout with no objectionable marks. NGC ID# 28GW, PCGS# 8871

17950 1913-S AU55 ANACS. This key-date Indian eagle boasts a mintage of only 66,000 pieces. This Choice AU representative is satiny and partially lustrous with bold design elements. A brush of friction over Liberty's cheek and the eagle's shoulder determines the grade. NGC ID# 28GZ, PCGS# 8874

17951 1914-D MS63 PCGS. A colorful combination of green and peach-gold hues adorns this satiny 1914-D eagle. The devices exhibit good detail with a touch of high-point softness. Scattered abrasions are of little import. Scarcely seen in higher grades. NGC ID# 28H3, PCGS# 8876

17952 1914-D MS63 PCGS. This frosty Select Mint State 1914-D eagle exhibits full cartwheel luster on its brilliant yellow-gold surfaces with trivial, grade-consistent marks on each side. NGC ID# 28H3, PCGS# 8876

17953 1914-S MS61 NGC. Most Uncirculated 1914-S ten dollar gold pieces survive in MS61 to MS62. This radiant wheat-gold example is softly struck on the highest points, but the overall impression is good. The reverse is noticeably cleaner than the obverse. NGC ID# 28H4, PCGS# 8877

17954 1915 MS63 NGC. Smooth, minimally abraded fields awash in frosty luster feature attractive shades of rose and green-gold coloration. The obverse is uniformly well-struck, while minor softness appears on the tip of the eagle's wing. A single fleck on Liberty's jaw merits attention. NGC ID# 28H5, PCGS# 8878

17955 1915 MS64 PCGS. Rich, original color is the first feature one notices about this attractive near-Gem. Deep reddish patina is interspersed with bright dabs of lilac on each side. Sharply detailed and highly lustrous. NGC ID# 28H5, PCGS# 8878

17956 1916-S MS62 PCGS. CAC. The 1916-S was the final gold eagle struck at any mint until 1920. Production amounted to 138,500 pieces, and Mint State coins are scarce. This piece displays bright yellow-gold mint luster and a good strike. Light, scattered abrasions are as expected for the grade, although none are overly detracting. NGC ID# 28H7, PCGS# 8880

1932 Saint-Gaudens Ten Dollar, MS65
Ideal for Type Purposes

17957 1932 MS65 NGC. Few issues challenge the 1932's availability in Gem condition or its appropriateness for type representation. More than 4.4 million coins were struck, and thousands of pieces survive through MS65. Radiant mint frost glimmers over light yellow-gold surfaces. Strike detail is crisp with softness confined to the usual trouble spots: the two lowest headdress feathers, talons, and shoulder tip. NGC ID# 28HB, PCGS# 8884

1932 Eagle, Frosty MS65+
A Type Coin With Exceptional Luster

17958 1932 MS65+ PCGS. Intense, frosty yellow-gold mint luster is an immediately appealing attribute of this high-end Gem, while the outstanding preservation of that luster is a characteristic that sets in with the viewer upon closer examination. The strike is sharp, and Liberty's cheek shows fewer marks than usual for the issue. Finer 1932 Indian eagles are infrequently offered. NGC ID# 28HB, PCGS# 8884

1932 Ten Dollar, MS65+
Beautiful Honey-Gold Surfaces

17959 1932 MS65+ PCGS. Beautiful honey-gold surfaces radiate glistening frost, providing this ideal type coin with terrific aesthetic quality to match its excellent technical preservation. A couple of ticks on the chin and behind the eagle stand in the way of a Premium Gem grade. The 1932 is the final collectible issue in the Saint-Gaudens series. NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

1850 Double Eagle, XF45
First Year of the Denomination

17960 1850 XF45 PCGS. The entire nation felt the influence of the California Gold Rush, including the U.S. Mint when a new denomination, the double eagle, was added to the national coinage system. This large gold coin doubled the Mint's use of gold with little additional effort. The Choice XF example offered here has myriad surface marks as expected for the grade. The pleasing light yellow surfaces have splashes of straw-gold toning on the high points, and retain traces of luster in the protected areas. NGC ID# 268F, PCGS# 8902

1850 Double Eagle, AU50
Always in High Demand

17961 1850 AU50 PCGS. The first regular year of issue in the double eagle series enjoys a large mintage that exceeds 1.1 million coins. Although the 1850 survives to a great extent, most examples are well-circulated and demand always outpaces supply. The stars are a trifle soft, and blending occurs over Liberty's curls and the eagle's wingtips, but the impression is generally well-defined. Orange-gold surfaces are predictably abraded. NGC ID# 268F, PCGS# 8902

1851 Twenty Dollar, AU58
Some Luster Remains

17962 1851 AU58 NGC. Partial luster remains in the fields of this near-Mint type coin, complementing bold design elements that show only trivial high-point wear. Scattered abrasions are typical of the grade, including a couple of more prominent ones near ES OF on the reverse border. The bright yellow-gold color is a familiar sight among Philadelphia double eagles coined prior to the 1854, when California ore fueled much of this denomination's production. NGC ID# 268H, PCGS# 8904

**1851-O Double Eagle, XF40
Smooth, Appealing Surfaces**

17963 1851-O XF40 PCGS. Variety 1. The orange-gold surfaces of this collectible New Orleans double eagle are remarkably smooth considering the grade and mint of manufacture. Most of the fields are lightly worn, although the most protected regions show remnants of prooflike reflectivity, indicating that this piece was an early strike from a freshly lapped die pair. Partial removal of the designer's initials at the base of the neck truncation suggest against an early die state. NGC ID# 268J, PCGS# 8905

17964 1851-O — Improperly Cleaned — NGC Details. AU. Variety 2. Some light wear shows on the well-detailed design elements of this popular Type One issue, but the orange-gold surfaces are lightly abraded throughout. Traces of prooflike reflectivity are evident in sheltered areas, despite the noted cleaning. NGC ID# 268J, PCGS# 8905

17965 1853 AU55 NGC. As a moderately available Type One double eagle from the 1850s, the 1853 is popular with type collectors as well as gold specialists. This is an appealing greenish-gold example with lightly worn and abraded surfaces. Partial mint luster remains around the devices and within Liberty's hair strands. A thin band of Mint grime curves above the rays on the reverse. NGC ID# 268M, PCGS# 8908

**1853-O Twenty Dollar, AU Details
Above-Average Strike**

17966 1853-O — Improperly Cleaned — NGC Details. AU. Variety 1. With 400 to 500 examples known (mostly in VF to XF condition), Doug Winter explains that "the 1853-O is much scarcer than the 1850-O, 1851-O, and 1852-O." This AU representative features an above-average strike with strong stars and curls. Moderate hairlines over yellow-gold surfaces are a tell-tale sign of improper cleaning, though most collectors would be delighted to include this No Motto O-mint twenty in their sets. NGC ID# 268N, PCGS# 8910

17967 1855-S XF45 NGC. Considerable luster is still present on this Choice XF double eagle, featuring a Medium S mintmark. Myriad marks, mostly trivial, are evident on each side, including the rims, as expected for this lightly circulated example. NGC ID# 268X, PCGS# 8916

17968 1856-S AU53 PCGS. Liberty's curls, the stars, and the eagle are fully struck, showing the slightest bit of friction over the highest points. The surfaces exhibit deep orange-gold color and light field chatter with a couple of prominent reed marks left of the portrait. The S-mint produced nearly 1.2 million double eagles in its third year of operation. NGC ID# 2692, PCGS# 8919

**1857 Liberty Double Eagle, AU55
Type One Philadelphia Issue**

17969 1857 AU55 PCGS. The 1857 Liberty double eagle claims a mintage of 439,375 pieces, but the issue is surprisingly difficult to locate in high grade. This impressive Choice AU specimen exhibits just a trace of wear on the well-detailed design elements and the lightly abraded orange-gold surfaces retain most of their original mint luster. NGC ID# 2693, PCGS# 8920

**1857 Twenty Dollar, AU58
Underrated and Genuinely Scarce**

17970 1857 AU58 NGC. This Philadelphia No Motto twenty issue is underappreciated in AU and Mint States grades, providing collectors the opportunity to obtain a genuinely scarce high-end example for a reasonable price. This near-Mint representative displays razor-sharp central elements that soften toward the margins. Green-gold surfaces are lightly abraded and retain much luster. NGC ID# 2693, PCGS# 8920

17971 1857-S XF45 PCGS. The 1857-S Liberty double eagle has become famous in recent years because of its presence in recent shipwreck finds. The vivid orange-gold surfaces of this lightly worn, lightly abraded specimen retain traces of original mint luster. Housed in a green label holder. NGC ID# 2696, PCGS# 8922

17972 1857-S XF45 NGC. It is likely that this Choice XF example, with its Medium S mintmark, was known long before the S.S. *Central America* treasure was discovered. The myriad surface marks on this light yellow double eagle are expected for the grade, and mostly inconsequential. NGC ID# 2696, PCGS# 8922

17973 1858-S XF45 PCGS. Myriad surface marks are frequently encountered on these large gold coins that served in commerce for a period of time. Paper currency was unpopular in California in the 1850s, the citizens favoring gold and silver coins. This light yellow example exhibits hints of luster in the protected areas. NGC ID# 2699, PCGS# 8925

17974 1858-S XF45 PCGS. This lightly abraded, medium-gold 1858-S displays Choice XF definition over partially lustrous, medium-gold surfaces with orange at the rims. Most marks are of the minor variety, although a small gouge at WE of TWENTY is noted. NGC ID# 2699, PCGS# 8925

17975 1860-S XF45 NGC. This Choice XF Liberty double eagle exhibits only light wear on the well-detailed design elements, with moderately abraded orange-gold surfaces that retain traces of original mint luster. From a mintage of 544,950 pieces. NGC ID# 269F, PCGS# 8931

17976 1860-S AU53 NGC. Glowing golden-orange luster complements well-struck surfaces that show scattered, mostly light abrasions. Both sides are better-preserved than might be expected at this grade level. This piece is in a bit better grade than usually encountered for survivors of this production of slightly more than a half-million coins. NGC ID# 269F, PCGS# 8931

17977 1861 XF45 PCGS. An attractive Choice XF specimen of the Type One design, with only light wear on the well-detailed design elements and minor abrasions on the pleasing yellow and orange-gold surfaces. NGC ID# 269G, PCGS# 8932

1861 Type One Twenty, AU55 Collector Favorite for Type

17978 1861 AU55 NGC. A Choice AU representative from a mintage of almost 3 million coins, produced during the first year of the Civil War as the hoarding of coinage began. This lovely piece displays attractive yellow and green-gold tones, with a few hints of orange present. The reverse exhibits a die crack at the upper portions of TES of STATES. As expected at this grade level, a number of scattered marks appear.

Ex: Bently Collection / Long Beach Signature (Heritage, 6/2014), lot 5873, where it brought \$2,937.50. NGC ID# 269G, PCGS# 8932

17979 1861 — Obverse Improperly Cleaned — NGC Details. Unc. Signs of cleaning are slight on this lovely 1861 double eagle, which boasts radiant luster over orange-gold surfaces. A noticeable tick appears in the left obverse field and some smaller abrasions are scattered about, but the surfaces nonetheless boast much appeal and a good strike.

Ex: Central States Signature (Heritage, 4-5/2010), lot 3892.

1861 Twenty Dollar, MS60 Original Mint Luster

17980 1861 MS60 PCGS. An Uncirculated example of one of the most popular type coins in the Type One double eagle series. This 1861 twenty displays original yellow-gold luster and well-defined motifs. Heavy abrasions on each side determine the grade. Although not truly scarce in Mint State, the 1861 does present a challenge in such condition due to type collector demand. NGC ID# 269G, PCGS# 8932

17981 1863-S AG3 PCGS. CAC. A well-worn, but problem-free, example of this popular Type One issue. The orange-gold surfaces are evenly worn and lightly abraded and the central design elements are complete in outline, but the rim is worn flat on the reverse. NGC ID# 269R, PCGS# 8940

17982 1863-S VF35 PCGS. This Choice VF example displays original orange-gold color with hints of luster in the most protected regions of the fields. Wear is even and consistent with the grade. Neither side exhibits obtrusive abrasions. A popular Type One San Francisco issue. NGC ID# 269R, PCGS# 8940

1864-S Liberty Twenty, AU55 Elusive Type One Issue in High Grade

17983 1864-S AU55 PCGS. The 1864-S was produced in large numbers, but few examples were saved by contemporary collectors and most were exported or melted during the last year of the Civil War. This attractive Choice AU specimen is lightly worn, well-struck, and lightly abraded, with orange-gold surfaces that retain traces of original mint luster. NGC ID# 269T, PCGS# 8942

17984 1865-S XF45 NGC. Small S mintmark. A large number of discoveries from the *S.S. Republic* and the *Brother Jonathan* shipwrecks make the 1865-S much more available than it was prior to the seawater finds. Most of the salvage coins grade About Uncirculated or finer, while the present coin almost certainly never saw the ocean. Original orange-gold surfaces display red and olive overtones amid traces of mint luster to justify the Choice XF designation. We note a few light marks and a small rim bump below E of TWENTY. NGC ID# 269V, PCGS# 8944

17985 1865-S XF45 NGC. The reverse has a Small S mintmark. Faint violet tones outline the devices of this light yellow double eagle that was struck the year of the *S.S. Brother Jonathan* and *S.S. Republic* disasters, but this piece is likely not from either treasure. NGC ID# 269V, PCGS# 8944

1865-S Twenty Dollar, AU58 Last Readily Collectible Type One Issue

17986 1865-S AU58 NGC. With a mintage exceeding 1 million coins, the 1865-S represents the final readily collectible issue in the No Motto short set. The San Francisco Mint struck another 120,000 Type One twenties in 1866, but they are exceedingly scarce. This nearly Uncirculated offering presents a remarkable degree of remaining frosty luster over luminous rose-gold surfaces. Strike is good, if a touch incomplete, and abrasions are lightly scattered over each side. NGC ID# 269V, PCGS# 8944

**1865-S Liberty Twenty, AU58
Type One San Francisco Issue**

17987 1865-S AU58 PCGS. From a substantial mintage of just over 1 million pieces, the 1865-S Liberty double eagle was seldom seen in Mint State condition before recent shipwreck finds augmented the supply of high-grade specimens considerably. This impressive near-Mint example shows light wear on the well-detailed design elements and the orange-gold surfaces exhibit the expected number of minor abrasions for the grade. NGC ID# 269V, PCGS# 8944

**1866 Motto Double Eagle, AU50
First Type Two Issue**

17988 1866 Motto AU50 NGC. The 1866 represents the first Type Two issue in the series and is highly collectible as such. Nearly 700,000 examples were struck, but high-grade survivors are surprisingly scarce. Brief circulation fails to diminish luster within the protected areas or obscure the major design elements, though light blending is seen. Peach-gold with minimal abrasions and interesting cracks through the reverse legend. NGC ID# 269X, PCGS# 8949

17989 1866-S Motto VF25 PCGS. A VF25 representative from the first year of the Type Two design, this coin exhibits even wear on both sides, with legible LIBERTY and most prongs on the coronet still distinguishable. The orange-gold surfaces show only minor abrasions. NGC ID# 26B2, PCGS# 8950

17990 1867-S AU53 PCGS. Luster remains across lightly marked, yellow-gold surfaces with high point wear from its short time in circulation. The 1867-S is readily available in circulated grades but scarce in Mint State, making About Uncirculated examples the logical selection for many collectors. NGC ID# 26A2, PCGS# 8952

**1867-S Double Eagle, AU55
Frosty Luster Remains**

17991 1867-S AU55 NGC. Double eagle production reached 920,750 coins at the San Francisco mint in 1867. In lower circulated grades the 1867-S is one of the more collectible Type Two twenties. Examples quickly become scarce, however, at the Choice AU level. The design recesses retain frosty luster that illuminates abraded yellow-gold surfaces. Partial star and curl detail is typical. A singular tick occurs below the eye. NGC ID# 26A2, PCGS# 8952

17992 1868-S AU55 NGC. This attractive Choice AU specimen exhibits just a touch of wear on the high points of the well-detailed design elements, and the orange-gold surfaces are lightly abraded, aside from one arcing scratch that extends from Liberty's nose into the obverse field. NGC ID# 26A4, PCGS# 8954

**1869-S Twenty Dollar, Lustrous AU58
Difficult to Upgrade**

17993 1869-S AU58 NGC. Both sides are luminous with a remarkable degree of frosty luster. The stars mostly lack centers, but Liberty's curls are relatively well-defined and the eagle's neck and wing feathers are bold. Numerous abrasions, some shallow and others more profound, appear throughout. This light yellow-gold Type Two double eagle would be exceedingly difficult to upgrade. NGC ID# 26A6, PCGS# 8956

**1870-S Liberty Twenty, AU58
Reflective Fields, Sharp Eye Appeal**

17994 1870-S AU58 NGC. This vibrant, medium-gold 1870-S displays a sharp strike and semiprooflike fields. Only light field chatter reveals its brief stint in circulation. While 1870 is a numismatically significant year with the opening of the Carson City Mint as well as several scarce-to-rare denominations, it was business as usual at the San Francisco Mint for double eagles. Nearly 1 million pieces were struck. This near-Mint example shows a cluster of small marks below star 1 but no major abrasions. NGC reports just 77 numerically finer pieces (9/17). NGC ID# 26A9, PCGS# 8959

17995 1871 XF45 NGC. The 1871 Liberty double eagle is a low-mintage Philadelphia issue and high-grade examples are quite elusive. The yellow and greenish-gold surfaces of this Choice XF specimen retain traces of original mint luster, despite a large number of insignificant, minor abrasions. Only light wear is evident on the design elements. NGC ID# 26AA, PCGS# 8960

17996 1871-S AU58 NGC. Like most Type Two double eagles, the 1871-S is a challenging issue in Mint State. This attractive near-Mint specimen is lightly worn and moderately abraded for the grade, with lustrous yellow and orange-gold surfaces. NGC ID# 26ND, PCGS# 8962

17997 1871-S AU58 NGC. A touch of softness shows on the obverse stars on the left, but only a trace of friction is evident on the central design elements of this impressive near-Mint specimen. The lightly abraded orange-gold surfaces retain much original mint luster. NGC ID# 26ND, PCGS# 8962

17998 1871-S AU58 PCGS. CAC. Micro S mintmark. Soft mint luster remains across most of the greenish-gold surfaces of this slightly better-date San Francisco twenty. Minor field chatter and a bit of blending on the upper hair strands support the near-Mint assigned grade. Scattered deep-gray accents confirm the CAC-endorsed, original surfaces. NGC ID# 26ND, PCGS# 8962

17999 1872-S AU58 PCGS. The pleasing orange-gold surfaces of this attractive near-Mint specimen retain almost all of their original mint luster, but a number of minor abrasions are evident, mostly on the obverse. Only the slightest trace of wear shows on the design elements. NGC ID# 26AF, PCGS# 8965

1872-S Double Eagle, MS61 Always Challenging in Mint State

18000 1872-S MS61 PCGS. Micro S mintmark. The overwhelming majority of 1872-S twenties are in circulated condition, and even low-level Mint State coins are scarce. This fully lustrous example is clearly Uncirculated with brassy-gold color. Numerous bagmarks reside on the reflective fields, although the contact is mostly frictionlike and few individually discernible marks exist. Only a bit of central weakness precludes a sharp strike. PCGS reports just nine numerically finer coins (10/17). NGC ID# 26AF, PCGS# 8965

18001 1873 Open 3 MS61 PCGS. The 1873 Liberty double eagle with an Open 3 in the date is more available than its Closed 3 counterpart. This well-detailed Mint State example exhibits vivid orange-gold surfaces with the expected number of minor contact marks for the grade and vibrant mint luster throughout. NGC ID# 26AL, PCGS# 8967

18002 1873 Open 3 MS61+ NGC. CAC. Green and rose-gold coloration graces the entirety of this radiantly frosted Type Two twenty. Although well-struck in most places, a hint of softness over the curls is to be expected. Surprisingly appealing for the grade. NGC ID# 26AL, PCGS# 8967

1873 Liberty Double Eagle, MS62 Popular Type Two, Open 3 Variant

18003 1873 Open 3 MS62 PCGS. The double eagle dies were modified part way through the year in 1873 because Chief Coiner A. Loudon Snowden thought the Closed 3 in the date looked too much like an 8. This attractive MS62 specimen exhibits sharply detailed design elements and lustrous orange-gold surfaces that are lightly abraded, aside from a long thin scratch in the left obverse field. NGC ID# 26AL, PCGS# 8967

1873 Open 3 Twenty Dollar, MS62+ Terrific Eye Appeal

18004 1873 Open 3 MS62+ PCGS. CAC. Examples of the 1873 Open 3 double eagle are roughly 10 times scarcer in MS63 or higher than they are in MS62, making this Plus-graded example a good option for collectors balancing quality and affordability. The surfaces certainly appear cleaner than the assessment suggests, with a singular mark on the chin and small ticks and grazes elsewhere. Even rose-gold color over each side. Bold strike. NGC ID# 26AL, PCGS# 8967

18005 1873 Open 3, Doubled Die Obverse, FS-101, MS60 NGC. LIBERTY is die doubled south, with the widest spread on the first four letters. A sun-gold Type Two twenty with good luster and a sharp strike. The reverse has claims to a higher grade, though the obverse displays the expected amount of individually minor marks. NGC ID# 26AH, PCGS# 148749 Base PCGS# 8967

1873 Liberty Twenty, MS62 Open 3, Doubled Die Obverse

18006 1873 Open 3, Doubled Die Obverse, FS-101, MS62 PCGS. CAC. The die doubled Open 3 obverse, showing a noticeable spread on LIBERTY. This sharp, dramatically lustrous MS62 example might have garnered a higher grade were it not for a moderate graze on Liberty's jaw. Nonetheless, the aesthetic appeal is superb for the grade. The Open 3 coins were struck later in the year because the Closed 3 looked too much like an 8. NGC ID# 26AH, PCGS# 148749 Base PCGS# 8967

**1873-S Liberty Double Eagle, MS61
Closed 3 Variant**

18007 1873-S Closed 3 MS61 PCGS. The 1873-S Liberty double eagle with a Closed 3 in the date was struck early in the year, before the new dies with the Open 3 arrived from Philadelphia. This impressive Mint State specimen exhibits well-detailed design elements and the pleasing orange-gold surfaces show the expected number of minor contact marks for the grade. Both sides radiate vibrant mint luster. NGC ID# 26AL, PCGS# 8969

**1873-S Double Eagle, MS61
Closed 3, Vibrant Mint Frost**

18008 1873-S Closed 3 MS61 NGC. The Closed 3 variety is usually encountered among S-mint double eagles struck in 1873. Survivors are rarely found finer than MS61. This luminous peach-gold representative features vibrant mint frost and a good strike for the issue, though the lower stars and middle curls are incomplete. Numerous abrasions are peppered over each side. NGC ID# 26AL, PCGS# 8969

**1873-S Twenty Dollar, AU58
Scarce Open 3 Variant**

18009 1873-S Open 3 AU58 NGC. The San Francisco Mint received new Open 3 dies late in the year. This variety is about two to three times scarcer than its Closed 3 counterpart. Each side presents faint red-gold coloration and well-struck devices. The star radials are almost entirely clear. A trace of rub appears on the hair bun and lower curls, precluding a full Mint State assessment. Moderately abraded. NGC ID# 26AM, PCGS# 8979

**1874 Double Eagle, MS61
Frosty Peach-Gold Example**

18010 1874 MS61 PCGS. The 1874 transitions from relatively collectible in high AU grades to very scarce in mint condition. Uncirculated representatives are generally seen in MS60 or MS61. Higher-graded examples are downright rare. This is a well-struck Type Two twenty with frosty luster and pleasing peach-gold color. The stars and wingtips are crisp, while the curls are somewhat blended. Expectedly abraded. NGC ID# 26AN, PCGS# 8970

**1874 Liberty Double Eagle, MS61
Seldom Encountered Finer**

18011 1874 MS61 NGC. Typically, Type Two double eagles can be found in circulated grades with little difficulty, but Mint State specimens are elusive. This rule holds true for the 1874 Liberty double eagle, which claims a mintage of 366,800 pieces, but is seldom encountered in grades above MS61. This attractive Mint State piece displays well-detailed design elements and lustrous orange-gold surfaces, with the expected number of minor contact marks for the grade. NGC ID# 26AN, PCGS# 8970

**1874 Liberty Double Eagle, MS61
Ideal Type Two Representative**

18012 1874 MS61 PCGS. PCGS reports the lion's share of grading events for the 1874 Philadelphia issue, counting just 50 numerically finer examples than the present MS61 coin (10/17). Like most Type Two double eagles, the 1874 is scarce in any Uncirculated grade and rare in high Mint State conditions. This vibrant and frosted coin displays a good strike with rich-gold color. The expected obverse chatter exists, but no heavy marks distract the eye. Unbroken cartwheel luster sweeps across both sides. NGC ID# 26AN, PCGS# 8970

**1874 Double Eagle, MS61
Very Scarce in Mint Condition**

18013 1874 MS61 PCGS. The 1874 Type Two twenty dollar is seldom found in Mint State. Nearly all Uncirculated examples fall within the range of MS60 or MS61, and finer coins are rare. This conditionally scarce double eagle has rich orange-gold color throughout. Each side is awash in radiant luster, and the relief elements are strongly brought-up. The surfaces display myriad ticks and abrasions. NGC ID# 26AN, PCGS# 8970

18014 1874-CC VF30 NGC. Variety 4-A. A die chip on Liberty's neck, near the hair, confirms this variety, which is unlisted in Doug Winter's series reference. The vivid orange-gold surfaces show many tiny abrasions, but none are unduly distracting. The moderately worn design elements retain much interior detail. NGC ID# 26AP, PCGS# 8971

**1874-CC Double Eagle, Choice VF
Red-Gold and CAC-Approved**

18015 1874-CC VF35 NGC. CAC. Variety 2-A. A die chip occurs behind Liberty's eye. This red-gold Choice VF double eagle exhibits slightly more evidence of circulation than we are accustomed to seeing, offering budget-minded collectors an opportunity to obtain an original twenty dollar representative from the beloved Carson City facility. Most stars show clear radials. Blending on the curls, shield, and feathers is minimal for the grade. NGC ID# 26AP, PCGS# 8971

18016 1874-CC — Reverse Scratched — NGC Details. AU. Variety 1-A. A V-shaped scratch in the right reverse field constitutes the noted damage, but this still-attractive specimen is lightly worn and lightly abraded otherwise. The orange-gold surfaces retain much of their original mint luster. NGC ID# 26AP, PCGS# 8971

18017 1874-S MS61 NGC. Block S. The three basic mintmark styles are described as a Small S, Broad S, and Block S, this piece representing the last of those styles. Although countless surface marks are evident, limiting the grade, all are trivial and inconsequential. Both sides exhibit frosty yellow luster. Examples are rare in higher grade, and NGC has only certified 43 numerically finer examples (10/17). NGC ID# 26AR, PCGS# 8972

18018 1874-S MS61 NGC. This well-detailed Type Two double eagle exhibits some softness on the obverse stars on the left, and the orange-gold surfaces show many minor, grade-consistent contact marks, but much original mint luster remains intact. NGC has graded 43 numerically finer examples (9/17). NGC ID# 26AR, PCGS# 8972

18019 1875 MS61 PCGS. Although a few other Type Two double eagles are more plentiful in Mint State grades, the 1875 is an excellent candidate for the design collector who seeks a single example of each of three Liberty double eagle types. This lovely piece, while exhibiting trivial grade-consistent marks, has frosty yellow luster and displays faint green and rose overtones. NGC ID# 2547, PCGS# 8973

18020 1875 MS62 NGC. For Type Two double eagles, MS62 is an excellent grade option to obtain an attractive piece at an affordable price. The NGC Price Guide values MS63 examples of this issue at more than double the price of MS62 pieces. The same relationship holds true for all common Type Two twenties. This piece has faint orange overtones on its frosty yellow-gold luster with scattered marks that are consistent with the grade. NGC has only certified 32 finer examples (10/17). NGC ID# 2547, PCGS# 8973

18021 1875 MS62 PCGS. There have been no hoards or treasures containing large quantities of Type Two double eagles, and the short production span of just 11 years from 1866 to 1876 means that these coins are much scarcer than either Type One or Type Three double eagles. This pleasing Mint State piece has scattered surface marks and frosty yellow luster with a small streak of dark toning at the upper reverse. NGC ID# 2547, PCGS# 8973

18022 1875 MS62 PCGS. With a reported mintage of 295,740 pieces, the 1875 Liberty double eagle is the only gold denomination of the date that was produced in anything like normal numbers. This impressive MS62 example offers well-detailed design elements and lustrous orange-gold surfaces that are lightly marked, aside from two obverse scrapes, one on the neck, and another in the right obverse field. PCGS has graded 87 numerically finer examples (3/17). NGC ID# 2547, PCGS# 8973

**1875-CC Double Eagle, XF45
Old-Time Patina**

18023 1875-CC XF45 PCGS. Variety 4-A. A lightly circulated Carson City gold piece with an old-time olive-gold look and hints of luster in the fields. Scattered abrasions do not detract considering the grade. The 1875-CC is one of the more plentiful dates in the Carson City short set, ideal for type collectors seeking a single coin from this mint. NGC ID# 26AT, PCGS# 8974

**1875-CC Double Eagle, XF45+
Glowing Luster in the Recesses**

18024 1875-CC XF45+ PCGS. CAC. Variety 2-B. This issue often represents the Carson City Mint in type sets and is a popular choice for those in search of a Type Two double eagle. Struck to the extent of 111,151 coins, survivors are readily found in XF and AU grades, and occasionally in Mint State. This all-original khaki-gold twenty showcases glowing luster within the recesses. The strike is a touch soft, and friction is consistent with the Choice XF grade level. NGC ID# 26AT, PCGS# 8974

**1875-CC Twenty Dollar, Unc Details
Seldom Offered in Mint State**

18025 1875-CC — Improperly Cleaned — NGC Details. Unc. Variety 2-B. The 5 is mostly under the curl, and die lines appear near the mintmark. The 1875-CC twenty dollar is most often seen in XF to AU condition. Mint State survivors are scarce. This yellow-gold double eagle has the sharpness of an Uncirculated coin, but its overly bright surfaces suggest a cleaning at some point. The stars and curls are bold for a Type Two coin. Several prominent reeding marks occur on the obverse. NGC ID# 26AT, PCGS# 8974

18026 1875-S MS61 PCGS. The 1875-S is readily available thanks to European repatriates. This example shows light abrasions from storage and counting intermixed with minute field chatter. A short abrasion near the nose in the left field is slightly more prominent than the nearby marks. Full mint luster flashes from the frosted, rich-gold surfaces. NGC ID# 26AU, PCGS# 8975

18027 1875-S MS61 PCGS. Lustrous, sun-gold surfaces show few marks for this Type Two San Francisco issue. Lilac overtones add eye appeal. We note a pair of small nicks on the cheek and a bit of struck-in grease below star 13. Sharply struck for the issue, which saw much of its 1.2 million-piece mintage exported with numerous coins returned from foreign holdings in recent decades. NGC ID# 26AU, PCGS# 8975

**1875-S Liberty Double Eagle, MS62
Conditionally Rare Any Finer**

18028 1875-S MS62 NGC. An attractive orange-gold specimen of this popular Type Two issue, with sharply detailed central design elements and just a touch of softness on some star centers. The surfaces show a number of grade-consistent minor contact marks but vibrant mint luster radiates from both sides. From a mintage of 1.2 million pieces, NGC has graded only 16 numerically finer examples (9/17). NGC ID# 26AU, PCGS# 8975

**1875-S Liberty Twenty, MS62
Rarely Seen Finer**

18029 1875-S MS62 PCGS. A large mintage of 1.2 million Liberty double eagles was accomplished at the San Francisco Mint in 1875, but the issue is seldom encountered in grades above the MS62 level. This attractive MS62 specimen offers sharply detailed design elements and lustrous orange-gold surfaces that show the minimum number of minor contact marks for the grade. PCGS has graded 25 numerically finer examples (10/17). NGC ID# 26AU, PCGS# 8975

**1875-S Liberty Twenty, MS62
Appealing Type Two Representative**

18030 1875-S MS62 PCGS. CAC. The medium orange-gold surfaces boast copious luster throughout both sides on this popular Type Two issue, among the larger San Francisco emissions of the era. Scattered contact marks are as expected for the grade, none terribly overt. Liberty's cheek shows only small ticks. PCGS has graded 25 numerically finer examples and CAC has given its green approval sticker to 23 examples of the issue in this grade and five finer (9/17). NGC ID# 26AU, PCGS# 8975

18031 1876 MS61 NGC. According to Mint State totals reported in the NGC Census, the 1876 is the fourth most plentiful Type Two double eagle in MS60 and finer grades, yet the total number of pieces so graded is less than one-fourth the total for the most plentiful issue, the 1873 Open 3. Despite a modest MS61 grade assessment, this frosty and fully lustrous orange-gold double eagle exhibits minimal surface marks and maximum eye appeal. NGC ID# 26AV, PCGS# 8976

18032 1876 MS61 PCGS. Light Motto Reverse. A sharp strike and blazing mint luster define this vibrant double eagle. Brilliant yellow-gold color shines beneath lightly abraded surfaces, with strong eye appeal and Mint-fresh flash. NGC ID# 26AV, PCGS# 8976

**1876 Liberty Twenty, MS62
Final Type Two Issue**

18033 1876 MS62 NGC. From a mintage of 583,905 pieces, the 1876 Liberty double eagle is relatively available in grades up to the MS62 level, but finer coins are elusive. This attractive MS62 specimen displays well-detailed design elements and lustrous orange-gold surfaces with a number of scattered, minor contact marks on both sides. The 1876 is always popular as the final issue of the Type Two design. NGC ID# 26AV, PCGS# 8976

**1876 Double Eagle, MS62
Sharply Struck Centennial-Year Issue**

18034 1876 MS62 PCGS. The Centennial 1876 double eagle marked the final year of the Type Two reverse — this one, featuring a new Light Motto hub with six rays between the eagle's wing and the thick club ray beneath the first S in STATES. It is a sharply struck example, with light chatter from bag storage some deep-gray accents over attractive medium-gold surfaces with hints of olive at the margins. PCGS shows just 54 numerically finer examples (10/17). NGC ID# 26AV, PCGS# 8976

1876 Double Eagle, Frosty MS63

18035 1876 MS63 NGC. Examples of the 1876 P-mint twenty are offered with regularity through MS62, but the number of public offerings declines considerably in MS63 or higher. That trend follows the dwindling certified populations at those esteemed levels. This thickly frosted Type Two double eagle features well-defined motifs over luminous peach-gold surfaces. Field grazes and scattered ticks are fewer in number and less severe than often seen. Census: 46 in 63 (1 in 63+), 10 finer (9/17). NGC ID# 26AV, PCGS# 8976

**1876-CC Double Eagle, XF40
Last Type Two Issue**

18036 1876-CC XF40 PCGS. Variety 5-B. There are 10 different combinations of seven obverse dies and four reverse dies that were used for the coinage of 138,441 double eagles at Carson City in 1876, the last year of the Type Two design. Variety 5-B is slightly scarcer than some other varieties of this issue. This honey-gold example exhibits light wear and myriad trivial marks of little consequence. NGC ID# 26AW, PCGS# 8977

**1876-CC Liberty Twenty, XF45
Type Two Carson City Issue**

18037 1876-CC XF45 PCGS. Variety 1-A. The 1876-CC Liberty double eagle claims a relatively generous mintage of 138,441 pieces, making it an available issue in today's market. It also represents the final year of the Type Two design, an important consideration for type purposes. This Choice XF specimen shows only light wear on the design elements and the still-lustrous orange-gold surfaces are lightly abraded, aside from a vertical scratch across Liberty's nose. NGC ID# 26AW, PCGS# 8977

18038 1876-S MS62 NGC. The second most plentiful issue in the Type Two double eagle series, the 1876-S has an NGC Mint State population of less than half that of the 1873 Open 3 double eagle. This is an excellent type coin for the design collector. The surfaces have no marks of any consequence. Frosty yellow-gold luster enjoys delicate rose overtones. NGC ID# 26AX, PCGS# 8978

18039 1876-S MS62 PCGS. As usually seen, the reverse grades at least a point finer than the obverse — sheltered from abrasions by its design and the somewhat lower relief of the motifs. Minor marks on Liberty's cheek and in the left obverse field exist, yet this example is well-struck and quite vibrant with dazzling mint luster. NGC ID# 26AX, PCGS# 8978

**1876-S Twenty Dollar, MS62
Frosty and Well-Struck**

18040 1876-S MS62 PCGS. The 1876-S double eagle sees a dramatic fall in its certified population from MS61 to MS62 and again from MS62 to MS63. This grade level provides collectors with a blend of conditional scarcity and affordability without sacrificing quality. Copious mint frost issues from attractive yellow-gold surfaces. The stars are well-formed, as are Liberty's curls and the eagle's feathers. Expectedly abraded. NGC ID# 26AX, PCGS# 8978

**1877 Double Eagle, Lustrous MS62
Inaugural Type Three Date**

18041 1877 MS62 NGC. This is just about the nicest 1877 one can hope to add to his or her collection without spending in excess of five figures. Each lustrous, rose-gold side boasts the eye appeal of a higher-graded representative. Scattered abrasions limit the grade. Hair definition is notably strong. There are 18 finer submissions at PCGS (9/17). NGC ID# 2547, PCGS# 8982

18042 1877-CC VF25 PCGS. Variety 1-A. The orange-gold surfaces of this VF25 Liberty double eagle are lightly abraded for the grade, and moderate wear shows on the design elements. LIBERTY remains legible and much interior detail in the hair remains intact. NGC ID# 26AZ, PCGS# 8983

18043 1877-S MS61 NGC. Some of the obverse stars show a touch of softness on the centers, but the central devices of this attractive Mint State specimen are sharply detailed. The lustrous orange-gold surfaces show the minimum number of minor contact marks for the grade. NGC ID# 254B, PCGS# 8984

**1878 Liberty Double Eagle, MS62
Elusive Issue in Higher Grades**

18044 1878 MS62 NGC. The 1878 Liberty double eagle is a plentiful Type Three issue in lower grades, but it becomes very scarce above the MS62 level. This impressive MS62 example exhibits sharply detailed design elements and lustrous orange-gold surfaces that show a scattering of grade-consistent contact marks on both sides. NGC has graded 36 numerically finer examples (9/17). NGC ID# 26B3, PCGS# 8985

18045 1878-S MS61 NGC. This satiny yellow-gold Type Three double eagle displays sharp design elements and remarkably minimal surface chatter for the grade. Only under a loupe do scattered light grazes become distracting. The 1878-S is scarce in Uncirculated condition. NGC ID# 338K, PCGS# 8987

18046 1878-S MS61 PCGS. The pleasing orange-gold surfaces of this impressive Mint State specimen radiate vibrant mint luster on both sides, and show the expected number of minor contact marks for the grade. The design elements are sharply detailed and eye appeal is outstanding. NGC ID# 338K, PCGS# 8987

18047 1879-S MS60 PCGS. Original olive-gold surfaces yield warm peach-gold luster and sharp design elements. Both sides of this Uncirculated 1879-S double eagle are heavily abraded, as the grade suggests, although eye appeal remains pleasing. Mint State Type Three double eagles from this period are much scarcer than coins from later decades. NGC ID# 26B9, PCGS# 8991

**1879-S Twenty Dollar, MS61
Obvious Reverse Die Doubling**

18048 1879-S MS61 PCGS. STATES OF AMERICA and IN GOD WE TRUST are nicely die doubled on this lustrous and crisply struck double eagle. The variety is currently unlisted in *CherryPickers'*, but will likely be listed in a future edition. Moderately abraded, but the only noticeable mark is a brief thin line at 1 o'clock.
Ex: Summer FUN Signature (Heritage, 6/2008), lot 2322, where it realized \$3,450. NGC ID# 26B9, PCGS# 8991

18049 1880 AU55 NGC. Rose accents complement this green-gold twenty. The motifs are sharp despite trivial high-point blending. Small marks congregate on Liberty's cheek and in the adjacent fields. The 1880 is the only obtainable Philadelphia double eagle from the first seven years of the decade. NGC ID# 26BA, PCGS# 8992

18050 1880 AU55 NGC. Only 51,456 double eagles were struck at the Philadelphia Mint in 1880. High-grade survivors are exceedingly scarce. This crisp red-gold example displays slight rub over the motifs and peppered abrasions on each side. Abundant mint luster remains. NGC ID# 26BA, PCGS# 8992

**1882-CC Liberty Double Eagle, XF40
Colorful Branch Mint Type Coin**

18051 1882-CC XF40 PCGS. Variety 1-A. Production of double eagles was resumed in 1882, after none were struck the previous two years, with an adequate mintage of 39,140 pieces. The issue is relatively available in circulated condition, but high-grade examples are elusive. This XF40 specimen shows some light wear on the well-detailed design elements and the lightly abraded orange-gold surfaces retain traces of original mint luster. NGC ID# 26BF, PCGS# 8997

1882-CC Liberty Twenty, XF45
Light Wear, Minor Abrasions

18052 1882-CC XF45 PCGS. Variety 1-B. The 1882-CC Liberty double eagle claims a mintage of 39,140 pieces, a small production total in absolute terms, but not unduly small in the context of the series. This Choice XF specimen shows the first C in the mintmark slightly higher than the second and a die crack through the base of TWENTY DOLLARS on the reverse. The pleasing orange-gold surfaces are lightly abraded and retain traces of original mint luster. Some light wear is evident on the strongly impressed design elements. NGC ID# 26BF, PCGS# 8997

1882-CC Liberty Twenty, AU50
Lightly Abraded Original Surfaces

18053 1882-CC AU50 PCGS. Variety 1-B. From a mintage of 39,140 pieces, the 1882-CC Liberty double eagle is a scarce issue at the AU50 grade level, and Mint State coins are quite elusive. This impressive AU representative shows just a trace of wear on the strongly impressed design elements, and the lightly abraded orange-gold surfaces retain traces of original mint luster. NGC ID# 26BF, PCGS# 8997

1882-S Twenty Dollar, Peach-Gold MS62

18054 1882-S MS62 PCGS. The accessibility of the 1882-S (1.1 million coins struck) decreases significantly in grades higher than MS62. Here is an appealing mint condition San Francisco double eagle that enjoys frosty, peach-gold surfaces. Nearly all design features are well-detailed, the sole exception being stars 9 through 13. NGC ID# 26BG, PCGS# 8998

1883-CC Liberty Double Eagle, XF45
Excellent CC-Mint Type Coin

18055 1883-CC XF45 NGC. Variety 2-A. Only light wear shows on the well-detailed design elements of this XF45 example, like the rounded prongs of the tiara and the hair curls, and the pleasing orange-gold surfaces are lightly abraded for the grade. Faint hints of original mint luster cling to protected areas on both sides. From a mintage of 59,962 pieces. NGC ID# 26BH, PCGS# 8999

18056 1883-S MS62 PCGS. An attractive MS62 example, with sharply detailed central design elements, but just a trace of softness on some star centers. The vivid orange-gold surfaces are lustrous and lightly marked, aside from a scrape near Liberty's chin. NGC ID# 26BJ, PCGS# 9000

18057 1883-S MS62 PCGS. The vivid orange-gold surfaces of this attractive MS62 specimen radiate vibrant mint luster throughout, with traces of prooflike reflectivity in sheltered areas. The design elements are sharply detailed and only minor contact marks are evident. NGC ID# 26BJ, PCGS# 9000

18058 1883-S Misplaced Date, FS-501, MS62 PCGS. Small Squat S. The top of a 3 or 8 lurks in the dentils below the right side of the second 8 in the date. The *Cherry-pickers'* variety is undesignated on the PCGS holder. The orange-gold surfaces are nicely struck and display only moderate marks. PCGS# 145737 Base PCGS# 9000

18059 1884-CC — Damage — NGC Details. XF. Variety 1-A. This lightly circulated Carson City double eagle has original red-gold color and partial luster that emanates from the hidden areas. The noted damage occurs in the form of a wide scrape out from the upper nose of Liberty into the left field. NGC ID# 26BK, PCGS# 9001

1884-CC Double Eagle, AU50
Popular Type Three Carson City Issue

18060 1884-CC AU50 PCGS. Variety 1-A. The 1884-CC Liberty double eagle is a popular Type Three branch mint issue, from a mintage of 81,139 pieces. This attractive AU specimen shows just a touch of wear on the strongly impressed design elements, and the lustrous orange-gold surfaces are lightly marked for the grade. The overall presentation is most appealing. NGC ID# 26BK, PCGS# 9001

1884-CC Double Eagle, AU53
Glowing Remnants of Luster

18061 1884-CC AU53 PCGS. The 1884 *Mint Director's Annual Report* noted that "gold deposits, coinage, and work at the [Carson City Mint] varied but little from that of the previous year." Double eagle output increased to 81,139 pieces from just under 60,000 coins in 1883. Remaining luster glows from the stars and other protected areas of this green-gold twenty. Abrasions are unobtrusive, and strike detail is crisp with only slight high point wear. NGC ID# 26BK, PCGS# 9001

18062 1884-S MS61 PCGS. This is a colorfully accented and lustrous orange-gold twenty with glimpses of rose and lilac especially on the reverse. The strike is characteristically sharp for this San Francisco issue. Light abrasions are typical, too, defining the assigned grade but they do little to diminish the Mint-fresh eye appeal. NGC ID# 26BL, PCGS# 9002

18063 1884-S MS62 NGC. An impressive Type Three double eagle, with sharply detailed design elements and colorful orange-gold surfaces that show only scattered minor contact marks, with radiant mint luster on both sides. Eye appeal is terrific. NGC ID# 26BL, PCGS# 9002

1885-S Double Eagle, Sharply Struck MS63

18064 1885-S MS63 NGC. The 1885-S double eagle is a notably scarce issue in grades any finer than MS63. NGC reports a mere 11 pieces in numerically finer grades (9/17). This Select Uncirculated example displays sun-gold, reflective fields with a few light abrasions beneath the chin and only isolated, tiny marks. A sharp strike suggests that it is high-end for the assigned grade. NGC ID# 26BP, PCGS# 9005

1887-S Twenty Dollar, MS62
Seldom Offered Finer

18065 1887-S MS62 PCGS. Mint State examples of the 1887-S double eagle are infrequently seen compared to traditional common dates, and coins grading finer than the present MS62 piece are scarce. Sharp design elements melt into vibrant, frosty luster on each side that appears green-gold in the margins and transitions to warmer rose-gold hues in the centers. Scattered abrasions define the grade. NGC ID# 26BS, PCGS# 9007

1887-S Twenty Dollar, MS62
Highest Readily Collectible Grade

18066 1887-S MS62 PCGS. The typical 1887-S double eagle is apt to grade MS60. A majority of Mint State representatives fall within the range of MS61 to MS62, and the population sees a precipitous decline in higher grades. Each side exhibits luminous frost over light red-gold surfaces. Well-struck with grazes and marks throughout. NGC ID# 26BS, PCGS# 9007

18067 1888 MS62 PCGS. This P-mint emission is underappreciated for the rarity that it is in MS63 or better. Comparable MS62 representatives are still collectible, although they, too, are very scarce. This is a blended green and orange-gold Liberty Head double eagle with abundant mint frost. The devices are well-struck with a hint of central softness. NGC ID# 26BT, PCGS# 9008

18068 1888 MS62 PCGS. The 1888 is a scarcer date even though more than a quarter million pieces were struck, primarily because so many were shipped to Europe for international payments. It is not particularly rare in abraded MS60 to MS61 grades, but relatively unmarked pieces are infrequently found. Distributed tiny russet alloy flecks do not affect the technical grade. PCGS has graded 33 numerically finer examples (9/17).

Ex: Palm Beach Signature (Heritage, 3/2005), lot 7290. NGC ID# 26BT, PCGS# 9008

18069 1888 Doubled Die Reverse, FS-801, MS61 NGC. Bold die doubling is plain on all reverse peripheral legends, as well as E PLURIBUS UNUM and the arrows. This well-struck Uncirculated coin displays satiny straw-gold luster with light, scattered abrasions commensurate with the grade. Eye appeal is pleasing. NGC ID# 26BT, PCGS# 145738 Base PCGS# 9008

1888-S Liberty Double Eagle, MS63
Vivid Color, Vibrant Luster

18070 1888-S MS63 PCGS. From a substantial mintage of 859,600 pieces, the 1888-S Liberty double eagle is usually available in grades up to the MS63 level, but finer coins are very scarce. This impressive Select example offers vivid orange-gold surfaces, with vibrant mint luster and only minor signs of contact. The design elements are sharply detailed and eye appeal is outstanding. NGC ID# 26BU, PCGS# 9009

1888-S Double Eagle, MS63
Frosted, Appealing Surfaces

18071 1888-S MS63 NGC. The San Francisco Mint produced the lion's share of double eagles in 1888, nearly quadrupling the Philadelphia Mint's production of twenty dollar gold pieces. This Select Uncirculated example is the optimal collector grade, since few finer pieces exist despite the healthy 859,600-piece mintage. Frosted rich-gold surfaces display olive overtones and a crisp strike amplified by strong cartwheel luster. NGC shows just 39 numerically finer pieces in its Census (9/17). NGC ID# 26BU, PCGS# 9009

1888-S Twenty Dollar, MS63+
Seldom Available Any Finer

18072 1888-S MS63+ PCGS. Although examples of the 1888-S double eagle were discovered in the Saddle Ridge Hoard, no significant quantities of Mint State pieces were added to the population reports. This issue remains scarce above MS63 and prohibitively rare in Gem condition. The present Plus-graded Select example displays a sharp strike and frosty yellow-gold luster. Light surface grazes contribute to the grade. NGC ID# 26BU, PCGS# 9009

18073 1889-S MS62 NGC. Frosty mint luster issues from wheat-gold surfaces. The hair curls and feathers are crisply delineated, and minimal overt abrasions are noted for the grade. The Saddle Ridge Hoard added 422 1889-S double eagles to the certified population, 100 of which were in Mint State. NGC ID# 26BW, PCGS# 9012

1889-S Twenty Dollar, MS63
Uniformly Strong Strike

18074 1889-S MS63 PCGS. The 1889-S (774,700 coins produced) has a reputation for being widely available, but Select Uncirculated coins are conditionally scarce. Lightly marked surfaces display attractive orange-gold coloration and vibrant mint luster that rolls over each side. The strike is uniformly strong. NGC ID# 26BW, PCGS# 9012

1890-CC Liberty Double Eagle, AU50
Type Three Branch Mint Issue

18075 1890-CC AU50 PCGS. Variety 1-A. The second C in the mintmark is placed mostly to the left of the D in Dollar, identifying the Variety 1-A. The design elements of this lightly worn AU specimen are strongly impressed, aside from some incomplete detail on the eagle's tail, due to lapping. The pleasing orange-gold surfaces are lightly abraded and retain significant amounts of original mint luster. NGC ID# 26BY, PCGS# 9014

1890-CC Liberty Double Eagle, AU53
Lightly Worn, Lightly Abraded

18076 1890-CC AU53 PCGS. Variety 1-A. The 1890-CC Liberty twenty is a relatively available Type Three issue from the famous Carson City Mint. A respectable production total of 91,209 pieces was accomplished and many have been repatriated from European holdings in recent times. This lightly worn AU53 specimen is from a late state of the dies, with the effects of lapping visible on the eagle's tail. The colorful orange-gold surfaces are lightly abraded, with traces of original mint luster. NGC ID# 26BY, PCGS# 9014

1890-CC Double Eagle, AU53
Impressively Smooth and Appealing

18077 1890-CC AU53 NGC. Variety 1-A. The more interesting early die state, before lapping of the reverse partially effaced the eagle's tailfeathers and removed evidence of minor die doubling on the denomination (the latter is most easily visible along the top of TWENTY on the present coin). This About Uncirculated Carson City double eagle displays lustrous fields and remarkably smooth surfaces with original orange-gold coloration. Visual appeal surpasses expectations for the issue and grade. NGC ID# 26BY, PCGS# 9014

1890-CC Double Eagle, AU53
Appealing, Still-Lustrous Surfaces

18078 1890-CC AU53 PCGS. Variety 1-A. As one of the few somewhat available Type Three issues from the famous Western mint, this impressive AU53 example has both excellent eye appeal and a fine pedigree. The lightly worn surfaces display deep-orange and rose accents over attractive straw-gold patina. Abrasions are few for a Carson City double eagle, and a strong strike adds to the appeal. Ex: *The Paul S. Mory, Sr. Collection (Bowers and Merena, 6/2000)*, lot 1230. NGC ID# 26BY, PCGS# 9014

1890-S Twenty Dollar, MS63
Seldom Offered in Finer Grades

18079 1890-S MS63 PCGS. Uncirculated 1890-S double eagles are usually available with heavy abrasions, although MS63 coins are elusive and anything finer is scarce and priced accordingly. This is a collectible but well-preserved Select representative with sharp design elements and frosty yellow-gold mint luster. A few light marks on Liberty's cheek and neck limit the grade. NGC ID# 26BZ, PCGS# 9015

1890-S Double Eagle, MS63
Crisp Strike and Radiant Mint Frost

18080 1890-S MS63 PCGS. From a mintage of 802,750 coins, the 1890-S represents the most collectible of the three double eagle issues for the year. Yet, examples are rarely seen in MS64 and they are very scarce at this grade level. Frosty fields house strongly struck motifs that show particularly bold detail on the stars, curls, and eagle's neck. Scattered grazes and a mark under the eye explain the technical assessment. NGC ID# 26BZ, PCGS# 9015

18081 1891-S MS63 PCGS. The 1891-S is available through the MS63 grade, but thereafter it is an extremely scarce double eagle. This radiant orange-gold example is housed in a former generation green label holder and approaches an even finer grade. Sharply struck, the coin shows deep-orange and pale-lilac highlights over smooth surfaces with excellent eye appeal. A few light abrasions in the left obverse field and a tick on the cheek represent the sole extent of mentionable marks. NGC ID# 26C4, PCGS# 9018

18082 1891-S MS63 NGC. From a substantial mintage of 1.2 million pieces, the 1891-S Liberty double eagle becomes scarce in grades above the MS63 level. This impressive Select specimen offers well-detailed design elements and lustrous orange-gold surfaces with some scattered minor contact marks. NGC has graded 64 numerically finer examples (9/17). NGC ID# 26C4, PCGS# 9018

1892-CC Double Eagle, Choice XF
Original Coloration

18083 1892-CC XF45 PCGS. Variety 1-A. This early die state coin shows no die lapping and retains partial luster in the fields. Original olive-gold patina complements the boldly detailed motifs. The usual scattering of moderate abrasions is familiar among Carson City double eagles in XF and lower AU grades. This piece will appeal to the collector who appreciates old-time patina. NGC ID# 26C6, PCGS# 9020

1892-CC Liberty Twenty, XF45
Attractive CC-Mint Type Coin

18084 1892-CC XF45 PCGS. CAC. Variety 1-A. The availability of the 1892-CC Liberty double eagle has increased substantially in recent years, due to the presence of many examples of this issue in foreign hoards that have surfaced since the 1990s. This impressive Choice XF specimen exhibits only light wear on the strongly impressed design elements and the vivid orange-gold surfaces are lightly abraded throughout. NGC ID# 26C6, PCGS# 9020

1892-CC Twenty Dollar, AU50
Overt Originality

18085 1892-CC AU50 PCGS. Variety 1-A. The 1892-CC is a moderately scarce Nevada mint issue in About Uncirculated grades, though examples appear on the market with sufficient frequency so as to satisfy the bulk of collector demand. Overtly original and eminently appealing, this CC twenty features reddish-gold color and still-strong motif detail. Only 27,265 coins minted. NGC ID# 26C6, PCGS# 9020

18086 1892-S MS63 PCGS. An attractive Select example of this popular Type Three double eagle, with sharply detailed design elements and vibrant mint luster throughout. The pleasing orange-gold surfaces show a scattering of minor contact marks that do little to detract from the outstanding eye appeal. NGC ID# 26C7, PCGS# 9021

18087 1893 MS63 NGC. The 1893 Liberty double eagle becomes very scarce in grades above the MS63 level. This sharply detailed Select specimen offers lustrous, peach-gold surfaces that show only minor signs of contact. NGC has graded 65 numerically finer examples (9/17). NGC ID# 26C8, PCGS# 9022

18088 1893 MS63 PCGS. Housed in a green-label PCGS holder, this Select Mint State 1893 double eagle has frosty luster and fully brilliant orange-gold surfaces with excellent eye appeal. NGC ID# 26C8, PCGS# 9022

1893-S Double Eagle, MS63
Elusive in High Grades

18089 1893-S MS63 NGC. From MS63 to MS64, the population of certified 1893-S twenty dollar gold pieces sees a decline of roughly 90%, attesting to the issue's conditional rarity. The reverse is razor-sharp, while the obverse displays minor softness on the lower stars and middle curls. Each side features red-gold color and uninhibited mint luster. NGC ID# 26CA, PCGS# 9024

1893-S Double Eagle, MS63
Optimal Collectible Grade Level

18090 1893-S MS63 PCGS. CAC. A steep drop-off in the number of coins certified in higher grades makes MS63 an ideal level for those trying to balance technical quality and affordability in their pursuit of an 1893-S double eagle. The CAC endorsement is an added bonus. Each side showcases yellow-gold coloration and soft, frosty luster. Shallow ticks and grazes are minimal for the grade. NGC ID# 26CA, PCGS# 9024

18091 1894 MS63 PCGS. This impressive Select Type Three double eagle exhibits sharply detailed design elements and lightly marked orange-gold surfaces, with vibrant mint luster on both sides. Overall eye appeal is quite strong. NGC ID# 26CB, PCGS# 9025

1894 Twenty Dollar, MS64
Few Known Finer

18092 1894 MS64 PCGS. The 1894 double eagle is an available Type Three date in most grades, but it becomes scarce in near-Gem condition and it is a rarity any finer. This lustrous and satiny Choice example has smooth surfaces and nice, variegated gold patina. Orange-gold shades surround light yellow-gold centers. A few slight chatter marks on the rims are of little note because there are no heavy or distracting marks. PCGS reports just three numerically finer coins (9/17). NGC ID# 26CB, PCGS# 9025

18093 1894-S MS63 PCGS. The vivid orange-gold surfaces of this attractive Select double eagle radiate vibrant mint luster from both sides, with a few highlights of lilac. The design elements are sharply detailed and only minor signs of contact are evident. NGC ID# 26CC, PCGS# 9026

**1894-S Liberty Double Eagle, MS64
Very Rare Any Finer**

18094 1894-S MS64 PCGS. Although the PCGS population of 164 pieces in MS64 is rather significant, that service has only graded three finer examples (9/17). This Choice Mint State piece features vivid orange-gold surfaces and bold design elements, with excellent eye appeal. The obverse is prooflike and the reverse shows a mix of vibrant luster and prooflike reflectivity. NGC ID# 26CC, PCGS# 9026

18095 1895 MS64 NGC. The 1895 Liberty double eagle is extremely elusive in grades above the MS64 level. This attractive Choice example exhibits sharply detailed design elements and well-preserved peach-gold surfaces, with vibrant mint luster throughout. NGC has graded 10 numerically finer examples (9/17). NGC ID# 26CD, PCGS# 9027

**1895 Double Eagle, MS64+
Just Five Finer Coins at PCGS**

18096 1895 MS64+ PCGS. While generally not thought of as a conditionally rare double eagle, the 1895 is a sleeper in Plus-Graded, near-Gem condition and it is truly rare in MS65 or finer conditions. This high-end MS64+ displays a cracking-sharp strike and attractive orange-gold patina. Frosted luster flows over both sides to reveal faint rose-colored highlights. Marks are at a minimum. Population: 27 in 64+, 5 finer (9/17). NGC ID# 26CD, PCGS# 9027

18097 1895-S MS63 PCGS. An impressive Select specimen, with lightly marked orange-gold surfaces and vibrant mint luster throughout. The slightest touch of softness shows on some star centers, but the other design elements are sharply defined. Overall eye appeal is outstanding. NGC ID# 26CE, PCGS# 9028

**1895-S Twenty Dollar, MS63+
Coruscating Frost**

18098 1895-S MS63+ PCGS. CAC. Specialist Mike Fuljenz writes: "This date is sometimes seen with a small amount of striking weakness at the lower obverse border. The rest of the obverse, however, is usually very sharp with strong detail visible on the hair and the stars." Such is the case with this high-end Select offering. The reverse feathers are also needle-sharp, and coruscating frost blankets appealing rose-gold surfaces. NGC ID# 26CE, PCGS# 9028

**1895-S Double Eagle, MS63+
Seldom Offered With CAC Approval**

18099 1895-S MS63+ PCGS. CAC. Rose-gold centers and deep sun-gold hues around the border are typical for the issue, as is unbridled mint frost that rolls over each side. Full radials appear on the stars, Liberty's curls are boldly delineated, and the eagle's neck and tailfeathers are crisp. While this S-mint issue can be located through MS64, seldom are examples seen with a CAC endorsement. NGC ID# 26CE, PCGS# 9028

**1896 Double Eagle, Clean MS64
Rare in Better Condition**

18100 1896 MS64 PCGS. Nearly the entire population of 1896 double eagles at the leading certification services falls within the grade range of MS61 to MS63. Comparable near-Gems are very scarce, and only a handful of MS65 representatives are known. This smooth, softly frosted double eagle with peach-gold color certainly appears finer than the grade suggests. The obverse fields are remarkably unabraded. Razor-sharp strike. PCGS reports seven finer submissions (9/17). NGC ID# 26CF, PCGS# 9029

18101 1896-S MS63 PCGS. An attractive Select representative of the Type Three motif, this coin exhibits sharply detailed design elements and vibrant mint luster throughout. The pleasing orange-gold surfaces show only minor signs of contact and eye appeal is quite strong. NGC ID# 26CG, PCGS# 9030

1898 Liberty Double Eagle, MS63
Sharply Detailed and Lustrous

18102 1898 MS63 PCGS. An impressive Select example of this lower-mintage Philadelphia issue, with sharply detailed design elements and vivid orange-gold surfaces that show the expected number of minor contact marks for the grade. Vibrant mint luster adds to the outstanding eye appeal. PCGS has graded 20 numerically finer specimens (9/17). NGC ID# 26CK, PCGS# 9033

1898 Liberty Twenty, MS63
Elusive Issue in Finer Grades

18103 1898 MS63 PCGS. From a smaller than average mintage of 170,300 pieces, the 1898 Liberty double eagle is a rare issue in grades above the MS63 level. This attractive Select specimen offers well-detailed design elements and dusky orange-gold surfaces that show a few scattered minor contact marks on both sides. PCGS has graded 20 numerically finer examples (9/17). NGC ID# 26CK, PCGS# 9033

1898 Double Eagle, Strong MS63
Low Mintage for the Period

18104 1898 MS63 NGC. The Mint was firing on all cylinders during the last few years of the 19th century, striking doubles eagles of the highest quality. The mintage for the 1898, however, is much lower than any other P-mint issue between 1893 and 1900 with 170,395 pieces struck. This Select twenty dollar coin boasts a full strike and swirling luster over light, even reddish-gold surfaces. A mark on the upper cheek and another above the bust truncation are undistracting. NGC shows 22 finer submissions (9/17). NGC ID# 26CK, PCGS# 9033

1898 Double Eagle, MS63
Boldly Struck and Lustrous

18105 1898 MS63 NGC. With a lower mintage than the Philadelphia issues of the previous few years, the 1898 double eagle can be difficult to find in pleasing condition. According to the Garrett and Guth's *Encyclopedia*, the 1898 is "seldom seen above MS-62." This example is well-struck, with sharp details, and the lustrous surfaces bear a hint of orange toning that indicates originality. Scattered marks commensurate with the grade and a splash of darker reverse toning are noted. NGC has graded only 23 finer including 1 in 63+ (9/17). NGC ID# 26CK, PCGS# 9033

18106 1898-S MS64+ PCGS. A substantial mintage of more than 2.5 million double eagles occurred at the San Francisco Mint in 1898, and examples are available in grades up to MS64, but higher grade pieces, including MS64+ examples like this one, are scarce. This near-Gem exhibits frosty mint luster and brilliant yellow surfaces with excellent eye appeal. NGC ID# 26CL, PCGS# 9034

18107 1898-S MS64 PCGS. CAC. A nearly full strike is seen throughout this Choice S-mint double eagle. Thick mint frost and yellow-gold coloration meld over each side, accounting for the excellent aesthetic appeal and the resulting CAC approval sticker. Marks are shallow and undistracting. Very scarce any finer. NGC ID# 26CL, PCGS# 9034

18108 1900 MS64+ PCGS. CAC. Frosty, luminous mint luster casts this high-end Choice 1900 double eagle in eye-catching yellow-gold hues over sharp design elements. Were it not for a single light graze in the field by Liberty's nose, a full MS65 grade might have been achieved. Eye appeal is excellent. NGC ID# 26CP, PCGS# 9037

18109 1900 MS64+ PCGS. CAC. This is a frosty, radiantly lustrous high-end near-Gem with original surfaces and warm rose-gold patina. Liberty's cheek is particularly clean, and the strike is sharp. Finer examples of the 1900 double eagle may be out of reach for the average series enthusiast. NGC ID# 26CP, PCGS# 9037

18110 1900 MS64+ PCGS. CAC. A Plus-graded Choice example of this popular turn-of-the-century issue, with sharply detailed design elements and well-preserved orange-gold surfaces that display vibrant mint luster on both sides. Eye appeal is terrific. NGC ID# 26CP, PCGS# 9037

18111 1900 MS64+ PCGS. CAC. The PCGS Plus designation and CAC endorsement confirm the high quality of this borderline Gem twenty. The smooth, Choice surfaces display strong cartwheel luster over lovely, minimally marked orange-gold surfaces. The strike is razor-sharp. NGC ID# 26CP, PCGS# 9037

18112 1900-S MS63 PCGS. The 1900-S Liberty double eagle is always popular because of its turn-of-the-century date. This sharply detailed Select specimen offers lightly marked orange-gold surfaces, with vibrant mint luster and outstanding eye appeal. NGC ID# 26CR, PCGS# 9038

18113 1901 MS64 PCGS. CAC. The lightly marked orange-gold surfaces of this attractive Liberty double eagle radiate vibrant mint luster from both sides and the design elements are sharply detailed throughout. Overall eye appeal is exceptional. NGC ID# 26CS, PCGS# 9039

**1901 Double Eagle, MS65
Rare Any Finer**

18114 1901 MS65 PCGS. While scattered abrasions can be seen in the fields of this piece, its surfaces are on the whole smooth and clean, with a satisfying luster giving the coin strong eye appeal. Despite a mintage of only 111,430 pieces, these remain fairly available even in Gem Uncirculated. It is notable, however, that PCGS has graded only four examples finer than this, and NGC has graded none finer (9/17). NGC ID# 26CS, PCGS# 9039

18115 1901-S MS63 PCGS. Obtainable through Select Uncirculated condition for a modest premium, the 1901-S double eagle begins to pose a more significant challenge in MS64. Frosty luster and medium orange-gold color are the two major attributes of this attractive San Francisco twenty. Well-struck with just a couple of notable reeding marks in the field above Liberty's eye. NGC ID# 26CT, PCGS# 9040

18116 1901-S MS63 NGC. The design elements of this attractive Select specimen are sharply detailed throughout, and the lightly marked peach-gold surfaces radiate vibrant mint luster on both sides. NGC has graded 72 numerically finer examples (9/17). NGC ID# 26CT, PCGS# 9040

**1902 Twenty Dollar, MS62
Seldom Offered Finer**

18117 1902 MS62 PCGS. The 1902 is famous for its remarkably small mintage of 31,140 pieces, a production total that makes it scarce in Mint State in the context of 20th century double eagles. This MS62 coin displays original peach-gold luster and sharp design elements. The reverse is beautifully preserved, while the obverse collects scattered abrasions that limit the grade. NGC ID# 26CU, PCGS# 9041

**1902 Double Eagle, MS62
Key 20th Century Issue**

18118 1902 MS62 PCGS. This is the key date among 20th century Liberty Head twenties with a tiny mintage of 31,140 pieces. The issue becomes very scarce in MS63. Frosty luster is somewhat subdued over light rose-gold surfaces. Reeding marks near the eye and nose will identify this coin in future sales. NGC ID# 26CU, PCGS# 9041

**1902 Twenty Dollar, MS62
Conditionally Rare 20th Century Semikey**

18119 1902 MS62 PCGS. This conditionally rare 20th century semikey claims a tiny production of 31,140 coins. The issue's availability is strictly limited in higher grades. Strongly struck on the stars, curls, and feathers, this red-gold MS62 representative shows softly frosted mint luster and a mixture of shallow grazes and prominent bagmarks. NGC ID# 26CU, PCGS# 9041

18120 1902-S MS63 PCGS. An impressive Select specimen of this early 20th century issue, with well-detailed design elements and vivid orange-gold surfaces that radiate vibrant mint luster throughout. Only minor signs of contact are evident and eye appeal is quite strong. NGC ID# 26CV, PCGS# 9042

18121 1903-S MS64 NGC. A decline of 96% in the certified population occurs between MS64 and MS65, highlighting the conditional rarity of Gem 1903-S double eagles. This particular example does not deviate from the trend of the issue coming well-struck. Orange and khaki-gold tones color minimally marked surfaces. There are just 22 higher-graded coins at NGC (9/17). NGC ID# 26CX, PCGS# 9044

18122 1903-S MS64 NGC. This double eagle issue was exported overseas en masse during the early part of the 20th century. Later repatriations account for today's supply through MS64. Light marks are scattered across surfaces that show swirling luster and well-detailed central motifs. Rare any finer. NGC ID# 26CX, PCGS# 9044

18123 1903-S MS64 PCGS. The 1903-S Liberty double eagle is usually available in grades up to the MS64 level, but finer examples are condition rarities. This well-preserved, orange-gold Choice example displays sharply detailed design elements and vibrant mint luster throughout. PCGS has graded 16 numerically finer examples (9/17). NGC ID# 26CX, PCGS# 9044

**1903-S Double Eagle, MS64+
Bold and Lustrous**

18124 1903-S MS64+ PCGS. While the usual abrasions and bagmarks can be seen on this San Francisco emission, the boldly struck devices and smooth, satiny surfaces are anything but typical. Cartwheel luster adds to the tremendous eye appeal of this example. While plentiful in MS64, the population of these pieces drops to 27 in MS64+, with 16 finer (9/17). NGC ID# 26CX, PCGS# 9044

**1903-S Double Eagle, MS64+
Frosty and Eye-Appealing**

18125 1903-S MS64+ PCGS. CAC. This California double eagle issue is collectible through MS64, but high-end near-Gems are much more elusive. Anything finer than this piece would prove exceedingly difficult to obtain. Frosty luster and warm yellow-gold coloration combine over each carefully preserved side. The motifs are nearly fully struck, and there are just a few luster grazes and reeding marks noted in the obverse field. PCGS shows 16 finer submissions (9/17). NGC ID# 26CX, PCGS# 9044

18126 1904 MS65 PCGS. Beautifully preserved medium yellow-gold surfaces emit remarkably vibrant luster over fully struck motifs. A great example for type representation. Housed in a green label holder. NGC ID# 26CY, PCGS# 9045

**1904 Double Eagle, MS65
Fully Struck Type Coin**

18127 1904 MS65 PCGS. A record-breaking quantity of double eagles was produced in 1904. The Mint struck in excess of 6.2 million examples that year — a total that would only be exceeded in 1928. Gems are correspondingly collectible, though anything finer qualifies as scarce. A full strike and swirling luster define this impressively preserved Liberty Head twenty. Each side displays warm yellow-gold color and minimal ticks. NGC ID# 26CY, PCGS# 9045

18128 1904 MS62 Prooflike NGC. CAC. The fields are brightly reflective except for a few small, foggy areas on the obverse. A brilliant, blond-gold coin, it displays a sharp strike and a minimum of marks for the MS62 level. The mirroring is especially impressive on the reverse. NGC ID# 26CY, PCGS# 79045

**1904 Double Eagle, MS64 Prooflike
Sharp Details, Strong Eye Appeal**

18129 1904 MS64 Prooflike NGC. Among the first pieces struck from these dies, which imparted to this example the razor-sharp design elements and polished surfaces one associates with proofs. Scattered marks near the date are noted as are a few minor marks on the reverse near the right wing and in the field to the left of the eagle. A near-Gem piece with striking eye appeal. Census: 57 in 64 (2 in 64★) Prooflike, 12 finer (9/17). NGC ID# 26CY, PCGS# 79045

**1904-S Double Eagle, Luminous MS65
Surprisingly Elusive in High Grades**

18130 1904-S MS65 NGC. This mass-produced issue (5.1 million coins struck) is surprisingly scarce in MS65, and extremely rare in higher grades. The only area of noticeable softness occurs on the date. Otherwise, this Gem San Francisco double eagle is razor-sharp. There are seven higher grading events reported at PCGS (9/17). NGC ID# 26CZ, PCGS# 9046

**1904-S Double Eagle, MS65
Fully Struck, Extremely Rare Any Finer**

18131 1904-S MS65 PCGS. Fully struck and highly lustrous with uniform orange-gold color and pleasingly smooth, distraction-free surfaces. The 1904-S is the most available Liberty Head double eagle from the San Francisco Mint, but Gem examples are somewhat elusive compared to certain other issues. PCGS reports merely seven finer grading events (9/17).
Ex: Dallas Signature (Heritage, 10/2006), lot 3413; FUN Signature (Heritage, 1/2007), lot 6550. NGC ID# 26CZ, PCGS# 9046

**1905-S Twenty Dollar, MS63
Bright Mint Frost**

- 18132 1905-S MS63 PCGS.** Unlike the 1905-P double eagle, this San Francisco issue is collectible through MS63 thanks in part to a healthy production of 1.8 million coins. Swirling mint frost over luminous yellow-gold surfaces accounts for the terrific eye appeal. The strike is well-executed with the sole exception of the uppermost stars. One noticeable tick occurs on Liberty's neck. NGC ID# 26D3, PCGS# 9048

**1905-S Twenty Dollar, MS63+
Shimmering Peach-Gold Surfaces**

- 18133 1905-S MS63+ PCGS. CAC.** Collectors working on date sets often have little choice but to opt for an example of the 1905-S when searching for a high-grade double eagle from this year. The low-mintage 1905-P is rarely seen in MS63 and higher, while the 1905-S is collectible through MS64. The stars, curls, and feathers exhibit crisp definition. Shimmering luster covers nicely preserved peach-gold surfaces. CAC: 13 in 63, 20 finer (8/17). NGC ID# 26D3, PCGS# 9048

**1906 Twenty Dollar, MS62
Only 69,596 Coins Struck**

- 18134 1906 MS62 NGC.** Like the 1902 and 1905, the 1906 Philadelphia double eagle is a low-mintage, conditionally scarce 20th century issue. Out of the 69,596 coins struck, few survivors are seen finer than MS62 or MS63, and the average certified grade is between MS60 and MS61. This medium orange-gold twenty enjoys razor-sharp detail on the major design features. Frosty luster washes over surfaces that show numerous small marks, but none worthy of singular mention. NGC ID# 26D4, PCGS# 9049

- 18135 1906-D MS62 PCGS.** An attractive MS62 double eagle from the first year of coinage operations at the Denver Mint, this coin displays lustrous reddish-gold surfaces that show a scattering of minor contact marks. The design elements are sharply detailed throughout. NGC ID# 26D5, PCGS# 9050

- 18136 1906-S MS63 PCGS.** An attractive Select Type Three double eagle from late in the series, this coin exhibits well-detailed design elements and lightly marked orange-gold surfaces. Vibrant cartwheel mint luster adds to the considerable eye appeal. NGC ID# 26F6, PCGS# 9051

- 18137 1907 MS64 PCGS.** The 1907 Liberty double eagle is seldom encountered in grades above the MS64 level. This attractive Choice specimen offers well-detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster throughout. PCGS has graded 21 numerically finer examples (9/17). NGC ID# 26D7, PCGS# 9052

**1907-D Double Eagle, MS63
Attractive Final-Year Example**

- 18138 1907-D MS63 PCGS.** The 1907-D is renowned as the final issue in the Liberty Head double eagle series and one of just two issues produced at the Denver Mint. A total of 842,250 coins were struck, and fewer examples survive in high grades than its Philadelphia or S-mint counterparts. Satiny surfaces offer attractive shades of yellow and peach-gold color. The star radials and hair curls are boldly delineated. Small ticks occur throughout, but none are singularly important. NGC ID# 26D8, PCGS# 9053

- 18139 1907-S MS63 NGC.** An impressive Select double eagle from the last year of the Liberty design, this coin exhibits well-detailed design elements and lightly marked orange-gold surfaces, with vibrant mint luster on both sides. Eye appeal is quite strong. NGC ID# 26D9, PCGS# 9054

**1907-S Liberty Head Twenty Dollar, MS64
Exceedingly Rare Any Finer**

- 18140 1907-S MS64 PCGS.** Most Uncirculated 1907-S double eagles grade within the MS62 to MS63 range. Choice representatives are scarce and highly sought-after given the dearth of high-graded alternatives. This orange-gold near-Gem is marvelously preserved for the issue with clean fields and complete strike definition. PCGS has seen merely 14 finer submissions (9/17). NGC ID# 26D9, PCGS# 9054

SAINT-GAUDENS DOUBLE EAGLES

- 18141 1907 Arabic Numerals MS64 PCGS.** Ex: Rough Rider Hoard. From a substantial hoard of more than 1,000 1907 and 1908 No Motto double eagles, this Choice Mint State piece has splashes of dark toning on the obverse and reverse high points, with brilliant and frosty yellow-gold luster. NGC ID# 26F5, PCGS# 9141
- 18142 1907 Arabic Numerals MS64 PCGS.** Ex: Rough Rider Hoard. The hoard consist of hundreds of 1907 and 1908 No Motto double eagles that have recently become available in the numismatic marketplace. This Choice Mint State 1907 Arabic Numerals double eagle has frosty yellow luster and minimal marks with hints of dark high-point toning. NGC ID# 26F5, PCGS# 9141
- 18143 1907 Arabic Numerals MS64 PCGS.** Ex: Rough Rider Hoard. According to publicity about the hoard, the coins were found in European bank vaults where they had been stored for over a century. Typical of such pieces, this Choice Mint State example has dark toning on the high points with fully brilliance on both sides. NGC ID# 26F5, PCGS# 9141
- 18144 1907 Arabic Numerals MS64 PCGS.** Ex: Rough Rider Hoard. These double eagles are housed with a special PCGS label depicting that famous Rough Rider, Teddy Roosevelt. This Choice Mint State example has lustrous light yellow surfaces and dark high-point patina. NGC ID# 26F5, PCGS# 9141
- 18145 1907 Arabic Numerals MS64 PCGS.** Ex: Rough Rider Hoard. This near-Gem was sourced from a European hoard that contained in excess of 1,000 coins. Its well-preserved surfaces are the direct result of decades spent untouched in bank vaults. Each side showcases a bold strike and frosty, red-gold surfaces. Excellent first-year type. NGC ID# 26F5, PCGS# 9141
- 18146 1907 Arabic Numerals MS64 PCGS.** This frosty near-Gem displays rich orange-gold luster with warmer rose-gold hues at the centers. The strike is sharp. Only a few scattered ticks in the fields and on the high points of Liberty's figure prevent a finer grade. Housed in a green label holder. NGC ID# 26F5, PCGS# 9141

1907 Saint-Gaudens Double Eagle, MS65 First-Year Arabic Numerals Type Coin

- 18147 1907 Arabic Numerals MS65 PCGS.** A delightful Gem from the first year of Augustus Saint-Gaudens' iconic design, this coin exhibits sharply detailed design elements throughout, and the well-preserved orange-gold surfaces show a few hints of lilac. Vibrant mint luster adds to the terrific eye appeal. This coin should find a home in a fine collection of Saint-Gaudens double eagles. NGC ID# 26F5, PCGS# 9141
- 18148 1908 No Motto MS65 NGC.** Housed in a prior generation holder with rich, satiny luster and original yellow-gold coloration. The fields are clean, and only a few light marks on the high points of the Liberty figure and eagle limit the grade. A popular type-coin issue. NGC ID# 26F6, PCGS# 9142

- 18149 1908 No Motto MS66 NGC.** The inexpensive price for No Motto 1908 twenties combined with their high grades and limited two-year type status make these pieces an irresistible buy for the collector. The surfaces are bright and lustrous with even light reddish patina. NGC ID# 26F6, PCGS# 9142

- 18150 1908-D No Motto MS64 PCGS.** This attractive Choice specimen represents the final year of the No Motto design. The design elements are sharply detailed and the well-preserved orange-gold surfaces radiate vibrant mint luster throughout. NGC ID# 26F7, PCGS# 9143

1908 Double Eagle, MS64 With Motto, First Year of Type

- 18151 1908 Motto MS64 PCGS.** Less than 4% of the double eagles struck in 1908 were of the With Motto type, with the vast majority struck earlier in the year before the design was modified. This near-Gem piece bears attractive coloration and is well-struck, with even minor details like the Capitol building distinct. The usual accompaniment of bagmarks are present, but this example lacks any significant imperfections. NGC ID# BNAK, PCGS# 9147

1908 Double Eagle, MS64 With Motto

- 18152 1908 Motto MS64 PCGS.** In the second half of 1908, the reverse design of the Saint-Gaudens double eagle was modified to incorporate the motto IN GOD WE TRUST above the sun. The number struck during that year with the motto were but a fraction of those struck without it, making this a particularly desirable first-year-of-type issue. This Choice Uncirculated example has the bagmarks and other abrasions usually encountered, but is well-struck with pleasing coloration. NGC ID# BNAK, PCGS# 9147
- 18153 1908-D Motto MS64 NGC.** An impressive Choice representative from the first year of the Motto design, this coin exhibits well-detailed design elements and lightly marked orange-gold surfaces, with vibrant mint luster on both sides. NGC ID# 26F9, PCGS# 9148

**1909-S Twenty Dollar, MS65
Rarely Encountered Finer**

18154 1909-S MS65 PCGS. Lovely wheat-gold luster rolls vibrantly across frosty surfaces on this Gem 1909-S double eagle. The design elements showcase a sharp strike, and only a few light marks on the high points of Liberty's figure prevent a Premium Gem designation. While the 1909-S is available in this grade, finer pieces are rare, with only 20 such coins reported at PCGS (10/17). NGC ID# 26FE, PCGS# 9153

18155 1909-S/S FS-501 MS64 NGC. VP-003. The mintmark is repunched northwest. This well-struck double eagle exhibits attractive orange-gold coloration intermixed with coruscating mint frost. A minimally bagmarked example of this interesting *Cherrypickers' Guide* variety. NGC ID# 26FE, PCGS# 145741 Base PCGS# 9153

18156 1910-D MS64+ PCGS. CAC. A Plus-graded Choice example of this early series issue, with vibrant mint luster and pleasing orange-gold surfaces that show only minor signs of contact. The design elements are well-detailed and eye appeal is quite strong. NGC ID# 26FG, PCGS# 9155

18157 1910-D MS65 PCGS. A delightful Gem representative of this early branch mint issue, with sharp definition on all design elements and lustrous orange-gold surfaces with no mentionable distractions. Overall eye appeal is terrific. NGC ID# 26FG, PCGS# 9155

**1911 Saint-Gaudens Double Eagle, MS64
Underrated P-Mint Issue**

18158 1911 MS64 PCGS. The 1911 Saint-Gaudens double eagle is an underrated Philadelphia Mint issue from a mintage of 197,250 pieces. Most examples seen are in lower Mint State grades and the issue is very scarce above the MS64 grade level. This impressive Choice example offers well-detailed design elements and well-preserved orange-gold surfaces with only minor signs of contact. PCGS has graded 70 numerically finer examples (9/17). NGC ID# 26FK, PCGS# 9157

18159 1911-D/D FS-501, MS65 PCGS. The D mintmark is boldly repunched to the east on this impressive Gem, identifying the famous *Cherrypickers* variety. Sharply detailed and well-preserved, this coin radiates vibrant mint luster with outstanding eye appeal. PCGS has graded 42 numerically finer examples (9/17). NGC ID# 26FK, PCGS# 145010 Base PCGS# 9158

18160 1911-S MS64+ PCGS. CAC. Like a harvest-ready wheat field in the summer sun, the surfaces of this high-end near-Gem yield shades of gold, pale green, and warmer reddish-peach when rotated beneath a light. The strike is bold and abrasions are minimal. CAC-approved coins in this and finer grades are scarce. NGC ID# 26FL, PCGS# 9159

**1911-S Double Eagle, MS65
Exceptional Gem Example**

18161 1911-S MS65 PCGS. A perfect choice for a type set, the obverse of this handsome piece bears almost none of the marks that one usually encounters on these large, heavy coins. Instead, the surfaces are smooth and satiny with rich golden-yellow toning. A tiny mark to the right of Liberty's head is the only one worth mentioning. The reverse is also impressive, with most elements well-struck and only a few stray nicks here and there. The 1911-S double eagle becomes rare above this grade level, with PCGS only grading 43 pieces finer (9/17). NGC ID# 26FL, PCGS# 9159

18162 1914 MS63 PCGS Secure. From a smallish-mintage of 95,250 pieces, this attractive select example displays sharply detailed design elements and vibrant mint luster throughout. The yellow and reddish-gold surfaces show a few scattered, minor contact marks. NGC ID# 26FS, PCGS# 9164

1914-S Twenty Dollar, Strong MS65+

18163 1914-S MS65+ PCGS. There is a small group of issues in Saint-Gaudens' double eagle series that can be located with ease in MS65 condition; the 1914-S is among them. Surface coloration transitions from rich orange-gold to light straw-gold, while copious luster radiates throughout. The strike is uniformly well-impressed, and marks are generally concealed within the design elements. NGC ID# 82KA, PCGS# 9166

**1923 Double Eagle, MS65
Extremely Rare in Better Grades**

- 18164 1923 MS65 PCGS.** Gem condition 1923 double eagles are scarce, and the finest examples realistically available. PCGS reports four finer submissions, and none are graded higher at NGC (8/17). Peach-gold color and glittering frost coalesce over each side. Liberty's face and torch hand are strong. A few stray bagmarks in the left obverse field limit the grade. NGC ID# 26G5, PCGS# 9175

**1923 Double Eagle, MS65
Just Four Coins Graded Higher**

- 18165 1923 MS65 PCGS.** Warm apricot-gold coloration typifies this phenomenal Gem. Softly frosted mint luster glistens over well-struck motifs and clean fields. For nearly every specialist in this series, MS65 represents the highest attainable grade level. There are only four pieces graded finer at both services combined, all at PCGS (9/17). NGC ID# 26G5, PCGS# 9175

- 18166 1924 MS66 PCGS.** This sharply struck Premium Gem will be highly appealing as a Saint-Gaudens type coin. Original honey-gold coloration boasts unabraded surfaces save for a thin, curving line in the left field and rays. NGC ID# 26G7, PCGS# 9177

- 18167 1924 MS66 NGC.** Bright, even rose-tinted mint luster contribute to the strong visual appeal of this ultimate Saint-Gaudens type coin. The strike details are also fully brought up and there are no abrasions of consequence on either side. NGC ID# 26G7, PCGS# 9177

- 18168 1924 MS66 NGC.** Smooth, minimally marked surfaces combine with bright, frosted mint luster and a strong strike to deliver an upper-grade type coin. NGC ID# 26G7, PCGS# 9177

- 18169 1924 MS66 NGC.** Sharply struck with bright yellow-gold mint luster. Minimally abraded, as one would expect from this popular date that is so often used for type purposes. NGC ID# 26G7, PCGS# 9177

- 18170 1924 MS66 NGC.** Bright mint luster is the strong suit of this high-grade, original double eagle. The strike is sharp also and each side displays light, even reddish patina. NGC ID# 26G7, PCGS# 9177

- 18171 1924 MS66+ PCGS.** A spectacular Plus-graded Premium Gem example of this popular type issue, with sharply detailed design elements and impeccably preserved orange-gold surfaces. Vibrant mint luster adds to the tremendous visual appeal. NGC ID# 26G7, PCGS# 9177

- 18172 1925 MS66 PCGS.** The 1925 Saint-Gaudens double eagle is surprisingly available in MS66 condition, but finer coins are definitely rare. This delightful Premium Gem offers sharply detailed design elements and well-preserved orange-gold surfaces with vibrant mint luster. PCGS has graded seven numerically finer examples (9/17). NGC ID# 26GA, PCGS# 9180

- 18173 1925 MS66 NGC.** Ex: WWII Exile Hoard. Deep reddish patina covers each side of this thickly lustrous type coin. Minimal abrasions interrupt the flow of luster over the obverse and reverse. NGC ID# 26GA, PCGS# 9180

- 18174 1925 MS66 NGC.** Light reddish patina is seen over each side of this uniformly lustrous twenty. The strike is bold throughout and there are minimal abrasions as well. NGC ID# 26GA, PCGS# 9180

- 18175 1927 MS65 ★ NGC.** Although the 1927 double eagle is a common date in MS65, only 63 pieces in this grade are Star-designated at NGC (9/17). The coin displays sharp design elements and excellent preservation, although slightly semiprooflike fields are the visual hallmark. The coloration is warm straw-gold. NGC ID# 26GG, PCGS# 9186

- 18176 1927 MS66 PCGS.** Usually available in MS66, the 1927 Saint-Gaudens double is among the most popular type coins in the series. This piece is satiny and well-struck with vibrant cartwheel luster and rich yellow-gold color. Only the high points of Liberty's figure show light surface contact. NGC ID# 26GG, PCGS# 9186

- 18177 1927 MS66+ PCGS.** Nearly 3 million 1927 double eagles were struck, and thousands survive through MS66. Examples are much scarcer in MS66+ and are rare any finer. The torch fingers are well-formed on this marvelously preserved, lemon-gold Premium Gem. Swirling frost over each side. NGC ID# 26GG, PCGS# 9186

- 18178 1928 MS66 PCGS.** A spectacular Premium Gem representative of this popular type issue, with sharply detailed design elements and impeccably preserved orange-gold surfaces. Vibrant mint luster adds to the terrific eye appeal. NGC ID# 34VK, PCGS# 9189

TERRITORIAL GOLD

- 18179 (1837-42) C. Bechtler Dollar, N Reversed — Obverse Damage — NGC Details.** AU. K-4, R.4. The Bechtlers produced the first gold coins in this country during the North Carolina Gold Rush of the late 1830s and 1840s. This popular variety features the N in ONE reversed. Reddish-gold surfaces are boldly defined with light marks. The noted damage occurs below the H in BECHTLER. Listed on page 392 of the 2018 *Guide Book*.

**A. Bechtler Gold Dollar, XF40
27G., 21C., Plain Edge, CAC Approval**

- 18180 (1842-52) A. Bechtler Dollar, 27G., 21C., Plain Edge XF40 PCGS.** CAC. K-24, R.3. Augustus Bechtler assumed control of the family business in Rutherfordton, North Carolina around 1840. For more than a decade, he operated concurrently with the branch mint in Charlotte. The Bechtlers are best-known for the high quality of their coinage and for striking the first gold dollars to circulate in this country. This example is strongly defined with trivial friction. Original wheat-gold surfaces display scattered marks that do not diminish the appeal. NGC ID# 2B99, PCGS# 10040

**1849 Norris, Gregg, & Norris Five Dollar, K-4
Reeded Edge, AU Details**

18181 1849 Norris, Greg, & Norris Five Dollar, Reeded Edge — Plugged — NGC Details. AU. K-4, R.4. Period after ALLOY. Kagin lists Period and No Period varieties for examples struck with Plain or Reeded edges. Three engineers from Brooklyn, Thomas H. Norris, Hiram Norris, and Charles Gregg, established the first Gold Rush-era coining operation in Benicia, California in 1849 and struck five dollar gold pieces. This example is strongly defined with signs of light wear, including high-point friction and peppered abrasions. The plug occurs at 12 o'clock on each side at (CALIFO) RN(IA) and WE(IGHT) and is minimally distracting. Listed on page 394 of the 2018 *Guide Book*.

**1849 Moffat & Co. Five Dollar, Fine 15
K-4a, Popular Gold Rush Souvenir**

18182 1849 Moffat & Co. Five Dollar Fine 15 PCGS. K-4a, R.4. A die break through E DO is diagnostic of late die state examples. Moffat five dollar gold pieces were among the most reputable private issues circulating in the Western region of this country during the early days of the California Gold Rush. Today, survivors are highly prized for their historical and numismatic significance. This well-worn five is mostly orange-gold with several cobalt-blue and violet alloy spots on each side. Encapsulated in an old green label holder. Listed on page 395 of the 2018 *Guide Book*. NGC ID# ANJ5, PCGS# 10240

**1852 Moffat Ten Dollar, XF Details
K-9, Wide Date**

18183 1852 Moffat & Co. Wide Date Ten Dollar — Mount Removed — NGC Details. XF. K-9, R.6. The San Francisco *Picayune* ran an article on January 23, 1852 that read: "Improvements. The new ten dollar pieces of Messrs. Moffat & Co.'s issue, made their appearance yesterday, and were put out over the counter of some of our Banking Houses. ... they were not only readily received, but hailed with pleasure as another means of relief" from the large fifty dollar slugs. This circulated example has moderately rough orange-gold surfaces. The fact that it was removed from a mount has little bearing on its appeal or significance. Listed on page 397 of the 2018 *Guide Book*.

1860 Clark, Gruber & Co. Ten, VF20 Details

18184 1860 Clark, Gruber & Co. Ten Dollar — Damaged, Tooled, Mount Removed, Polished — ANACS. VF20 Details. K-3, R.5. Although slightly more plentiful than the twenty dollar gold piece of this year by the same firm, the 1860 Clark, Gruber & Company ten is a scarce issue that typically commands auction prices beyond the reach of the average collector. This VF-level example will appeal to budget-restricted territorial gold enthusiasts. Abraded surfaces are brightly polished, and tool marks appear below DENVER on the obverse from an attempt to efface small depressions in the planchet.

CALIFORNIA FRACTIONAL GOLD

**Liberty Round Quarter, BG-202, MS61
Very Rare Period One Issue, 15 Pieces Extant**

18185 Undated Liberty Round 25 Cents, BG-202, High R.6, MS61 PCGS. BG-202 is the only Round quarter dollar with the denomination written as 25 CENTS and a small ribbon bow. These Period One coins were produced by Joseph Bros. around 1852-1853. Approximately 15 examples are believed extant. This brightly lustrous red-gold representative is razor-sharp throughout the obverse and considerably softer on the reverse. A pedigree mark appears above the 5 in the denomination. Housed in an old green label holder. Population: 2 in 61, 8 finer (9/17). NGC ID# 2BGY, PCGS# 10387

18186 1855 Liberty Round 25 Cents, BG-226A, R.5, MS63 PCGS. A scarce Period One round quarter dollar by Antoine Louis Nouzillet. BG-226A was previously listed as BG-227, which is the variety the old green label PCGS holder indicates. This satiny yellow-gold coin is well-struck and devoid of major abrasions. Eye appeal is pleasing. Population (including this piece): 6 in 63, 2 finer (10/17). NGC ID# 2BHZ, PCGS# 10417

18187 1854 Liberty Octagonal 50 Cents, BG-305, Low R.4, MS66 Prooflike NGC. This spectacular Premium Gem is the single finest certified example of this popular Territorial issue with prooflike surfaces (9/17). The design elements are strongly impressed and the lemon-yellow surfaces are virtually pristine, aside from a small, circular planchet flaw by the nose. NGC ID# 2BJC, PCGS# 710425

18188 1866 Liberty Octagonal 25 Cents, BG-708, High R.4, MS66 NGC. Two octagonal quarter dollar varieties are known for 1866, this one without the fraction within a shield. Both sides are crudely struck and light yellow-gold in color. Exceptionally preserved. Census: 4 in 66, 1 finer (9/17). NGC ID# 2BMJ, PCGS# 10535

18189 1871 Liberty Octagonal 25 Cents, BG-715, Low R.6, MS65 PCGS. Breen-Gillio write of BG-715, "Reverse shattered through value and date, explaining immediate discard and rarity." This green-gold Gem displays marvelously preserved surfaces with typically crude design elements. Population: 8 in 65, 5 finer (9/17). NGC ID# 2BMS, PCGS# 10542

18190 1872 Washington Octagonal 25 Cents, Baker-503, BG-722, Musante GW-818, Low R.4, MS63 PCGS. A popular "Washington Head" issue by Frontier & Bellemere. This Period Two octagonal quarter dollar displays satiny olive-gold luster without distracting abrasions and has well-struck design elements. The eye appeal surpasses expectations for the grade. NGC ID# 2BN4, PCGS# 10549

18191 1875 Indian Octagonal 25 Cents, BG-797, Low R.4, MS66 PCGS. The 5 is close to star 13. This overtly prooflike Premium Gem octagonal quarter exhibits deep orange-gold color and full design detail on the portrait and wreath. An important lot for specialists to consider. Population: 4 in 66, 0 finer (9/17). NGC ID# 2BRH, PCGS# 10624

1876 Indian Octagonal Quarter, Unc Details Very Rare BG-799B, Possibly Four Known

18192 1876 Indian Octagonal 25 Cents, BG-799B, High R.7 — Holed — PCGS Genuine. Unc Details. BG-799B is one of the true rarities of the Period Two (1858-1882) Octagonal quarters. Discovered by Jay Roe in July, 1980, it is an issue of San Francisco jeweler Christopher Ferdinand Mohrig. When Mohrig was arrested by federal agents, hundreds of his fractional gold pieces were seized and ultimately melted, which could help explain the great rarity of BG-799B. We are aware of just two other PCGS specimens and one NGC coin (all Mint State examples) plus this holed Uncirculated Details coin. It is possible there is some duplication among the other three pieces at the grading services. This example well-struck with sun-gold mirrored fields, holed at 9 o'clock and slightly bent as a result.

18193 1871 Liberty Round 25 Cents, BG-862, High R.6, MS63 PCGS. PCGS lists 10 examples of this rare variety, with the present coin comfortably about in the middle grade-wise. Save for minor weakness on the lower wreath and upper stars, this piece is well-struck and displays satiny, attractive yellow-gold luster. The reverse fields are semiprooflike. Housed in an old green label holder. Population: 2 in 63, 5 finer (10/17). NGC ID# 2BUT, PCGS# 10723

1867 Octagonal Liberty 50 Cents, MS67 Single-Finest Certified BG-905 Specimen

18194 1867 Liberty Octagonal 50 Cents, BG-905, Low R.5, MS67 PCGS. Particularly well-struck and displaying gorgeous original green-gold color. The surfaces exhibit a dazzling combination of prooflike reflectivity and cartwheel luster, and just a couple of tiny ticks that are much too faint to decrease the assigned grade of the piece. Certainly the finest known. NGC ID# 2BVZ, PCGS# 10763

18195 1876 Liberty Octagonal 50 Cents, BG-932, High R.4, MS63 PCGS. BG-932 is a collectible Period Two octagonal half dollar variety, typically seen deeply prooflike as here. This Select example displays some strike weakness on the portrait as usual. No major abrasions are seen. A small planchet lamination is visible in the obverse field beneath star 5. Housed in an old green label holder. Population: 17 in 63, 19 finer (10/17). NGC ID# 2BWY, PCGS# 10790

18196 1868 Indian Octagonal 50 Cents, BG-960A, High R.6, MS64 PCGS. BG-960A is the late die state variant of BG-960, showing CAL on the reverse mostly effaced by die lapping. PCGS has certified only eight BG-960A examples, and NGC two (8/17). This near-Gem representative is well-struck and deeply reflective. Original olive-gold surfaces show hints of warmer peach color and are free of distractions. Labeled BG-960 on the PCGS insert, although the lapped reverse confirms our BG-960A attribution. Population: 2 in 64, 3 finer (8/17). NGC ID# 2BXZ, PCGS# 10829

18197 1872 Indian Round 50 Cents, BG-1049, R.4, MS65 NGC. A crack connects the ear to the dentil between 18. This scarce round half dollar exhibits razor-sharp detail on the portrait and crisp wreath definition. Yellow-gold surfaces are partly prooflike. Census: 2 in 65, 0 finer (9/17). NGC ID# 2BZY, PCGS# 10878

18198 1875 Indian Octagonal 1 Dollar, BG-1126, R.5, MS62 PCGS. This Period Two gold dollar was produced by Mohrig of San Francisco. The fields are bright and fully prooflike, even though no such designation was given the coin by PCGS. Attractive, light mint frost covers the devices. NGC ID# 2C3U, PCGS# 10937

PATTERNS

1850 Ring Cent in Billon Judd-119 Original, Toned PR63

18199 1850 One Cent, Judd-119 Original, Pollock-134, Low R.6 PR63 PCGS. The New Millennium Collection. The obverse displays the denomination CENT at the top, the date 1850 at the bottom, two rosettes at the sides, and a perforation in the center. The shattered reverse has the inscriptions USA and ONE TENTH SILVER around. Struck in billon (10% silver, 90% copper) with a plain edge and medal turn. The billon pieces with the hole are considered the original strikes. Each side of this piece is deeply toned, and on the reverse the area around the lettering shows noticeable bright red color. NGC ID# 2A57, PCGS# 11511

**1851 Annular Cent in Billon With a Silver Wash
Judd-127 Original, AU58**

18200 1851 One Cent, Judd-127 Original, Pollock-149, Low R.6 AU58 PCGS. CAC. The obverse features CENT at the top and ONE TENTH SILVER at the bottom, while the reverse depicts a laurel wreath and the legend UNITED STATES OF AMERICA (the coin is reversed in the holder). Part of an effort to reduce the diameter of the cumbersome large cent. The center is perforated, unlike restrikes. Struck in billon (10% silver, 90% copper) with a plain edge. The billon has a silver wash over each side. The wash is gone over the high points and partially absent from the fields. As such, it is unlisted on USPatterns.com and in the Judd reference. Slight rub is seen over the design on each side. NGC ID# 298J, PCGS# 11543

**1853 Nickel-Copper Pattern Cent
Judd-151, PR64**

18201 1853 One Cent, Judd-151, Pollock-178, Low R.6 PR64 PCGS. The obverse is the same as that used to coin regular issue 1853 quarter eagles. The reverse shows an uneven laurel wreath with the legends ONE and CENT widely separated. Struck in a nickel-copper alloy (40% nickel-60% copper) with a reeded edge. Approximately two dozen examples are believed extant in this composition. The high nickel content gives this piece its brightness. The fields are brightly reflective and the devices sharply detailed throughout. NGC ID# 2APC, PCGS# 11628

**1854 Large Cent in Bronze
Judd-161 Original, PR62 Brown**

18202 1854 One Cent, Judd-161 Original, Pollock-187, R.4 PR62 Brown PCGS. Similar to the regular issue large cent, but there are no obverse stars, and the wreath is smaller. Struck in bronze with a plain edge. While it is suggested that metallurgical analysis be conducted if it is suspected a piece is orioide, we also suggest such analysis be conducted on Judd-160 and 161 pieces. The difference between copper and bronze is not immediately obvious, and we have never been certain how the grading services determine the difference just eye-balling it. This piece shows deep brown patina over each side with just the slightest hint of underlying red. NGC ID# 29A6, PCGS# 11663

**1854 Large Cent in Bronze
Judd-161 Original, PR60 Red and Brown**

18203 1854 One Cent, Judd-161 Original, Pollock-187, R.4, PR60 Red and Brown ANACS. Reduced size and starless Large cent with the obverse showing the head of Liberty wearing a diadem inscribed LIBERTY, the reverse depicts ONE CENT within a small laurel wreath. Struck in bronze with plain edge. A crisply struck specimen with blended bright gold, olive, and lilac colors. There are a pair of slender mint-made laminations on the obverse at 1 o'clock. Ex: ANA Signature (Heritage, 8/2004), lot 7881. NGC ID# 29A6, PCGS# 11664

**1854 Flying Eagle Cent in Bronze
Judd-164 Original**

18204 1854 Flying Eagle Cent, Judd-164 Original, Pollock-189, R.5 — Cleaned, Lacquered — ANACS. Net PR50. Flying Eagle design with a hook-neck eagle on the obverse, surrounded by stars and the date below. The reverse closely resembles the regular dies issue for the large cent. Struck in either copper or bronze with a plain edge. A pleasing deep red-brown color adorns the fields, while golden accents sparkle over the tops of the devices. The strike details are bold throughout, except on ONE, and a number of tiny hairlines, well hidden by the deep coloration, attest to an old cleaning, as noted by ANACS. Ex: ANA Signature (Heritage, 8/2004), lot 7882. NGC ID# 29A9, PCGS# 11678

**1855 Flying Eagle Cent in Bronze
Judd-168 Original, PR61 Brown**

18205 1855 Flying Eagle Cent, Judd-168 Original, Pollock-193, R.4, PR61 Brown NGC. A Flying Eagle cent pattern featuring a hooked-neck eagle and slanting 5s on the obverse. The diameter is that of a large cent, and the reverse is similar to the issued 1855 cent. It shows ONE CENT at the center surrounded by a circular wreath bound by a ribbon. Struck in bronze with a plain edge. The design elements show slight softness of high-point detail. Each side is covered in dusky gray and light reddish-brown patina. NGC ID# 29AG, PCGS# 11720

1856 Half Cent in Copper-Nickel
Judd-177, PR45

- 18206** 1856 Half Cent, Judd-177, Pollock-205, R.5 PR45 NGC. Regular die trials striking for the half cent. Struck in copper-nickel with a plain edge. These pieces were an important metallurgical trial striking that tested the proposed alloy for the Flying Eagle cents which were struck later in this same year. This is one of only two pattern half cents; an honor shared with Judd-155. Apparently the difference in metallurgical composition was not immediately apparent to a great many people; some who spent this coin in mid-19th century America. Even wear is seen over the high points with a notable scratch in the field out from stars 1 and 2.
Ex: FUN Signature (Heritage, 1/2005), lot 10449. NGC ID# 29AV, PCGS# 11777

1858 Flying Eagle Cent in Copper-Nickel
Judd-191, PR64, Reverse of 1859

- 18207** 1858 Flying Eagle Cent, Judd-191, Pollock-233, R.5, PR64 PCGS. Eagle Eye Photo Seal, card not included. Snow-PT14 with five leaf clusters in the wreath. The obverse is from a regular Flying Eagle Small Letters die, while the reverse displays the wreath introduced on the 1859 Indian cent. Struck in copper-nickel with a plain edge. Remarkably well-preserved surfaces. The fields are deeply reflective with noticeable contrast present on each side. The obverse is covered in deep red patina, while the reverse shows the more traditional honey-tan color of copper-nickel with a slight tinge of red patina on that side. NGC ID# 38KC, PCGS# 11840

1858 Flying Eagle Cent in Copper-Nickel
Judd-192, Brightly Reflective PR63

- 18208** 1858 Flying Eagle Cent, Judd-192, Pollock-235, Snow-PT13, R.5, PR63 ANACS. The obverse is the familiar Small Letters 1858 cent. The pattern reverse generally resembles the 1860 regular issue reverse, but there is no shield at the top and the wreath is closed. Struck in copper-nickel with a plain edge. This is a frequently encountered Flying Eagle cent pattern. Seen here, the fields display remarkable depth of reflectivity on each side. Attractive red patina is seen over each side with a dab of yellow on the left portion of the obverse. Fully struck in all areas. NGC ID# 29BC, PCGS# 11842

1858 Flying Eagle Cent in Copper-Nickel
Judd-193, PR64, Ornamental Shield on Reverse

- 18209** 1858 Flying Eagle Cent, Judd-193, Pollock-236, R.5, PR64 NGC. Eagle Eye Photo Seal, no card accompanies. The obverse is the regular issue Small Letters 1858 cent. The reverse resembles the issued 1860 Indian cent, as it displays an oak wreath and ONE CENT with a shield at the top, but the shield is comparatively broad and ornamental. Struck in copper-nickel with a plain edge. This piece has been metallurgically tested and the results are on the insert: 88% copper / 12% nickel, standard copper-nickel coin alloy. For copper-nickel this piece shows remarkably deep color. The obverse is covered with cherry-red color, while the reverse cherry-red and lilac. Deeply mirrored fields. A superior example of this interesting Flying Eagle cent pattern. NGC ID# 29BD, PCGS# 11844

1858 Flying Eagle Cent in Copper-Nickel
Judd-202, PR55, Five-Leaf Clusters

- 18210** 1858 Flying Eagle Cent, Judd-202, Pollock-245, R.5, PR55 NGC. The hook-necked eagle obverse, generally attributed to Longacre, is paired with several reverses during the year, here with ONE CENT in a simple laurel wreath. This variant shows five-leaf clusters on the reverse wreath. Struck in copper-nickel with a plain edge. This specimen somehow entered circulation and subsequently shows light wear and numerous small marks in the fields. An affordable example of this popular pattern cent.
Ex: Long Beach Signature (Heritage, 6/2005), lot 7361. NGC ID# 29BH, PCGS# 11867

1858 Flying Eagle Cent in Copper-Nickel
Judd-202, Scarcer Six-Leaves Clusters

- 18211** 1858 Flying Eagle Cent, Judd-202, Pollock-246, R.5, PR64 NGC. The hook-necked eagle pattern obverse, usually attributed to Longacre, was paired with several reverses during the year. Judd-202 displays ONE CENT in a simple laurel wreath with clusters of either five (Pollock-245) or six (Pollock-246) leaves (seen here). Struck in copper-nickel with a plain edge. Most of each side displays deep blue-gray patina with bright honey-tan color surrounding the lettering and other devices. With the help of a loupe a few tiny contact marks can be seen in the field above the date. NGC ID# 29BH, PCGS# 11867

1858 Hooked-Neck Flying Eagle Cent
Judd-203, PR45

18212 1858 Flying Eagle Cent, Judd-203, Pollock-247, R.5, PR45 NGC. The obverse has a hooked-neck eagle flying left with tall wings. The reverse is similar to that of the issued 1860 cent but there is no shield at 12 o'clock. Struck in copper-nickel with a plain edge. A relatively common pattern, this particular piece made its way into circulation — apparently for several years — before it was noticed and pulled as “something different.” Even wear over each side and original light brown surfaces. NGC ID# 29BJ, PCGS# 11869

1858 Flying Eagle Cent in Copper-Nickel
Judd-203, PR65

18213 1858 Flying Eagle Cent, Judd-203, Pollock-247, R.5, PR65 NGC. The obverse has a hook-necked eagle flying left with tall wings. The reverse has the denomination within a wide oak wreath with an olive sprig and a group of three arrows are wrapped into the bottom of the wreath. Struck in copper-nickel with a plain edge. Nicely struck with splashes of violet patina in the exposed fields and subtle amber highlights.
Ex: Long Beach Signature (Heritage, 6/2005), lot 7362. NGC ID# 29BJ, PCGS# 11869

1858 Flying Eagle Cent in Copper-Nickel
Judd-204, PR64

18214 1858 Flying Eagle Cent, Judd-204, Pollock-248, R.5, PR64 PCGS. Flying Eagle pattern with a hook-necked eagle in flight on the obverse. The reverse has an oak wreath with a broad, ornamented shield at the top. Struck in copper-nickel with a plain edge. Also known in copper. A few minor spots are noticed on the obverse of this needle sharp, but lightly toned example.
Ex: ANA Signature (Heritage, 8/2004), lot 7885. NGC ID# 29BK, PCGS# 11871

1858 Flying Eagle Cent in Copper-Nickel
Judd-206, PR64

18215 1858 Flying Eagle Cent, Judd-206, Pollock-242, R.5, PR64 NGC. Eagle Eye Photo Seal, no card included. Snow-PT16. Slight hub doubling is evident on the reverse with the close E in ONE rehubbbed with an open E. Paquet's Small Eagle obverse is paired with the regular issue Low Leaves reverse. Struck in copper-nickel with a plain edge. The NGC insert indicates this piece was struck in the traditional copper-nickel alloy for coinage: 88% copper / 12% nickel. The bright golden-tan surfaces have taken on a very attractive reddish patina over each side. Bright, reflective fields. NGC ID# 29BM, PCGS# 11877

1858 Indian Cent in Copper-Nickel
Judd-208, Pollock-261, MS61
Centered Date, Six-Leaf Clusters

18216 1858 Indian Cent, Judd-208, Pollock-261, R.7, MS61 ANACS. Snow PT29. A transitional pattern that resembles the designs of the issued 1859 cent but is dated 1858. This is the centered date Pollock variant with six leaf clusters on the wreath. Struck in copper-nickel with a plain edge. This interesting pattern is also one of the few struck in business strike format. Strike definition is strong throughout, and the original tan surfaces have taken on short streaks of red patina over each side, resembling a woodgrain pattern. NGC ID# 29BP, PCGS# 11884

1858 Indian Cent, Design of 1859
Judd-208, Pollock-259, PR63
Centered Date, Five-Leaf Clusters

- 18217** 1858 Indian Cent, Judd-208, Pollock-259, R.1, PR63 NGC. The Indian Head cent as adopted in 1859, with clusters of five leaves on the reverse wreath. This is the Centered Date Pollock variant. Struck in copper-nickel with a plain edge. This is one of the most available patterns and as such is a good entry level piece. The fields are deeply mirrored but somewhat subdued by the layer of rich red patina that covers each side. A few light specks of carbon and minor contact marks explain the grade. NGC ID# 29BP, PCGS# 11885

Transitional 1858 Indian Cent Pattern, PR63
Rare Pollock-254, Snow-PT35 Subvariety

- 18218** 1858 Indian Cent, Judd-208, Pollock-254, PR63 NGC. Snow-PT35, R.7. There are four notable subvarieties of Judd-208; these include each combination of narrow or broad bust point obverses paired with either five or six leaf cluster laurel wreath reverses. The present piece pairs the narrow bust point obverse with a six leaf clusters wreath reverse. Struck in copper-nickel with a plain edge. Snow states, "Rare and popular as the true transitional - The exact style of 1859." This well struck light golden-brown specimen is pleasing despite a few faint slide marks on the neck and cheekbone and a tiny spot within the C in CENT. NGC ID# 29BP, PCGS# 11885

1858 Indian Cent in Copper-Nickel
Judd-208, Pollock-259, PR64
Centered Date, Five-Leaf Clusters

- 18219** 1858 Indian Cent, Judd-208, Pollock-259, R.1, PR64 NGC. An Indian cent pattern with the adopted design of 1859, but dated a year earlier. Struck in copper-nickel with a plain edge. Judd-208 is broken into four Pollock patterns, based upon whether the date is low or centered, and whether the wreath has six or five leaves within each cluster. Pollock-259 has a centered date and five leaf clusters. This near-Gem example has vibrant mint luster and displays only modest reddish patina over each side. Ex: ANA Signature (Heritage, 8/2004), lot 7886. NGC ID# 29BP, PCGS# 11885

1858 Indian Cent Pattern
Judd-208, Pollock-259, PR65
Centered Date, Five-Leaf Clusters

- 18220** 1858 Indian Cent, Judd-208, Pollock-259, R.1, PR65 NGC. Eagle Eye Photo Seal. The Indian Head cent as adopted in 1859, with clusters of five leaves on the reverse wreath. This is the Centered Date Pollock variant. Struck in copper-nickel with a plain edge. The NGC insert shows this piece has undergone metallurgical testing as indicated by the composition stated on the insert: 88% copper / 12% nickel. The original "white" surface of the copper-nickel alloy has now toned over with light, even reddish patina seen across each side. Sharper struck than usually seen. NGC ID# 29BP, PCGS# 11885

1858 Indian Cent Pattern
Judd-211, Pollock-262, PR62
Centered Date Variant

- 18221** 1858 Indian Cent, Judd-211, Pollock-262, R.4, PR62 NGC. The obverse of this popular pattern displays James Longacre's Indian Head motif that appears on the production cent of 1859. The reverse, however, carries a thick oak wreath not unlike the one the Mint would mate with a shield for its 1860 cent production. Struck in copper-nickel with a plain edge. This is the centered date Pollock variant of Judd-211. The reddish-tan surfaces display deep brick-red color in the protected areas over each side that somewhat subdues the overall appearance.
Ex: Long Beach Signature (Heritage, 6/2005), lot 7364. NGC ID# 29BT, PCGS# 11893

1858 Indian Cent Pattern
Judd-211, Pollock-262, PR65
Centered Date Variant

- 18222** 1858 Indian Cent, Judd-211, Pollock-262, R.4, PR65 NGC. The obverse is similar to the issued Indian cent, but is dated 1858. The reverse is similar to the issued 1860 cent reverse, except there is no shield between the ends of the laurel wreath. The centered date, broad bust point variant. The fields are brightly mirrored with even reddish patina over each side. NGC ID# 29BT, PCGS# 11893

1858 Indian Cent With Ornamental Shield
Judd-212, PR63, Centered Date Variant

- 18223** 1858 Indian Cent, Judd-212, Pollock-263, R.4, PR63 NGC. Similar to the regular issue Indian cent but with a broad, ornamental shield at the top of the reverse. This is the centered date variant. Struck in copper-nickel with a plain edge. The surfaces are bright and overlaid by rich olive-lilac and tan patina. A more affordable example of this common pattern cent.
Ex: Portland Signature (Heritage, 3/2004), lot 6636. NGC ID# 29BU, PCGS# 11895

1858 Indian Cent in Copper-Nickel
Judd-212, Pollock-263, PR64
Centered Date Variant

- 18224** 1858 Indian Cent, Judd-212, Pollock-263, R.4, PR64 PCGS. Eagle Eye Photo Seal, no card included. Similar to the Indian cent design as issued in 1860, but with a broad, ornamental shield at the top of the reverse. Struck in copper-nickel with a plain edge. The centered date, broad bust tip Pollock and Snow variant of Judd-212. There are two Pollock variants of the Judd-212; this one is Pollock-263 showing a centered date. The surfaces retain much of the original "whiteness" of the copper-nickel alloy, also showing slight reddish bits of toning here and there. NGC ID# 29BU, PCGS# 11895

1858 Copper-Nickel Indian Cent
Judd-213, Pollock-258, PR64
Centered Date Obverse, Low Leaves Reverse

- 18225** 1858 Indian Cent, Judd-213, Pollock-258, R.5, PR64 PCGS. An Indian Head obverse, similar to that adopted in 1859, is paired with the Flying Eagle cent Agricultural Wreath reverse of 1858. This piece represents the first die pair of this Low Leaves Reverse variant. Struck in copper-nickel with a plain edge. Over a dozen examples are known of this obverse/reverse die pairing. The original tan surfaces are just slightly toned in a reddish hue. Nicely reflective fields and strong definition throughout. NGC ID# 29BV, PCGS# 11897

1858 Indian Cent in Copper-Nickel
Judd-213, Pollock-252, PR64

- 18226** 1858 Indian Cent, Judd-213, Pollock-252, R.5, PR64 NGC. The obverse design is similar to the regular 1859 Indian cent, while the reverse design resembles the 1858 Flying Eagle cent. Judd-213 is broken into four separate issues by Pollock, based upon the position of the wreath tip below the C in CENT and whether the bust tip is rounded or pointed. Pollock-252 is the pointed bust and short wreath tip variant. This attractively mellowed, amber-colored cent displays shallow reflectivity and delicate lilac undertones.
Ex: ANA Signature (Heritage, 8/2004), lot 7887. NGC ID# 29BV, PCGS# 11897

1859 Indian Cent in Copper-Nickel
Reverse of 1860, Judd-228, PR64

- 18227** 1859 Indian Cent, Judd-228, Pollock-272, R.1, PR64 NGC. A popular transitional pattern, dated 1859 but with the shield and wreath reverse design that first appeared on Indian cents the following year. A few examples were also struck in copper. The "white" color seen on this piece makes the composition in this case unmistakable as copper-nickel. The fields are nicely reflective and there are a couple of fingerprints and carbon that prevent an even higher grade. NGC ID# 29C8, PCGS# 11934

1863 Two Cent Pattern in Bronze
Judd-312, PR65 Brown

- 18228** 1863 Two Cents, Judd-312, Pollock-377, R.4, PR65 Brown PCGS. The obverse is similar to the regular issue obverse of 1864, with GOD OUR TRUST on the ribbon above the shield. The reverse shows the denomination 2 CENTS sharply curved in a wreath with the legend UNITED STATES OF AMERICA around. Struck in bronze with a plain edge. A fairly common pattern; the USPatterns.com website notes that examples vary in weight from 76 to 101 grains. Crisply defined on each side, the surfaces are deep brown with a hazy overlay of gray-blue patina.
Ex: Summer FUN Signature (Heritage, 7/2007), lot 2241. NGC ID# 29ER, PCGS# 60467

1863 Billon Postage Currency Ten Cents
Judd-326A, PR65

- 18229** 1863 Ten Cents, Judd-326A, Pollock-394, High R.6, PR65 NGC. During the Civil War, coins were hoarded by both North and South, and this pattern was part of an effort to replenish small change. This problem was eventually solved by fractional currency. The simple design features a shield, arrows, and wreath, not too different from the eventually released two cent piece and Shield nickel. The legends define the issue as postage currency, redeemable in U.S. notes. These dies were stuck in various alloys. Judd-326A was struck with a plain edge in a billon (copper-silver) alloy. Several compositions of copper and silver were tried on this pattern and not all have been metallurgically tested. This piece is deeply toned in shades of blue, green, and gray with brightly reflective fields that display die striations. Two prominent die cracks are easily seen on the left side of the obverse.
Ex: Long Beach Signature (Heritage, 9/2005), lot 4192; ANA Signature (Heritage, 4/2006), lot 891; West Palm Beach Signature (Heritage, 6/2008), lot 1744, where it realized \$3,737.50. NGC ID# 9392, PCGS# 60485

1866 Washington Obverse Five Cent in Nickel
Judd-470, PR55

- 18230** 1866 Five Cents, Judd-470, Pollock-562, Low R.6, PR55 PCGS. A bust of George Washington faces right on the obverse, the legend IN GOD WE TRUST above and the date below. A wreath of laurel on the reverse encloses a large broad numeral 5 with the legend UNITED STATES OF AMERICA around. Struck in nickel with a plain edge. Also struck in bronze and equally as scarce as the nickel strikings with about a dozen pieces known in each metal. The nickel-gray surfaces have taken on a slight golden peripheral color on each side. Nearly abrasion-free. NGC ID# 29KD, PCGS# 60666

**1868 Cent, Struck in Nickel
Judd-605, PR66**

18231 1868 One Cent, Judd-605, Pollock-670, R.5, PR66 PCGS. The design closely resembles the contemporary three cent nickel, but only a single pillar represents the denomination within the laurel wreath. Struck in nickel with a plain edge. This design was struck in nickel, copper, and aluminum. The nickel impressions are by far the most frequently encountered (in aluminum it is unique). The planchet for this piece shows differing degrees of preparation in the Mint. The obverse is bright with nicely reflective fields, while the reverse is less polished with horizontal streaks of granularity across that side. An untoned example. NGC ID# 29UU, PCGS# 60817

18232 1868 Three Cent Nickel, Judd-618, Pollock-687, R.4, PR65 NGC. Similar to the regular issue three cent nickel, but the devices on both sides are set in larger fields. In addition, the Roman numerals on the reverse are smooth and without ribs. Struck in nickel with a plain edge. These were issued in three-piece sets along with the one cent (Judd-608) and five cent (Judd-633). Brilliant throughout and deeply mirrored in the fields with pleasing, problem-free surfaces. NGC ID# 29NA, PCGS# 60834

**1869 Three Cent Nickel in Nickel
Judd-676, PR65 Cameo**

18233 1869 Three Cent Nickel, Judd-676, Pollock-753, R.4, PR65 Cameo PCGS. CAC. Similar to the adopted dies, except the Roman numeral on the reverse lacks ribbing. Two variants are known of this pattern, this is the more available one with normal (short) dentils on the reverse and the wreath slightly low of center (easiest seen by looking at the top of the wreath). Struck in nickel with a plain edge. Brilliant throughout and highly reflective proof mirrors in the fields. NGC ID# 29PV, PCGS# 388660

**1869 Standard Silver Half Dollar
Judd-748, PR63**

18234 1869 Standard Silver Half Dollar, Judd-748, Pollock-831, R.5, PR63 PCGS. Standard Silver design with a bust of Liberty facing right on the obverse. Liberty is wearing a diadem inscribed LIBERTY, the legend is around the border, and the motto IN GOD WE TRUST is on a scroll at the bottom. The reverse exhibits the denomination 50 CENTS within a wreath of oak and laurel. STANDARD SILVER is at the periphery, the date 1869 is below the wreath. Struck in silver with a reeded edge. Nicely mirrored, both sides are mostly brilliant with only slight golden toning present around the rims. NGC ID# 26VS, PCGS# 60977

**1870 Standard Silver Ten Cent in Copper
Judd-846, PR64 Red and Brown**

18235 1870 Standard Silver Ten Cents, Judd-846, Pollock-945, Low R.7, PR64 Red and Brown PCGS. The obverse features a head of Liberty with no stars on the tiara, UNITED STATES OF AMERICA above, and the motto on a scroll below. The reverse has the date and denomination encircled by an open agricultural wreath, with STANDARD above. Struck in copper with a plain edge. The silver strikings are the commonly encountered examples of this pattern, while the copper and aluminum pieces are scarce. Only a half dozen are believed extant of each of these types — in both metals and in reeded edge and plain edge formats. The Red and Brown designation is correct, but what needs to be noted is each side is uniform in color with even mellowing. The reverse is a couple of shades deeper in color than the obverse. Few surface imperfections are seen. NGC ID# 29VN, PCGS# 71090

1870 Standard Silver Quarter in Silver
Judd-919, PR64
 Possibly Ex: Farouk

- 18236** 1870 Standard Silver Quarter Dollar, Judd-919, Pollock-1023, High R.7, PR64 PCGS. The obverse features the bust of Liberty wearing a coronet with LIBERTY inscribed in raised letters. The motto IN GOD WE TRUST is on a scroll below. The reverse has 25 CENTS inside a wreath of oak and laurel leaves with STANDARD SILVER above and 1870 below. Struck in silver with a plain edge. Less than a dozen examples are known of the silver, plain edge variety. Examples were also struck in silver with a reeded edge, as well as copper and aluminum pieces (both reeded and plain edge). At one time, this pattern came with an old-time holder that identified it as an AW-945 and stated it is from the Farouk Collection. The holder is gone now, and we have no definitive proof of this, but the piece was lightly cleaned and King Farouk did employ a conservator for his coins. PCGS# 61163

1870 Standard Silver Half in Silver
Judd-952, Toned PR64

- 18237** 1870 Standard Silver Half Dollar, Judd-952, Pollock-1095, Low R.7, PR64 PCGS. The bust of Liberty faces right on the obverse, with UNITED STATES OF AMERICA around and the motto IN GOD WE TRUST on a scroll below. Liberty's hair is tied in a bun. On the reverse, the denomination 50 / CENTS and date 1870 are in an agricultural wreath of cotton and corn, with the inscription STANDARD above. Struck in silver with a plain edge. As usually seen in the Standard Silver series, the silver strikings are the most frequently encountered. Copper and aluminum pieces were also produced (all in reeded and plain edge format). As such, this would be an excellent opportunity for the collector to acquire an attractive, well-preserved Standard Silver half. Light rose centers are surrounded by sea-green margins. The obverse is several shades lighter than the reverse and displays considerable field reflectivity. NGC ID# 29YL, PCGS# 61198

1882 Liberty Nickel, Struck in Nickel
Judd-1690, PR64

- 18238** 1882 Liberty Head Five Cents, Judd-1690, Pollock-1892, R.5, PR64 PCGS. A popular precursor to the Liberty nickel. Dated 1882 instead of 1883, and the stars are arranged differently relative to the portrait, particularly star 10. The reverse is identical to the issued 1883 No Cents nickel. Struck in nickel with a plain edge. An intricately struck and mark-free cream-gray specimen. A few tiny flecks are noted near star 1 and the date. NGC ID# 2AKC, PCGS# 62095

1884 Eastman Johnson Perforated Cent in Nickel
Judd-1721, PR66

- 18239** 1884 One Cent, Judd-1721, Pollock-1929, R.5, PR66 NGC. Eastman Johnson's "holey" design for the cent with the center perforated with an irregular circumference. These experimental pieces were intended to make small denomination coinage easier to distinguish by the blind, and thereby to "remedy the inconvenience of similarity in our small coin." The obverse bears the legend UNITED STATES OF AMERICA about the upper rim and the date at the bottom. The reverse shows the denomination ONE CENT at the top with an inverted shield and two laurel sprigs below. Struck in nickel with a plain edge. Although struck in 1884, this design dates back to the 1870s. Approximately two dozen of these pieces are known today in nickel, and the holes are slightly irregular on all we have seen, suggesting they were hand-cut. This is a lovely, bright, lustrous example that is still mostly untuned. One tiny green spot is detected at the reverse border at 3 o'clock. Ex: ANA Signature (Heritage, 8/2004), lot 8025. NGC ID# 2AL9, PCGS# 62150

1884 Annular Cent in Aluminum
Judd-1722, PR65

18240 1884 One Cent, Judd-1722, Pollock-1930, Low R.7, PR65 NGC. CAC. Eastman Johnson's annular design for the cent with an irregular hole in the center. The statutory legends exclude LIBERTY and IN GOD WE TRUST. The lower reverse has an inverted Federal shield and two laurel branches. Struck in aluminum with a plain edge. Also struck in nickel and one unique piece struck in white metal. The hole was hand-cut in these pieces, and that is immediately apparent on this example. The hole is slightly oval-shaped and irregularly cut. Bright, unoxidized surfaces with significant reflectivity in the fields. NGC ID# 2ALA, PCGS# 62151

1896 Federal Shield Cent
Judd-1767, Proof Details

18241 1896 One Cent, Judd-1767, Pollock-1982, Low R.7 — Plated — NCS. Impaired Proof. The obverse has a scroll reading LIBERTY across a shield with thirteen stripes. Behind are two crossed poles, topped by an eagle and a liberty cap. E PLURIBUS UNUM is above, 1896 is below. The reverse displays ONE CENT within a curved olive sprig with UNITED STATES OF AMERICA around. Both sides have beaded borders. Struck in nickel alloy or German silver with a plain edge. Each side has an unnaturally bright sheen from plating. NGC ID# 2AM5, PCGS# 62220

1896 Five Cent Aluminum Pattern, PR64
Judd-1772, Unusual Aluminum Alloy

18242 1896 Five Cents, Judd-1772, Pollock-1989, High R.6, PR64 PCGS. This 1896 pattern design features a large shield in the center of the obverse with crossed poles behind and a large ribbon across the center of the shield. The reverse has a large numeral 5 with CENTS in small letters below, surrounded by a curved olive sprig. Struck in aluminum with a plain edge. Pollock lists four different alloys for this aluminum striking. However, the composition of this piece is unlisted. It has been metallurgically tested by PCGS and the percentage of aluminum is significantly lower than the four compositions listed in Pollock. The insert lists this piece as: 88% aluminum, 2.7% nickel, 2.5% copper, and 2.2% something else (apparently they ran out of room on the insert). The surfaces are bright as would be expected from an aluminum striking with nicely reflective fields and no oxidation. Ex: ANA Signature (Heritage, 8/2007), lot 2772. NGC ID# 2AMD, PCGS# 62226

(1979) SBA Dollar Experimental Striking
Judd-2175, MS66

18243 (1979) Judd-2175, Pollock-2090, R.6, MS66 PCGS. This was an experimental piece struck by the Mint in preparation for the upcoming Susan B. Anthony dollars. Both obverse and reverse has 11 sides, as did the SBA dollars, and these were produced to give to vending machine manufacturers. Struck in clad cupro-nickel with a reeded edge. Probably a dozen or more pieces are known today. Survivors of this experimental striking are rare and this is the first we remember having handled. The surfaces show circular lathe-turning lines on each side, and the centers are slightly raised. Essentially untoned. NGC ID# 26XB, PCGS# 62301

BETTS MEDAL

20822 1773 Lord Chatham (William Pitt the Elder), Betts-522, MS63 Brown PCGS. Copper.

WASHINGTONIA

20823 (1797) Sansom Medal — 1859 Restrike, Baker-72A, Musante GW-59, J-PR-1b, SP64 PCGS. Bronze, plain edge, 41 mm.

20824 (1861) George Washington, Time Increases His Fame, J-PR-27b, Baker-91A, Musante GW-442, MS64 NGC. Silver, plain edge, 27 mm.

20825 Undated George Washington, Time Increases His Fame, Baker-91B, J-PR-27c, Musante GW-442, MS65 Brown NGC. Copper, plain edge, 28 mm.

20826 (c.1860) Headquarters at Newburg, No. 10 - 2nd Obverse, Baker-194A, Musante GW-497, MS66 Red and Brown Prooflike NGC. Copper, plain edge, 28 mm.

20827 1861-Dated George Washington, Oath of Allegiance, J-CM-2c, Baker-279A, Musante GW-476, MS64 Brown NGC. Copper, plain edge, 30 mm.

20828 1891 Washington Monument Dedication, HK-763, Baker N-324, MS63 NGC. Bronze, 38 mm.

20829 1859-Dated Commencement of Cabinet, J-MT-22c, Baker-325B, Musante GW-240, MS64 Brown NGC. Copper, plain edge, 21 mm.

20830 1860 Mint Cabinet Medal, Baker-326A, Julian MT-23, Musante GW-241, MS62 NGC. Bronze, 60 mm, plain edge.

20831 1887 International Medical Congress Medal, Baker F-378, Musante GW-1038 — Mounted — NGC Details. Unc. Bronze, 76 mm, plain edge.

20832 1876 Independence Hall Dollar, U.S. Centennial Exposition, HK-41, Baker-392B, Musante GW-908, R.6, MS61 Prooflike NGC. White metal, 38 mm.

20833 1876 Danish Medal, International Exhibition, Philadelphia, PA, Baker-426A, MS65 Brown NGC. Bronze, 53 mm.

20834 1876 Battle of Lake Champlain, Lovett's Battles of 1776, HK-104, Baker-444B, Musante GW-888, R.5, MS62 Deep Prooflike NGC. White metal, 34 mm.

20835 1878 Valley Forge Centennial, HK-137, Baker-449A, J-CM-48, Musante GW-959, MS63 Brown NGC. Red bronze, plain edge, 41 mm.

20836 1899 Masonic Fraternity, Centennial of Death, Baker-1831A, Musante GW-1021, MS65 Deep Prooflike NGC. White metal, plain edge, 32 mm.

LINCOLN

20837 1865-Dated Lincoln - Martyr to Liberty Medal, Oval, 65 Pearls, K-279, Cunningham-9-600B, MS64 NGC. Brass, 27x24 mm.

20838 1927 Abraham Lincoln Token, Thomas Elder Issue, DeLorey-48, MS62 PCGS. Gold.

U.S. PRESIDENTS & STATESMEN

20839 (1864) Maj. General McClellan Campaign Medal, DeWitt-GMcC-1864-8, MS64 NGC. Silver, 34 mm.

U.S. MINT MEDAL

20840 (1860-74) State Department Medal, J-LS-1, MS66 Brown NGC. 67 mm.

SO-CALLED DOLLARS

20841 1854 Crystal Palace — Type 3, HK-8, R.6, MS62 PCGS. White metal.

20842 1876 U.S. Centennial Exposition Nevada Dollar, HK-19, Julian CM-36a, R.5, AU53 NGC. Silver, plain edge.

20843 1876 U.S. Centennial Exposition Official Medal, HK-20, Julian CM-10a, R.4, MS62 NGC. Silver, 38 mm.

- 20844** 1876 Centennial Foundation So-Called Dollar, U.S. Centennial Exposition, HK-69, R.6, MS61 Prooflike NGC. Gilt copper.
- 20845** 1892 Liberty Head High Relief Medal, HK-222, Eglit-51, R.5, PR65 Deep Prooflike NGC. Aluminum.
- 20846** 1892 World's Columbian Expo, Saint-Gaudens Dollar, HK-223, Eglit-19, R.5, MS63 Brown. Copper, 38 mm.
- 20847** 1902 Wells Fargo & Co. Semicentennial, Silver, HK-296, R.5, AU50 NGC.
- 20848** 1904 Louisiana Purchase Expo Souvenir Medal, HK-304, R.3, MS66 NGC. Gilt, 33 mm.
- 20849** 1904 Louisiana Purchase Admission #27512, HK-306, R.4, MS64 Prooflike NGC. Brass. Ex: Jeff Shevlin Collection.
- 20850** 1905 U.S. Government Building, Lewis and Clark Expo, HK-331A, R.5, MS63 Deep Prooflike NGC. Gilt bronze, reeded edge, 34 mm.
- 20851** 1914 Panama Canal Comp., HK-398, R.4, MS63 NGC. Bronze. #8425.
- 20852** 1915 Panama-Pacific Exposition Official Medal, Silver, HK-399, R.5, MS65 PCGS. 38 mm, plain edge. Beautiful luster, lovely champagne toning with lavender rims.
- 20853** 1915 C.G. Brinker, HK-424, R.6, MS64 NGC. Gilt bronze. Ex: Jeff Shevlin Collection.
- 20854** 1917 Vet. Corps of Artillery, HK-447, R.7, MS63 Prooflike NGC. Aluminum.
- 20855** 1948 Gold Discovery Centennial, HK-497, R.4, MS65 NGC. Bronze, gold plated, 40 mm. Ex: Jeff Shevlin Collection.
- 20856** 1900 Bryan Dollar, Gorham Mfg. Co., HK-783, Zerbe-10, R.6, MS61 PCGS. Silver, reeded edge, 38 mm.
- 20857** 1933 Montana Dollar, HK-820, R.5, AU50 PCGS. Silver, 40 mm.
- 20858** 1933 Century of Progress, Helena, Montana, Silver, HK-820, R.5, MS65 NGC. 40 mm.
- 20859** (1861-65) Aaron White Satirical Dollar, HK-829, R.6, MS63 Brown PCGS. Copper, plain edge, 35 mm.
- 20860** (1890s) Whipple Dollar, So-Called Dollar, HK-832, R.5, MS63 NGC. Gilt bronze.
- 20861** (1897) Bickford Dollar, HK-835, R.5, MS66 NGC. Aluminum, brass center.

COUNTERSTAMPS

- 20862** (1848-55) New York, NY Counterstamp, EBLING'S / COLUMBIAN / GARDEN, Brunk E-59, Rulau M-NY-165B, AG3 NGC. Counterstamped on a 1797 silver 2 reales piece. Separate punches "P,M,S," may or may not be related to the initial Ebling counterstamp, which reads EBLING'S / COLUMBIAN / GARDEN / 200 / BOWERY / N.Y. in 6 lines. A classic New York counterstamp issued by Joseph E. Ebling, a confectioner, New York politician, and wheeler/dealer in the 1840s and 1850s.
- 20863** (1874) Buffalo, NY Counterstamp, SAGE'S CANDY COIN, Brunk S-86, Rulau R-NY-BF-18, XF40 NGC. Counterstamped on a sharp 1874 Arrows quarter. A popular but enigmatic counterstamp, the issuer is unconfirmed. Recent research by noted counterstamp authority Bill Groom draws a link between the issuer of TRY COREY'S OINTMENT (believed to be Dr. Medad S. Corey) and the SAGE'S CANDY COIN marks by comparing the common letters between the two punches. They appear to come from the same maker.
- 20864** (1853-54) Syracuse, NY Counterstamp, STONE & BALL, Brunk S-1023, Rulau R-NY-1027G, Good 6 NGC. Incuse Type 1 counterstamp on three lines, rather awkwardly impressed on the center of a 1787 silver 2 reales piece. The first line, STONE & BALL, is slightly overstacked by the 2-line second punch, SYRACUSE / N.Y. Seymour Stone and Calvin S. Ball sold silverware, jewelry, and repaired clocks. They were prolific issuers of counterstamped coins. The favored incuse punch soon broke at the second L (as shown on this example), with the first L breaking at a later time.
- 20865** (1848-55) New York, NY Counterstamp, Unlisted C.C. TRACY / SAW FILER Variant, Brunk T-384, Rulau M-NY-2073A, AG3 NGC. Counterstamped on a 17?? silver 2 reales host coin. Caleb C. Tracy issued two previously known formats for his counterstamps, each including the C.C. TRACY name as the first line of his 3 or 4-line marks. This example without his name (the word THE is substituted) is a new variant, unknown to us until now. The other three lines of the counterstamp match traditional C.C. TRACY marks.

HARD TIMES TOKENS

- 20866** 1837 Half Cent Worth of Pure Copper, Low-49, HT-73, R.2, AU58 NGC. Copper, plain edge, 23.5 mm.
- 20867** 1833 Robinson's Jones & Co., Low-76, HT-153, R.6, MS64 Brown PCGS. Copper.
- 20868** 1837 H. Crossman, New York, NY, Low-113, HT-244, R.1, MS63 Brown NGC. Copper, plain edge, 28.5 mm.

U.S. MERCHANT TOKENS (1845-1860)

- 20869** 1861 Alfred S. Robinson, Hartford, CT, Rulau-CT-HA-14, Miller-Conn-9, W-15005 (formerly Fuld-210A-1B), MS63 NGC. Brass, plain edge, 28 mm. Ex: Alan Bleiviss Collection.
- 20870** (1860s) Alfred S. Robinson, Hartford, CT, Rulau-CT-HA-19, MS63 NGC. White metal, 35 mm, plain edge.
- 20871** 1860 John K. Curtis, New York, NY, Miller-NY-175, MS63 NGC. Silver, reeded edge, 31 mm.
- 20872** 1859 John K. Curtis, New York, NY, Miller-NY-180, MS64 Brown. Copper, reeded edge, 31 mm.
- 20873** 1859 John K. Curtis, New York, NY, Miller-NY-181, MS63 NGC. Brass, reeded edge, 31 mm.
- 20874** (1861) John K. Curtis, New York, NY, Miller-NY-189, MS64 Brown NGC. Copper, reeded edge, 31 mm.
- 20875** Undated WM. H. Richardson, New York, NY, Miller-NY-657, MS65 NGC. Brass, plain edge, 24 mm.
- 20876** 1860 Smith & Hartmann; Patchen, New York, NY, Miller-NY-820C, MS63 Prooflike NGC. Brass, reeded edge, 29 mm.
- 20877** 1860 Edward Cogan Coin Dealer, Philadelphia, PA, Miller-PA-90B, MS62 NGC. Brass, reeded edge, 21 mm.
- 20878** (c.1860) W. Idler, Coin Dealer, Philadelphia, PA, Miller-PA-222A, MS65 Red and Brown NGC. Copper, plain edge, 20 mm.

- 20879** (1860s) William Idler, Coin Dealer, Philadelphia, PA, Miller-PA-222A, MS66 Brown Prooflike NGC. Copper, plain edge, 20 mm.
- 20880** (c.1860) W. Idler, Coin Dealer, Philadelphia, PA, Miller-PA-228, MS64 NGC. Brass, reeded edge, 20 mm.

20881 (1860) W. Idler, Coin Dealer, Philadelphia, PA, Miller-PA-228H, MS62 NGC. Brass, reeded edge, 20 mm.

20882 (1859) R. Lovett Jr., Philadelphia, PA, Miller-PA-350, MS64 NGC. Brass, plain edge, 15 mm.

CIVIL WAR TOKEN

20883 (1861-65) J.A. Garman Sutler Token, PA, S-54-10Bb, X Punched After 10, R.7, XF40 NGC. Brass.

WORLD TOKEN

20884 (1790s) Middlesex Copper Halfpenny Token, D&H-1037, Payable in Dublin, AU55 NGC.

WORLD MEDALS

20885 1909 Thomas L. Elder Piker's Peak Satirical Token, DeLorey-70, MS62 PCGS. Aluminum.

20886 (1742) Great Britain Spanish Galleys Destroyed Medal, Duke Argyle & Sir Robert, ML-568-203, AU55 NGC. Copper, 37 mm.

CASINO AND GAMING TOKENS

MISCELLANEOUS

20897 (1906) Uncancelled Steel Die, Schuylkill Navy Regatta. Most likely the die for the drop of a hanging badge or medal, although possibly an embossing die for a medallic seal to be affixed to an award certificate. The Schuylkill Navy rowing team was active at the turn of the century in international as well as domestic rowing events and competitions, many of them held on the Schuylkill River. The die measures 2" in diameter and has a shaft of 2-1/4", in excellent condition. It weighs 2 lbs., made by William Jessop & Sons, a New York die maker and tool steel manufacturer.

20898 1877-S "Box Dollar," Uncertified. An "opium dollar," or "box dollar," created by hollowing out one coin and planing off another to make two hinged halves that fit together tightly. Pressing on the reverse dentils at about 12 o'clock and then pressing or pulling the lid downward opens the piece. The inside shows shimmering swirls created by the hollowing machine, while the exterior is slate-gray with mild wear. A few peripheral pinscratches are seen on the reverse. The internal mica is missing. Ex: Coin Galleries (4/2007), lot 7094.

WESTERN SOUVENIR GOLD

20899 1909 Alaska Gold Round, 1 DWT, MS65 NGC. HK-360, AMRD-3, R.3, Die State 4. Alaska-Yukon-Pacific Gold. Hart's Coins of the West. Sharply struck head. Die Varieties listed at MEHartGold.com.

MINT SETS

20900 1947 Double Mint Set, Uncertified. The contains 28 coins, including two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1947 (the San Francisco Mint did not strike half dollars that year). The coins are housed in original cardboard holders and have light to moderate toning. Includes the original kraft envelope. (Total: 28 coins)

20901 1947 Double Mint Set, Uncertified. The contains 28 coins, including two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1947 (the San Francisco Mint did not strike half dollars that year). The coins are housed in original cardboard holders and have light to moderate toning. Includes the original kraft envelope. (Total: 28 coins)

20902 1947 Double Mint Set, Uncertified. The set contains 28 coins, including two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1947 (the San Francisco Mint did not strike half dollars that year). The coins are housed in original cardboard holders with light to moderate toning. Includes the original Treasury envelope. (Total: 28 coins)

20903 1948 Double Mint Set, Uncertified. The set contains 28 coins, including two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1948 (the San Francisco Mint did not strike half dollars that year). The coins are housed in original cardboard holders with light to moderate toning. Includes the outer kraft envelope. (Total: 28 coins)

20904 1948 Double Mint Set, Uncertified. The set contains 28 coins, including two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1948 (the San Francisco Mint did not strike half dollars that year). The coins are housed in original cardboard holders with light to moderate toning. Includes the outer kraft envelope but not the mailing envelope. (Total: 28 coins)

20905 1948 Double Mint Set, Uncertified.

The set contains 28 coins, including two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1948 (the San Francisco Mint did not strike half dollars that year). The coins are housed in original cardboard holders with primarily light toning. Includes the original outer kraft envelope. (Total: 28 coins)

20906 1949 Double Mint Set, Uncertified.

The contains 28 coins, including two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1949 (the San Francisco Mint did not strike quarters that year). The coins are housed in original cardboard holders and have light to moderate toning. Includes the original kraft envelope. (Total: 28 coins)

20907 1952 Double Mint Set, Uncertified.

The set contains 30 coins, including two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1952. The coins are housed in original cardboard holders and have light to moderate toning. Includes the original kraft envelope. (Total: 30 coins)

20908 (2) 1953 Double Mint Sets, Uncertified.

Each set contains 30 coins, including two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1953. The coins are housed in original cardboard holders and have light to moderate toning. Includes the original kraft envelope for each set. (Total: 60 coins)

20909 Lot of Four 1954-1958 Double Mint Sets, Uncertified.

Includes one 1954 set and three 1958 sets, for a total of 90 coins, or two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1954 and 1958 when the sets were issued. The coins exhibit light to moderate toning and are housed in original cardboard holders with the outer kraft envelopes. (Total: 90 coins)

20910 Lot of Five 1954-1958 Double Mint Sets, Uncertified.

Includes a total of 110 coins, or two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints each year from 1954 to 1958. The coins exhibit light to moderate toning and are housed in original cardboard holders with outer kraft envelopes. (Total: 110 coins)

20911 Lot of Five 1954-1958 Double Mint Sets, Uncertified.

Includes a total of 110 coins, or two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints each year from 1954 to 1958. The coins exhibit light to moderate toning and are housed in original cardboard holders with outer kraft envelopes. (Total: 110 coins)

20912 Lot of Five 1954-1958 Double Mint Sets, Uncertified.

Includes a total of 110 coins, or two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints each year from 1954 to 1958. The coins exhibit light to moderate toning and are housed in original cardboard holders with outer kraft envelopes. (Total: 110 coins)

20913 Lot of Nine Partial Double Mint Sets, Uncertified.

Includes: **1947**, missing all four halves, one Denver quarter, and both San Francisco quarters; **1947**, missing all four halves, both Philadelphia nickels, and one P-mint quarter; **1948**, missing all San Francisco coins, one Denver quarter, both Philadelphia halves, and one P-mint dime and quarter; **1951**, missing both S-mint quarters and halves, one Denver half, one Philadelphia half, and both P-mint nickels; **1952**, missing the D- and S-mint halves, both S-mint quarters, and one D-mint quarter; **1953**, missing one half dollar from each mint and a San Francisco quarter; **1956**, missing both Philadelphia halves; **1957**, missing both Philadelphia halves and quarters, one P-mint dime, one D-mint half, and one D-mint dime; **1958**, missing the Philadelphia halves, one P-mint quarter, and all 10 Denver coins. The coins exhibit light to moderate toning and are housed in original cardboard holders. (Total: 164 coins)

PROOF SETS

20914 Lot of Four 1951-1954 Proof Sets, Uncertified.

Includes 20 coins, comprised of four consecutively dated five-piece proof sets from 1951-1954. The sets are housed in original cardboard boxes and tissue paper as issued from the Mint. Most are brilliant, although a few show light toning. (Total: 20 coins)

End of Auction

Terms and Conditions of Auction

Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., Currency Auctions of America, Inc., Heritage Auctions (HK) Limited, or Heritage Auctions – Europe Cooperatief U.A. as identified with the applicable licensing information on the title page of the catalog or on the H.A.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at H.A.com supersede those in the printed catalog.

Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:

- Fifteen percent (15%) on Domain Names & Intellectual Property Auction lots;
- Nineteen and one-half percent (19.5%) on Comic and Movie Poster Auction lots;
- Twenty percent (20%) on Currency, Sports Collectibles, US Coin, and World & Ancient Coin Auction lots;
- Twenty-two percent (22%) on Wine Auction lots;
- For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$250,000, plus twenty percent (20%) of any amount between \$250,000 and \$2,500,000, plus twelve percent (12%) of any amount over \$2,500,000.
- Minimum Buyer's Premium per lot is \$19, except for Sports Collectibles lots wherein the Buyer's Premium is \$14 per lot.

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of H.A.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: H.A.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

8. Bids in Signature, Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on H.A.com. Review at <http://www.ha.com/c/ref/web-tips.zx#biddingTutorial>.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments

(see HA.com/c/ref/web-tips.zx#guidelines-increments).

Current Bid	Bid Increment	Current Bid	Bid Increment
< \$10.....	\$1	\$10,000 - \$19,999.....	\$1,000
\$10 - \$49.....	\$2	\$20,000 - \$49,999.....	\$2,000
\$50 - \$99.....	\$5	\$50,000 - \$99,999.....	\$5,000
\$100 - \$199.....	\$10	\$100,000 - \$199,999.....	\$10,000
\$200 - \$499.....	\$20	\$200,000 - \$499,999.....	\$20,000
\$500 - \$999.....	\$50	\$500,000 - \$999,999.....	\$25,000
\$1,000 - \$1,999.....	\$100	\$1,000,000 - \$1,999,999.....	\$50,000
\$2,000 - \$4,999.....	\$200	\$2,000,000 - \$9,999,999.....	\$100,000
\$5,000 - \$9,999.....	\$500	>= \$10,000,000.....	\$200,000

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's

Premium and Seller's Commissions on such lot.

14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise. Regardless that bids are made on a Property, Auctioneer reserves the right to withdraw the Properties, or any part of the Properties, from the Auction at any time prior to the opening of any lot containing such Properties for sale by the auctioneer (crier), or in the case of Internet-only auctions when the bid opens for either live bidding online or the beginning of the extended period, if any.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40–60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%–60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the H.A.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer. Alternatively, Auctioneer at its sole option, may charge a twenty (20%) fee based on the amount of the purchase. In either case the Auctioneer may offset amount of its claim against any monies owing to the Bidder or secure its claim against any of the Bidder's properties held by the Auctioneer..
25. Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.

Terms and Conditions of Auction

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery; Shipping; and Handling Charges:

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.zx for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.

33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.

34. All shipping charges will be borne by the successful Bidder. On all shipments in which Heritage charges the Delivery, Handling, and Transit Fee *infra*, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file, this is the "Secure Location". A common carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature. Auctioneer shall arrange, select, and engage common carriers and other transportation vendors on your behalf. Transit services are subject to the following terms and conditions:

a. **Scope of Transit Services:** Your properties for transit will be insured under one or more insurance policies issued by an authorized broker to Auctioneer. The properties will be insured for the invoice price of the properties (hammer price plus Buyer's Premium) ("Insured Value"). For each shipment, you will provide a Secure Location to which the items will be delivered. NOTICE: **Auctioneer is neither an insurance company nor a common carrier of any type.**

b. **Auctioneer's Compensation for Transit Services:** Auctioneer will provide transit services to Buyer for ¼ of 1% of the Insured Value, plus packaging and handling fees and fees for the common carrier (collectively, "Delivery, Handling, and Transit Fee"). You agree to pay Delivery, Handling, and Transit Fee and comply with all terms of payment as set forth in paragraphs 23 to 31 of this Agreement.

c. **Auctioneer's Limitation of Liability for Transit Services:** You understand and agree that Auctioneer's liability for loss of or damage to the items, if any, ends when the items have been delivered to the Secure Location, and Auctioneer has received evidence of delivery. If you claim that any property has sustained loss or damage during transit, you must report any such loss or damage to Auctioneer within seventy-two (72) hours of the delivery date. Your recovery for loss of or damage to any property is limited to the lesser of actual cash value of the property or the Insured Value. **Under no circumstances is Auctioneer liable for consequential or punitive damages.**

35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.

36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) Brazilian rosewood, ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay, failure, or incapacity to obtain any such license or permit does not relieve the buyer of timely payment, or afford them the capacity to void their purchase or payment. For further information, please contact Ron Brackemyre at 800-872-6467 ext. 1312.

36B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.

36C. Auctioneer shall not be liable for any loss caused by or resulting from:

- Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
- Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles

37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions. .

39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.

40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.

41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.

42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opines, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.

44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or consequential, and expressly

disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.

46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.

47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.

48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and/or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administrated by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.

49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.

50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid of arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.

51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.

53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.

54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California: Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City: This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site. All lots are subject to the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas: In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Terms and Conditions of Auction

Additional Terms & Conditions:

COINS & CURRENCY

COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcg.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be

liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reclassified to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

COINS and CURRENCY TERM O: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions call the Credit department at 877-HERITAGE (437-4824) or e-mail: CreditDept@HA.com

Notice as to an Auction in New York City

This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site.

All lots are subject to: the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 6-8-2016

How to Ship Your Purchases

Agent Shipping Release Authorization form

Heritage Auctions requires "Third Party Shipping" for certain items in this auction not picked up in person by the buyer. It shall be the responsibility of the successful bidder to arrange pick up and shipping through a third party; as to such items auctioneer shall have no liability.

Steps to follow:

1. Select a shipping company from the list below or a company of your choosing which will remain on file and in effect until you advise otherwise in writing.
2. Complete, sign, and return an Agent Shipping Release Authorization form to Heritage (this form will automatically be emailed to you along with your winning bid(s) notice or may be obtained by calling Client Services at 866-835-3243). The completed form may be faxed to 214-409-1425.
3. Heritage Auctions' shipping department will coordinate with the shipping company you have selected to pick up your purchases.

Shippers that Heritage has used are listed below. However, you are not obligated to choose from the following and may provide Heritage with information of your preferred shipper.

Navis Pack & Ship
11009 Shady Trail
Dallas, TX 75229
Ph: 972-870-1212
Fax: 214-409-9001
TX1062@GoNavis.com

The Packing & Moving Center
915 W Mayfield Road Suite 103
Arlington, TX 76014
Ph: 817-795-1999
Fax: 214-409-9000
thepackman@sbcglobal.net

Craters & Freighters
2220 Merritt Drive, Suite 200
Garland, TX 75041
Ph: 972-840-8147
Fax: 214-780-5674
dallas@cratersandfreighters.com

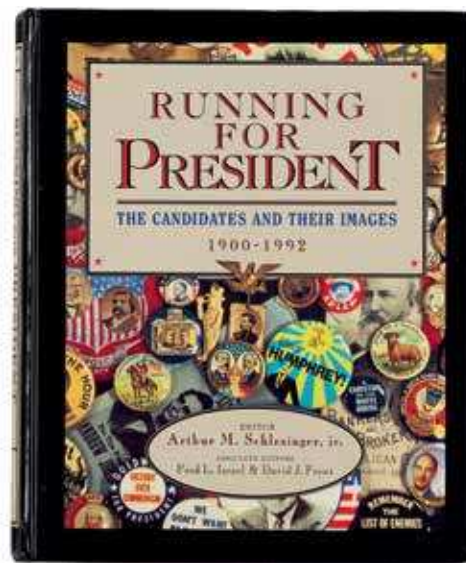

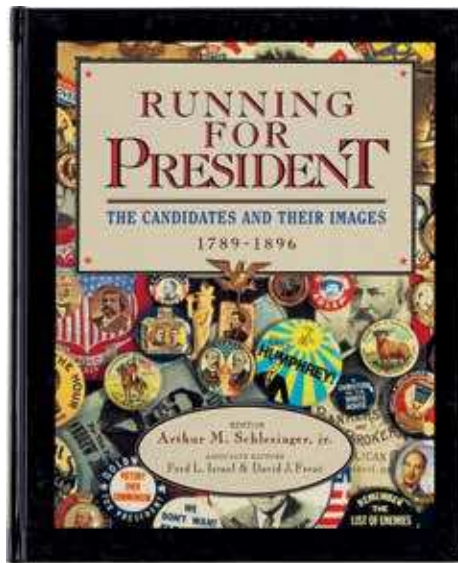

- It is the Third Party Shipper's responsibility to pack (or crate) and ship (or freight) your purchase to you. Please make all payment arrangements for shipping with your Shipper of choice.
- Any questions concerning Third Party Shipping can be addressed through our Client Services Department at 1-866-835-3243.
- Successful bidders are advised that pick-up or shipping arrangements should be made within ten (10) days of the auction or they may be subject to storage fees as stated in Heritage's Terms & Conditions of Auction, item 35.

NOTICE of CITES COMPLIANCE; When purchasing items made from protected species.

Any property made of or incorporating endangered or protected species or wildlife may have import and export restrictions established by the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). These items are not available to ship Internationally or in some cases, domestically. By placing a bid the bidder acknowledges that he is aware of the restriction and takes responsibility in obtaining and paying for any license or permits relevant to delivery of the product. Lots containing potentially regulated wildlife material are noted in the description as a convenience to our clients. Heritage Auctions does not accept liability for errors or for failure to mark lots containing protected or regulated species.

RUNNING FOR PRESIDENT:

The Candidates and Their Images

This landmark set of two volumes, published by Simon & Schuster in 1994, is perhaps the finest available introduction to American politics and the wide range of items used to promote candidates over the years. Edited by renowned historian Arthur M. Schlesinger, Jr. with the assistance of political history professor Fred L. Israel and Collector David Frent, these massive, coffee table-type books include essays on each presidential election campaign by various respected scholars. They're profusely illustrated with dazzling color images of items from the **David and Janice Frent Collection**.

Heritage has been able to secure a limited number of sets to offer to our clients. The original issue price was \$200, but we are able to offer these at just

\$125 postpaid.

These beautiful volumes are a must for aspiring and seasoned collectors alike. The supply is very limited, so order yours today!

Go to HA.com and click the "Order our Auction Catalogs" link. Then go to **Special Books, hard bound editions and more**. Select *Running for President: The Candidates and Their Images* from the menu. You may also email catalogorders@HA.com or call Customer Service at 866-835-3243 to order.
